\section*{JURY DUTY IN THE CITY OF NEW YORK.}

To be qualificd to serve, a person must be not less than 21 nor more than 70 years of age, and he must be a malc citizen of the United States, and a resident of the County of New York; and he is a resident within the meaning of the Jury law if he dwells or lodges here the greater part of the time between the first day of October and the last day
of June. He must be the owner, in his own right, of real or personal property of the value of \(\$ 250\); or the husband of a woman who is the owner, in her own right, of real or personal property of that value He must also be in the possession of his natural faculties, and not be infirm or decreplt; intelligent, of good character, and able to read and write the English language understandlngly.

\section*{THE FOLLOWING ARE EXEMPT FROM JURY DUTY.}

A clergyman, mlnister of any religion officiating as such and not followlng any other calling. A practising physician, surgeon, surgeon-dentist, or veterinary surgeon not following any other calllng, and a licensed pharmaceutlst or pharmacist, or a duly licensed embalmer, while actually engaged in his profession as a means of livelihood. A duly registered optometrist actually engaged in his profession as a means of livelihood. An attorney or counsellor-at-law regularly engaged in the practice of law as a means of livelihood. A professor or teacher in a college, academy, or public school, not following any other calling. Editor, editorial writer, or reporter of a dally newspaper or press association regularly employed as such and not following any other vocation. The holder of an office under the United States, or the State, or City or County of New York, whose offcial duties, at
the time, prevent his attendance as a juror. A consul of a foreign nation. A captain, engineer, or other officer actually employed upon a vessel making regular trips; a licensed pilot, actually following that calling. A superintendent, conductor, or engineer employed by a railroad company other than a street railroad company, or a telegraph opcrator employed by a press association or telegraph company who is actually doing duty in an office or along the railroad or telcgraph line of the company or association by which he is employcd. Honorably discharged firemen. Active and honorably discharged militiamen and active members of the Old Guard. A duly licensed engineer of steam boilers actually employed as such. Inspectors, poll clerks, and ballot clerks, or a person who is physically incapable. Grand, Sheriff's, Special, and Municipal Court Jurors.
The law of the County of the Bronx, recently created, ls the same as Manhattan.

Women's University (1891), 106 E. 52d St.; Pres., Mrs. Wm. L. Colt.
Yale of N. Y. C. (1897), 50 Vand 3 rbit Ave.; Pres., Geo. T. Adee; Sec., Livingston Piatt.

\section*{BANKRUPT'S LIABILITIES \$304,840,332,912,685.}

Owing more money than there is in the worid, outside of Russia, George Thomas Jones, of San José, Cai., filed a bankruptcy petitlon at San Franclsco, Sept., 29, 1922. Jones said the amount due his principal creditor was \(\$ 304,840,332,912,685.16\).
and was a judgment against him by the superior Court of Santa Clara County.

In 1897 he borrowed \(\$ 100\) from Henry B. Stuart at 10 pcr cent interest compounded monthiy. Recently Stuart brought an action to recover. Mathematical experts finally figured it up. The court heid against Jones.

\section*{MAYORS OF THE CITY OF NEW YORK.}

Before the Revolution the Mayor was appointed by the Governor of the Province; and from 1784
to 1820 by the Appointling Board of the State of to 1820 by the Appointlng Board of the State of
member. From 1820 to the amendment of the Chirter, in 1830. the Mayor was appolnted by the Common Councli. In 1898 the term of the first Mayor of Greater New York (Van,Wyck) began

\section*{POST OFFICES IN NEW YORK CITY.}

The New York General Post Office, with Jurisdiction over Manhattan and the Bronx, covers the two city blocks, 31st Street to 33rd Street, Eighth Avenue to Ninth Avenue. The main entrance is on Eighth Avenue. Postmaster-Edward M. Morgan. Asststant Postmaster-John J. Kleley. Secretary to the Postmaster-A. H. Harbinson. In this building are located the Postal Inspectors, Rallway Mall Service, and all the general offices.

The old General Post Office, now called the Citv Hall Station, covers the trlangular block bounded by Broadway, Park Row and Mall Street, abutting City Hall Park.
The Grand Central Statlon, Lexington Avenue and 45 th Street, handies the mall over the N. Y.

Central and New Haven Raliroads, in addition to local business in that district

The Foreign Station, at West and Morton Streets handles the ocean mails

The only other large general station is on Varlck St., between Beach and Laight Streets,
Branch Offices-Pelham Branch, Pelham, N. Y.; Pelham Manor Branch, Pelham Manor, N. Y.

The Brooklyn General Post Office covers the block bounded by Adams and Washington, Tlilary and Johnson Streets. Postmaster-Walter C. Burton. Assistant Postmaster-Peter J. Cleary.

There were, as of Nov. 1, 1922, in Manhattan and the Bronx, 3,856 letter carriers. The New York Post Office does a business of approximately \(\$ 54,-\) 000,000 a year

FIRST STREET RAILWAY IN N. Y. CITY.

The first passenger street traek in the world was laid in New York City-the Fourth Ave. (Harlem) street railroad, chartered in 1831. It was built on the Bowery and was opened for travel from Prince St. to the present site of Union Square in November, 1832.

The vehicles were drawn by two norses, and were after the style of the stage coaeh of that time. On the day of the opening, the Mayor and the City Couneilmen and other invited guests made the first trip over the line.

A large number of people gathered to see the new ears make their start and even the most sceptleal of the number were obliged to confess that the new horse cars were a suecess and designed to prove a great eonvenience to the publie.

The road was extended to Murray Hiil in 1833, and reaehed the Harlem River in 1839. Fares were paid in silver sixpenecs of the old Spanish eurreney then in eirculation. A rapid extension of the system followed as towns in different parts of the country increased in size.

\section*{SUBWAY AND "L" LINES IN NEW YORK CITY,}

The first elevated railway in N. Y. City opened April 30, 1878; the first subway opened Oct. 27, 1904.

The New York State Legislature in 1921 (act signed May 12) authorized the construction of a subway between Brooklyn and Staten Island, to be uscd for both freight and passengers.

There are three subway systems and two elevated railroad systems in the City of New York devoted \(\mathrm{t}_{0}\) local passenger rapid transit. There is also a fourth system, that of the Penusylvania Railroad, which, by means of twin tubes extendng under Manhattan at 33d Street, connects the Pennsylvania Terminal at Seventh Avcnue with Long Island City, enabling through all-rail passenger and freight traffic betwecn New England and the South and West. This route is used by the New Haven Railroad trains between Boston and Washington. Of the three local subway systems in the city, only one, that of the Hudson and Manhattan Railway Company, is altogether under ground. The others run pany, is attogether under ground. The oth
on elevated structures in the outlying parts.

\section*{HUDSON TUBES.}

There are two sets of these tubes under the Hudson River, one connecting Montgomery Street, Jersey City, with the IIudson Terminal Station at Fulton-Cortlandt-Church Streets, Manhattan; the other connecting the Hudson tubes in Jersey CityHoboken with Christopher Street, Manhattan. The main trunk-line tubes of the system run from Montgomery Strect, Jersey City, to Park Place, Newark, emerging to the surface on Jersey City Heghts, and connecting on the meadows with the Pennsylvania Railroad, at a surface station callcd Manhattan Transfer. In New Jersey, one set of tubes parallels the Hudson River, linking up the Pennsylvania, Erie, and Lackawanna railroad passenger stations, so that travellers may go to or from their stations, to or from downtown or uptown Manhattan. In Manhattan, the Hudson tubes connect Christopher Street with Broadway and 33d Street by way of Sixth Avenue.

\section*{INTERBOROUGH SUBWAYS.}

There are two of these systems, the east side and the west side, with cross connections in Manhattan and also in Brooklyn, so that for one five-cent fare passengers may go to or from the eastern part of Brooklyn to the northern parts of Manhattan and the Bronx.
The west side system starts on an elevated structure at Livonia and New Lots Avenues, East New York (Brooklyn), goes on Livonia Avenue to Saratoga Avenue, then turns into the Eastern Parkway, where it becomes a subway. It runs through the Eastern Parkway to Flatbush Avenue, at Fighth Avenue, thence down Flatbush Avenue to Fulton Street, through Fulton Street to Clark Street; through Clark Street and under the East River to William Street, Manhattan; through William Street to Fulton Street; thence west to West Broadway; to Hudson Street; to Seventh Avenue; to Broadway; 'to St. Nicholas Avenue; to Amsterdam Avenue: to Broadway, to 242 d Street. at Van Cortlandt Park. It emerges from Fort George Hill near Dyckman Street, and goes to \(242 d\) Street on an elevated structure.
Another branch of the west side system starts at Flatbush and Nostrand Avenues, Brooklyn, and runs in a subway through Nostrand Avenue to the Eastern Parkway, where it joins the other branch. Through trains run in both branches over the entire west side system. Transfers to the east side subway system are made at Nevins Street or at Atlantic Avenue, Brooklyn, and at 96th Street and Broadway, Manhaftan.

At 96th Street and Broadway, the west side system has a branch (part of the original Interborough subway) that extends under the northwest corner of Central Park to Lenox Avenue, to 145 th Street, thence under the Harlem River to 149th Street, where it joins the east side trunk line on Westchester Avenue and the Southern Boulevard. Just south of Bronx Park, an extension, on an elevated structure, branches off and goes along White Plains Road, to 241st Street, Mount Vernon. This extension also is used by Third Avenue " \(L\) ", trains, north of Gun Hill Road.
The west side-east side systems have an elevated extension on Jerome Avenue extending north from Mott Avenue and 149th Street, up through Fordham and Bedford Park, to a point between Van Cortlandt Park and Woodlawn Cemetery, ending at about 242 d Street. This extension is, also used by Sixth Avenue and Ninth Avenue " L ' trains, north of 162 d Street.
The east side system starts at Flatbush and Atlantic Avenues (Long Island R. R. Terminal),

Brooklyn, gocs on Flatbush Avenue to Fulton Street: to Joralemon Street; thence under the East River to Battery Park, Manhattan; thence under Broadway, to Park Row; to the Brooklyn Bridge; to Lafayette Street, to Fourth Avenue; to 42d Street (Grand Central Scation); to Lexington Avenue; to 130 th' Street; thence under the Harlem River to Mott Avenue; to 149th Street; where it emerges onto an elevated structure; to Westchester Avenue; to the Southern Boulevard; to the southern part of Bronx Park (Bronx Zoo).

An extension of the east side system starts at Mott Avenue and 138th Street, and gocs through 138th Street to the Southern Boulevard; to Whitlock Avenue: to Westchester Avenue, and through old Westchester Village, to the Eastern Boulevard, at the west side of Pelham Bay Park.

The Queensboro Branch of the Interborough subway system starts at. 42d Street and Lexington Avenue, and uses the Belmont tubes under the East River at 42d Street, to Long Island City, there emerging onto an elevated structure and going to the Queensboro Bridge Plaza. There it splits into two elevated branches, one going through Ravenswood. on Second Avenue, to Ditmars Avenue, Astoria; the other going on Queens Boulevard, Greenpoint Avenue and Roosevelt Avenue, to Alburtis Avenue, Corona. Both branches are used by the Second Avenue, Manhattan, "I," trains between Queensboro Bridge Plaza and the terminals of the branches.

All of the Intcrboro's subway lines are city-owned.

\section*{BROOKLYN RAPID TRANSIT COMPANY'S} SUBWAYS.
There are three B. R. T. subways-the Fourth Avenue line, the Broadway line, and the Queensboro line.

The Transit Commission, in October, 1922, announced plans for the tunnel under the Narrows, from the extension of the Fourth Ave. subway, Fort Hamilton, Brooklyn, to Rosebank, Staten Island.

The Fourth Avenue route starts at Fourth Avenue and 86th Street, South Brooklyn, and runs along Fourth Avenue to Flatbush Avenue, to the Manhattan Bridge, re-entering a subway at the Manhattan approach to the bridge, continuing west by way of Canal Street to Broadway, where it joins the Broadway tubes of the B. R. T. Fourth Avenue traffic usually goes by way of the Montague Street tube and Broadway.

The Fourth Avenue subway is to be extended to 95th St., Fort Hamilton.

The Broadway subway line starts at Flatbush Avenue and Malbone Street (Empire Boulevard) at the Willinck entrance to Prospect Park; goes along Flatbush Avenuc to Fourth and Atlantic Avenues, where it connects with the Fourth Avenue subvay and also with the Interborough subway; thence on Flatbush Avenue to Fulton Street, to Borough Hall, to Montague Street; thence under the East River to Whitehall Street, Manhattan; thence under Trinlty Place, Church Street, Broadway and Seventh Avenue; thence under 59th and 60th Streets, and by tunnel under the East River to a connection with the Queensboro lines. The Fourth Avenuc route connects with the Broadway route at Flatbush and DeKalb Avenues, Brooklyn, and also at Broadway and Canal Street, Manhattan.

The Transit Commission, in October, 1922, announced plans for an extension of the Brooklyn Rapid Transit Subway System, from 59th St. and Seventh Avenue, Manhattan, up Central Park West, Seventh Avenue and St. Nicholas Avenue to Washington Heights, where it will connect with the proposed Eighth Avenue trunk line, and the existing Interborough subway at 168th Street and Broadway.

The Brighton Beach line of the B. R. T. connects with the B. R. T. subway at Malbone Street, and the B. R. T. surface and "L"' Coney Island lines connect with the Fourth Avenue subway at 86th Street, so that there are through subway trains by both subways between Manhattan, Queens, Brooklyn, and the Coney Island district.

Owing to the many connecting and transfer points, the above grouping of Interborough and B. R. T. routes is arbitrary, intended for the reader's convenience, inasmuch as the trains are operated at times over other than the group routes indicated.

All of the B. R. T. subways are city-owned.
Under a contract between the city and the \(B . R\). T., a 5 -cent fare is assured by subway or "L" between Queens Plaza, Manhattan, or Brooklyn, and Coney Island. The B. R. T surface lines, by resolving themselves into their old corporate identitics, are able to charge a 10 -cent fare to Coney Island, and on several of their other surfacc routes they charge 10 cents for through rides.

The lines remaining to be completed in the Dual

System are, for the Interioorough Company, the extension of the Queensboro subway from Lexington Avenue (Grand Central Terminal) to 41st Street
and Eighth Avenue and, for the New York Municipal Corporation, the 14th Street-Eastern and the pal Corporation, th
"L'" LINES-MANHATTAN AND BRONX.

There are four elevated roads in these two boroughs, all operated by the Interborough.

Second Avenue "L" starts at South Ferry, Battery Park, runs north to Pearl Street and New Bowery to the Bowery; to Division Street; to Allen Street; First Avenue to 23 d Street; to Second Avenue; to 129 th Street. where it merges with the Third Avenue "L.

Third Avenue "L" starts at Park Row (old Chatham Street) and the Brooklyn Bridge, and runs on Park Row to the Bowery, at Chatham Square, where it bends into the Bowery; to Third Avenue; to 129 th Street, where it erosses the Harlem River, and continues north through Willis and Melrose Avenues, to Third Avenue, the Bronx; thence past Crotona and Bronx Parks to Williamsbridge, at, White Plains and Gun Hill Roads. There it connects with the White Plains Road elevated Interborough subway extension to Mt. Vernon

At 1494 Street, the " \(L\) " connects with the Interborough subway elevated line that runs on Westchester Avenue, the Southern Bouievard, and White plains Road to Mt. Vernon. The "L" trains use this extension along, with the subway trains

Ninth Avenue "L." starts at South Ferry, Battery Park, and runs north through the park to Greenwich Street; to West 14th Street and Ninth Avenue; on Ninth Avenue to 53d Street, where it merges with the Sixth Avenue "L," and the two roads jointly eontinue on Ninth (Columbus) Avenue, to 110 th Street; to Eighth Avenue; to 155th Street, where

> TO CONEY ISLAND

The only direet "L" line to Coney Island at the present time is the Culver Line operating via the Fifth Avenue line to 36 th Street, and thence via a new structure, principally on Gravesend Avenue, to Coney Island.

Since the completion of the Brighton Line subway connection in 1920, no regular elevated service is operated over the Brighton route, a shuttle service only being maintained between Franklin Avenue and Fulton Street and Prospect Park. During the summer months express trains run from Fulton Street and Franklin Avenue to Brighton Beach.

The Myrtle Avenue "L" runs from the Brooklyn Bridge, and also via the Williamsburg Bridge, to Metropolitan Avenue, Ridgewood.

SUMMARY OF RAP
There are over 600 miles of subway and "L" tracks in the city, of which 361 miles are Interborough lines, and 258 are B. R. T. lines. The Interborough subway roads total 222 miles; the Manhattan "L"' system, 139 miles. The Interborongh subway roads have eost over \(\$ 300,000,000\); the Brooklyn Rapid Transit subway roads over \$193,000,000 . The Interborough's share of the cost has been over \(\$ 148,000,000\), including \(\$ 48.000,000\) the company spent on the first East River tubes and the extension to Flatbush and Atlantic Avenues, Brooklyn. The city has put up the rest of the cost of the Interborough subways. Of the cost of the Brooklyn Rapid Transit subways the company has borne over \(\$ 69,000,000\); the city over \(\$ 124,000,000\).

Under the Dual System of rapid transit, all of the lines operated by the Interborough and the Consolidateu Railroads Co. (the latter a B. R. T. subsidiary), including the first subway and the elevated lines of the two systems are combined in two great operating units, covering four of the five boroughs. Each company has lines which operate through the
the road crosses the Harlem River, bearing east, conneeting with the Youkers branch of the N . Y . Central R. R., at Sedgwick Avenue, and continuing east to Jerome Avenue, whence it uscs the Jerome Avenue elevated extension of the Interborough subway that goes on up to Woodlawn Cemetery.

Sixth Avenue "L"' starts at South Ferry, Battery Park, and runs north through the park to Chureh Street; to Park Place; to West Rroadway; to West Third Street; to Sixth Avenue; to West 53d Street (where a shuttle train runs between 50 th Street and 59 th Street, on Sixth Avenue); to Ninth Avenue where it merges with the Ninth Avenue "L.

\section*{ELEVATED LINES IN BROOKLYN AND QUEENS.}

The "L'" roads in Brooklyn and Queens (except the Interborough's subway extensions) are operated by the Brooklyn Rapid Transit Company. They run trains over the Brooklyn and the Williamsburg Bridges across the East River. Thus these lines connect Manhattan with the Brough of Brooklyn and with the outlying districts, including Pichmond Hill, Jamaica, Canarsie, Sheepshead Bay, Brighton Beach, and Coney Island. The East New York Jamaica, Brownsville lines inter-connect at Eas New York, so that passengers may transfer via any bridge between Manhattan, Jamaica, Ridgewood and Canarsie, and the intervening distriets of Brooklyn.

\section*{FOR FIVE CENTS}

The Fulton Street "L" runs from the Brooklyn Bridge to East New York, and thence via Pitkin and Liberty Avenues to Lefferts Avenue, Richmond Hill.

The Lexington Avenue "L" runs from the Brooklyn Bridge to Jamaica, via Myrtle and Lexington Avenues and Broadway

The Broadway "L'" runs' from Manhattan via the Williamsburg Bridge to East New York and Canarsie.

The Fifth Avenue " \(L\) ' runs from the Prooklyn Bridge to Bay Ridge, at 65th Street. At. 35th Street the line connects with and trangfers to the Culver route.
so-called community centre of the city, namely, the section of Manhattan Island below 59th Street

New York's original subway, operated by the Interborough, now denoted the Cirst Subway, is an integral part of the Dual System. Under the operating eonditions scheduled for the new lines, it lost its identity and was merged for operating purposes with other lines assigned under the dual agreements to the Interborough

The Dual System was created when the city, through the Public Service Commission. on Marcl 19, 1913, entered into an agreement (the dual contracts) with the Interborough and the Municipal Railway Corporation (the latter a B. R. T. subsiii iary), providing for the construction and operation of new lines and extensions.

In Oetober, 1922, the Transit Commission and Interborough security holders agreed, it was announced, on a finaneial reorganlzation, under whieh there are to be no dividends for 5 years; dividends never are to exceed 5 per cent. in a year: and the Manhattan "L" stock no longer gets a fixed divirlend.

\section*{VALUATIONS RECOMMENDED AND COMPANIES' FIGURES.}
\begin{tabular}{r|r|r|r|r}
\hline
\end{tabular}

The amount that the City of New York has invested in the subways is (Contricts 1, 2, 3 and 4) \$293,493,239 . Adding this to the recommended valuation of company property \((\$ 465,680,154)\) would give a total valuation of city and company property of \(\$ 759,173,393\).

TUNNELS IN OPERATION IN AND ABOUT NEW YORK CITY.

Pennsylvania Ramboad System-Tunnels under Hudson River extend from Pennsylvania Railroad Station, New York, to Weehawken, N. J. There is no station at Weehawken; the electric trains from the Pennsylvania Station run to Manhattan Transfer, near Newark, N. J., without a stop. Work started April 1, 1904; completed in 1910. Two tubes of cast iron rings, 23 feet outside diameter and 21 feet 2 inches inside diameter; subaqueous portion 6,118 feet long.
Manhattan crosstown tunnels from the Pennsylvania Railroad Station, mentioned above, across New York under 32d and 33d Sts. to First Ave. Started July, 1905, completed in 1910. There are two tunnels, each with two tracks. The tunnels are built of concrete with the crown about 60 feet below the surface of the street.
East River tunnels connect with the crosstown tunnels and extend under the East River to Long Island City. Started September, 1904; completed in 1910. Four separate tubes with rings 23 feet outside diameter, each tube from the Manhattan shaft to the Long Island City shaft, 3,900 feet long.
Hudson and Manhattan Railroad SystemNorth tunnels under the Hudson River from Jersey City to Morton St., New York. Started November, 1874 ; the first in New York, officially opened February 25, 1908. Two single track tubes, with a minimum inside diameter of 15 feet 3 inches, and approximately 5.700 feet long.
Up-town tunnels connect with north tunnels at Morton St. and extend to Christopner St. thence to Sixth Ave, and up Sixth Ave. to \(33 d\) St. Started March, 1904 , completed in 1910 . Section from Morton to 12 th St. shield construction, remainder cut and cover.
South tunnels under Hudson River from Jersey City to the Church St. Terminal Building (Cortlandt, Church and Fulton Sts.), New York. Started May, 1905; opened for traffic July, 1909. Two tubes about 5,950 feet long, with cast iron rings, 16 feet 7 inches outside diameter and 15 feet 3 inches inside diameter.
Tunnels (consisting of two single track tubes) extend from the Hoboken terminal of the Lackawanna Railroad to Washington St., Jersey City, with connections to the north tunnels and to the Erie Railroad Station. At Washington St. a branch runs to the Pennsylvania Railroad Station at Jersey City, where connections are made with the south tunnels. West from Washington St. to a point east of Summit Ave. is a double track concrete tunnel with a centre wall dividing the tracks. Work started March, 1905; completed in July, 1911.
Belmont Tunnel under the East River from 42d St., New York, to Long Island City. Subaqueous portion two single track tubes with cast-iron rings 16 feet 10 inches outside diametcr, and a clear inside diameter of 15 feet 6 inches. Through rock a horseshoe shaped concrete section is used and in other places a rectangular double track cross
section with reinforced concrete lining. Construction started by New York and Long Island Railroad, July 12, 1905; practically completed January 1, 1908. (Commonly known as the Steinway Tunnel.)
Rapid Transit Tunnel under the East River from the Battery, New York. to Joralemon St., Brooklyn, connecting the New York and Brooklyn subways.' Started April, 1903; trains running January 9, 1908. Two tubes, 6,784 feet long, with a finished inside diameter of 15 feet 6 inches.
Clark Street Tube-These twin-tubes undcrneath the East River, connecting the InterboroughSeventh Avenue subway in Mannattan with the Fulton Street-Flatbush Avenue subway of the Interborough in Brooklyn, were completed and put in operation the Summer of 1919. They are 5,047 feet long; outside diameter of 17 feet 6 inches; inside diameter 15 feet.
The B. R. T. subway tubes from Whitehall St.; Manhattan, to Montague St., Brooklyn, from East 14th St., Manhattan, to North 7 th St., Brooklyn, and from east 60th St., Manhattan, under Blackwell's Island to Long Island City, Queens, were in full operation in 1921.
West Shore Railloat Tunnel, Weehawken, NEW JER EY-Commenced in 1881, and completed twenty-thrce months later, at a cost of \(\$ 525,000\). It is double-tracked and the original length was 3,983 feet. A steel and concrete portal, constructed in 1907 at the east increased its length to 4,273 feet. One-fourth of the tunnel is bricklined, the remaining portion, unlined. The normal section is 27 feet in width and 19 feet high. 80,500 cubic yards of rock were removed, and five vertical shafts were utilized, giving ten working faces, and average progress of 173 linear feet per month was maintained. The average expenditure per linear foot of lined section was \$200, and of unlined section, \(\$ 110\), and equivalent of \(\$ 7.00\) per cubic yard of excavation. The tunnel is a tangent, with the exception of the extended portion of the east end, previously mentioned, at which point the freight and passenger tracks divide. There is a grade of \(0.30 \%\) toward the east, and \(0.34 \%\) toward the west, from approximately the centre of the tunnel. It is ventilated by rotary fans, installed in 1911.
BERGEN CUT of Erie Railroad through Bergen Hill, Jersey City, parallel to the present tunnel, which is 4,700 feet long. The Bergen cut was started March, 1906, and completed July 1, 1910. It has five four-track tunnels, with open cuts between the tunnels, making a total length of 4,300 feet. Tunnel sections 58 feet wide at the bottom and 21 feet high.
LACKAWANNA RAILROAD TUNNEL, through Bergen Hill, Jersey City. Started February 28, 1906; completed Fcbruary 14, 1909. Parallel to and 24 feet away from old tunnel and of the same length, viz., 4,283 feet. New tunncl is double tracked, lincd with concrete, having inside dimensions 23 feet high by 30 feet wide. Bush track construction used.

\section*{THE NEW YORK-NEW JERSEY VEIHCULAR TUNNEL.}
(Contributed by the N. Y. State Bridge and Tunnei Commission, Mail of Records, Oct. 17, 1922.)

New York State Bridge and Tunnel CommissionCommlssioners: Gen. George R. Dyer, Chairman; F. W. Bloomingdale, MeDougall Hawkes, A. J. Shainberg, N. Y. City Commissloner of Plant and Structures, cx-offclo; N. Y. State Engineer, exoflicio; Paul Wlndels, Counsel; Morris M. Frohlich, Secretary.

New Jersey Interstate Bridge and Tunnel Commis-sion-Commlssloners: Theodore Boettger, Chairman: Weller H. Noyes, Robert S. Sinclair, John F. Boyle, Thomas J. S. Barlow, John B. Kates, Isaac Ferris, Frank L. Supice, Emerson Richards, Counsel; James P. Dolan, Sccretary

Chief Engineer-Clifford M. Holland
The States of New York and New Jersey enacted legislatlon providing for the construction, maintenance and operation of a tunnel, to be paid for by each State in equal parts, and directed the Commissions to enter into a treaty or contract to tiat end. The treaty was executed in final form on Dec. 30 , 1919, and has been consented to by a resolution of Congress, approved by the President. One mlllion doilars was made available by the Legislature of each State, and the Commlssions thereby had the necessary funds to begin actual construction.

On Jan. 6, 1920. Chief Engineer Clifford M. Holland recommended the construction of twin tubes of 29 feet 6 inches external diameter of cast-iron rings lined with concrete, provlding for a 20 -foot roadway \(\ln\) each which would be capable of carlng for two lines of traffic, the north tube for westbound trafic and the south tube for eastbound. The tunnels recommended provide a narrow sidewalk for pedestrians and sufficient ventilation ducts and service conduits.

The Commissions unanimously approved the recommendation of the Chicf Engineer, and contract drawlngs and specifications were ordered prepared, and on Oct. 12, 1920, ground was broken at Canai Street Park on contract No. 1 for the constructlon of the ventllation shafts on Manhattan Island. These have been compieted and form the worklng chambers for the under-river structure from the New York slde. Drawings and specificatlons were then prepared for similar work on the New Jersey slde, as wcll as the under-river section of the tunnel, and are known as contracts 3 and 4 . Negotiations were entered into wlth the City of New York for the acqulrement of Pier 35 and other waterfront property necessary for construction, maintenance and operatlon; aiso wlth the Erie Railroad Company in whose yard on the Jersey watcrfront the bulk of tunnel construction operations will be carried on for a perlod of three years.

The difficult problems of property acqusition have been solved and contracts were signed on March 28 , 1922, calling for construction work \(\ln\) an amount approximating \(\$ 20,000,000\). Preliminary operatlons commenced lmmediately, which involved contracts for material produced in different sections of the country.

Two elcctric power-houses have been completely erected for furnishlng the compressed air and hydraullc power requlred ln construction work. These represent an outiay of \(\$ 500,000\). The quarters for the compressed alr workers as provided by law are in the course of constructlon, to be fully equlpped for the accommodation of 600 men . A blanket of approximately 200,000 cuble yards of clay and riprap is being laid in the river bed for the protection of tunneiling operations and the structure ltsclt. At the New Jersey pierhead llne 84 concrete steei piles 24 lnches in diameter are being sunk to bedrock 260 feet beiow hlgh water to form the foundation for the New Jersey rlver ventilation shaft.

The shields to be driven from the Manhattan side of the river were erected ln the shafts at Canal and Spring Streety, and the driving of the shleids out under the Hudson River was started before the end of the year. The shields on the New Jersey side for driving eastward under the rlver wili be set up eariy in 1923, after the land shafts located in the Eric Railroad yard have been completed. The time for completing contracts 3 and 4 is set for April, 1925.

The actual work of boring the tunnci began on Oct. 26, 1922.

\section*{VENTILATION OF TUNNEL}

The ventilation probiem has been worked out through co-operative lnvestigations with the U. S. Bureau of Mines, Yaie Unlversity and Unlversity of Ilinois, which have demonstrated the practicability of an economic system of ventifation. This wili be tirougli four shafts, two on each side of the river, one loeated on either side alld near the pierhead ine, which wlii provlde protection to the tunncis and aliow silps for the deepest draft ocear-going vessel.

These piers wili be buitt by the City of New York and the Erie Raiiroad Company. The other shafts are to be located nearcr the portals, thus making a series of ventilation units materially reduclng the cost of equipment and operation.
The ventilation of the tunnel will be accomplished by supplying the fresh air through a contlnuous duct in the bottom of each tunnel and withdrawing the vitiated air through another continuous duct at the top of each tunnel. The fresh alr enters the roadway through two continuous slots in the curb on either side of tie roadway, and the vitiated alr enters the upper duct through openings located at frequent intervals in the roof over the roadway. The ventllation requirements are based on a maximum concentration of carbon monoxide of 4 parts in 10,000 parts of air

This wiil ultlmately require \(3,600,000\) cubic feet of fresh air per minute, representing an average of 40 complete air changes per hour.

After study of traffic across the ferries and bridges and on the clty streets, it was seen that precaution must be taken to prevent the congestlon of traffic on the streets at the tunnel terminals; and lt is planned to separate the incoming from the outgoing traffic to permlt of its concentration and absorption without endangering the capacity use of the tunnel and interference with normal street traffc.

The Manhattan entrance ls from a plaza on Broome Street, from Hudson to Varlck Streets, and the exit ls on the south side of Canal Street at Varick and Vestry Streets. The Jerscy City entrance is from a piaza at 12 th and Provost Streets, and the exit at 14 th and Provost Streets.
The entire cost of construction, approximately \(\$ 30,000,000\), can bc amortized on the estimated traffic at rate of tolls equal to the present ferry rates in about eleven years, whlch conforms with the requirement of the New York act that tolls be coilected to pay all maintenance and operating charges and amortize the cost of construction within twenty years.

QUICK TRANSIT FOR FOOD SUPPLIES.
Among the advantages which the tunnel will afford wili be the quick and certain transportation of merchandise, foodstuffs and coal from the malnland direct 10 final destination in Manhattan, the Bronx and Long Island, unhindered by climatic or other conditions. In the item of coal alone, the entirc cost of the tunnel could have been defrayed out of any one of a dozen day's losses in January, 1918, due to the lnabillty to move the coal barges across the river, not to mention the deaths, lllncss and physical suffering resulting from the coal famine.

Milk and produce wagons or trucks coming from the New York counties adjoining the New Jersey line could drive directly into the city and deliver their product with certainty many hours earlier than ls now possiblc. Outgoing frelght deliverles could also be made more emfientiy and in larger volume than is now possible by the present lighterage system. This would do away with the necesslty of using valuable waterfront property for railroad piers, floats and brldges on both the Manhattan and Jersey shores.

Finally the most important question of time in transit would be solved for all classes of freight or passenger-carrying vehicles at no increase ln ferry cost. At present, owing to the crowded conditions at certain hours, a truck or car is forced to walt in line, sometimes for several hours, before it can be driven aboard the ferry, whereas wlth the tunnel proposed, and its wide plazas at each end, there wouid not be the slightest delay or congestion at any time.

THE TUNNEL IN BRIEF.
Total length of proposed tunnels, 9,250 feet.
Outside diameter of circular subsurface tubes, 29 feet 6 inchas.

Construction materiai, cast-iron ring lined with concrete

Elevatlon of top of tube, 60 fcet below mean low tide.

Maximum gradients on approaches at each end, \(31 / 2\) per cant

Width of roadway in each tunnel, 20 feet.
Ventilation-blower and cxhaust fans at 4 shafts -2 on each side of river.

Estimated annual traffic on completion (both directions), \(5,610,000\) vehicles.

Total estimated annuai capacity of tunnel (botil dircctions), \(15,800,000\) veilicies.

Manhattan terminus of tumnel-entrance Broome Street-exit Canal and Varlck Streets.

Jersey City terminus-cntrance 12th Streotexit 14 th Street.

\section*{ALTITUDES IN NEW YORK CITY.}

The hlghest natural elevation of land in the City of New York- 430 feet-is on top of Todt (Toad or Iron) Hill, Staten Island. Thls hill rises from the Richmond Road at Gurretson's station on the rapid transit railway, and overlooks New Dorp and the Moravian cemetery where the Vanderbllts lie burled. A point near tale summit referred to, where the altitude is 409.24 feet, is lndicated by a bench mark eight feet from the east side of David J. Tysen's dwelling, near the southeast corner of Ocean Terrace and Todt Hlll Road. The house is about 100 feet south of Ocean Terrace, and about 200 feet east of Todt Hill Road

This is the highest point on the Atlantic Coast, south of Maine.

Other hlgh road points in Richmond Borough are: Manor Road ( 244.35 ft .) at Castleton Corners, near the Eckstein brewery; and Manor Road (233.43 ft.) near the N. Y. City Farm Colony. There are several hills on Staten Island over 300 feet high. The elevation at the Fort Wadsworth Post-Exchange building is 107.15 feet above sea level.

The highest natural altitude in Manhattan-267 feet, 9 inches-is near the site of old Fort Washington, a little west of Fort, Washington Avenue, approximately 900 feet north of W. 181st St. The hlll at Inwood rises to a height of 232 feet, 9 inches. Other elevations in Manhattan above sea level, expressed in feet and decimals thereof, are-Custom House, 17.06; Bowling Green, 21.75; Pine St. and Broadway, 40.78; Municipal Building, 41.61; City Hall, 44.74; Astor Place, 43.01; Union Square, 45.73; Columbus Circle, 86.64; Central Park near W. 93rd St., 114.14; Amsterdam Ave., at Trinity Cemetery, 148.73; Audubon Ave., at W. 174th St.,
185.92; Wadsworth Ave., near W. 182d St., 188.33; High Bridge water tower, at the stree \({ }^{+}\)level, 203.25. The highest natural elevation in the Bronx-284 feet, 6 lnches-ls on the hill bounded by Iselin Ave., Highland Ave., and W. 250th St., Rlverdale Hill. Other Bronx altludes are-Jerome Ave., near E. 233rd St., 210.73; Jerome and Mosholu Aves., Van Cortlandt Park, 193.39; Rlverdale Ave., and Spuyten Duyvll Parkway, 178.49; Grand Boulevard and Concoursc, and E. 199th St., , 148.64; Hall of Fame Terrace, at Unlversity Ave., 170.32; Poe Park, E. 192d St., 140.22; East approach to Washlngton Bridge, at University and Aqueduct Aves., 141.63.

The hlghest natural elevatlon in Brooklyn-210 feet-ls in Greenwood Cemetery, near the 9th Ave. entrance. Other Brooklyn altitudes are-Base of the Museum on Eastern Parkway, at Washington Ave., 163.44; 9th Ave. (Prospect Park West.), 32 feet south of 14 th St., 155.34; Prospect Park West and 5th St., 162.16; Unlon St., Plaza, at Flatbush Ave., \(146.29 ; 59\) th St., and 5 th Ave., 116.96; Atlantic and Classon Aves., 83.68; Borough Hall, on street level, 66.71 ; Surf Ave., Coney Island, at the Public Bath, 11.49.
The highest elevation in Queens Borough-266.48 feet-is on Little Neck Hill, 800 feet east of Little Neck Road and 435 feet south of 61st Ave. (Hyde Park Road) near the Vanderbilt estate.

The highest track elevation (altltude above sea level at base of rajl) in the Interborough tubes133.5 feet-is at the Museum station, Eastern Parkway and Washington Ave. The tracks in the lowest part of the Queensboro (42d St.) Interborough tube under the East River are 105 feet below sea level.

\section*{SUSPENSION AND CANTILEVER BRIDGES.}

The suspension bridge is a fixed brldge and consists of a truss supported by cables resting on towers; the cables belng anchored at each end In masonry anchorages. Suspender ropes or wires connect the truss to the cables.

The cantilever bridge is a fixed bridge in which

59,625; Greenpoint Ave., 10,324; Grand St., 13,139.
Queens: Borden Ave., 12,038; Flushing, 28,862. Richmond: Fresh Kills, 1,054.

Total 24 -hour count, both ways, on the 44 municipal bridges-Cars, 39,862; car passengers, 1,212,660. Vehicles, 228,778: vehicle passengers, 443,007. Pedestrians, 105,661. Total persons using the bridges, \(1,761,328\).
the truss is supported on a pier and balanced by extending in boin directions from the pler, one end of the truss extending over part of the space to be bridged toward a similar truss from an opposlte pier and the other end of the truss extending back to a masonry anchor pier.

\section*{THE HARBOR OF NEW YORK:}

\section*{(Data by courtesy of the Chief of Engineers, U. S. Army.)}

New York Bay is the principal entrance to New York City. It is divided into two parts, the Lower Bay and the Upper Bay, by the Narrows, a passage about five-elghths of a mile wide at its narrowest part. The entranee to tire Lower Bay is between Sandy Hook on tne south and Roekaway Point on the north and is about seven miles wlde. The Upper Bay extends from the Narrows to the Battery. The prineipal entranee ehannels to the harbor of New York are the Ambrose Channel and the Main Ship-BaysideGedney Channel.

Ambrose Channel, whieh is the newer and more important channel, was eompleted April 17, 1914 It has a eomparatively stralght course in a northwesteriy and then northerly direction from deep water in the ocean through the Lower Bay. It is 38,000 feet in length and 2,000 feet in width, and has a depth of 40 feet at mean low water. The mean range of tide is about 4.5 feet.

Main Ship-Bayside-Gedney Channel is the route formerly used by deep-draught vessels. It extends westward past Sandy Hook and then northward through the Lower Bay. It has a depth of 30 feet at mean low water and a nominal width of 1,000 feet, which has deereased in places to 500 feet. The Main Channel in the Upper Bay leads between Jersey Flats and Gowanus Flats and has depths of 40 to 90 feet and a width of about one-nalf mile. Within the harbor there are several channels connecting the different sections. Bay Ridge, Red Hook and Buttermilk Channels lie in Gowanus Bay along the Brookly and form an easter Naver and is separated from the Main Ship Channel by a broad shoal off Gowanus Bay and by Governor's Isiand. By means of these channels the extensive terminals of the Bush Terminal Co. and of the New York Dock Co., as well as the municipal terminals In South Brooklyn, are directly aceessible for large shlps and have easy communication with the other sectlons of the inner harbor.

Bay Ridge Cliannel has a minimum depth of 35 feet at mean low water for its full width of 1,200 leet, and of 40 feet for the middle 800 feet of that wldth. Red Hook Channei is approximately 1,200 feet wide and has available depths of 38 to 40 feet at mean low water throughout its length. The comblned length of these channels is about 4.5 milies and the mean range of tide is about \(41 / 2\) feet. Buttermilk Channel has a depth of 30 feet, but at places along the sides the depth does not exceed 27 feet. The channel is broad, having at lts narrowest point a width of about 800 feet.
Rtvers, Creeks and Bays.-The Hudson (North) Rlver empties Into Upper New York Bay at the Battery, the southernmost point of Manhattan Island. The width of the river between established plerhead llnes is 3,900 feet at the Battery and gradually deereases to 2,750 feet between Castle Point, N. J., and West 14 th Street, New York City, and 2,725 feet opposite West 59 th Street.
A vessel drawing 40 feet ean be carried at mean low water up to West 19th. Street, through the eastern, or New York, side of the river; from West 19 th to about West 50 th Street, through the western, or New Jersey, side; and between West 50 th and West 75 th Streets, in the middle of the river, and thenee generally near the east shore, to the north boundary of the eity. The mean range of tide at the Battery is 4.4 feet.

The East River is a tidal strait about 16 miles long and from 600 to 4,000 fect wide, exclusive of bays and estuaries, and extends from the Battery in New York Clty to Throgs Neek at the head of Long Island Sound. The river separates the Boroughs of Manhattan and the Bronx from the Boroughs of Queens and Brookiyn.

The East River has a through ehannel to Long Island Sound 30 feet deep at mean low water and rith width of 550 leet or more, except at Hel Gate, where the 30 -ioot channel is too narrow for and the safe depth is fimited to 26 feet. A orojeet is under way for deepening the entire ehannel to 35 and 40 feet. The mean range of tide \(1 n\) the East River is 4.4 feet at the Battery, 4 feet at the Brooklyn Navy Yard and 6.6 feet at the east entrance to Hell Gate.

Harlem River and Spuyten Duyvil Creek together form a waterway about 8 milies in length, which extends from the East River to the Hudson River and separates the Borougl of Manhattan from the Borough of the Bronx. The East River entrance to the Harlem Rlver is about \(81 / 2\) milles by water
northeast of the Battery and the Hudson River entrance to Spuyten Duyvil Creek is about \(131 / 2\) miles by water north of the Battery. The Improved channel in Harlem River has a width of 150 to 400 feet and a depth of 15 feet at mean low water, except at Maeombs Dam Brldge, where ledge rock projects at a point 12 feet below mean low water.

Bronx River is a short and narrow stream that emptjes into a shallow bay or estuary on the East River at Hunts Point, about 11 miles northeast of the Battery. The navigable portion of the river eonsists of a Channel extending from its mouth to a dam at East 177 th Street. This ehannel is about \(21 / 2\) miles long and from about 50 to 300 feet wide and has a depth of 7 feet at mean low water in the lower section. The mean range of tide in the Bronx River is about 7 feet in the estuary and 6 feet at the dam.

Westchester Creek is a small stream lying wholly within the limits of the City of New York. This stream extends northward from an estuary in the north shore of East River about 14 miles northeast of the Battery. The estuary is about 1 mile long and from 500 to 3,000 feet wide. The portion of the creek now under improvement is \(2 \frac{2}{3}\) miles long from deep water in the East River and from 110 to 500 feet wide. The lower section has a depth at mean low water of 8 feet, while the upper seetion has a mean depth of 6 feet.

Eust Chester Creek is a shallow stream that empties into East Chester Bay on the north shore of Long Island Sound about 12 miles west of the Connecticut State line and about 21 miles northeast of the Batter.v. The lower two miles of the navigable portion of this stream lie wholly within tne limits of the City of New York and have a depth of 4 feet at mean low water, or 11 feet at higl water, while the upper section has a depth of about 5 feet at high water

Flushing Bay is on the north shore of Long Island, about 12 miles from the Battery. The bay is about 1 mile wide and 2 miles long. Flushlng Creek, which flows into the head of the bay. is a tidal stream navigable for a distance of about 3.5 miles from its mouth. The total length of dredged channel in the bay and the creek is about 3 miles and the mean low water depth of channel in the bay is 10 feet; in the ereck, 8 feet. The mean range of the tide is about 7.1 feet.

Newtown Creek is the inlet of the East River that separates for a distance of about 4 miles the Boroughs of Queens and Brooklyn. The lmproved ehannel has a width of about 125 feet and a mean low water depth of 20 feet to Meeker Avenue bridge and 14 feet above. The mean range of tide is about 4 feet.

Wallabout Channel is a channel in Wallabout Bay, an lnlet of the East River adjacent to the United States Navy Yard in Brooklyn. The channel consists of a waterway extending in a half cirele around the lnside of the island known as Cob Dock and is divided into two parts by a stone causeway eonnecting the mainland with cob Dock. The eastern section of the channel is about 2,000 feet long and from 250 to 350 feet wide, and has a depth of about 20 feet at mean low water. At the head of Wallabout Channel are two bodies of navigable water, Kent Avenue Basin and Wallabout Basin, which are 2,200 feet long and 1,300 feet long respectively.

Jamalca Bay is situated on the south shore of Long Island and lies wholly within the limits of the City of New York. It is about 8 miles long and 4 miles wide, and eovers an area of approximately 32 square miles. The bay is eonnected with the oeean at Roekaway Inlet by a shifting ehannel having a least depth over the bar of about 11 feet at mean low water. An entrance channel 17 feet deep at mean low water has been dredged through the north end of the bars. The bay contains numerous smail low-lylng islands. A ehannel \(21 / 2\) miles long is under joint. improvement by the Federal Government and the City of New York. The United States is to provide and maintain the entranee ehannel and to reimburse the city for dredging the main channel in the bay; while the city is to dredge the other cnannels witnin the bay, bulkhead the shores of the bay, and fill in behind the bulkheads. On June 30, 1920, an entrance ehannel had been completed to a width of about 200 leet, and a deptn of 17 feet at mean low water.
The New Jersey Portion of the Harbor.-Newark Bay is a large estuary extending from the confluence of the Passaie and Haekensack Rivers south to Staten Island, a distance of about 6 miles. It is about \(11 / 2\) miles wide. At Staten Island the bay is ecnnected on the east with Kill van Kull and on the west witn Arthur Kili. The navigable channel in the bay lias a dredged depth of 20 feet
at mean low water and the range of tide is about 5 leet.

Passaic River is a tldal stream which is navigable for vessels drawing 6 feet of water as far as the city of Passaic, 16 miles above its mouth. In the lower portion of the river the depth of the navigable channel is 20 feet to within 800 feet of the Jackson Street bridge at Newark; thence 16 feet deep to the Montclair and Greenwood Lake railroad bridge; thence 6 feet deep to Passaic.

Hackensack Rlver is a tidal stream which merges with the Passaic River at the head of Newark Bay. It is navigable to New Milford, \(201 / 2\) miles from \(i\) cs mouth. At mean low water, 12 feet can be carried to Little Ferry, \(123 / 4\) mlles; then 10 feet through the highway dridge at Littie Ferry; thence 12 feet to Hackensack, \(21 / 4\) miles; thence quite shoal to New Milford.

\section*{THE STATEN ISLAND KILLS.}

Arthur Kill separates Staten Island from New Jersey. It is about 12 miles long. This channel, together with Kill van Kull, forms Staten Island Sound, and, with the lower end of Newark Bay, forms the inland waterway between New York and New Jersey, the boundary between the two States following the centre of the waterway. Vessels drawing 19 feet can be taken at mean low water into Newark Bay via Lower New York Bay, Raritan Bay and Arthur Kill. Vessels drdwing 23 feet at mean low water can be taken through Upper

New York Bay, Kill van Kull and Arthur Kill to Perth Amboy, N. J.

Kill van Kull, a connecting waterway about 3 miles in length, lies along the northern shore of Staten Island and extends from the lower end of Newark Bay to Upper New York Bay. Vessels having a draught of 25 feet can be brought at mean low water into Newark Bay tnrough Upper New York Bay and the channel in Kill van Kull.

Raritan Bay lies at the southern end of Staten Island and forms the western portion of Lower New York Bay. Its greatest length from north to south is about 5 miles and from east to west about 7 miles. The Raritan River empties into the bay at its western end and the Arthur Kill extends northward from lts western end. Vesscls enter the bay by way of the Main Snip-Bay-side-Gedney Channel, but a draught of not more than 21 feet at mean low water can be carried through the dredged channels at the head of the bay.

\section*{THE RARITAN RIVER.}

Raritan River empties into Raritan Bay at Perth Amboy. At mean low water vessels with a draught of 16 feet can be carried to the Washington Canal at Sayreville, a distance of 6.7 miles; thence 10 feet to New Brunswick, a distance of about 5.3 miles.

Elizabeth River is a small stream that empties into the Arthur Kill near its junction with Newark Bay. The navigable chanuel in the lower river has a depth of 7 feet at mean high water for \(11 / 2\) miles.

\section*{THE PORT OF NEW YORK AUTHORITY.}

\section*{(Headquarters, No. 11 Broadway, N. Y. City.)}

First-That terminal operations within the Port
By chapter 154 of the Laws of New York and chapter 151 of the Laws of New Jersey, 1921, Commissioners from the State of New York and Commissioners from the State of New Jersey were authorized to sign the compact between the State of New York and the State of New Jersey for the creation of the Port of New York District and the creation of Port of New York Authority. This treaty was subsequently ratified by Congress and approved by the President.

The Port of New York Authority is a body corporate and politic, having the powers enumerated in the compact for upbuilding the port. The Port Treaty says:
"The Port Authority shall constitute a body, both corporate and politic, with full power and authority to purchase, construct, lease and, or, operate any terminal or transportation facility within said district; and to make charges for the use thereof; and for any of such purposes to own, hold, lease and, or, operate real or personal property, to borrow money and secure the same by bonds or by mortgages upon any property held or to be held by it.'

The compact was signed on April 30, 1921, by Commissioners William R. Willcox and Eugenius H. Outerbridge, on behalf of the State of New York, and by Commissioners J. Spencer Smith, Frank R. Ford and DeWitt Van Buskirk, and Attorney-General Thomas F. McCram, on behalf of the State of New Jersey. Attorney-General Charles D. Newton of the State of New York signed the compact on May \(6,1921\).

\section*{PERSONNEL OF THE COMMISSIONS.}

The Commissioners from New Jersey were appointed April 7, 1921; those from New York State on April 16, 1921. Their names, with year of expiration of term in parentheses, are: Eugenius H. Outerbridge, Chairman, New York City (July 1 1928) : Alfred E. Smith, New York City (July 1. 1926) ; Lewis H. Pounds, Brooklyn (July 1, 1924); J. Spencer Smith, Vice-Chairman, Tenafy, N. J. (July 1, 1923); DeWitt Van Buskirk, Bayonne, N. J. (July 1, 1924); Frank R. Ford, Caldwell, N. J. (July 1, 1925); George W. Goethals, Consulting Engineer; B. F. Cresson, Jr., Chief Engineer; Julius Henry Cohen, Counsel; William Leary, Secretary; C. A. Ruhlmann, Assistant Secretary.

The Port Authority was delegated with the duty of recommending a comprehenslve plan for the development of the Port of New York and such plan was approved by the Legislature of New Jersey on February 20, 1922, and New York on February 21, and approved by Congress in June. President Harding on July 1 signed the Congressional Resolution. Thus the Port Authority is the recognized agency of the two States and the Federal Government in developing the Port of New York.

The Port Authority seeks to co-ordinate and extend the facilities of the Port of New York in pursuance of these fundamentai principles:

District, so far as practicable, should be unified. Second-That there should be consolidation of shipments at proper classification points so as to eliminate duplication of effort, inefficient loading of equipment and realize reduction in expenses.

Third-That there should be the most direct routing of all commodities so as to avoid centres of congestion, conflictlng currents and long truck-hauls.

Fourth-That terminal stations established under the comprehensive plan should be union stations, so far as practicable.

Fifth-That the process of co-ordinating facillties should so far as practicable adapt existing facilities as integral parts of the new system, so as to avoid needless destruction of existing capital investment and reduce as far as may be possible the requirements for new capital; and endeavor should be made to obtain the consent of the States and local municlpalities within the Port Dlstrict for the co-ordination of their present and contemplated port and terminal facilities with the whole plan.

Sixth-That freight from all railroads must be brought to all parts of the port wherever practicable without cars breaking bulk, and this necessitates tunnel connection between New Jersey and Long Island, and tunnel or bridge connections between other parts of the port.
Seventh-That there should be urged upon the Federal authorities improvement of channels so as to give access for that type of water-borne commerce adapted to the various forms of development which the respective shorefronts and adjacent lands of the port would best lend themselves to;

\section*{MOTOR TRUCK HIGHWAYS.}

Eighth-Highways for motor truck traffic should be laid out so as to permit the most efflcient interrelation between terminals, piers and industrial establishments not equlpped with railroad sldings and for the distribution of building materials and many other commodlities which must be handled by trucks; these.highways to connect with existing or projected bridges, tunnels and ferries.

Ninth-Definite methods for prompt relief must be devised that can be applied for the better coordination and operation of existing facilitles while large and more comprehensive plans for future development are belng carried out.

Measures of immediate reliel from present harbor conditions, such as the consolidation of marine equipment, and the establishment of motor trunk line highways and the increased use of motor truck. facilities, are provided in the Port Authority programme.

The commission has authority to hold public hearings and has conferred with committees of railroad Presidents, steamship offcials, and all other official and civic bodies wlthin the Port Distrlet as well as with the representatives of the various busincss interests. The Port Authority has ais conferred with munlcipal, State, and Federal o ficials on phases of port planning.

\section*{200 COMPANIES OPERATE SHIPS AT THIS PORT.}

There are approximately 200 companies operating
Port of New York, says a ships into and out of the Port of New York, says a sels annually enter and clear the port in forelgn commerce, and posslbly nearly as many more in coastwise servlec. The tonnage of forelgn vessels enterlng the port in 1920 was \(17,404,188\), which was over 27 per cent. of the total tonnage entering the United States.

The inland waterway connections wlth the Port of New York are numerous. Buffalo and the Great Lakes are connected by the Hudson River and the New York State Barge Canal; New Eingland by Jong Island Sound and the Cape Cod Canal; Southern States by the Delaware and Rarlian Canal and
the Delaware Rlver: the Chesapeake and Delaware Canal to Chesapeake Bay ports.

Every important railroad in the United States serves New York either by lts own railroads or by through traffe arrangements with the railroads leading to the port or by a coastwise steamship) service from some other port. Convenient intracomniunication between the different parts of the harbor is afforded by the many waterways, rivers, channels and bays provided by nature and modern engineering science.

The area of the port is 175 square miles, and it is estimated that any slx of the other leading ports of the world could be placed within thls area wlth plenty of room to spare.

SHIPPING TONNAGE PORT OF NEW YORK.

Staten Island-Piers 1 to 21, extending from Tompkinsville to Clifton, are privately owned. So are B. \& O. R. R. piers 1 to 8 , bet. 'St." George and New Brighton; "also the Nicholas Ave. pier at Port Richmond. The city owns the Harbor Road Pier, Mariners' Harbor, and the pier at Rossville. The piers at Holland Hook and at Tottenville are privately owned.

The city has built at Stapleton 12 piers, 1,000 to 1,184 feet long, and 125 to 209 feet wide, four covered with two-story sheds, and eight with one-story sheds. . One of the piers is reserved by the city for open wharfage, or general commercial use. The others, eleven in number, have been rented by the city for a term of years to various ocean steamship companles, the rent belng fixed at \(71 / 2\) per cent. a year on the construction cost, which.was \(\$ 20,000,000\) for the 12 plers. They were commenced in 1920 and they furnish 26,000 llnear feet of wharfage, and \(1 ; 800,000\) square foet of pier space

Piers A and New No. 1, at the Battery, North River, are the only stone piers in the city. The new city-owned pier at Roosevelt St., East River, Manhattan, is of concrete, and the city-owned pier at Barren Island, Jamilica Bay, rests on concrete biling.

\section*{CIVIL SERVICE RULES IN THE CITY OF NEW YORK.}

Brnopsis of regulations governing the admission of persons into the Ciyil Service of the Clty of New York. Information may also be hadd by applying.ta the Secretary of the Municipal Civill Service Commission. Municipal Buildin, 14 th floor.

Under the White Civil Service Law, Chapter 370. Laws of 1899; April 19, the rules apply to alipositions In the service of the City of New York except officers elected by the pepple, all legislative officers and employees, heads of any department, or superintendents. principals, or teachers in a pubile school, academy. or college. This" requires "examinations, wherever practicable, to ascertain the fitness of applicants for adpointment to the Civil Service of sald.city. \(\because\) The Constitution requires that these examinations shall be' competitive, "so far as practicable."

There are approximately. \(55,000^{\circ}\) permanent employees in the city serylce, exclusive of the teaching force of the Department of Education.

The entire Administration of the City of New York is divided into two general services; namely, the Unclassified Service and the Classifed Service: The Unclassifted Service includes all, elective offcers; the officers and employees of the Board of Aldermen; members of the Board of Dlections; the head, or heads, of any department of the City Government; or any person appointed by name in any statute.

The Classifted Service includes all positions not in the Unclassifled Service.

The Classified Service is divided into four classes; namely:

Exempt Class-The Exempt Class includes the deputies of princlpal executive offcers authorized by law to act generally for and in place of their princtpals: one secretary of each officer, board, and commission authorized by law to appoint a secretary; one clerk and one deputy clerk, if authorized by law, of, each court, and one clerk of each elective Judicial officer. In addition thereto there may be included in the Exempt Class all other subordinate offees for the flling of which competitive or noncompetitive examination may be found to be not practicable.

Non-Competitive Class-Includes ali those positions of a minor nature, in the city institutions or elsewbere, that it is not practicable to fll through competitive examination.

Labor Class-Includes all unskilled laborers and. such skilled laborers as are not Included in the competitive or non-competitive classes.

Competitive Class-Includes all positions in the Classified Service (excepting those in the Exempt, Non-Competitive or the Labor Class) for which it is practicable to determine the merit and itness of the applicant by compettive examination.

Vacancles in the Exempt Class may be filled without examination, appolntments being made by the Mayor or other offilal having jurisdlction over the department where the vacancy exists
Positlons: in the Non-Competitive Class are filled as a result of the examinations held by the department where the person is to be employed. Filing, Applications for Positions in Competitive Class-Applications for positions in the

Competitive Class will be issued and recelved only for the position or positions advertised, and only during the pertod specitied by the commission in such advertisement. Advertisements for the various examinations appear \(1 n\) the prominent daily papers and In the Clty Record. The City Record is on fle in the reading room of any of the city libraries.

Ali applications for an examination must be on a prescribed form addressed" to the "Secretary of the Municipal Civil Service Commission." When an examination is advertised application blanks may be obtained at the "office of the commission, Room 1400.

Applicatlon jblanks will be mafled upon request provided a seif-addressed stamped envelope or sufficient postage is inclosed to cover the mailing. The commission will not guarantee the delivery of the same... Postage on applications forwarded by mall must be fully prepaid.

Applicants must be citizens of the United States and residents of the State of New York. The requirement as to resldence may be waived by the commission, but only with the proviso that applicants become residents of the State of New York brior to the date of their appointment.
Applleants for patrolmen must have resided within the State of New York at least one (1) year prior to the date of appointment.

The preseribed application form filled out in the applicant's handwriting sets forth the following:
The applicant's name, age, residence, statement regarding citlzenship or inaturalization, statement regarding -arrests or previous service in a City Department, if any, and also the certificate for citizens whose residences or places of business are within the City of New York.
In examinations for positions requiring previous experience, applicants must fil in and file with their application an experience paper. . In some examinations where experience is, a qualifying \(x\) subject applicants recelving less than the minimun passing applicants recelving less than the minmun passing
mark in this paper are barred from the remainder of the examination.
Applications for positions in the Labor Class are issued and received, continually

Applicants for all positions in the Competitive and the Labor Classes are required to take a medical and physical examination

Applicants for Labor Class positions that-require previous training or experience must take an oral or practical test; no written examination is given to appllcants.

\section*{CONDUCT OF EXAMINATIONS.}

Applicants 'shall be admitted to examination upon the production. of the official notification to appear for that purpose.
All paper upon which examinations are to be written shall be furnished to the applicants by the examining board and shall bear some suitable offcial indorscment,stamp, or mark, for the purdose of identifying the same:

All examinatlons shall be in writing, except such as refer to expertness or physical qualities, and except as herein otherwise provided.
The sheets of questions shall be numbered and shall be given out in the order of their numbers each, after the first, being given only when the competitor has returncd to the examiners the last sheet given to him. In general, no examination shall extend beyond five hours wlthout intermission, and no questlons given out at any sesslon, to any candidate, shall be allowed to be answered at another session.

The time allowed for completing the examination shall be announced before the first paper is given out.

The following municipal departments and offces come under jurisdiction of Civil Service rules:

In 1696 the population of New York Clty was 4,302 , of whom 575 were negroes.
In 1711. a slave market was established in Wall St., near East Rlver.
MARITAL CONDITION IN NEW YORK CİTY. 1920.
(U. S. Census Figures.)

The population of New York Clty, (5,620,048, on \(\mid\) married men exceeds that of marrled women- 76.4 Jan. 1, 1920), comprised 2,001,025 males 15 years of age and over, of whom \(1,143,643\), or 57.2 per cent., were marrled; and \(2,026,797\) females above the same age limit, of whom \(1,115,670\), or 55 per cent., were married. In the earlier years of adult life the proportion married is much larger for females than per cent.' as agalnst 54.3 per cent. The obvious explanation ls that women marry at younger ages than men. There were in the population of New York City on the census date 78,999 widowers, 232,991 widows, 4,303 divorced men, and 6,775 divorced women. The population 45 years of age and over lncluded 62,902 single men and 63,341 for males, but after the age of 45 the proportion of slngle women.

\section*{FOREIGN WHITE STOCK IN N. Y. CITY.}

The Department of Commerce announces that, according to the Census of 1920 , the foreign white stock in the population of New York City on Jan. 1 of that year numbered 4,294,629. By "foreign white stock" is meant the total loreign-born white population plus the native white population having one or both parents foreign-born. The corresponding total for 1910 was \(3,747,844\), and the increase between 1910 and 1920 was 546,785 , or 14.6 per cent.

The foreign white stock constituted 76.4 per cent. of the total population of the city in 1920 ( \(5,620,048\) ), as against 78.6 per cent. of the total in 1910 (4,766, 883) The foreign white stock in 1920 comprised 1,991,547 persons who were themselves foreign-born and came to this country as immigrants and 2,303 ,082 who were born in this country but whose parents, one or both, were immigrants.
The classification of the foreign white stock by country of origin is based upon the pre-war map of Europe.

\section*{STRANGERS IN THE CREAT METROPOLIS.}

It is estimated that there arc, on every day in the year, at least 100,000 strangers in the City of New York. They do not count, of course, in the eensus popuiation. They come by water and by land, and tarry a while. The following figures show the numbers of strangers, visitors and commuters who arrived and departed in 1921 by the various raliways:

Baltimore \& Ohio, 551.880; Central of N. J.; 16, 718.099; D.. L. \& W.. 21,594.743; Eric, 30,026.406; Lchigh Valicy, 829,706; Long Island, 60,386,698; New Haven, 16,653.438; New York Central, 28.434,974 ; Ontario \& Western, 619,658; Westehester \& Boston, 5,395,365; Pennsylvania, 39,936,082. Total, 220,847,049.

FOREIGN-BORN WHITE AND COLORED IN NEW YORK CITY.

THE WEATHER，JANUARY－SEPTEMBER， 1922.
Up to the close of the month of September，there year，as against the numerous＂dry＂years at the
was in 1922，in the City of New York，an accumu－ lated excess of 3.73 inches of rainfall over the nor－ mal，since Jan．1．There also was considerable rain in October，enough to insure 1922 as a＂wet＂－
metropolis since 1909．In that period of thirteen years there are only two that show a total rainfall of more than 43.21 inches－the so－called average annual total at this city．

MISCELLANEOUS DATA FOR 1921.
Barometric Pressure (reduced to sca level)-Mean, 30.05 inches; highest, 30.97 inches, January 19 ; lowest, 29.35 inches, December 12.
Temprrature-Greatest daily range, \(44^{\circ}\), March 28; least daily range, \(4^{\circ}\), August 3. Greatest monthiy
range, \(55^{\circ}\), March; least monthiy range, \(31^{\circ}\), July. Highest mean of three consccutive days, \(81^{\circ}\),
July 26-28; lowest mean of three consecutive days, \(17^{\circ}\), January 17-19.
Precipiration -Longest period without a measurable amount of precipitation ( 0.01 inch or more), 15 days, August 19-September 2. Greatest number of consecuijve days with precipitation ( 0.01 inch or more), 6, June 26-July 1.
SNow-Greatest amount in 24 hours, 12.5 inches, February 20. Greatest depth of snow on the ground,
measured at 8 P. M., 12.0 inches, February 20. Last show in spring occurred April 11; first snow
in autumin oceurred November 13.
ost-In spring: iast kiling frost occurred April 11; last ligit. frost occurred April 20. In autumn:
first light frost occurred October 9 ; first killing frost occurred October 27.
Thunderstorms-First, January 5; last, October 20.
Hall-None at station.
Aulloras-May 14. 15.

\section*{THE WATER SUPPLY OF NEW YORK CITY.}

\section*{(For The Almanac; by Merritt H. Smith, Chief Engincer.)}

Manhattan and Bronx-The Boroughs of Manhattan and Bronx, prior to the introduction of Catskill water, were supplied entirely from the Croton watershed and from the Bronx and Byram watershed, the latter being now part of the Catskill system. Croton water was first introduced in 1842. Water from the Bronx River was introduced in 1854, and from the Byram River in 1896! The Croton watershed furnishes about half of the present supply for Manhattan and Bronx, the other lialf being supplied from the Esopus watershed. The Esopus watershed in the Catskills, from which the Catskill supply is obtained, has an area of 257 square miles. The watel from the Esopus watershed is collected in the Ashokan Reservoir, about fourteen miles west of the Hudson at Kingston, N. Y., and about ninety-two miles from the northern city boundary. The available. supply from the Esopus watershed is increased by the ralnfall and run-off on some twenty-two square miles of watershed (the Bronx and Byram watershed) tributary to Kensico Reservoir, which lies east of the Hudson River, and about seventeen miles from the northern city boundary. Under average rainfall and run-off conditions the available supply from the Esopus watershed is \(375,000,000\) gallons daily, and from the Bronx and Byram watershed about \(20,000,000\) gallons daily, making the total available supply of water from the Catskill system \(395,000,000\) gallons daily; the safe minimum yield from these two sheds is \(315,000,000\) gallons daily

The Croton watershed, which lies some 22 miles north of the clty line, has an area of 375 square milles and a safe minimum yield of \(336,000,000\) gallons daily. Under average rainfall and run-off conditions the yield of this shed is \(400,000,000\) gallons daily. The water from the Croton watershed is collected in twelve reservoirs and six lakes and ponds.
Brookiyn-The Esopus watershed together with
the old Brooklyn system furnish the entire supply for the Bolough of Brooklyn, with the exception of the Twenty-ninth Ward, which is supplied by the Flatbush Water Works Company, a private water company, the sourcc of supply being ground water collected from driven wells. The supply from the old Brooklyn system, which yielded about 150.000 ,000 gallons, and which is now for the greater part held in reserve, was obtained from driven wells, infiltration galleries, and small streams along the south shore of Long Island. This supply, was tirst introduced in 1859.

Queens-The city supplies only the First, Second and Third Wards in the Borough of Qucens. The Esopus watershed furnishes a bout 70 per cent. of the supply to these wards. The First Ward was formerly supplied from the Brooklyn system, supplemented by a small amount derived from the municipal driven well pumping stations in the Flrst and Third Wards. . The Third Ward was supplied by two pumping stations, now held in rescrve, one station drawing its supply from driven wells and the other obtaining about halr its supply from wells and one-half from a small lake, the water being filtered The combined yield of the two plants is about 6,000 , 000 gallons daily. The supply to the Second Ward was formerly furnlshed by the Citizens' Water Supply Co. This plant was taken over by the city in April, 1922. The Fourth and Fifth Wards, Queens, are supplied by private water companies, the source of supply being entirely ground waters, collected by means of driven wells. There are three of these private companies, with three others serving special customers.
Richmond-The Borough of Richmond is supplied from the Esopus watershed, supplemented by a small amount (about \(7,000,000\) gallons daily) de rived from wells pumped at two stations. Silver Lake Reservoir, the terminal reservoir for the Catskill system, is located in this borough.

\hline
\end{tabular}

The figures by boroughs show oniy daily consumption of city water. The total column shows daily city water consumption plus consumption of water of private companies. In 1920, for example, the total daily consumption in Brooklyn, including private water, was 200,700,000 gallons; in Queens, 49,600,000 gallons. Private companies supplied 13,500,000 gallons in Brookiyn, and \(31,500,000\) in Queens.

WATER CONSUMPTION IN NEW
Catskill water was introduced into the city in 1917. Before that the supply in Manhattan and the Bronx was drawn from the Croton watershed, with al llttle from, the Bronx and Byram water. shed; the supply in Queens and Richmond was

YORK UITY-GALLONS PER DAY.
drawn from local Long Island sources; and Brooklyn got most of its water from wells, ponds, and riprings out on Long Lsland, in Southern Nassau and Suflolk Countles. Private water companies still supply water in the boroughs of Brooklyn and Queens.

OTHER DATA ON' THE WATER SUPPLY.
The new Catskill Mountain water supply is at gravity system. For New York Clty's Catskill Mountain water system there are two contiguous irainage areas, or watersheds, occupying the central portion of the Catskill Mountains lying betwfen 8.5
and 125 miles from New York The Schoharle watan:ned has an area of 314 square miles. Esopus has an area of 257. square miles. These two watersheds have a total area of 571 square miles, from which \(1800,000,000\) gallons of water daily can safely be
drawn throughout each year. Along the aqueduct provislons have been made for storing a large quantity of water. From the Ashokan reservoir lt is almost a three-days' journey for the water to flow through the aqueduct to the Silver Lake termlnai reservoir on Staten Island.
For surveys, real estate, construction, engineering and general supervislon, and all other items except interest on the bonds, the total cost of the completed Catskill system will be about \(\$ 177,000,000\), of which \(\$ 22,000,000\) is for the Schoharie works.

Ashokan reservoir, about fourteen mlles west of the Hudson at Kingston, was built at a cost of nearly \(\$ 30,000,000\). The water whlch the reservolr holds would cover all Manhattan Island to a depth of thirty feet; the area of its surface Is equlvalent to that of Manhattan below One Hundred and Tenth Street. The water surface of the west basln when full is at an elevation of 590 feet above mean tide in New York Harbor.

Kenslco reservoir, east of the Hudson, and thirty miles from the City Hall, contains enough Catskill water te supply New York several months if carefully husbanded. It acts as a storage reservolr. Thls reservoir is formed by the Kensico dam across the valley of the Bronx River, about three miles north of White Pialns and fifteen miles north of the Hill Vlew reservoir. The total cost of Kenslco reservoir was about \(\$ 13,500,000\). It is 355 feet above tidewater.

Hill View reservoir is located \(\ln\) the Clty of Yonkers, just north of the New York Clty line, and fifteen miles south of Kensico reservolr. Its functlon is to equalize the difference between the use of water ln the clty as it varies from hour to hour and the steady flow in the aqueduct. It ls an uncovered, artlficial reservoir of the earth embankment type. It hoids \(900,000,000\) gallons of water, wlth a depth of \(361 / 2\) feet and has a water surface of 90 acres. The total cost of Hill View reservoir was about \(\$ 4,700,000\). It was first fllled December 29, 1915. It is 295 feet above tidewater.

The Hudson Rlver is crossed by means of a tunnel wholly in granitic rock, at a depth of 1,114 feet below sea level, between a shaft at Storm King Mountain on the west bank and another shalt on the east slde of the river at Breakneck Mountaln.

At the Ashokan reservoir, and also at Kensico reservolr, aerators have been built. The aerators are substantially alike and are great iountain basins, approximately 500 1eet long by 250 feet wlde, each contalnlng about 1,600 nozzies, through whlch jets of water are thrown vertlcally into the air, permltting thorough admixture of oxygen from the atmosphere and removai of undesirable gases and other matters causing tastes and odors.

Wlthln the screen chamber down stream from Kensico reservolr chlorlne is introduced into the water flowing in the aqueduct for the destruction of germ life. The gas is delivered at the chamber compressed to a llquid state in steel contalners holdlng one hundred pounds each. Chlorine is used to lnsure the practlcal sterllization of the water before it goes to the city and is wholly neutralized or disslpated before the water reaches the distribution plpes.

From Hill View reservoir, Catskill water ls delivered lato the five boroughs by a circular tunnel in solid rock reducing in dlametcr from 15 to \(14,13,12\), and 11 feet. The total length of the tunnel is eighteen mlles. From two terminal shafts in Brooklyn, steel and cast lron pipe lines extend into Queens and Richmond. A 36-lnch flexlbie-jolnted cast Iron plpe, burled in a trench In the harbor bottom, has been laid across the Narrows to the Staten Island siore, whence a 48 -inch cast lron plpe extends to the Silver Lake reservolr, holding \(435,000,000\) gallons. The total iength of the dellvery systern ls over thirtyfour mlies. The tunnei is at depths of 200 to 750 feet below the street surface, thus avoiding interference with strcets, buildings, subways, sewers and pipes. : Tnese depths are necessary, also, to secure a
substantlal rock coverlng to withstand the bursting pressure of the water Inside and afford tne requlsite watertightness. The waterway of the tunnel is iined throughout with Portland cement concrete.

The city tunnel, which is the longest tunnel in the world for carrylng water under pressure, or for any other purpose, was constructed from twenty-flve shafts, including the downtake shaft at H1ll View reservolr, about 4,000 feet apart, located in parks and other places where they interfered very little wlth traffic. Through twenty-two of these sinafts the water is delivered into the street mains. Tnese connections from the tunnel to the malns are made by means of vertical rlveted steel pipes (called rlsers) embedded in concrete ln the upper part of each shaft and IIned with concrete to prevent corroslon inside. Concrete fills all spaces ouiside the risers, sealing the shafts against the escape of water excepting through the plpes. Provision is made at Shaft 11, in Mornlngside Park, and at Shaft 21, on the shore of the East Rlver, at Clinton and South Streets, Manhattan, for unwatering the tunnel, whenever necessary, for inspectlon, cleanlng or repairs. Unusual features in connection wlth the operation of the tunnel are the bronze rlser valves in the shafts. The former are located about 100 feet below the top of sound rock and are deslgned to close automatlcally in case of an important break in the valve chamber or in the street mains. They can also be closed by hand from within the chambers at the shaft tops.

The cost of the portions of the Catskill aqueduct wlthin the clty llmits, including the tunnel, plpe lines, appurtenances and Silver Lake reservoir, was about \(\$ 26,400,000\).

The terminal Sllver Lake reservoir for the Catshlll Water system, located on Staten Isiand, is about 2,400 fect long and 1,500 feet wide. It holds 435 ,000,000 galions, and is 228 reet above tldewater.
GIVING NEW YORK.CITY FIRE PROTECTION.
High Pressure F'ire Service System-The hlgh pressure fire service system. In Manhattan is bounded by Thirty-fourth Street, M:2dison Avenue, Twentyfourth Street, Lexington Avenue, Fourteenth Street Third Avenue, Bowery, Houston Street, East River, Battery, North River. There are two pumping sta-tions-Gansevoort and West Streets, and Oliver and South Streets. Each statlon has slx electrically driven centrifugal pumps. Either fresh or salt watcr may be used. Each pump can dellver 3,000 gallons a minute. The combined capaclty of the two stations is equal to about fifty fire engines. The distributing system conslsts of 128 miles of mains eight to twenty-four inches in diameter, and about 2,750 four-nozzle hydrants. There are approximately 696 telepnones communicating wlth. Fire:Department headquarters and with the maln and subsldiary statlons of the New York Edison Company from which the necessary electric power is obtained. The present system cost about \(\$ 9,380,000\).

In Brooklyn there are two high pressure fire service systems. The one for the buslness and manufacturlng districts ls bounded by the Navy Yard, St. Edward's Street, St. Feiix Street, Fort Greene Place. Flith Avenue, Twenty-fourth Street, Fourth Avenue, Thlrty-ninth Street and the water front, covering an area of 4.8 square mlles. The supply is furnished by two statlons, one located at the foot of Joralemon Street, and the reserve at Willoughby and St. Edward's Streets. Both draw thelr supply from the Ridgewood mains. The main station is connected to the East Rlver. The pumps are eiectrlcally operated \(\ln\) both statlons, and have a comblned rated capacity of 24,000 gallons per minute. The dlstributing system consists of about forty-five miles of malns, elght to twenty'inches in diameter.

The Coney Island high pressure system protects an area of 470 acres. The pumping station is located at West Twelfth Street and Coney Island Creek. The total capaclty is 4,500 galions per minute. The water is distributed through six miles of mains.

\section*{LAFAYETTE PANEL, BROOKLYN.}

The bronze Lafayette panel, Prospect Park, at 9 th St., Brooklyn, was dedicated on May 10, 1917. Marshal Joftre, hero of the Marne, unveiled the statue, which was accepted for the clty by Mayor Mitchel. Former Premler Viviani, who headed the French Commlssion to the United States, spoke, as dld Marquis de Chambrun. great-grandson of Ialayette. The work cost \(\$ 35,000\), the gift of the Henry Marteau estate. The sculptor was Daniel Chester French. The monument conslsts of a panel of bronze about 12 feet long and 10 reet high, agalnst which is a figure of Laiayette in the uniform of a General in the Continental Army, "wlth a negro holding his horse s nead. The panel rests against a structure of granite of Itallan Renalssance design.

\section*{MEMORIAL ARCH, BROOKLYN.}

The chief monument in Brooklyn is the white marble Soldiers and Sailors Arch, surmounted by bronze groups, designed by Frederick W. MacMonnles. It stands at the plaza entrance to Prospect Park, Union Street. Flatbush and Vanderblit Avenues.

\section*{PARKS IN THE CITY OF NEW YORK.}

The total area of improved parks in Manhattan is 1,275 acres; unimproved parks, 209 acres; playgrounds, 5 acres; parkways, streets, etc., under jurisdiction of Department of Parks, 40,929 feet long, wldth varying from 90 to 168 feet.

\section*{PARKS IN MANHATTAN.}

\section*{Battery, foot of Broadway. 21 aeres.}

Bryant, 6 th Ave. and W. 42 d St. \(43 / 4\) acres.
Carl Schurz, between Ave. \(B\) and East River, E. 84 th St. to E. 89 th St. \(121 / 2\) acres.

Central, 843 acres (see below).
Chelsea, 27 th St. and 9 th Ave. 3 acres.
City Hall Park, Broadway, Park Row, and Chambers St. 8 acres.
Colonial, 145 th to 155 th St., Bradhurst Ave. to Edgecombe Ave. \(123 / 4\) acres.
Columbus, Mulberry and Bayard Sts. \(23 / 4\) acres.
Corlears Hook Park, Corlears and South Sts. 8 acres. De-Witt Clinton, \(52 d\) to 54 th St., North River. 7 acres.
Fort Washington, Ft. Washington Point, Hudson River. 40 2-3 acres.
Hamilton Flsh Park, Houston and Willett Sts. \(31 / 2\) acres.
Highbridge Park, 155th St. to Washington Bridge, west of Driveway. 75 2-3 acres.
Isham, 213th St. and Broadway to Harlem Ship Canal. 8 acres.
John Jay, 76 th to 78 th St., East River. 3 acres. Kuyter Park, 129th St. and 3d Ave. . 298 acres. Madison Square, Broadway and 23d St. \(63 / 4\) acres.

Manhattan Square, Central Park W., 77th to 81st St. \(171 / 2\) acres.
Morningslde, between Columbus and Amsterdam Aves. and W. 110 th and W. 123 Sts. \(311 / 4\) acres. Mount Morris, between Madison and Mt. Morris Aves. and 120 th and 124 th Sts. 20 acres.
Park Ave., 34th to 42d St.; 56 th to 96 th St. 8 acres. Rlverslde Drlve Extenslon, 135 th St. to 158 th St.
Rlyerside Park, between Riverside Drive and the N. Y. C. R. R. and W. 72 d and W. 129 th Sts. 140 acres; and from 135 th St. to 158 th St. 24 acres. St. Gabrlel's Park, 1 st Ave. and 35 th St. 3 acres. St. Nicholas, 130 th to 141 st St., St. Nicholas Ave. to St. Nicholas Terrace, \(193 / 4\) acres; and west of St. Nlcholas Terrace and the extension at 130 th and 141st Sts. \(71 / 2\) acres.
Seward, Canal and Jefferson Sts. 3 acres.
Straus, 106 th St. and Broadway
Stuyvesant, Rutherford Pl. and E. 16th St. 4 acres. Thomas Jefferson, 111 th St., 1 st Ave., 114 th St. and Harlem River. \(151 / 2\) acres.
Tompkins Square, Avenue A and 7th St. \(101 / 2\) acres.
Union Square, Broadway and 14 th \(\mathrm{St} .31 / 2\) acres.
Washington Square, 5 th Ave. and Waverley Pl. 8 acres.

\section*{PLAYGROUNDS-MANHATTAN.}

Abingdon Square at Hudson St.
Carmansville, Amsterdam Ave. and 151st St.
Cherry and Market Sts.
Five Polnts Playground, Baxter and Worth Sts.
Fifty-ninth Street Playground, west of Amsterdam Ave.

There are also playgrounds ln the following named parks: Battery, Chelsea, Colonlal, Columbus, Corlears Hook, De Witt Clinton, Hamilton Flsh, Hudson, John Jay, Thomas Jefferson, Morningside, Mount Morris, Rlverside, at 97 th Street and ball ground at 79 th Street, Ryan, St. Gabriel's, St. Nlcholas, Carl Schurz, William H. Seward, Tompkins Square.

Of the parks in Manhattan named In the above llst, Fort Washington, Highbridge, St. Nlcholas, and Isham are unimproved. The Harlem River Drlveway is 11,562 feet long and 100 to 150 feet wide; Morningside Drlve is 3,538 feet long and 90 feet wide; Riverside Drive is 17,000 feet long and 90 to 168 feet wide, and the extension, 135 th to 158 th Street, is 6,560 feet long.

\section*{SOME FACTS ABOUT CENTRAL PARK.}

The great park of New York extends from 59th St. to 110 th St., being over \(21 / 2\) miles long, and from 5 th Ave. to 8 th Ave., being over half a mile wlde. It covers. 843 acres, of which 185 are in lakes and reservoirs and 400 ln forest, wherein over half a mlllion trees and shrubs have been planted. There are \(101 / 4\) miles of roads, \(51 / 2\) of brldle paths, and 31 of walks. The landscape archltects of the park were Frederick Law Olmsted and Calvert Vaux. Work was begun on the Park in 1857. The following fanciful names have been officially applied to the several entrances to the Park: 5th Ave. and 59th St., Scholar's Gate; 6th Ave. and 59th St., Artist's Gate; 7th Ave. and 59th St., Artlsan's Gate; 8th Ave. and 59 th S . \({ }^{\prime}\) Merchant's Gate; 8th Ave. and 72d St., Woman's Gate; 8 th Ave. and 81st St., Hunter's Gate; 8th Ave. and 85th St., Mariner's Gate; 8th Ave. and 96 th St., Gate of All Salnts; 8th Ave, and 100 th St., Boy's Gate; 8 th Ave. and 110 th St., Stranger's Gate; 5 th Ave. and 67 th St., Student's Gatc; 5 th Ave. and \(72 d\) St., Children's Gate; 5 th A ve. and 79th St., Miner's Gate; 5th Ave. and 90th St., Engineer's Gate; 5th Ave. and 96th St., Woodman's Gate; 5 th Ave, and 102d St.: Girl's Gate; 5 th Ave. and 110th St., Ploneer's Gatc; 6 th Ave. and 110 th St., Farmer's Gatc; 7 th Avc. and 110th St., Warrior's Gate.

\section*{UNION SQUARE.}

Union Square was purchased by the clty \(\ln 1833\) for \(\$ 116,051\); Madison Square, \(\ln 1847\), for \(\$ 65,952\); Tompkins Square, in 1834 for \(\$ 93,358\); Washington Square, in 1827, for \(\$ 77,970\); and Manhattan Square, In 1839 , for \(\$ 54,657\).

The first park spacc in the Clty of New York was that now ealled Bowling Green Park. In 1732 this plot of ground was leased by citizens for playing the zame of bowls. The plot was originally square and in the middle there was erected, in 1770 , a lead statue of Ge rge III. After the Declaration of Independence the statue was torn down by a mob and the lead uscd
fo making bullets for the American army. In 1786 Bowling Green was first laid out as a park. At that time lt was the centre of the fashionable residential distrlct.

THE BATTERY.
Open water existed originally where the staten Island Ferry houses now stand, and the site of the Aquarium was under water untll about 1800 . State Street was not lald out until 1789, and was then bounded by the Bay on one slde. A ledge of rocks stretched across Manhattan Island, and facing these rocks along the edge of the water there was built in the early days a llne of defensive works known as "The Battery." These works extended from Whitehall Street to what is now Rector Stree \(i\), and cannon werc mounted behind them: About 1723 the first steps were taken to fill in to the prescnt water line. but many years passed before this was aetually accompllshed.

\section*{CITY HALL PARK.}

The present City Hall Park constitutes a part of what was known in the latter half of the seventeenth century as "The Common Lands," which stretched from the slte of the Post Offlce northward toward the Toinbs and from the line of Broadway across what is now Park Row. This land was originally used for the grazing of cattle and at lts northeasterly end was what was known as "Fresh Water Pond." The land orlginally comprising The Commons was gradually reduced by the laying out of streets and the construction of buildings. At the close of the Revolutionary War lmprovements were begun in City Hali Park. The erectlon of the present City Hall was authorized in 1803 and it was ready for occupaney in 1811. During the Civil War the present site of the Post Office Bulding was occupled by sheds where the soldiers were supplied with food. After the war it was ceded to the United States Government as a Was ceded to the Officc.
sitc for the Post Offer

\section*{1,000,000 TREES IN THE ENTIRE CITY.}

There are in Manhattan Borougl, according to Park Cominissioner Francis D. Callatin, about 130,000 lrces, of elghty varieties, of which 90,000 are in Central Park, 25,000 in other parks, and 15,000 in the strects. These tiees die at the rate of 3,500 a year, and 2,500 new trees are planted. In the entire ilty there are, it is estimated, over \(1,000,000\) trees.

18-hole course.
Silver Lake, bounded by Revere Ave., University Pl.. Forest Ave., Richmond Turnpike and Clove Pl. 96.27 acres water; 68.84 acres land

Tompklnsville Sq., bounded by Arrietta, Bay and Griffin Sts. 0.44 acres.

Barrett Park, at St. George; 0.20 acres.
Westerleigh. Park, bounded by Maine, Williard, Springfield and Neal Dow Aves.; 1.43 acres.

Washington Park, Stapleton, bounded by Bay, Canal, Wright and Water Sts.; 1.43 acres.

Hero Park, bounded by Richmond Turnpike, Louis St. and Howard Ave.; 1.92 acres.

Clifton Park, bounded by Vanderbiit Ave., Bay St., and the Rapid Transit R. R.; 0.18 acres.

Port Richmond Park, bounded by Park and Heberton Aves., and Bennett and New Sts.; 1.28 acres.

Among the proposed parks is Clove Lake Park, 191 acres, bounded by Forest, Slosson and. Brookside Aves.

PARKWAYS IN RICHMOND BOROUGH
St. Austins Place, New. Brlghton, between. St. Austins Place N. and St: Austins Place S.; 0.14 acres.
Haven Esplanade, Forest Ave. to Castleton Ave.; 0.18 acres.

Henderson Avenue, New Brighton, Henderson Ave, east slde and Davis Ave.; 0.01 acres.
Canal Street, Stapleton, between Broad St. and Wright St.; 0.20 acres.
Ellicott Place, New Brlghton, between Arnold St. and Prospect Ave.; 0.10 acres.

Maple Avenue, Mariners Harbor, between Netherland Ave. and Linden Ave.; 0.64 acres.

\section*{PUBLIC MARKETS IN NEW YORK CITY,}

\section*{Under the supervision of the Municipal Department of Public Markets.}

THE public markets are West Washington, Gansevoort, Washington, Jefferson and Delancey in Manhattan, and Wallabout in Brooklyn.

Washington Market, at Fulton and West Streets, covers an area of \(175 \times 203\) feet, and was established in 1812. Meat, fish and game, butter, eggs, cheese, fruits and vegetables are sold there. The city charges for space in this market.

West Washington Market, established in 1889 at Gansevoort and West Streets, covers 369 x 400 feet. There aré ten buildings-two-story structures in blocks of twenty stands, with marketing space on the first floor and offices on the second. It is a wholesale market in which meat, garden produce and llve poultry are sold. . The stalls are leased.

Jefferson Market, at Greenwich Avenue and Sixth Avenue, occupies 36,000 square feet. This is a retail market. Space is rented by the city to dealers.

Gansevoort Market, an open square bounded by West, Llttle West Twelftli, Washington and Gansevoort Streets, has no buildings of any kind. It is by legislation restricted to the use of farmers and gardeners for the sale of products they themselves have grown. Each farmer is charged 25 cents daily. It is mostiy a wholesale market for dealers.

Delancey Street Market is under the approach to Williamsburg Bridge at Pltt and. Willett Strects, where fish, vegetables and fruits and miscelianeous dry goods are sold. It occupies a space \(400 \times 100\) feet.

Harlem Market-Under Harlem Bridge, 130th Street and \(3 d\) Avenue. Things are sold at retall.

Queensboro Market, retail, under Queensboro Bridge; Manhattan approach, 1st Avenue, Avenue A, 59 th and 60 th Streets.

Wallabout Market has an area of thirty-six acres. It extends from Clinton Avenue to East A venue, to Wallabout Basin. The city owns the land and the ground is leased. Many farmers use thls market to sell their produce to dealers, and pay 25 cents a day for each wagon space in the market; Mostly-ali the purchases are wholesaic.

Janaica Publlo Market, parallel to L. I..R. R., Archer Avenue and Twombley Place. This is a farm produce market, established April, \(192 \theta\).

There are about 34 open air street (pusheart) markets in Manhattan, 2 in the Bronx, and 18 ln Brooklyn, under the direction of a supervisor of the Department of Public Markets. Prices are regulated by the department,' and are sanctloned by the Board of Aldermen.

\section*{THE NEW YORK PUBLIC LIBRARY.}
(Prepared for The Aimanac by Edmund L. Pearson, Editor of Publications of the Library.)

The corporate existence of the New York Pubiic ibrary began May 23,1895 . by the consoildation ff the Astor Library, the Lenox Library and the rilden Trust. The Astor Llbrary, incorporated 1849, owned at the time of consolidation a fund of 6941,000 and 266,147 books. The Lenox Llbrary, ncorporated 1870 , owned in 1895 a fund of \(\$ 505\),300 and 86,000 books. The Tllden Trust (founded jy Samuel J. Tllden, who dled 1886), brought to the lbrary \(\$ 2,000,000\). In 1901, the New Tork Free Jirculating Library, with 11 branches, was consoillated with the new system. Between 1901 and 1904, the New York Free Circulating Library for the Bilnd, the Aguilar, St. Agnes, Harlem, Tottenville, Washington Heights, Unlversity Settlement, Webster, and Cathedral Librarles all joined the corporation. In 1901 Andrew Carnegie gave \(\$ 5,200,000\) to Greater New York for library buildings, on condition that the city provide the land and maintain the libraries when built. With the part of this sum whlch was assigned to the New York Public Library, 37 branch llbraries have been buitt. (The Boroughs of Brooklyn and Queens have their own libraries. The New York Publlc Library serves the Boroughs of Manhattan, the Bronx and Richmond.) There are in the New York Public Library, 42 branches in all. In addition there are six sub-branehes, in buildings not owned by the llbrary. In 1909 John S. Kennedy left the llbrary \(\$ 3,000.000\).

The Central Building of the library, Fifth Avenue and 42 d Street, bullt by the city, was opened May 23, 1911; cost, \(\$ 9,000,000\); archltects, Carrere and Hastings; hours, week days, including holidays, 9 A. M. to 10 P. M.; Sundays, \(1 P\). M. to \(10 \mathrm{P} . \mathrm{M}\). dant of the Astor and Lenox Librarles, and the headquarters of the Circuiation Department (the branch libraries). Reference Department has 1,468,521 books and pamphlets; the Circulation Department has \(1,161,608\) books. Fxceeded in slize only by the Library of Congress in thls country, and by two or three European llbrarles, it is the first library in the world in point of use. The number of persons recorded as using the Reference Department in 1921 was \(1,157,275\). The actual use is much larger; the count includes only those who apply on written sllps for books. The number of books lent for home use by the Circulation Department in 1921 was 10,226:366. From 6,000 to 11,000 persons enter the Central Building dally. To malntaln the Reference Department in 1921 the library dlsbursed \(\$ 979,221.26\), chiefly from lts own endowments. In 1921 the disbursement for the Munlcipal Reference Branch, in the Municipai Building, was \(\$ 22,725.21\), of which sum the city gave \(\$ 22.312 .85\). For the Clrculation Department in 1921 was expended \(\$ 1,100,982.72\), of which the clty gave \(\$ 1,099,858.81\). No publlc funds are spent for books, salarles, or other costs of the Reference Department in the Central Buliding. or for the Central Circulation Branch and Central Children's Room in that building.

The branch llbrary bulldings usually contain tendling and reference departments for aduits, simllar departments for children, lecture rooms used for meetings for educational purposes and for organizatlons for soclal betterment. The branch librarles work in concert with the schools and pay special attention to the Americanization of, forelgn-born

\section*{THE NEW YORK AQUARIUM IN BATTERY PARK. \\ (By Charies H. Townsend, Director.)}

THE Aquarium Building was erected in 1807 by the United States Government as a fort, calied West Battery, and after the war of 1812 was calied Castle Clinton. It had a battery of thirty guns, the embrasutes for which still remain in the outer wail, which is nine feet thick. The old ammunition rooms are surrounded with walls of masonry fifteen feet thick. In 1823 the buildlng was ceded by Congress to the City of New York and used as a place of amusement calied Castle Garden, which had a seating capacity of 6,000 . It was connected with Battery Park by a bridge, the intervening space having slnce been filled in. Gen. Lafayette was received here in 1824; President Jackson in 1832; President Tyler in 1843; Louis Kossuth \(\ln\) 1851. Prof. Morse, inventor of the telegraph, demonstrated here in 1835 the use of the Morse telegraphic code.

Jenny Lind began singing here in 1850 under the management of P. T. Barnum. Among other notables received here were President Van Buren and the Prince of Wales. The building was used as a landing place for immigrants from 1855 to 1890 , during which period 7,690,606 immigrants passed through its doors.

Then, for severai years, the historic old structure was in process of repair for the use of the Aquarium, which was opened by the city on Dec. 10,1896 ; and on Nov. 1, 1902, its management was transferred from the Department of Parks to the New York Zoological Society, a private scientific association with a membership of 2,550 .
The Aquarium is reached by all elevated, surface and subway lines running to South Ferry. The building is open free, every day in the year. The hours for visitors are: 9 A. M. to 5 P. M., AprilSeptember; 10 A. M. to 4 P. M., October-March.

The attendance exceeds \(2,000,000\) visitors a year The New York Aquarlum is the largest in the world and contains a greater number of species and of specimens than any otiner. It has 7 large fioor pools, 94 large wall tanks and 30 smaller tanks. There are also 26 reserve tanks containing specimens not on exhibition. The building is circular in form, with a diameter of 205 feet. The largest pool is 37 feet in diameter and 7 feet deep. During 1922 the space available for exhibits will be increased one-fifth. The exhibits inciude fishes, turties, crocodilians, frogs, salamanders, marlne mammals and invertebrates, and are both northern and tropical in character. There are usually about 200 species of fishes and other aquatic vertebrates on exhibition. The total number of specimens, exclusive of invertebrates and young fry in the hatchery, varies from 5,000 to 6,000 . Most of the local fresh-water and salt-water species are collected by the employees. Tropical fishes are brought by steamer from the Bermuda Islands.
The fish hatchery, maintained as a fish-cultural exhibit, produces yearly from three to eight milions of young food and game fishes, which are afterward deposited in New York State waters. The Aquarium is equipped for heatling sea water for tropical fishes in winter, and has a refrigerating piant for cooling fresh water in summer. Flowing fresh water is supplied from the city water system, while the pumps circulate about 300,000 gailons of salt water daily The pumps run day and night. The salt water tanks are suppiied from a reservoir holding 100,000 galions of pure stored sea water. Thls water, originally brought in by steamer, is used as a "ciosed circulation," the water being pumped through the exhibition tanks, failing thence through sand filters back to the reservoir. It has been in continuous circulation since 1908

\section*{NEW YORK ZOOLOCICAL PARK.}

\section*{(By W. T. Hornaday, the Director.)}

Che New York Zoological Park was founded in 1895 by the New York Zoological Socjety, a scientinc corporation. The park was formaily opened Nov. 9, 1899. The grounds, many of the buildings, and an annual maintenance fund are provided by the city. The remainder of the buildings and the animal coliections are furnlshed by the socjety, which is also charged with the direct management of the park.

The Zoological Park is free to the public on all days of the week except Mondays and Thursdays. Should Monday or Thursday fall on a legai hoiiday admission to the Zoological Park is frec. The openlig and closing hours are 10 A. M. until one-naif hour before sunset. On pay days admission for adults is 25 cents, and for children under twelve years, 15 cents. The park embraces a tract of 264 acres. It contains thirty-five acres of water, and its land consists of heavy forest, open forest and meadow clades, in about equai proportions. The park is bout one mile long and three-tifths of a mile wide.

The princlpal bulidings are the Eiephant, Lion Prlmate, Zebra, Large Blrd, Reptlle, Antelope, Ostrich and Smail Mammal Houses, and the Aquatic Blrd House. The prlnclpal open-all enclosures are the Bear Dens, Flylng Cage, Pheasant Aviary, the Cagle and Vulture Aviary, Wolf and Fox Dens, Burrowing Rodent quarters, Beaver Pond, Duck Avlary, Wild Fowl Ponti and Mountain Sheep Hiil. The most valuable and important mammai collectlons are the abes, baboons and monkeys, the lions, tigers and leopards, the zebra and wild horse collect. Won, the antelopes and deer, the bears, and the huge speclmens in the Elephant House, comprlsing elephants, rhinoceroses and hippopotami. The collection of living blrds in the Zoological Park is the
largest and most varied to be found anywhere in the worid. The collection of birds of paradise including the rare bluebird of paradise, and the coliections of parrots, parakeets and lories easily rank among the flnest of their kind.

On May 25, 1922, the National Collection of heads and horns, for which a special museum build ing had been erected by the glits of ten member of the Zoological Society, was dedicated and opened to the publlc. This collection is now displayer free to the public "in memory of the vanlshing big game of the world." Both the coliection and the buiding to contain it are quite unique, and the collection is almost complete for all the hoofed horned and tusked animal species of the world The total value of the building and coliection is more than \(\$ 500,000\).

In 1921 the census of the collections in the park was 623 mammais representing 185 species, 217 s blrds of 750 species, and 465 reptiles and amphiblans, representing 73 species. Total number ol specimens, 2,174 ; totai number of species, 1,008 The attendance of visitors for 1921 was \(2,562,138\), an increase over the previous year of 311,961 .

Routes to the Zoologlcal Park-AutomobilesLenox Avenue north t 145 th Street: acr ss Harlem River to 149 th Street, continuing to top of hill turn left at Mott Avenue; thence north along Franz Sigel Park to Grand Boulevard and Concourse thence along Grand Boulevard and Concourse for about two miles to Forlham Road; thence to the riglit and continuing to the park. SubwaySeverth Avenue Division, Bronx Park traln to end of the llire at 180th Street and boston Roati entrance to the Zoological Park. Loxington Avenue Division, East 180th Street train to 177 th Streot and change to 13 ronx Park tratn to end of line at 180 th Strect.

\section*{NEW YORK HISTORICAL SOCIETY GALLERY.AND MUSEUM.}

The New York Historical Society, founded in 1804, is open free to the public daliy, 9 A . M. to \(5 \mathrm{P} . \mathrm{M}\).; Sundays, 2-5 P. M., except July, August and September, and on holidays 1 to 5 P . M. (excepting Christmas, New Year's and July 4. Closed for the montn of August for cieaning and repairs). The society has occupied since 1908 the building on Central Park West between 76th and 77th Streets, completed and furnished by the Society at a cost of \(\$ 1,-\) 000,000 , including the land. The home before that was on Second Avenue. It is supported by endowment funds and membership fces without aid from city or State. The soclety maintains a library, museum and gailery of art. The library contains 130,000 volumes and 150,000 pamph lets, newspapers, prints. maps and a large collection of maniscripts, all relating to American history. The newsp:uper collection numbers 5,386 volumes, of which 3,181 were printed in this city and State. The earliest flle being the "Boston News-Letter,", beginning in 1704. The first newspaper printed in New York City was "The New York Gazette," established in 1725 by William Bradford, the first printer in the Colony of New York. The soclety's file of this paper begins with 1730. The largest. collection of New York City and State newspapers may be found here. The old New York prints cover the period from the earliest "View of the Clity," published in 1651, to modern times, and is unrivalled in its completeness by either private or public collections elsewhere, among which may be mentioned The Burgis Vlew of the City, 1717, of which only one other copy is known; the Maverick View of Wall Street, about 1825, and the Tiebout Engraving of the City Hall on Wall Street. The maps include the James Lyne survey of the city in 1731, published by William Bradford-the first, engraved map of the city pub-lished-one of three known copies; the Dycklnck. plan of 1755 , the Ratzer map of 1767 , and the commissioners' map of 1811, besides a large collection of atlases and maps of all periods. The more im-
portant manuscripts are the Cadwallader Golden papers, De Peyster famlly paders, James Duane papers, Albert Gallatin papers, General Horatio Gates papers, diary of Philio Hone, Rufus King papers, Lloyd famlly papers, Rutherford papers, and Lord Sterling papers.

The museum contajns many relics of New York and American history, besides an Egyptian collection of 3,000 objects, the first brought to Amerlca. Three mummied bulls from tue tombs are features, while every form of Egyptian art during the Old and Middle Kingdom and the Empile, 2900-1167 B. C., is represented. Tne collection is especially rich in papyrii. The society also possesses the Nineveh sculptures, presented in 1858 by the late James Lenox. Of local relics the Beekman family coach, used before the Revolutionary War, in this city, may be mentioned, as well as the remains of the famous equestrian statue of King George III., and the statue of William Pitt (the Earl of Chatham), champion of the American cause in Pariiament.

The Gallery of Art now numbers over 1,000 paintings, including old masters. Over 300 of the paintings are American portraits: George Washington by Stuart, Peale and Durand, John Adams, John Quinc. Adams, Bayard family portraits, Aaron Burr, Henry C,lay, George and De Witt Clinton, John S. Copley by himself, De Peyster family portraits, Hamilton Fisn, Benjamin Franklin, Aibert Gallatin, FitzGreene Hallack, Alexander Hamilton, Andrew Jackson, John Jay, Thomas Jefferson, Lafayette, James Madison, Oliver H. Perry, Edgar Allen Poe, Rcd Jacket, Schuyler famlly portraits, Stuyvesant family portraits, Zachary Taylor, Daniel Webster, and N. \(P\). Willis. The society also possesses the original water color drawings made by John James Audubon for his "Birds of Amerjca"- 460 beautifully executed pictures. Special exhibitions of the society's collectlons are held from time to time to which the public is invited. Since the occupation of the present buildIng in 1908 the society's treasures in art and literature have been exhibited and freely placed at the disposal of the public for its enjoyment, use and study.

\section*{NEW YORK BOTANICAL CARDEN.}

THE New York Botanical Garden occuples a reservation of nearly 400 acres of Bronx Park north of Pelham Parkway. The tract includes the beautiful natural features of the valley of the Bronx Rlver, its gorge, its waterfall and its rapids, and over 100 acres of natural woodland, including the famous Hemlock Forest, the most southern grove of hemlock spruce near the Atlantic Coast. The institution was chartered by the Legislature of New York, 1891, and the first reservation of 250 acres was set aside by the city in 1895, and about 140 acres were added by the city in 1915. Tne.grounds and buildings are open to the publlc every day in the year without charge.
Museum Building, situated a short distance from the Botanical Garden Station of the New York Central \& Hudson River Railroad, has a front:ge of 312 feet, Is Italian Renaissance; front approach is ornamented by a bronze fountain by Carl E. Tefft and by terra cotta and marble fountains and seats; tne vista lines are formed by four parallel lines of tulip trees. Three floors are devoted to public exhibits.

There is a large public lecture hall in the basement of the museum building, in which free public lec-
tures are given every Saturday afternoon from Spring until Autumn. The upper floor of the building contains the library of 20,000 volumes on botany, horticulture and related sciences, including several speclal collections; the herbarium, contalning prepared and dried specimens of plants from all parts of the world. occuples the greater portion of several rooms on the upper floor and comprises some 1,500 ,000 specimens. There are also laboratories equipped for research on the upper floor, to which properly qualified students of botany are admitted and instructed by one or another member of the garden staff.

The Conservatories inciude two ranges in the southern and eastern parts of the grounds. In them are housed collections of palms, cacti and other succulents, ferns, orchids, aquatics, and other groups of exotlc plants. Fiower shows and lectures are held in the central display house of Conservatory range 2, near the Allerton Ave. entrance.

The gardens, besides displays of shrubs, trees, and herbaceous plants, include flowering displays in scason of tulips. 11arcissus, iris, peonles, roses, gladiolus and dahlias.

The Mansion-A large stone house built by the Lorillard family in 1850 stands above the Bronx River near the waterfall.

\section*{BROOKLYN BOTANIC GARDEN.}

The Brooklyn Botanic. Garden. located between Eastern Parkway and Empire Boulevard, and Flatbush and Washington Avenues was opened to the public on Linnaeus's birthday, May 13, 1911. The Garden comprises about 50 acres of land, on wnicn are located the various plantations, the conservatories, and the laboratory building. The object of the Garden is .the advancement and diffusion of a knowledge and love of plants, and its special aim is to be of service to the local community. The grounds are open free to the public daily. The Garden is supported, in part only, by the city.

The Native Wild Flower Garden contains about 900 species that grow without eultivation within 100 miles of New York City; the Rock Garden contains over 600 species of alpine and other rock-loving plants; the Japanese Garden has been pronounced the most perfect specimen of that kind of garden in any public park in America; the general Systematic Garden, ehlefly of European herbs and shrubs. occupies the central portion of the grounds; the Ecolog-
ical Garden illustrates the relation of plants to various factors of environment, such as water, light, gravity, insects, etc. The Iris Garden extends along the brook, and the Children's Garden, containing over 250 individual plots, are at the south end of the grounds. A. library of over 13,000 books and pamphlets on plant life and gardening is open free to the public, and also the herbarium of over 150,000 specimens. Illustrated lectures and occasional exliliblts are also open free. . The conservatorles contain a collection of tropical and sub-tropical plants, including those used for food, fibre, and other economic purposes, including banana, sugarcane, tea, coffee, rubber, hemp, papyrus, figs, citrus fruits, etc.

FLOWER GARDENS IN PROSPECT PARK.
Owing to their accessibility, the Greenhouse (where flower shows are glven in season), the Old Fashioned Fiower Garden and the Zoo. in Prospect Park, are visited yearly by hundreds of thousands on foot and in vehicles.

\section*{MUSEUMS OF THE BROOKLYN INSTITUTE OF ARTS AND SCIENCES.}

THE Central Museum (Brooklyn Museum) on Eastern Parkway and Washington Ave., the Children's Museum in Bedford Park, the Department of Education with activities in the Acadcmy of Music building, the Brooklvn Botanic Garden, adjoining the Museum, and the Biological Laboratory at Cold Spring Harbor, L. I., are under the generai management of the Trustees of the Brooklyn Institute of Arts and Sciences, though each department has its own Director and Governing Committee. The Museum and the Botanie Garden reecive appropriations from the eity for maintenance, and Lheir collections are provided for entireiy from private sourees. The construction work is done through the Department of Parks and the bills are audited through this department. The new wing of the Central Museum was finished in part in 1914.

It is expected that the city will shortly complete it. The Eastern Parkway-Brooklyn Museum statlon of the Interborough Subway is directiy in front of the Museum building.

The Central Museum contains a noteworthy collection of paintings, sculpture, carvings, textiles and other objects of art; archaeologicai gatherings, Egyptian relics and jewelry, Oriental objects. including Japànese, Chinese and East Indian armor and ornaments, objects from American Indian life and legends, etc.; Natural History, minerals, zoological collections, especially the fauna of Long Island, habitat groups, etc

The Children's Museum, the first established of its kind, aided by an influential Woman's Auxiliary Committee interests and instructs thousands of children through its lectures and nature clubs and its historical and natural history exhibits.

THE HALL OF FAME.
(Director, Dr. Robert
March . 5, 1900, the Council of New York University accepted a glft of \(\$ 100,000\), afterward increased to \(\$ 250,000\), from a donor, whose name was withheld, for the erectlon and compietion on University Heights, New York City, of a building to be calied "The Hall of Fame for Great Americans." A structure was built in the form of a terrace with superimposed colonnade eonnecting the University Hall of Philosophy with the Hall of Languages. On the ground floor is a museum 200 feet long by 40 feet wide, consisting of a corridor and six halls to contain mementoes of the names that are inscribed above. The colonnade over this is 600 feet long with provision for 150 panels, each about 2 feet by 6 feet, eaeh to bear the name of a famous American.

Only persons who shall have been dead twentyfive or more years are eligible to be chosen. Fifteen classes of citizens were recommended for consideration, to wit: Authors and editors, business men, educators, inventors, missionaries and explorers, philanthropists and reformers, preachers and theologians, scientists, engineers and arehitects, lawyers and judges, musicians, painters and sculptors,

Underwood Johnson.)
physicians and surgeons, rulers and statesmen: soldiers and sailors, distinguished men and women outside the above classes. Fifty names were to be inseribed on the tablets at the beginning, and five additional names every fifth year thereafter, until the year 2000, when the 150 inscriptions will be completed.

In February, 1904, the plan was announced of a Hall of Fame for Women near the former, with places for 50 tablets. This plan later was abandoned, and men and women now are admitted to one and the same Hall of Fame.

The rules prescribed that the council shall invite nominations from the public. Every nomination seconded by a member of the University Senate shall be submitted to an electorate of one hundred eminent citizens selected by the senate. Executive office of the Hall of Fame is at No. 342 Madison Avenue, New York.

The hali was dedicated May 30,1901 , when twenty-five or more national associations each unveiled one of the bronze tablets in the colonnade, and on May 30, 1907, eleven new tablets were unveiled, orations being given by the Governors of New York and Massachysetts.

AMERICANS IN THE HALL OF FAME.

Chosen in 1900-George Washington, Abraham Lincoln, Danlel Webster, Benjamin Franklin, Ulysses S. Grant, John Marshall, Thomas Jefferson, Ralph Waldo Emerson, Henry W. Longfellow, Robert Fulton, Washington Irving, Jonathan Edwards, Samuel F. B. Morse, David G. Farragut, Henry Clay, Nathaniel Hawthorne, George Peabody, Robert E. Lee, Peter Cooper, Eli Whitney, John J. Audubon, Horace Mann, Henry Ward Beecher, James Kent, Joseph Story, John Adams, William E. Channing, Gilbert Stuart and Asa Gray.

Chosen in 1905-John Quincy Adams, James Russell Loweli, William T. Sherman, James Madison, John G. Whittier, Mary Lyon, Emma Willard, Maria Mitchell.

Chosen in 1910 -Harriet Beecher Stowe, Oliver Wendell Holmes, Edgar Allan Poe, James Fenimore Cooper, Phillips Brooks, Wiliiam Cullen Bryant, Frances E. Wiliard, Andrew Jackson, George Bancroft, John Lathrop Motley.

Chosen in 1915-Alexander Hamilton, Mark Hopkins, Francis Parkman, Louis Agassiz, Eiias Howe, Joseph Henry, Rufus Choate, Daniel Boone, Charlotte Cushman. Of these Hamilton and Agassiz
had been elected in 1905 to the separate hall proposed for famous foreign-born Americans. When the Constitution was amended in 1914 to do away. with the line of discrimination between native-born and forelgn-born, it was required that the four foreignborn, already ehosen, be re-elected in competition with the native-born put in nomination. Two above named were approved, while John Paul Jones and Roger Williams lacked the votes.

Chosen in 1920-Samuel L. Clemens (Mark Twain), James B. Eads, Patrick Henry, William T. G.' Morton, Augustus Saint-Gaudens, Roger Williams, Allce Freeman Palmer.

Total to date-Fifty-six men, seven women
On May 21, 1921, there was a public unveiling at the Hall of Fame on University Heights of twentysix bronze tablets bearing the names of men and women who have been elected in this and previous elections, therty-seven tablets having already been unveiled.
In May, 1922, busts of Edgar Allan Poe, George Washington, Gen. U.'S. Grant, Miss Maria Mitchell, and Mark Hopkins were unvelled. The only other busts in the hall are those of Robert Fulton and Horace Mann, unveiled several years ago.

MEMORIAL TO AMERICAN PAINTERS. SCULPTORS AND ARCHITECTS.

A pian to create a memorlal to Amerfcan painters, sculptors and architects In Gould Memorial Library of New York University was inaugurated in 1921. Only. busts of painters and architects will be placed in the reading room. The architects' corner will be in the hallway of the main entrance. Busts of George Inness, Clinton Ogilvie, Carroli Beckwith, Walter Shirlaw and J. Q. A. Ward already have been placed in the reading room. Present plans
call for a bust to be placed at the foot of each of the sixteen columns of Connemara taarble that encircle the reading room. Bronze doors have been hung at the main entrance as a memorial to Stanford White, who designed the llbrary.

Gould Memorial Library is one of the group of university buildings in which is included the Hall of Fame, but the plans for the two memorlals are unrelated movements.

\section*{MUSEUM OF THE AMERICAN INDIAN.}

The Museum of the American Indlan (Heye Foundation), at Broadway and One Fundred and Fifty-flfth Street, houses the most complete collection of Indlan relics ever assembled, totalling over \(2,000,000\) exhibits. The tracing of the Indian tralls of New York and its vlennty, which is the work of Reginad Pelhani Bolton, throws a new light on an unfamillar perlod of local history.

Years of patlent andi lintellgent resoarch liave been reduired to fix these anclent trank and re-
construct tle civllization which once spread over the present slte of New York Citv. Every section of the city has been explored for relics, often with gratifying results. The written history of the perlod and every possible reference in old manuscripts, maps and documents have been compared.

Tens of thonsands of referenees have been inade and an claborate card Index system followed in preserving them. Millimis of people to-day are following these tralls, whlch have become busy city streets or great hlghways of trado.

\section*{NEW YORK FOUNDATIONS SPEED WORLD'S SOCIAL PROCRESS.}

\author{
(From Better Times, N. Y.)
}

THE greatest fortune in America, if not in the whole worid, is dedicated to the cause of humanlty. No single mllionaire in this or any other country can match the vast wealth held in trust by the great philanthropic foundations of New York for the betterment of mankind.

Ten of these great trusts hoid, for purposes of general sociai welfare, funds conservatively estimated at more than half a biliion dollars, though the actual total is probably much more.

Where these great funds came from, and to what purposes they are dedicated is of interest.

The Brez Foundation is probably the least known of the group. It was incorporated in 1917, in accordance with the will of one Brez, a watchmaker born in New York of Swiss parents who died in Switzerland about twenty years ago. By the terms of this will Mr Brez's daughter enjoyed the income of his estate for llfe. Should she die without lssue the will directed that a corporation to be known as the Brez Foundation be formed to hold and adminlster the estate and to pay out the income to charitable institutions and for philanthropic purposes, the beneficiaries in every case to be within fifty miles of New York.

At the death of Miss Brez in 1916 the Foundation was formed. The seiection of beneficiarles ls entirely at the discretlon of the trustees. In a general way the undertakings seeking support are considered in the following order: hospitals, orphan asylums, other charitable organizations, other philanthropic purposes, individuals. The exact amount held by the Foundation has never been announced but it is known to be not far from \(\$ 2,000,000\).

The Carnegie benefactions form a vast, far reaching network. It is estlmated that the gifts of Andrew Carnegie to public causes, from 1881 , when he made nls first offer of a library to the City of Pittsburgh, until his death in 1919 amounted to \(\$ 288\),743,360 . Thls includes the endowment of two great foundations which bear his name, the Carnegie Corporation of New York, established in 1911, and the Carnegle Foundation for the Advancement of Teaching, formed in 1906. While both are primarily for the advancement of education, that being apparently the underlying motive. of most of the Carnegie benevolence, both have certain provisions in their charters which give them much latitude in the wide field of social welfare.

The stated purpose of the Carnegie Corporation is to "promote the advancement and diffusion of knowiedge and understanding among the people of the United States by aiding technical schools, institutions of higher learning, llbrarles, sclentlfle research, hero funds, useful publications, and by such other agencies and means as shall from time to time be found appropriate therefor."

Carnegie's gifts to the Corporation during his lifetime amounted to \(\$ 125,000,000\), but as, by hls will, it recelved the residue of his estate it undoubtedly at the present time controls a much larger sum. No announcement has ever been made as to the amount of the residue.

Since its organization the Corporation has appropriated about \(\$ 50,000,000\) for purposes within its scope. Its donations to various wartime causes amounted to nearly \(\$ 3,000,000\). For the studies of methods of Amerlcanization, whlch were directed by Allen T. Burns, and whlch are now being published, the sum of \(\$ 190,000\) was appropriated.

The Carnegie Foundation for the Advancement of Teaching, whlch is concerned with "those educational agencies which undertake to deal with the inteliectuai, social and moral progress of mankind," began wlth an endowment of \(\$ 15,000,000\), but through additional glfts and accruals its total resources are now put at \(\$ 25,390,000\). The iargest expenditure of the Foundation is for retiring allowances and pensions to teachers and their dependents. This amounted in the last fiscal year to \(\$ 956,262\). The beneficiaries numbered 999 , representing eighty-nine different institutions. Since 1906 the Foundation has expended for this purpose \(\$ 8,920,661\).

Commonwealth Fund-The Commonwealth Fund is among the youngest of the foundations, having been incorporated in 1918. It had its inception in the offer of a considerable sum by Mrs. Stephen V. Harkness, to be used for "bencvolent, reilgiuus, educationai and like purposes, of an eleemosynary character." This gift was in the form of securlties with a value of \(\$ 9,956,111.90\). A year later Mrs. Harkness added to her gift to the extent of \(\$ 6,379,925.26\), making the total resources of the Fund approximately \(\$ 16,336,000\).

During its first years the Fund made a careful
study of different flelds of opportunity, and while it has made ccrtain limited grants to miscellaneous and comparatively unrelated projects, its efforts in the main have been dlrected toward accomplishing results in three fieids: Education, Child Welfare and Healtin. The most extensive project which the Fund is supporting is a study and demonstration, to extend over a five-year period, of methods of prevention of juvenile delinquency.

The Milbank Memorial Fund has been in exlstence for some time under the name of the Memorial Fund Association, but in March, 1921, it was Increased by the will of Mrs. Elizabeth Mllbank Anderson to appioxlmately \(\$ 10,000,000\). At that tlme the name was changed to Milbank Memorial Fund. Its purpose is "to further secular and religious education among all classes; to care for the slck, the young, the aged and disabied; to minlster to the needs of the poor; to improve the physical, mental and moral condition of humanity and generally to advance charitable and benevolent objects.'

The New York Foundation has an interesting history. It was incorporated in 1909 to disburse the lncome from a fund of \(\$ 1,000,000\). ieft for phllanthropic purposes by the late Louis Heinsheimer. Mr. Helnsheimer's will set aside this sum for Jewish charities provided that such charlties, within a stated number of years. came together in a certain form of federatlon. The charities did not accomplish this organlzatlon within the time speclfied, but the survlving brothers of Mr. Heinsheimer, to whom, by the terms of the will, the estate reverted, were anxious to carry out the intention of their relative, and extended the time limit. Still the Jewish charlties were unable to form the desired organizatlon.

The Heinsheimer brothers then formed the New York Foundation to hold and administer the funds designated by Louls Heinsheimer for philanthropic purposes. The trustees have full power to dlsburse the income.

Three Rockefeller Corporations-The Rockefeller benefactions, like the Carnegle, are vast and farreaching. Three great philanthropic boards have been formed for their administration; the General Education Board, incorporated in 1903, the Rockefeller Foundation, incorporated \(\ln\) 1913, and the Laura Spelman Rockefcller Memorial, established in 1920.
The Board has for its object " \(t\) the promotlon of education within the United States of America without distinction of race, "sex or creed." Beginning with an initial sum of \(\$ 1,000,000\), Mr. Rockefeller's gifts to the Board have mounted to \(\$ 126,788,000\). Principal as well as income may be disbursed. The Board aids three general llnes of education: Universitles and Colleges, Medical Schools, and Negro Education. It has aided 207 institutions in these three groups with gifts totalling \$48,665,639. To secure. these gifts the institutions concerned raised in addition nearly \(\$ 170,000,000\).

The Rockefeller Foundation was chartered "to promote the well-being of mankind througliout the world, to provide an agency which sliall deal with problems of numan welfare in accordance with the principles and methods most ayproved ln each generation." It devotes its resources almost entirely to pubiic health and medical education, carrying on its activities through three departmental organlzations; the Internationai Heaith Board; the China Medical Board-and the Divlslon of Medical Educatlon. The Foundatlon's prlncipal funds are \(\$ 170,-\) 000,000 , both the income and principai of which are avallable for approprlation.

The Laura Speiman, Rockefeller Memorial was established by John D. Rockefeller as a memorial to his wife, who died in 1915...The particular objects for wnich the Corporation is formed "are the application to charitable purposes of the income, and, if the Corporation so decides, of the principal of such property as the Corporation may from time to time possess.". The Memorial has no connection with the Rockefeller Foundation or any of the other bencvolent boards or lnstitutions established by Mr. Rockefeller. The trustees have full and unrestricted discretion in the use of the funds, but the generai policy, 'in keeping with the spirit of Mrs. Rockeleller's avowed interests, is that gifts should be made particularly to activities looking to the improvement of the conditions of women and chlldren. Since the over to lt securities with a total of approximately \(\$ 64,000,000\).

The Sage Millions-The Russell Sage Foundation was established in 1907 , by Mrs. Sage in memory of her husband. The origlnal endowment of \(\$ 10,000\),000 was added to, at Mrs. Sage's death, by an additlonal sum. of about \(\$ 5,000,000\). This Foundatlon has for its purpose "the lmprovercent of social and living conditions in the United States of America."

Its charter gives it very wide latitude as to the means which may be employed to achieve its purpose. "It may, for instance, engage in "research, publisation", education, the estabiishment and maintenance of charitable and benevoient activlties, agencies and institutions, and the aid of any such activities, agencies and institutions aiready established.

The departments of the Foundation are: Charlty Organization Department, Department of Cnild Helping, Department of Education, Division of Industrial Studies, Library, Department of Recreation, Division of Remedial Loans, Division of Statisties, Department of Surveys and Exhibits.

The Havens Relief Fund Society is less widely known than the newer, foundations, though it has been active since 1870, when it was, incorporated to administer an endowment recelved from Charles \(G\). Havens. . The amount of its resources is not publiciy. announced. The Soclety appropriates its income to corporate and indlvidual aimoners, charged to give "temporary relief to industrious persons to aid in restoring them to self-support.'

The Altman Foundation is another great altruistic corporation which refrains from making public tne extent of its resources. Incorporated in 1913, it administers funds accruing from the estate of the late B. Aitman to promote the welfare of the employees of B. Altman \& Co., a corporation, and to benefit "charitable, benevolent or educatlonal institutions within the State of New York. The Foundation has not until very recently flgured in any notabie
altruistic projects. The new Chair of Fine Arts at New York University, which it will finance, is its first essay into the general field open to it by the terms ol its charter.

Millions for Specific Purposes-The great fortunes nere enumerated are, it will be noted, only those Which are heid for general purposes of social welfare. The endowment of the Rockefelier Institute for Medicai Researeh, for example, is not iistcd, since it is ior a specific purpose. The Juiliiard Foundation for the development of the musical arts is omitted for a like reason, as is also the Winifrca Masterson Burke Reilief Foundation for the benefit of convaiescents. and the Baron de Hirsch Fund for the ald of resident Jewish immigrants. Should these and many other similar funds held for specific purposes be included the totai amount of the vested wealth of charity would assume staggering proportions.

\section*{THE STATUE OF LIBERTY.}

The Statue of. Liberty on Bedloes Island, New York Harbor, was first proposed, soon after the Franco-German War, by a group of prominent Frenchmen, who commissioned one of their number, Frederic August Bartholdi, seulptor (born 1833, died 1904), to do the work. The U.S. Congress, Feb. 22, 1877, authorized President Hayes to set apart a site on the island, which Bartholdi, on a visit, had suggested. A committee was formed in 1874, to raise funds.' 'In France, 180 cities, 40 general councils, many societies, and thousands of peopie contributed. In the United. States, by the aid of The World, \(\$ 300,000\) was raised for the pedestai. The statue cost about \(\$ 700,000\), making the total about \(\$ 1,000,000\).

The head of the Statue was completed for the
Paris Exposition, in 1878; the forearm had been sent to America and snown at the Centennial Exposition, Philadelphia, in 1876 . Thence it was transferred to Madison Square, New York City, where it remained until 1886. On Oct. 24, 1881, the anniversary of the Battle of Yorktown, all the pieces of the framework and basc were put in place at Paris, Levi P. Morton, the American Ambassador, drlving the first rivet. The Statuc was finished in 1883; on July 4, 1884, M. De Lesśeps, President of the French Committee, officially presented the Statue to Ambassador Morton: on Aug. 5, 1884, the cornerstone of the pedestai was laid on Bedloes Isiand; late in June, 1885, the French vessel, Isere, from Roucn, France, landed the Statue at New York in 210 packing cases; the work of putling the parts together was begun in May, 1886, and the Statue was unveiled on.Oct. \(28,1886\).

DIMENSIONS OF THE STATUE.

DIMENSIONS OF THE PEDESTAL.

DIMENSIONS OF THE FOUNDATION.

The Statuc weiohs 450.000 pounds ( 225 tons) ; the bronze alone welghs 200,000 pounds, and is \(3-10\) of an ineh thick; 40 persons can stand in the head, BEDLOE'S ISL
Thë-Statue slte, Bedloe's Island (Bediow's Island), was named after Isaae Bediow, who bought it from the old Colonial Government of New Amsterdam. It was called Kennedy's I.sland during the Revolulion, alter Capt. Kennedy, commander of the British Naval Station in New York: He bougitt the island from the trustees of Mary Smith, a daughter of
and 12 in the torch; number of steps in statue, from pedestal to head, 154 ; number of rounds in ladder in uplifted right arm, 54.

AND HISTORY.
Bedlow, for one hundred pounds. In 1750 it was purchased by Now York for a pest house site. In 1800 the state gave it to the general government. In 1841 the present star-shaped fort was built on the island, at a cost of \(\$ 213,000,70\) guns were mounted on the parapets, and ugarrison of 350 men was stationcd there

\section*{HOW TO FIND ANY STREET NUMBER IN NEW YORK.}

To and what street is nearest, take the number, cancel last figure, and divlde by 2 , add the key number found below. The result will be the nearest sureet. The key numbers are: Avenue A. 3 ; Avenue 13, 3; Avenue C, 3; Avenue D, 3; First Avenue, 3; Sccond Avenue, 3; Third Avenue, 9 or 10 ; Fourth Avenue, 8 ; Fifth Avenue to Central Parik, 18 or 17 : above Mount Morrls Park, 24: Sixth Avenue, \(\mathrm{t}^{\text {; }}\)

Seventh Avenue, 12, Elghth Avenue, 9: Ninth Avenue, 13: Tenth Avenue, 14. Fleventh Avenue, 15; Lexington Avenue, 22 ; Madisoll Avenue, 26 ; Park. Avenue, 34 or 35 ; Columbus, Ansterdam, and West End Avenues, 59 or 60; Broadway above 14 th Strcet (subtact), 30 or 31 , Central Park West, divide house number by 10 , and add 60; Riverside divide house humber by 10, and add 60; Riverside
Drlve, divide house number by 10 , and add 72 .

\section*{CHURCHES IN THE CITY OF NEW YORK,}

IN the city of New York there are over 1,600 churches, attended each Sunday, it is estimated, by more than a milion worshippers, of which 100,000 , at least, are strangers visiting the metropolis.

\section*{THE PULITZER SCHOOL OF JOURNALISM.}

The School of Journalism at Columbia University, founded and endowed by the late Joseph Pulitzer, opened in September, 1912, and a year later entered its new building at 116th Street and Broadway. The Director is Dr. J. W. Cunliffe; the Director Emeritus, Dr. Talcott. Williams. One-fourth of the 150 students in the scholastic year 1922-23 were from New York City and vicinity. There are a reference library of \(: 100,000\) books, a file of 50 daily papers (American and foreign) and a "morgue" of 500,000 newspaper clips of which Dr. Talcott Williams's choice private collection was the basis., Advisory Board - Nicholas Murray Butler, Columbia University, N. Y. City; Solomon B. field, Mass.; John Langdon Heaton, The World, N. Y. City; Arthur M. \section*{ALTERATIONS. IN BUILDINGS IN MANHATTAN.}

As new bullding operations decrease in Man,attan alterations in existing buildings increase, showing that the Borough is being steadily reconstructed. This is in part due to limited area,
which restricts new building and compels Manhattan to provide for ever-increasing population by other means. This is shown in the following table:
\begin{tabular}{|c|c|c|c|c|c|c|c|c|c|}

\footnotetext{
The average number of new dweliings in Man-
hattan for the previous 10 years is 23 against 135
for 1921, an increase of nearly 600 per cent. This
increase is due to the adoption by the Board of

Aldermen on Feb. 15, 1921, of an ordinance in relation to exemption from iocal taxation other than assessments for local improvements of new buidings planned for dwelling purposes.
}

THE ANNEKE JANS CLAIM-ITS HISTORY.

Thoude the New York State Court of Appeals outlawed the Anneke Jans heirs' claim to the Trinlty Church tract in New York City as long ago as 1856, and again in 1881, the claim stll persists in the minds of some of Mrs. Jans's thousands of descendants. In the early part of 1922 the Appellate DivIsion of the Supreme Court, in New York City, disbarred an attorney because he had circularlzed the Jans clalmants in an attempt to obtain funds for another investigation and contest. The attorney, according to the Appellate tribunal, knew "that investigation had already been made and had proved futilc.'

The so-called Anneke Jans, later the Trinity P. E. Church, tract, contained about 62 acres and has been variously known as the Klng's Farm, the Duke's Farm, and the Queen's Farm: It extended from Warren Strect, along Broadway to Duane Street, thence northwesterly a mile and "a hdle to Cnristopher Street, the Hudson River forming the base of a sort of unequal triangle. Wouter Van Twlller, tne Dutch Governor of New Amsterdam, sold thls tract in 1636 to Roelof Jans, and by Roelor's will it became the property of his wife. Anneke. She married Everard Bogardus, who was drowned at sea, leaving Anneke again a widow. At ner death, in 1663, she was called Anetje Bogardus. She left elght children, all but. one of whom, Cornelius Bogardus, in March, 1670 , executed an instrument known as a "transport," conveying the propcrty to Col. Francis Lovelace, then Governor of the Province of New York. In the meantime (i667), Governor Nicholls had confirmed the titio to the tract in. Mrs. Jans-Bogardus and ner cighr children. Cornelius Bogardus died in 1707 . He left no wil, and never had made any clajm to his onare in the Jans tract.

Goveruor Lovelace seems to have acted merely as a Trustee for the State, for on May \(\mathbf{0}, 1697_{r}\) Trinicy Cburch was incorporated by Royal Charter, and therealcer in the same year a lease of the Jans tract was cxecuted by une inen Governor, Benjamin Fletcher, to the Trinty Church Corporation for seven years. Thts lease was aiterwara annulled and another one given by Guvernor Lord Corndury in 1702 for hls term of office. In 1703 Qucen Anne formally presented the tract, then called "Queen Farm." to Trinity. Church. The. Cueen Anile "patent" took the piaes of the Corndury lease.

In 1785 a legislative report respecting the title to "the King's Farm" in the City of New York, was made to the New York Assembly. This report recites the grant by Lord Cornoury, out expresses the opinion "that the right and title of the premises were of right, before the late revolution, vested in. the King of Great Britain, and now belong to and are of rlgat vested in the People of this State."

The first attack on Trinity Church's titie was made by one Cornelius Brouwer, about 1833. He claimed a one-fitth of one-sixtli interest as an heir of Cornelius Bogardus, and named the Trinity Church Corporation as a tenant ln common entitled to an undivided ilve-sixths. Defendants cialmed ownershin of the entire tract by virtue of the grant from Queen Anne. The Chancellor held that at the expiration of 60 years from that time the right of the compialnant's ancestor, if he previously had any, was compietely barred. on appeal to the Court of Errors, then the highest Court of the State, the decree was affirmed in 1835. The heirs of Cornellus Brouwer revived the sult and the causc was finally submitted to the Vice Cnancelior in January, 1847 The nearing occupied talrteen days, at the end of which the bill was dismissed.

Notwithstanding, this decision, an action of ejectment was begun in 1856. An appeal from the nonsuit directed in this case was taken to the Court of Appeals, where it was affirmed. Another phase of tne itigution reacred une Court of A'ppeais in 1881 , Where denial ot an application for letters of administration with the will annexed of the estate of Anneke Jans-Bogardus, was afirmed.

The streets latd out by Trinity Church Corporation in the Jans tract were named after leading officers of the church-Vesey, after the Rev. Wi]llam Vesey, ine rector: Barclay, alter the \(R \in v\) Mr. Barclay, who succeeded Vesey as rector: Murray, aiter a distingutshed lawyer and officer of che church. Warren, after Sir Peter Warren. commander of the Britisb nayal.forces at this staflon. who marrled Miss Dciancey of New York City: Chambers, arter Jonn Cnambers, a lawyer borr in New York and a leader 10 clvil and church aftairs.

The various litigatione attacking the Trinity Church titie. none of which was succeasful, were caen andi all based on tecnnical urectutarties in the grante of conveyunces, such ay the absenre-of a scal co at signature or on allegations vat the grantors themselves had og utle. The defense lias bect. duverse jossession and use otatutes of Immitation.

\section*{NON-RESIDENT TAXPAYERS}

The llst of "non-resident" New Yorkers on the 1923 personal assessment roll includes: Pcrcy A. Rockefeller, \(\$ 500,000 ; \mathbf{W}\) : A. Clark and Melville Gambrill, \(\$ 400,000\) each; Elizabeth F. Durazzo, \(\$ 170,000\); Geo. J. Gould, \(\$ 150,000\); E. T. Gerry, \(\$ 106,000\); and H. C. Cady, J. J. Duveen, W. A. Jamison, J. B. Duke, H. E. Huntlngton, Frances O. Jones, and Belmont Tiffany, \(\$ 100.000\) each.
\(\mathbf{7 5 , 1 4 7}\) ON PERSONALTY TAX ROLLS.
Although the possession of personal property valued at \(\$ 100,000\) by the tax assessors does not necessarily indicate that the owner thereof is a "millonaire," he or she is popularly so considered. When the New York City tax books were opened in 1922 there were disclosed the names of 75,147 persons from whom the assessors had decided a personal tax was collectlble. Thls was an increase of 2,244 over 1921 .

\section*{CALENDAR FOR TAXPAYERS.}

April 1-Commence to assess. Oct. 1-Annual record of assessed valuation of real and personal estate open for Inspection. Nov. 15-Real estate books close. Nov. 30-Personal books close. Feb. 1-Make up assessment rolis. March 1-Deliver to Board of Aldermen. March 3-Board of Aldermen fx tax rate. March 28-Deliver to Recelver of Taxes. May 1-All personal taxes and half real estate taxes payable in. May. If second half paid, rebate at rate of \(4 \%\) per annum to Nov 1 . June 1Interest at \(7 \%\) runs from May 1 on unpald taxes due in May. Aug., Third Tues.-Hearing on assessments on shareholders of banks. Nov. 1-2d half of real estate taxes payable. Dec. 1-Interest at \(7 \%\) from Nov. 1 on unpaid taxes due in Nov. Dec. 15 to 31 -Bank taxes payable.

NOTES TO THE ABOVE TABLE.

The valuations for the year 1897 have been äscertained as follows:. In Manhattan and the Bronx from tax bills of -1897 and from information furnished by the Department of Taxes and Assessments; in the Boroughs of Brooklyn, Queens and Richmond from the reports of the varlous Boards. of Supervisors as verified by the expert accountants of the City of New York. The valuations for
year 1898 have been ascertained as follows: in Manhattan and the Bronx from the reports of the Department of. Taxes and Assessments. In the Boroughs of Brooklyn, Queens and Riehmond, as there was no tax levied ln 1898. the valuations of the preceding year were repeated. The assessed valuations of. real estate were increased in 1903 from a varying pereentage theretofore of the full value to presumably the full value thereof.

The total for city purposes includes direct state taxes, which in 1922 were \(\$ 14,430,513\); interest on Deficiencies in taxes, 1899-1906, inclusive, totalled \(\$ 13,564,293\)
The 1923 budget, adopted by the Board of Estimate Oct. 31, 1922, totalled \(\$ 353,351,813\).

\section*{NEW YORK CITY PENSION LAW.}
(Chapter 42 , Laws of 1920 , effective Oct. 1, 1920.)

The New York City Pension Law provides that all employees, except those in exempt class, entering the city service after Oct. 1, 1920, shall become members of this system and all present city employees may become members by fling with the Board of Estimate and Apportionment a statement waiving all present or prospective benefits in other city retirement systems. The Board of Estimate and Apportionment has charge of all funds and of the entire system; the Comptroller is the custodian of the several funds, which are (1) Annuity savings funds. (2) Annuity reserve fund, (3) Contingent reserve fund, (4) Pension reserve fund, (5) Pension fund.

Teachers, policemen, firemen and street-cleaners do not enter into this system, as they have their own.

Among the provisions of this law are life insurance protection equal to the last six months' pay of the
employee, disability insurance protection of from one-quarter to one-half of the salary any time after completing ten years of service and paying, as long as the disability continues, a three-quarter pay pen sion if the employee is disabled in the performance of duty, a half-pay pension to the dependents with return in cash of all contributions at 4 per cent. per annum if the employee is killed in the performance of duty, retirement on demand after the ages of fifty-eight, fifty-nine and sixty, regardless of the length of service.

The city pays for all of these benefits except onehalf of the cost of service or superannuation retire ment benefit on account of service during membership in the fund. If the employee joins within the first year, the city also pays the entire cost of the benefits allowed by reason of service rendered prior to Oct. 1, 1920. The amount of the salary paid into the pension fund will be from 3 to 8 per cent.

\section*{NEW YORK CLEARING HOUSY ASSOCIATION.DATA.}
(Prepared for The Almanac by the Manager, William J. Gilpin.)
THE association is composed of 18 national banks, 11 State banks, and 12 trust companies. The Federal Reserve Bank of New York and the Clearing House City Collection Department also make their exchanges at the Clearing House, making 43 clearing institutions. There are 7 banks and trust companies in the city and vicinity, not members of the asso-
ciation, which make their exchanges through banks that are nuembers, in accordance with constitutional provisions. President-Walter E. Frew, President of the Corn Exchange Bank. Secretary-Lewis L. Clarke, President American Exciange National Bank. Manager-William J. Gilpin. Assistant Manager-Clarence E. Bacon. Examiner-Charles A. Hanna.

NEW YORK CLEARING HOUSE BUSINESS, YEAR ENDED SEPTEMBER 30, 1922.

\section*{AGGREGATE CAPITAL OF CLEARING HOUSE BANKS.}

The aggregate capital of the 18 national banks, 11 State banks, and 12 trust companies in the New York Clearing House, as of Oct. 28, 1922, was \(\$ 289,600,000\). This did not include the Federal

Reserve Bank. In addition, there were 4 institutions in New York City and 1 in Bayonne, N. J. (not members of the Clearing House but making through it their clearings) with a total capital of \(\$ 3,200,000\), and with deposits of \(\$ 54,708,000\).

\section*{VALUE AND WEIGHT OF GOLD.}
(By the United States Assay Offlce. New York.)

THe unit in weighing gold is the troy ounce. A "fine" ounce means an ounce of pure gold. The mint value of gold does not fluctuate, but remains constant at \(\$ 20.67183462\) per fine ounce. Troy measure is used in weighing gold. The grain is the same in both troy and avoirdupois measure, but the ounce and the pound are not the same. The troy
ounce contoins 480 grains and the troy nound 5,760 grains, tnere being 12 ounces to the pound. troy pound is never used in weighing gold, even when the weights of large quantities are to be computed. The avoirdupois ounce contains \(4371 / 2\) grains and the avoirdupois pound contains 7,000 grains, there being 16 ounces to the nound.

\section*{CONDITION OF MEMBERS, N. Y. CLEARINC HOUSE ASSOCIATION.}

For the week ending Oct. 28, 1922. The figures are six-day averages, except as to capital and net profits. The last named item covers the period from the foundation of the institution

Clearing House Members.

Reserves with legal depositories totalled \(\$ 517,989,000\).
Net demand deposits do not include \(\$ 217,031,000\) deposits in foreign branches of the National City Bank and the Bankers, Guaranty, Equitable, and Farmers Loan and Trust Companies.

THE FEDERAL RESERVE BANK OF NEW YORK.
The Federal Reserve Bank of New York, in the calendar year 1921, had total earnings of \(\$ 34,-\) 767,289 , from which were deducted \(\$ 8,673,456\) for expenses, including operation, self-insurance, etc. This left a net income in 1921 of \(\$ 26,093,832\), as against \(\$ 53,128,131\) in 1920 . Of the 1921 net
earnings, \(\$ 1,068,721\) were paid in dividends to member banks, at 6 per cent. on paid-in capital; \(\$ 3,782,671\) were added to the surplus: and the balance, \(\$ 20,702,440\), was paid to the United States Government. In 1921 the net earnings were 97.3 per cent. of the bank's capital.

(m) indicates mandate from League of Nations.

The returns of population are for censuses of 1921 and 1920 except where marked: (a) eensus of 1911 ; (b) census of 1916; (c) includes in total for Australia an estimate of 60,000 full-blood aborigines not
enumerated in its separate returns of the states; (d) includes 52,554 Maoris enumerated, but not ineluded in the census return; (e) estimated and in instances where exact figures are given these are returns for Europeans added to a large indefinite estimate of native population unenumerated.
RECAPITULATION.

\section*{GOVERNMENT OF THE BRITISH EMPIRE}

The British Empire covers about one-fourth ( \(13,406,103\) square milies) of the world's habitable land surface: this exeludes the Arctie regions. Its popuiation in the aggregate, aeeording to the best obtainabie estimates, is some fifteen millions more than one-fourth of the inliabitants of the worid-a total of \(441,595,965\).

The Capital of this vast empire is London, the
largest city in the world-the "Greater London" popuiation, eensus of 1921, being \(7,476,168\).

The Ruling Sovereign is George V., the first of the House of Windsor, whose title is "by the Graee of God of the United Kingdom of Creat Britain and Ireiand and of the British Dominions Beyond the Seas, King, Defender of the Faitil, Emperor of India." He was born June 3, 1865, the seeond son of King Edward VII. and Queen

Alexandra, daughter of King Christian IX. of Denmark, and he succeeded to the throne on the death of his father May 6, 1910 and was crowned, June 22, 1911. He married, on July 6, 1893, Princess Victoria Mary, born May 26, 1867, daughter of the late H. S. H. Duke of Teck and H. R. H. Princess Mary of Cambridge. They have five living children. His Heir, H. R. H. Edward, Prince of Wales, born June 23, 1894; H. R. H. Prince Albert, Duke of

York, born Dec. 14, 1895; H. R. H. Princess Mary born April 25, 1897, married Viscount Lascelles, K. G., son of the Earl of Harcwood, Feb. 28, 1922 H. R. H: Prince Henry, born March 31, 1900; and H. R. H. Prince George, born Dec. 20, 1902 .

The Premier is the Rt. Hon. Andrew Bonar Law, took office Oct. 25, 1922 on the resignation of David Lloyd George (1916-22). His Ministry and that of Mr. Lloyd George, follow:

\section*{THE NEW AND OLD MINISTRY.}

Mr. Lloyd George and his Ministers turned in their seals of office on Oct. 25, 1922, and Mr. Bonar Law's Ministers were sworn in and received them from King George that day. The Ministry was finally completed Oct. 31.

B. M. Eyres-Monsell.

The new Under Secretaries are: Home, G. F. Stanley; Foreign, Ronald MeNeill; Colonies; W. OrmsbyGore; War, Walter Guinness; Air, The Duke of Sutherland; Indta, Earl Winterton. Parliamentary: Overseas Trade, Sir W. Joynson-Hicks; Board of Trade, Lord Wolmer; Works and Transport, Col. Wilfred Ashley; Health, Farl of Onslow; Fisheries, Earl of Ancaster; Treasury, Col. Leslie Wilson.

The British Minister to the United States is Sir Auckland Geddes, G. O. M. G., K. C. B., etc., born 1879, appointed May 26, 1920. The diplomatic affairs of the entire British Empire in the United States are cared for by the Embassy at Washington.

British Consuls General in the United States re, at New York, H. Gloster Armstrong; at Boston, Thomas Parker Porter; at Philadelphia, vacant; at. Chicago, Horace Dickinson Nugent; at New Orleans, Cliarles Braithwaite Wallis; at San Francisco, Gerald Campbell; at Manila, P. I., Thomas Joseph Harrington.

British Consuls are, at Jacksonville, Fla., Walter Mucklow; at Savannah, Arthur Montague Brookfield; at Honolulu, H. I., William Massy Royds; at Portland, Me., John Bernard Keating; at Baltimore, Hugh Alexander Ford; at Detrolt, Howard G. Meredith; at St. Louis, Godirey Procter Hertslet; at Portland, Ore., John Philip Traut; at Pittsburgh, Charles E. E. Childers; at Galveston, John Elliott Bell; at Norfolk, Barton Myers; at St. Thomas, V: I.; Charles Bertram Stewart; at Seattle, Bernard Pelly; at San Juan. P. R., Arthur H. Noble. There are also Vice Consuls at Birmingham, Mobile, Skagway, Douglas, Ariz.; Los Angeles, San Diego, Denver, Hartford, Washington, D. C.; Key West, Miami, Pensacola, Tampa, Brunswick, Darien, Ga.; Duluth, Minneapolis, Gulfport, Kansas City, Mo.; Omaha, Wilmington, Cincinuati, Cleveland, Iloilo, P. I.; Providence, Charleston, El Paso, Laredo, Port Arthur, Newport News, Richmond, Gray's Harbor, Wash.; and Tacoma.

The United States Minister to Great Britain is Col. George Harvey, born Feb. 16, 1864, appointed A pril 16, 1921.

The United States Consuls General and Consuls will be found listed under the various subdivisions of the British Empire, which follow, according to their stations.
Parliament is the legislative governing body for the empire. It consists of two Houses; the. House of Lords, made up of the Peers of the United Kingdom, to wit: the Royal Dukes, the Archbishops,
the Dukes, the Marquises, the Earls, the Viscounts, 36 Bishops, and the Barons; also 28 Irish peers elected for life, and 16 Scottish peers elected for the duration of Parliament. The full membership of the House of Lords consists of about 730 members. There are about 30 women who are peelesses in thei own right, but their status as sitting and voting members of the House, though claimed by some, is still unsettled. The House of Lords has a limited veto power only in legislation. A peer of the United Kingdom is ineligible to a seat in the House of Commons, but a non-representative Irish Peer may be elected.

The House of Commons, elected in December, 1918, and which met Feb. 4, 1919 and was prorogued Oct. 2, 1922, consisted of 707 members elected by direct ballot in the several constituencies for the duration of Parliament. Of this House England had 492 members; Wales, 36; Scotiand, 74; and Ireland, 105. On the opening day the Coalition Government of David Lloyd George, the Prime Minister, had 478 supporters, a majority over all others of 249 . Clergymen of the Church of England, ministers of the Chureh of Scotland and Roman Catholic clergymen are disqualified from sitting as nembers, also certain Government officers, Sheriffs, and Governinent contractors. Members of the House of Commons are paid, since 1911, £400 a year. The franchise was extended to women by the Act of 1918 . There are certain qualifications. The total number of persons quailfied for registration in 1920 was estimated at \(21,776,000\), of which \(8,856,000\) wore women.

The House of Commons elected Nov. 15, 1922. numbers 615 . It contains on the first announcement of the balloting: Conservatives, 346; Laborites, 142 ; Asquith Liberals, 64; Lloyd George Liberals, 53 ; others, 10. Bonar Law thus has a Conservative majority of 75 over all.

The British Empire has six members of the Leaguc of Nations. To wit: United Kingdom, Commonwealth of Australia, Dominion of Canada, India, New Zealand and the Union of South Africa.

\section*{THE UNITED KINGDOM.}

AREA, 121,633 square miles.
POPULATION, census of 1921, 47,307,601.
United States Consul General, at London, Robert P. Skinner. Consuls, at Belfast, William P. Kent; at Birmingham, John F. Jewell; at Bradiord, Wallace J. Young; at Bristol, Robertson Honey; at Cardiff, John R. Bradley; at Dublin, Charles M. Hathaway, Jr.; at Dundee Henry A, Johnson; at Dunfermline, Howard D. Van Sant; at Edinburgh, Hunter Sharp; at Glasgow, George E. Chamberlain; at Hull, John H. Grout; at Leeds, Percival Gassett; at Liverpool. Horace Lee Washington; at Manchester, Ross E. Holaday; at New-castle-on-Tyne, Fred C. Slater; at Nottingham, Calvin M. Hitch; at Plymouth, Ralph C. Busser; at Queenstown (Cobh), John A. Gamon; at Sheffleld, Wllliam J. Grace; at Southampton, John M. Savage; at Stoke-on-Trent, William F, Doty; at Swansea, Arthur B. Cooke.
The United Kingdom, or British Isles, lie off the northwest corner of Europe, with the North Atlantic Ocean on the north and the North Sea on the east and the English Channel separating it from the mainland on the south. The Straits of Dover, 18 miles wlde, divide it from France. The northern end of Scotland lies due west from the southern end of Norway.

The climate of the British Isles is equable, mild and somewhat warmer than that of the continent opposlte, because of the Gulf Stream modifying the temperature of the Isles, whlch is mean at 49 degrees

Rainfall is abundant, averaging 34 inches annually; but is seldom heavy at a gen time, so that the precipitation covers longer periods, and often fogs prevail in many parts, "London Fog," holding much soot in suspension, being pecullarly dense at times.

The coastline is tortuous, giving very many harbors for shipping, and numerous rivers up which deep sea craft may go. The northern ends are more rugged than the southern. Peculiar geological features are the chalk formation along the English Channel, the chalk stratum running under the waters of the channel into France; and the same "hardpan" sub-stratum recurring as in many parts of France, which prevents the super-lmposition of modern "skyscrapers" such as geologically are permitted in American cities, where usually rock strata afford a frm foundation.
The soil is of varied natural fertillty. It is more sterile in the north, notwithstanding the figures show that the Scotch have attained a rclatively high per acre production by intensive cultlvation. But centuries of tlllage have rendered necessary the elaborate and large nse of artiticial jertliizers. The coast lines are generally of bluff formation.

The prevalent precipitation of moisture, together wlth the mild climate, has induced profuse growt of vegetation of all sorts. The Isles were naturally covered with forests, which have been largely cut off to accommodate so large a population on so smal area, a total less than the American State of New Mexico, and only about twice that of all Now Fnyland.

AGRICULTURE A GREAT INDUSTRY.
The iast census showed Great Britain (excluding waters) with \(76,639,000\) acres, of which \(3,037,600\) were woods and plantations, \(13,333,000\) mountain and heath grazing lands, \(24,995,000\) permanent pastures, and 20,764,000 arable lands. This was divided, England. 32,386,000 acres, with woods and plantations, 1,697,000; grazing, 2,732,000; pastures, 12,667,000; arable, 11,181,000; Waies, 4,751,000 acres. with woods and plantations, 187,000; grazing, \(1,400,000\); pastures, 1,820,000; arable, 839,000; Scotland, 19,070,000 acres, with woods and plantations, 852,000 ; grazing, \(9,134,000\); pastures, \(1,359,-\) 000 ; arable, \(5,271,000\); Ireiand, \(20,247,000\) acres with woods and plantations, 296,000; grazing (figures not available); pastures, 9,122,000; arable, \(5.271,000\); Isle of Man, 141,000 acres, with woods and plantations, 1,400; grazing, 35,000; pastures, 17,000; arable, 72,000; Channei Islands, 44,000 acres, with woods and plantations, 200; grazing, 2,000 ; pastures, 10,000 ; arable, \(21,000\).

Prewar and postwar areas, under cultivation for the Kingdom, were: 1913, corn (meaning wheat, bariey, oats, rye, beans and peas), \(8,211,641\) acres; \(1918,10,950,985\) acres; \(1921,8,902,301\).

Green crops (meaning potatoes, turnips, mangold, cabbage, kohlrabi, rape and vetch): \(1913,3,984,-\) 734 acres; 1918, 4,065, 164; 1921, 3,779,958.
Flax: 1913, 59,953 acres; 1918. 163,093; 1921, 48,097.

Hops: 1913, 35,676 acres; 1918, 15,666; 1921, 25,133.
mall fruits: 1913, 100,094 acres; 1918, 90,939 1921, 100,751.

Failow lands: \(1913,396,472\) acres; 1918, 414,124; 1921, 512,910.

Clover, grasses and permanent pastures: 1913, \(27,309,188\) acres; 1920, 31,774,000 acres.

Total areas under cultivation for the Kingdom: 1913, \(46,740,904\) acres; 1918, \(46,266,748 ; 1920\), 46,073,000 acres.

Taking these figures together with those to follow as to crop yields, it is apparent that the increased intrawar food production of the British Isles was due, not to larger cultivated areas, but to larger per acre yields and to more thorough utilization of lands hitherto in agricultural industry.

Crop yields in England and Wales, were in 1913, Wheat, \(26,568,000\) tons; \(1918,42,120,000\) tons; 1921 , 34,892,000 tons; potatoes, 1913, 2,895,000 tons; 1918, 4,209,000 tons; 1921, 2,958,000 tons; barley, 1913, \(25,292,000\) tons; 1918, \(24,320,000\) tons; oats, 1913, \(37,512,000\) tons; \(1918,57,356,000\) tons; hay, \(1913,9,052,000\) tons; \(1918,6,786,000\) tons; 1921 , 5,339,000 tons.

Scotland crops were, wheat, 1913, 1,052,000 tons; 1921, 1,284,000 tons; hay, \(1913,3,788,000\) tons; 1918, 3,272,000 tons; \(1921,3,144,000\) tons.

Ireland, 1913, wheat, 648,000 tons; 1918, 2,844,000 tons: \(1919,1,224,000\) tons; \(1920,700,000\) tons; 1921, 724,000 tons. The immense relative increase of wheat production in Ireland, accompanied by increases of other prcduction, indicates the potential capacity for food output when Ireland applies herself to production; and the heavy and sudden decreases. after the unity of the World War had ceased, indicate also how disastrous to Ireland's economic agrlcuitural life internal disturbances have been.

The total crops for the United Kingdom were, 1913, wheat, \(28,348,000\) tons; 1918, 46,572,000 tons; \(1919,34,660,000\) tons; \(1920,28,416,000\) tons; 1921 , 37,356,000 tons.
Barley: 1913, 32,816,000 tons; 1918, 31,040,000 tons; 1919, \(28.852,000\) tons; \(1920,32,844,000\) tons; 1921, 27,048,000 tons.
Oats: \(1913,82,640,000\) tons; 1918, 124,784,000 tons; \(1919,101,980,000\) tons; \(1920,90,436,000\) tons; 1921, 82,332,000 tons.

Potatoes: 1913, 7,605,000 tons; 1918, 9,223,000 tons: \(1919,6,312,000\) tons; \(1920,6,374,000\) tons; 1921, 6,554,000 tons.

Hay: \(1913,15,395,000\) tons; \(1918,12,372,000\) ons; 1919. \(10,708,000\) tons; \(1920,14,700,000\) tons; 1921, \(9,383,000\) tons.

Yields per acre for the Kingdom averaged in 1913 31.67 bushcls of wheat, twice that of the United States; barley, 34.01 ; oats, 41.72 , all lar above the Anıerican averages; and potatoes, 215.78 busheld, against about 95 for the United States.

Hay averages about 1.57 tons to the acre.
Great Britain had in 1913, 1,874,264 horses; 1918, \(1,916,347\); 1921, 2.137,200

Cattle, \(1913,11,936,600 ; 1918,12,311,149 ; 1921\),
Sheep, 1913, 27,629,206; 1918, 27,062,681; 1921,
3,749,000.
Swine, 1913, 3,305,771; 1918, 2,809,215; 1921,

\section*{,116,500.}

IMPORTS OF FOOD.
The per eapita sliare in each head of aomestic aninals is of course far less than that in the United states, necessitating the importation of nuch meat
food, on that account as well as the generai condition of large popuiation- 45 per cent. of that of the United States-confined on so limited an area.

It comes about, therefore, that Great Britain has intensively deveioped her manufacturing industries, and derives from exports the profits with which to buy what foodstuffs she must have, which is about 65 to 70 per cent. of her consumption. This imported food is also largely paid for by what is known as "invisible imports"-profits on shipping, insurance laid abroad かy British capital, and investments abroad which return annual interest, etc., all of which enables the Isles to pay for the food surplus bought.

Imports of food, drink and tobacco, for 1913 were \(\$ 1,475,745,000\); in \(1921, \$ 2,836,235,000\), ex pressed in doliar values, against raw materials, etc. 1913, \(\$ 1,349,695,000\); in \(1921, \$ 1,355,880,000\); and manufactured articles, inciuding "manufactured fuel": 1913, \(\$ 1,005,195,000\); in 1921, \(\$ 1,225,225,000\) In other words, of a total of \(\$ 3,843,675,000\) imported in 1913, food, drink and tobacco represented more than 40 per cent. In 1921, the food, drink and tobacco importations were more than 50 per cent of all importations, expressed in current dollar values.

Economically, the three factors-foods imported raw materials imported and manufactures exported - constitute the cycle of national life on the British Isles, the thre being absolutely essential to the continued existence of the British people according to existing standards of living

The raw materials importations cover the needs of the extensive manufacturing industries of the Isles developed very highly in England, parts of Scotland and in the north of Ireland, centring in Belfasttextile mills, steel and iron mills, wood working mills, chemicai factories, earthenware works, cutlery, hardware, electrical goods, leather, and all important modern industrial products which go to the ends of the earth, output by industrial leaders and mechanics acknowiedged as efficient parts of a remarkably complete industrial development, wrought by the force of the necessity to buy abroad so much food.

The prevailing policy of the British Empire for the greater part of the last century has been not to impose trade barriers on entrance of goods in o the British Isles or the outlying holdings of the empire. This free trade policy has been modified by certain attached countries, which at times have even imposed import duties on stuff from the mother country. And since the World War, under the dislocation of world industry and commerce and the unset tlement of the fiscal affairs of the Allies and their enemy countries, certain preferential arrangements have been made, and some barriers have been erected.

In so lar as there has been a degree of change of policy in the British Isles, it has been done by Parliament. But all such changes in the dominions and most of the colonies and dependencies have been by the local legislatures. The changes in the British Isles, were, according to the proponents of the newer policy, by reason of the necessity of preventing dumping of goods from European countries the currency of which is considerably depreciated.

MINES AND MINING
By and large, the mineral resources of the British Empire comprehend the gamut of the earth's varieties, in varying quantitics. In the British Isles the total mineral output in 1920 was 275 ,384,743 tons, and in 1921 it was \(284,601,174\) tons, the value being \(\$ 1,676,923,755\) in 1913 , and \(\$ 2,-\) \(137,244,420\) in 1921 .
Every gallon of oil or other petroieum product must be imported, and that necessity has shaped in considerable degree the foreign policy of the British. British capital has gone extensiveiy into foreign oil flelds, with Far Eastern holdings of importance, and also participation in the Dutcl oil interestis and in the United States and Mexico through the Pearson and other oil companies. The urgent necessity in these days of obtaining oil for power on land and at sea has apparently induced British statesmen to incorporate the interests of the oil companies in their national procedure, as in the United States and clsewhe-2.

There is, however, much naturai resource mineral wealth on the British Isles, coal of excellent grades, iron ores and tin ore. Coal in 1921 furnishcd more than 75 pel cent. of the totai product of ninerals. British cxport of coai has been for years a vital factor in kecping the economic craft of Britain afloat.

Iron ore comes next in inmportance, and is vital on account of the industries. Chaik alone contributes about 3 per cent. of the mineral output, and is about 8 per cent. of that which reniains after coal is eliminated. The minerals otherwise are varied, and include most of the base materials for building and mauufacturing.

\section*{SHIPPING AND RAILWAYS.}

Since the United States dissipated its "Clipper Fleets" in the last century, the Britlsh have been masters of the world's commerelal shipping. The Britlsh merehant marine exeeeds in tonnage and number of vessels that of any other people. The United States slnce the World War is second, and far in advance of the rest.

The profits from her shipping have been a heavy factor in the "invisible lmports," with which she pays for her food surplus bought abroad. In the latest decade British sh pbu lding yards gained not only in magnltude but sklll. The present tonnage (figures in detall of which appear elsewhere in The Almanac) is greater than that of pre-war, the deadweight tonnage sunk in the war already having been replaced.

The railway mileage of the United Kingdom is slightly more than 23,000 miles. In late years several important railway and eleetrie tram llnes in clty and country of the Kingdom have been placed in the hands of Amerlcan railway experts for management.

The roads are privately owned, and were returned from Government control and guarantee of interest on Aug. 15, 1921.

The British Isles have many canals - total mileage 4,673, of which 3,641 are in England and Wales, 184 in Seotland, and 848 in Ireland.

In 1921 tonnage orlginating on the principal canals of the United Kingdom totalled 11,893,000 tons.

In harbor development, the United Kingdom has made broad strides. The improvement of the banks of the Thames River, which flows through London, has been extensive and some very new ideas of navigation inland lor deep sea comlng and going have been introduced.

Probably the tidal gates for the Liverpool docks and piers are not duplicated. They enable the accommodation of deep draught craft regardless of the stages of the tides, which, at Llverpool, on the northwest side of the Isles, are very hlgh at certain phases of the moon

A ship canal makes Manchester the thlrd seaport of the Kingdom. Constructed in 1887-94, at a eost of \(£ 17,000,000\), it aecommodates steamers up to 12,850 tons. But all along the coastline, at Plymouth, Southampton, the Thames, at Hull, and at scores of other coast indentations the provlsions for shipping large and small are extensive, and thelr use constant and for the transfer of enormous traffic \(\ln\) people and goods.

Normally, there are no immigration restrietions in the British Isles.

The number of Irish who emigrated from Ireland was, in 1913, 30,967; 1914, 20,314; 1915, 10,659; 1916, 7,\(302 ; 1917,2,129 ; 1918,980 ; 1919,12,975 ;\) 1920, 15,585. The total number from May 1, 1851 , to the end of 1920 , was \(4,338,199\).

OLD AGE PENSIONS.
Every British subjeet and resident of the United Kingdom over 70 years of age, under certaln quallfications, whose yearly means do not exceed \(£ 50\) (broadly speaking \$250) is entitled to a pension. The weekly amount is 10 shillings if the pensioner's yearly means do not exceed \(£ 265 \mathrm{~s}\).; above that sum the pension decreases by 2 s. for every \(£ 55 \mathrm{~s}\). until at \(£ 47\) 5s. it becomes 1s. a week. On Mareh 25,1921 , there were \(1,002,342\) pensions payable in the Unlted Kingdom ( 353,794 to men, 648,548 to woinen). Total amount paid out in \(1920-21\) was \(£ 25,097,000\).

The estimated eost of war pensions and allowances in 1921-22 was \(£ 107,000,000\), which was exeluslve of \(£ 4,000,000\) cost of administration.
The total amount of unemployment benefit paid out from the Armistice to June 30,1922 , was approximately \(£ 88,700,000\); of this \(£ 27,000,000\) was paid out in the last fiseal year 1921-22.

In rellglon, absolute freedom of conscienee is guaranteed throughout the einpire. The state rellgon in the Kingdom is that of the Chureh of England, and for the Imperial Army and Navy, and for all phases of imperlal representation and aetivity abroad.

The inelusion of so many Mohammedans under the Brltish flag abroad nevertheless constitutes a a vital fasior in the determination of current imperial poilcios, espcelqlly in the Near East: as do the vast numbers of Buddhists and other Oriental rellgious cuicis affeet Far Eastern Britlsh pollcles.

The most celebrated of Britlsh universities are Oxford and Cambridge, eaeh with colleger founded In the thlrteenth century, and inextrlcably intertwlned in the iabrle of British history. But there are many others in England, London, Durham, Manehester, Birmlngham, Liverpool, Lceds,
\[
1
\]

Sheffield, and Bristol; in Scotland, St. Andrews Edlnburgh, Glasgow and Aberdeen; in Ireland, two \(\ln\) Dublln and one in Belfast, and one in Wales At these elghteen unlvergitles there were, in 1922 , 4,433 professors, and 50,870 students.

The system of instruction also lncludes elemen tary, special and certified schools, in which in the Kingdom the enrolment is about \(8,500,000\) pupils besides very many teehnical, art, professlonal and scientific instltutions along all lines ineldent to modern eivillzed needs. An exhaustlve survey has just been completed to prepare the ground for a complete readjustment of educational methods to conform to modern needs.

The trade with the United States as reported by the United States Department of Commerce for the last two years has been as follows:

\section*{THE ARMY.}

The army on peace strength numbers 183,000 men, with 205,000 in the tralned reserve

The United Klngdom is a member of the League of Nations.

Gibraltar, the rock at the southernmost point of the Iberian Peninsula, guards the entrance to the Mediterranean. The wldth of the strait dividing Europe from Africa is fourteen miles. The Rock has been in British possession sillee 1713. It has been elaborated, tunnelled, and armed untll it is eonsidered imprcgnable. A large and seeure harbor has bcen constructed at its foot. As a naval base lts position is of the greatest strategic importance. The Rock is \(23 / 4\) miles long, \(3 / 4\) of a mile wlde and 1,396 feet in helght; the area is nearly 2 square mlles; a narrow isthmus eonnects it with the Spanlsh mainland. Its population, census of 1921, was 17,690. The military establishment numbers about 6,000 men. Gibraltar is a crown colony and the Governor and Commander-in-Chief, at present Gen. Sir Horaee L. Smith-Dorrien, G. C. B., G. C. M. G., exereises all the governmental functions. The revenue for 1920 was \(£ 287,051\) and the expenditures \(£ 372,994\). In 1920 there entered 6,496 vessels of 11,614,187 tonnage.
Trade with the United States was:
Imports, 1920-21.
. \(21,466,475\)
Exports, 1920-21
4,514,326
The United Staies Consul at Gibraltar is Richard L. Sprague.

Malta, an island 17 miles long by 8 wlde and 58 miles due south of Sicily in the Mediterranean Sea and about 180 mlles from the African coast, has had eenturies of stormy history. It was annexed to the British Empire in 1814 following the Napoleonle wars and has been greatly strengthened and made into a base for repair and refitment for the British fleet. The harbor of Valletta (population 24,189) has been improved with a breakwater, but it is not large. The area of the island is 92 square mlles, and the total area, ineluding the neighboring lslands of Gozo and Comino, is 118 square miles. The elvi! population, by census of 1921 , was 211,864 . The lano under cultlvation amounts to 42,891 aeres, mostly in small holdings. Some cotton ls grown, and manufrctures lnclude lace filgree, cotton and elgarettes Fishlng is important. Wheat, flour, sugar, edlbl olls, tobaeco, textiles, wines, cattlo food, petroleum and eoal are the ehlef imports. There are elgh miles of railroads and in 1919-20 there entered thi port 1,519 vessels of \(1,893,850\) tons.
The Governor, at present Fleld Marshal Lor elected Legislature to care for purely local affairs The revenue of the eolony in \(1919-20\) was \(£ 650,489\) expenditures, \(£ 632,233\). Imports in 1920 were value at \(£ 5,789,426\) and exports at \(£ 1,602,294\).
The United States Consul at Malta is Masos
Mltehell.

Canada occupies the entire northern half of the continent of North America, excepting the United States Territory of Alaska in the northwest. It is bounded on the north by the Aretic Ocean, and the many indentations of the northeastern waters, including Baffin Bay; on the east by Baffin Bay and the Atlantic Ocean, on the south by the United States, and on the west by the Pacific Ocean and Alaska.

It has 24,500 miles of coastline, and its frontier aiong the United States, about 3,000 miles, is a unique example of non-fortification For more than 100 years, under treaty agreements, neither the United States nor Canada has maintained a soidier, fort, or other means of defense, at any point along this long border. Only two or three lightdraft vesseis, earrying a gun or two, ply the boundary waters, on customs duty for each country.

Canada is penetrated from the north in the eastern haif by Hudson Bay, a body of salt water which with the connecting strait, is about 1,000 miies long. Numerous rivers of navigabie size flow into the several oceans-the St. Lawrence, dividing Canada and the United States for many miles on the eastern side, flows into the Atlantic, and in its lower reaches is very wide and accominodates the dcepest draught craft; the Yukon, which rises in Canadian territory close to Alaska, then flows across Alaska into the Bering Sea to the nortinwest: the Mackenzie, which drains into the Arctic Ocean; and others of lesser size but of important commercial and power vaiues.

In area Canada is iarger than the United States, but is vastiy iess deveioped. The world-wide idea
that Canada is in all parts very cold and arctic in its physical characteristics is erroneous. The southern pa ts have a climate which corresponds with that of the northern tier of States of this country. Gradually it shades off into the severe weathers which are found in the northern regions. The climate varies; therefore, all the way from the north temperate to the very irigid Arctic.

Canada has every sort of topography-mountalnous in the west and northwest, and, like the United states, gradually attaining sea levels toward the east, excepting that there is not, as in the United States, a series of ranges of mountain height in the eastern half. In the west, the Rocky Mountaln range crosses from north to south, wlth the lower coast range which characterizes the entire Pacific regions of both North and South Amcrica. There is, lowever, a remnant of the Laurentian range in the east beyond Quebec reaching into Labrador. The influence of the Japan Current modifies the temperature of the west coast as it does that of South Alaska, lesGer degrees of cold being experienced than in the east. The variation of cold, therefore, is from a mean of 78 degrees in British Columbia, to Arctic low levels in the far north.

Of the total area, about one-seventh is covered by forests, of which something like one-half is merchantable timber according to existing conceptions thereof, and whlch, as North American timber supplies are further exhausted, will become more vaiuable. In the extreme north the timber growths are stunted and of local value only.
It is in the southern parts that the present potentiai and actual timber values are found. Lumbering in British Columbia proceeds in iorests of magnificent fir, trees as in the United States rising 300 feet in places. Other varieties also are in the west, and in the east the spruce, becoming the object of great competition as supply for paper puip, is of hcavy stand. Much of the cut comes to the United States, which must in the future depend on Canada for the bulk of its supplies.

In soil, Canada has all the varleties known to the north temperate zone, with vast areas toward the north which, by constant experiment and perfection of new methods, are coming more and more into agricultural uses. In the southern half at this time vast plains are avallabie for settiement and immediate tillage, awaiting only the plough and seeder. Large numbers of citizens. of the United States in the past 20 years have gone to occupy those cheaper lands, selling their more highly capitalized farms in this country and taking advantage of the liberal provisions of the Canadian Government for homesteaders.

Fine fruits are produced in the west, such as are grown in Oregon and Washington, in many valleys. In the east the fruits are similar to those raised across the line in the United States.

Wheat and all the cereals are grown extensively, the production being on the constant increase. The production now is far beyond domestic needs, and the exports to Europe are heavy

In minerals Canada possesses resources which are constantly being explored and developed, and which will be a source of vast wealth. All of the principai baser metais and other minerals abound, gold belng abundant in the west, northwest, and south.

Agriculturally, Canada takes a promising position, and livestock is a source of large revenue. Up to this tlme, agriculture and livcstock are the chief interests, and wili be until there is the same industrial development as in this country, with domestic demand for industrial workers talsing up more of the food surplus.

Wheat crops run at about one-third of those of the United States, the 1920 census reporting 263,198,300 bushels, with other cereals close in proportion, and dairying grows rapidly in relative importance.

Fisherios are of very large importance on both the Pacific and Atlantic sides, as well as in interior waters, with salmon, cod, sardines, principal catches, the value in 1919 bcing more than \(\$ 50,000,000\).

During the past two decades, manufacturing industry has advanced enormously. Not only have Canadians developed lmportant factories, but also many American manufacturers have established Canadian plants. The plenitude of water power sites has accelerated this progress, there having been heavy utilization under both governmental investment therein, as weil as private.

The latest reliable tigures are that about 2,400,000 horse power have been developed of the total minimum capacity estimated at \(18,000,000\) hor e nower.

In 1918, It was reported that Canada had invested in manufacturing in 35,797 cstablishments \(\$ 3,034,301,915\) capital; empioying 678,337 persons, paying \(\$ 629,790,644\) in wages and salaries, using \(\$ 1,900,252,314\) of materials, and outputting \(\$ 3,458\),036,975 of products. They include food products, textiles, iron and steel, timber and lumber, leather, paper, chemicals, glass, vehicles, shlps and other things.

Canada has been rapidly developing its foreign trade with the United States and Europe, and is making a vigorous invasion of the Central and South American markets. It is followling the sca traditions of the mother country, and has already a considerable merchant marine on both ocean fronts. In 1920 there was reported tonnage aggregating \(1,091,895\), inland and seagoing. Seagoing and coastwise clearances in that year were more than 42,500,000 tons.

A feature of railway development has been the governmental encouragement of transcontinental lines, the Canadian Pacific being one of the great systems of the world; others are the Grand Trunk, tlie Grand Trunk Pacific, the Canadian Northern. Transcontinental traffic, passenger and freight, is incroasingly heavy.

Canada malntains its own army, and is in fact and law independent of the imperial authority in London ln its use, as weli as in the beginning of a navy. It has, however, ioyaliy sustained the empira in its mllitary and naval undertakings, especially in the late war, when Canadlan troops won unusual distinction.

The Dominion of Canada is a member of the League of Natlons.

Although the Church of England is the state religious authority, complete freedom of worship is guaranteed, and on account of the prevalence of French in the eastern provinces, there are more Roman Cathoiies than any other faith. The 1911 figures showed 2,833,041 Catholics, 1,115,324 Presbyterians, mostly Scots, 1,043,017 Church of England, 1,079,892 Methodists, 382,666 Baptists, 229,864 Lutherans, and other creeds represented.
In later decades, many Siavs have taken up Canadlan farm lands and have gone into the factories, which swells the Catholic population.

Canada has well defined provincial local governments, under a Federal plan not dissimilar to that of the United States. The money system is a duplicate of that of this country.
There are 22 universities, with 2,998 professors and 28,486 students. The University of Toronto has the largest matriculation of any university under the British flag. The secondary and elementary schools numbered, in 1919, 27,968, with 53,990 teachers, and 1,738,977 pupils.

More and more, soclal custom and development on both sides of the boundary line cause mutual action and reaction between the United States and Canada. The social institutions are most similar and there is an economic interchange as well which accelerates this process.

New York City, as the financial capital of much of the world, becomes more and more the financial resort ior Canada, especially in the east, and Chicago, Detroit, Buffalo and other cities along the border grow constantly into closer relations with Canadian lnterests.

Canada is now finding her chief market in the United States, and the reciprocal relations become apparent on this side, until as matters stand, economically the two countries find each other their principal field of outside operation.

Interfow of tourist travel aids this process. Citizens of the United States go in increasing numbers'to summer in Canada, east and west-the west affording scenic beauties in the famed Canadian Rockies not excelled anywhere.

\section*{NEWFOUNDLAND.}

AREA, 42,734 square miles. Dependency, Labrador, 120,000 square miles.
POPULATION, census of Dec. 31, 1920, 263,383. Labrador, population, 1919, 3,647.
CAPITAL, St. John's; population, 34,045 (in
1918) ; other cities, Harbour Grace, 4,279 ; Bonavista, 3,911 .
Governor General, Sir O. A. Harris, K. C. M. G.
Premier, Sir R. A. Squires, K. C., K. C. M. G.
United States Consul, at St. John's, James is.

\section*{Benedict.}

Newfoundiand, at the eastern end of Britlsh America, in the Atlantic Ocean, is the island and main part, governing Labrador, which is on the mainland.

Newfoundland is the oldest Engiish coiony. Discovered by John Cabot, June 24,1497 (Cape Bonavista), it was, in August, 1583, formally occupied by Sir Humphrey Gilbert, and by the Treaty of Utrecht, 1713, acknowledged to be British. A Governor was appointed in 1728, and in 1855 "responsible government" was accorded to the isiand. It is administered by an appointed Governor, aided by an Executive Councll, with a Legislature of two Houses, the Assembly elected by manhood suffrage. Newtoundland has steadfastly refused to joln the Dominion of Canada. Labrador is a dependency; it has 850 miles of coastline, and is chiefly inhabited by Fskimos engaged in fishing and hunting.
Nowfoundland is rugged in topography, cilmate and the stern and peculiarly serious character of the
people, whose empioyment is mostiy flshing and sealing, next to agriculture and livestock. The colony contributed 11,922 men to the British armies in the World War, and 3,000 others enlisted in the Canadian contingent.

Besides the foodstuffs producible in that northern latitude, there are resources of minerals which are not yet much developed, including iron ores, copper and gold. The forests are a great source of revenue. Paper pulp is taken from there to England. It had, in 1919, 904 miles of railroad

Imports in 1921 totalled nearly \(\$ 30,000,000\), and exports more than \(\$ 23,000,000\).

Foreign trade is heaviest with Canada, the United
States foliowlng, Britain being next.
Trade with the United States was

\section*{BRITISH WEST INDIES.}

\section*{JAMAICA}

AREA, 4,431 square miles
POPULATION, census of \(1921,867,021\).
CAPITAL, Kingston; population, 1921, 62,562. Other cities: Spanish Town, 8,694; Port Antonlo, 7,074; Montego Bay, 6,616.
Governor, Sir Lealie Probyn, K. C. M. G
United States Consul, at Kingston, Charles L. Latham.
Jamaica is situate in the Caribbean Sea, 90 miies south of Cuba, and is the largest and most vaiuable of the British West Indies. It is about the size of the state of Connecticut. It has a rather mixed population, West Indians predominating. In 1921, there were \(1,074,703\) acres cared for, of which 302,125 were tilled, and 772,578 pasture. Products are tropical. Imports from the United States are iarger than from any other country, and exports to thls country second to those to Britain.

The climate has attractions for winter tourists, and many citlzens of this country visit the island. The lsland figures largely in the hlstory of the Buccaneers of the West Indies before and during the tlme of Sir Henry Morgan, once its Governor. The old haunt of the pirate, Port Royal, at the entrance of the harbor, was destroyed and sunk under the sea by an earthquake.

\section*{\(B E R M U D A\).}

AREA, 19 square milcs.
POPULATION, census of \(1920,219,987\).
CAPITAL, Hamiiton; population, 2,627.
Uniled States Consul, vacant.
Bermuda, a crown colony, is a group of 360 small islands of coral formation, about 20 inhabited, in mid-Atlantic, 677 miles southeast of New York and 580 miles east of North Carolina. To Americans, the main island, capital Hamilton, population 2,627, is a favorite winter resort, fully 25,000 visiting i , annually. It shlps to New York quantitics of Easter lilles, early potatoes and onions. Of its 12,360 acres 4,000 are under cultivation. The population, by census of 1920 , numbered 21,987 , of which 7,509 were whites.

The Governor, Gcn. Sir James Wiilcocks, is aided by two Councils and an elected House of Assembly of 36 members.

Bermuda is an important navai base wlth a weii equlpped dockyard. Food supplies are mostly imported from the Unitcd States and Canada. The imports in 1920 were valued at \(£ 1,414,250\), and exports at \(£ 265,868\). The revenue in 1920 was \(£ 219,-\) 753 ; expenditures, \(£ 186,470\); debt, \(£ 85,000\). Tonnage entering the port in 1920 amounted to \(2,371,064\) tons.

Trade with the United States was:

THE BARBADOS.
AREA, 166 square miles.
POPULATION, 1920, estimated, 198,366
CAPITAL, Bridgetown; population, 16,648 .
Governor, Lleut. Col. Sir C. R. M. O'Brien, K. C. M. G.

Unted States Consul, Join J. C. Watson.
The Barbados are the most eastern of the Wind-
ward Islands, In the West Indles, lying out in the Atlantic at \(13^{a}\) north latitude.

Of the total 106,470 acres, 74,000 are tilled, producing chiefly sugar and cotton. Imports are heaviest from the Unlted States, and exports heavlest to Canada. Tonnage entered in 1920 was \(3,201,535\).

These islands, together with others in the Carib bean Sea, were factors in the celebrated freebooting days of Morgan and other notorious pirates.

\section*{THE BAHAMAS}

AREA, 4,404 square miles.
POPULATION, census of 1921, 50,031
CAPITAL, Nassau; population, about 12,000 .
Governor General, Major Sir H. E. S. Cordeaux;
K. C. M. G., G. B.

United States Consul, Lorin A. Lathrop
The Bahama Islands number twenty, part of them uninhabited, and are in the Atlantic Ocean, off the coast of America. Nassau, on the Island of New Providence, near the Florida coast, is an attractive winter resort for Americans.

Sponges and sisal are the chief sources of revenue. Fruit growing is being developed. Trade with the United States is three times as heavy as with any other country.

\section*{WINDWARD ISLANDS.}

AREA, 133 square miles.
POPUI.ATION, census of \(1911,66,750\).
CAPITAL, St. George's, on Grenada Isiand.
Governor, Sir G. B. Haddon-Smith, K. C. M. G
The Windward Isiands ile at the eastern side of the Caribbean Sea, west from Martinique. They are Grenada and the Grenadines, St. Vincent and St. Lucia. Each has its own local government.

In 1916 there were under cuitivation 30,200 acres. Products mostly are sugar, cocoa, nutmegs, cotton, mace and fruits.

\section*{LEEWARD ISLANDS.}

AREA, 715 square miles.
POPULATION, census of \(1911,127,103\).
CAPITAL, Antigua.
Governor, Slr Eustace Fiennes, Bari.
The Leeward Islands, of the West Indies, are part of the Lesser Antilies, forming Froude's "Bow of Uiysses." They coniprise in one administration five Presidencies, and include the Islands of Antigua Barbuda, Redonda, St. Christopher, Nevis, Anguilla. Dominica, Montserrat, and the (British) Virgin Islands, with Sombrero, under Commlssioners, and all except the latter liaving their own local Legislature.

Their chief products are sugar, moiasses, cocoa and tropicai growtins. Trade with the United States is growing.

The trade of the Bahamas, the Windward Islande and the Leeward Islands wlth the Unlted States was: Imports, \(1920-21\)

1921-22 4,620,375

1921-22 4,013,120
1,690,929

\section*{BRITISH HONDURAS.}

AREA, 8,592 square iniles.
POPULATION, census of \(1921,45,317\).
CAPITAL, Belize, population, 12,660
Governor General Sir E. Hutson, IK. C. M. G.
United S'ates Consul, William W. Early.
British Honduras is situate oll the Caribbean Sea, south of Yucatan, and produces chiefly tropical fruits, mahogany, logwood, seashell, and cedar, much of which comes to the United States. Of the importo. a considerable trade is with this country and Canada, and comprehends things produced both in this country and Britain.
Imports in 1921 were valued at \(\$ 6,000,000\), and exports at \(\$ 5,130,000\).
Trade with the United States was:
Imports, 1920-21
\$2,622,217
Exports, \(1920-21\)

\section*{BRITISH GUIANA.}

AREA, 89,480 square miles.
POPULATION, census of 1921, 297,691.
CAPITAL, Georgetown; population, 53,422 .
Governor, Sir W. Coliet, K. C. M. G.
United States Consul, Chester W. Davis.
British Guiana is on the north shore of South America, with Venczuela on the west, Dutch Guiana on the east, and Brazil on the south. It is administered by a Governor, assisted by a Court of Policy, seven appointed and eight elected, these with six
others constituting the Combined Court that rules. Areas tilled are 177,000 acres, producing in 1920 sugar cane from 69,530 acres, rice from 55,250 acres, cocoanuts from 24,450 acres, coffee from 5,050 acres, rubber from 2,800 acres.

Livestock numbered 111,940 cattle, 1,420 horses, 22,250 sheep, 17,000 swine.
The placer gold mining industry is important, the 1920 production bcing \(\$ 430,000\).

Ores from which aluminum is made are abundant. and it is believed that there will be development of the oil, manganese and mica resources.
Trade with the United States was:
Imports, \(1920-21\)
\(\$ 6,246,348\)
Exports, 1920-21

\section*{1921-22...................................301}

FALKLAND ISLANDS AND SOUTH GEORGIA.
AREA, 6,500 square miles, including more than 100 islands. South Georgia, estimated. 1,000 square miles.
POPULATION, Faikland Isiand, census of 1919, 3,255 ( 2,271 malcs, 984 females) : - South Georgia, estimated, 1,000; only 3 females.
The Falkland Islands lie 300 miles east from the Strait of Magellan, at the southern end of South America. Their main value is in their strategic location, aithough there are domestic animals and whaling interests. It was off the Falkland Islands the British war fleet under Admiral Sturdee defeated the troublesome German fleet in the late war, completing the elimination of the naval force of the Central Powers in the South Pacific.

\section*{INDIA.}

AREA, of British provinces, \(1,093,074\) square miles; area of protected native states or agencies 709,555 square miles. Total India, 1,802,629 square miles. POPULATION, of British provinces, census of \(1921,247,138,396\); native states and agencies, 71,936,736; total India, 319,075,132.
CAPITAL, Delhi; population, 303,148.
Viceroy and Governor General, The Earl of Reading, P. C., G. C. B., G. M. S. I., G. M. I. E., K. C. . V.' 0 .

United Stotes Consul.General-At Calcutta, Alexander W. Weddell. Consuls, at Bombay, North Winship; at Karachi, Avra M. Warren; at Madras, Thomas M. Wilson; at Rangoon, James P. Moffatt.
Indla is bounded: on the north by Afghanistan and China; on the east by China, Siam and the Bay of Bengal; on the south by the Bay of Bengal, the Indian Ocean and the Arabian Sea; on the west by the Indian Ocean, the Arabian Sea, Persia and Afghanistan. Its territory is as large as that of the United States east of the Rocky Mountain States.

The climate ranges from the extremeiy hot in the southeast to cooler elevations of the northwest mountains, the whole being tropical in general character.

Approximately 25 per cent. of the area is forested, among the timber products being sandalwood, teak, ironwood, deodar. sissu, satinwood, date palm, cocoanut, sago, banyan and acacla.

The country is essentialiy agricultural 70 per cent. of the people living therefrom. By the 1911 figures, there were in ali of India, British India and the native states, \(313,000,000\) persons, of which about \(225,000,000\) were supported by soil tillage, forestry and livestock husbandry. Agriculture is crude, although improvement of method is being attained through the efforts of the British Department of Agriculture, which maintains staffs of experts to inculcate modernity among the natives. They also teach better ways of caring for domestic animals, and encourage the introduction of highbred grades.

In 1920 there. were \(254,990,536\) acres in crops in British India, with 23,197,000 acres irrigated by canals, \(7,337,000\) by tanks, \(12,692,000\) by weils and \(5,737,000\) by various other ways. About \(\$ 460\), 000,000 of crops were taken from irrigated lands in the crop year of 1919-20.
In 1921 rice on \(78,023,000\) acres yielded 28 ,033,000 tons; wheat, \(6,709,000\) tolls from \(25,722,000\) acres; cotton, \(3,556,000\) bales from 21,016,000 acres-an exceedingly low per acre yield.

Other important products were linseed, rape, mustard, jute, indigo, sugar cane and tea.
Livestock in 1920 numbered \(117,000,000\) oxen,
28.493 .000 buffalo, \(21,984,000\) sheep, \(24,134,000\) goats. \(1.698,000\) horses, 75,000 mules, \(1,372,000\) donkeys and 408,000 camels.

The cotton industry is the most important next to agriculture, there being 284 spinning and weaving milis. employing 282,297 persons. Jute mills come next, with 75 establishments employing 264,373 persons; cotton ginning and baling, 1,775 establishments employing 133,323 pcrsons. Other important industries empioying 11,000 or more persons are transport, ricc mills, engineering, manufacture of arms and ammunition, machinery, lumber, woollen goods, sugar, oil, tobacco, lace, rubber and other things.

Industry has 4,827 establishments and employs \(1,238,410\) persons.
In minerals, India has an unusuaily wide range of products gold, silver, petroleum, manganese, salt, saltpetre, lead, tungsten, mica, tin, jadestone, precious stones, iron ore, coai, copper, aium, potash. and a dozen other minerais valuable in the modern processes of manufacture.
Coai, with about \(\$ 50,000,000\) output in 1919 , led ali others in value.

The 1919 figures showed coal, \(22,628,037\) tons; manganese ore, 537,995 tons; woilfram, 3,577 tons; mica, 45,784 hundredweight; copper, 32,759 tons; goid, 507,261 ounces, and of precious stones, 158,577 carats. About 250,000 work in the mines. Manganese, without which modern steelmaking is impossible, formerly came to the United States entirely from India. In the past ten years this country has drawn most of its supply from South America.

Imports in 1920-21 into India totalied in value \(\$ 1,608,012,406\), of which neariy two-thirds came from the United Kingdom, the United States following with slightly more than 10 per cent., Japan coming next with 7 per cent., Java, Sumatra and Borneo next with 5 per cent., and no other of 20 countries seliing to India more than 2 per cent. of the total.

India exported in 1920-21 a total oi \(\$ 1,191,-\) 017,009 , of which slightiy more than 20 per cent. went to the United Kingdom, 15 per cent. to the United States, 17 per cent. to China, 10 per cent. to Japan, 5 per cent. to Ceylon, nearly 5 per cent. to Beigium, and not more than 3 per cent. to any other of seventeen countries.

Jute led in vaiue of exports, cotton, raw and manufactured, coming next, while cotton manufactures exceeded ail other importations, being haif the totai.

In 1920-21 there were 4,331 vessels entered Indian ports, of a total tonnage of \(8,046,475\), of which 2,444 vesseis were British, with 6,113,299 tonnage, and 332 British Indian, with 144,638 tonnage. The British and British Indian ships were about 60 per cent. of the total.
India has 55,000 miles of railways and about 150,000 miles of highways. Transport is aided also by the use of irrigation canals for freight moving, there being navigable waterways inland totailing about 3,300 miles. Railway development is not modern, three gauges being employed, preventing interchange of cars from one line to another.

Great Britain officiaily defines British India as that part of the Indian peninsula which is directiy under British rule, but the technical delimitation of British India shades off into other areas, where British influence predominates and is virtuaily complete. The British imperial status was given when Queen Victoria was proclaimed Empress of India in 1876.

Government there by Britain is deciared to be based on tlic principle which has obtained in other colonies and dominions since the time the United States separated from the mother country-that of advancing the peopie as far as possible aiong the pathway toward autonomy and complete seifgovernment. The ultimate objective is said to be that absolute self-government which the Dominion of Canada, the Commonwealth of Austraiia, the Union of South Africa and other areas have. The backward status of the people has prevented the realization of such an end so far, according to British authoritative statements.

India is a member of the League of Nations.
It is said that there are 45 races, speaking 170 languages, and 2,400 castes and tribes, divided, \(217,000,000\) Hindus, \(60,000,000\) descendants of Turanian tribes, \(66,000,000\) Mohammedans, and there are 700 feudatory states. Each cult, caste and tribe adheres flercely to its religious beliefs and social rules, many of them witi fanaticism, espectally the Mohammedans, who even in far-off India look quite as faithfully toward Mecca each sundown as do those nearer to tire capital of Islam for 1,000 years. The stability of these conditions, tonching all classes, is probably the morc assured because of all the ponulation only about 10 Der cent. is urban.

POPULATION OF CITIES OF INDIA.
The popuiation (1921) of the cities of India of above 100,000 inhabitants was as follows:
Greater Calcutta1,263,292 \(\mid\) Amritsar ....... 160,409 Bombay . . . . . . 1, 172,953 Allahabad....... 155, 1570 Madras.......... 522,951 Nagpur.......... 149,522 Hyderabad..... 404,225 Mandaiay...... 147,429 Rangoon....... 339,527 Srinagar....... 141,631 Delhi. . . . . . . . . . 303,148 Madura. . . . . . . 138,894 Lahore............ 279 27,558 Barellly ........... 127,939 Ahmedabad..... 274,202 Meerut. .......... 122,567 Lucknow . . . . . . 243,553 Jaipur. . . . . . . . . 120,196 Bangalore. . . . . 238,111 Patna. ......... 120,109 Karachi . . . . . . 215,781 Trichinopoiy . . 119,521 Cawnpore...... 213,044 Surat........... 118,299 Benares. . . . . . . 199,493 Dacca. . . . . . . . . . 117,304 Agra. . . . . . . . . . . 185,946 Ajmer . . . . . . . . . . . . 114, 196 Poona. . . . . . . . . 176,671 Jubbulpore. ... . . 108,973

There are aiso 54 cities with a population of more than 30,000 and less than 100,000 .

The problem in India is aiways how to get enough food for the people; that is, enough to stave off starvation. Famines and scourges are frequent, and obstacles to efflcient use of the natural resources are ever present in the conservatism of the people and disinciination to change

Although the efforts of Britain to introduce better methods have accomplished much and have held loyai a large proportion of the people, there has iately been an arousal of extreme nationalism, with resistance by the agitators and their followers to British ruie; taking under the leadership of Gandhi the form of non-co-operation.

Trade with the United States was:
Imports, 1920-21
\$92,549,584
Exports, 1920-21
35,723,466
Exports, \(1920-21 . .\).
Beluchistan is in the extreme western part of tho Indian Empire, with 54,228 square miles of area, and, in \(1921,421,679\) of popuiation, practically ail Mussulmans or Hindus. It is governed by Britisli Residents under long-standing agreements.

Barren mountains and deserts render it comparatively unimportant economicaliy, with some cereais produced, and ijttle development of any kind. Mincrals have been expiored, and will some time afford weaith. Foreign trade totals about \(\$ 1,000,000\).
Sikkim is a state of India in the Himalayas, south from Thibet. The area is 2,818 square mlies, and population in 1921 was 81,722, composed of Bhutias, Lepchas and Nepalese. It is governed by a Maharajah, H. H. Tashi Namgyal, under a British protectorate.

Cereals, fruits and woolen cloth are the products. The country is undeveloped.

The Andaman Islands are in the Bay of Bengal, 120 miles from the mainland of Burma. Area is 2,260 square miles, and population, 26,833 . Timber wealth is large, but the use of the islands for a penal settlement is the cirief interest.

The Nicobar Islands, 75 miles from Andaman Islands, lave 635 stuare miles of area, and population of 10,000 .

\section*{OTHER BRITISH ASIATIC POSSESSIONS.}
\(A D E N, ~ P E R I M, S O K O T R A, A N D\) BAHREIN ISLANDS.
United States Consul at Aden, Cecil M. P. Cross.
Aden, a peninsula on the Arabian coast, is on the southern end of the Suez Canal, and has 75 square miles of area, in Aden proper, and 9,000 square milas including protectorate areas. The population, including Perim, in 1921 was 54,923 , mostly Mohammedans. Foreign trade is indicated by about \(\$ 25,000,000\) in 1921 of imports-cotton goods, grains, coal, sugar, and foods; exports being coffee, gum, hides, cotton goods, and foods.

Manufacturing is chiefly of cigarettes and salt.
There are about 30 miles of narrow gauge railways
Sokotra is an island off the African coast undel British protection, and the Kuria Muria Islands, off the Arabian coast-all attached to Aden. Area in all is 1,382 square miles, and population 12,000 , mostly engaged in livestock husbandry.

Trade with the United States was:

The Bahrein Islands lie off the Arabian coast, in the Persizn Gulf, the total area being 280 square miles, and the population 110,000 , mostly Mohammedans. Pearl fishing is the chief interest. The foreign trade in \(1920-21\) totalled about \(\$ 5,900,-\) 000 of imports, chlefly rice, coffee, sugar, tea, and cotton piece goods; and exports about \(\$ 6,250,000\), being about \(\$ 750,000,000\), and exports \(\$ 600, \mathrm{C} 00,000\), mostly rice, coffee, sugar.

\section*{\(C E Y L O N\)}

Unitca States Consul, at Colombo, Marshall M. Vance.
Ceylon is an island as large as the state of West Virginia, off the southern tip of India, in the Indian Ocean, with 25,481 square miles of area and 4,497 , 599 of population, divided: Buddhists, 2,770,000; Hindus, 982,000; Mohammedaus, 302,000; Cnristians, 444,000 . Colombo (population 1921, 244,110), is the chief city.

Of the total \(16,212,000\) acres, \(3,106,000\) are tilled, and \(1,000,000\) pastureland. Products are cocoanuts, rubber, cinnamon, tea and grains. Tea is the most important, \(185,000,000\) pounds being exported in \(1920,120,000,000\) to the United Kingdom. Rubber exportations in 1920 were more than \(88,000,000\) pounds, half going to the United Kingdom, and \(39,368,000\) to the United States. Total imports in 1920 were about \(\$ 125,000,000\); exports, about \(\$ 95,000,000\).

Trade with the United States for the fiscal year 1921-22 was: imports, \(\$ 411,108\) : exports, \(\$ 9,723,851\).

The Maldive Isiands are 400 miles west from Ceylon, with 70,000 population, almost all Mohammedans. Cocoanuts, millet, palms, fruit and nuts are the products.
\(C Y P R U S\).
Cyprus is an island, third largest in the Mediterranean Sea, 40 miles from Asia Minor and 60 from Syria. Its area is 3,584 square miles, and population in 1921 was 274,108 Mohammedans (Ottoman Turks), 56,428; Christians, 214,480.

Nicosa is the capital, population 18,461 ; other towns, Larnaca, 10,652; Linasol, 11,843.

The island is agricultural, with wheat, barley, vetches, oats, olives and cotton chief products. 30 per cent. of the land area is cultivated.

STRAITS SETTLEMENT'.
AREA, Singapore Island, 217 square miles; Penang Island, 108 square miles; Wellesley, 280 square miles; Malacca, 840 square miles; Pangkor, 155
square miles; total, 1,600 square miles.
POPULATION, estimated, \(1921,882,000\).
CAPITAL, Singapore, population, 423,768.
Governor, Sir Lawrence N. Guillemard, K. C. B., K. C. M. G., also High Commissioner for the Federated Malay States; High Commissioner for Brunei, and British Agent for North-Borneo and Sarawak
United States Consul General, at Singapore, Ernest
L. Harris; Consul at Penang, Renwick S. McNeice.

The Straits Settlement is a crown colony in which Singapore, an island of 217 square miles area, just off the coast of the Malay Peninsula, is the chief part. The population in 1921 was about 890,000 Products are typical of that zone, total imports being about \(\$ 750,000,000\), and exports \(\$ 600,000,000\), two-thirds of each with British countries.

\section*{Trade with the United States was:}

Imports, 1920-21
14,927,449

The Federated Malay States lie in the Malay Peninsula, and have 27,506 square miles, and population in 1919 was about \(1,315,000\). Products are cocoanuts, rice, rubber, tapioca, pepper, gambier, and nipah palms. In 1920 imports were about \(\$ 100,000,000\), and exports about \(\$ 165,000,000\).

The Unfederated Malay States, area, 23,486 square miles, and estimated population, all Mohammedans, of about \(1,123,000\), are five in number, each under a native Sultan and with a British adviser.

British North Borneo has 31,106 square miles area, with 208,183 population in 1911, chiefly Mohammedans on the seacoast and aboriginal tribes inland
A. C. Pearson is Governor General, and the British North Borneo Company has Jurisdiction.
Exports are mainly timber, sago, rice, gum, and the tropical products.

Brunei has been since 1888 a protected sultanate on the north side of the Island of Borneo, between Sarawak and British North Borneo. Its area is Sarawak and British North Borneo. Its area is 1921, 25,454, of which 35 were Europeans. The revenue for 1920 was about \(£ 23,500\) and expenditures about \(£ 26,000\); debt \(£ 50,100\). A British Resident is in control.

Sarawak, the land of the white Rajah, is along the northwest coast of Borneo, between the mountains and the China Sea. Its coast line is 400 miles long and its area 42,000 square miles. Its population is estimated at about 600,000 . The chief towns are the capital, Kuching, 23 miles up the Sarawak River, and Sibu, 60 miles up the Rejang River, which is navigable for large steamers. The chief exports are sago, pepper, gold, plantation rubber, gutta percha, gutta jelutong, cutch, petroleum, birds' nests, fish, oil nuts and sugar. The Rajah is H. H. Charles.Vyner Brooke, great-nephew of James Brooke, the Englishman to whom the Sultan of Brunel gave the Government in 1842.

\section*{HONG KONG.}

Governor General, Sir R. E Stubbs, K. C. M. G.
United States Consul General, William H. Gale.
British Hong Kong is a crown colony acquired in 1841, and lies at the mouth of the Canton River 60 miles from Canton. It is 11 miles long by from two to three wide. The population in 1920 was estimated at 625,166 , non-Chinese being 14,000 .

Hong Kong is an important British station of great strategic value commercially as well as naval as to China. Foreign trade in 1920 was: imports about \(\$ 650,000,000\); exports, about \(\$ 765,000,000\); of the imports 32 per cent. was from the British Empire; of the exports, 18 per cent. to Eritish areas.

Much of the trade with the United Kingdom is for articles for re-exportation, the trade compristing exports of the simpler products of the areas tributary to Hong Kong, and inports the manufactures and other things of more advanced countries.

\section*{WEIHAIWEI.}

Weihaiwei is in the Chinese Province of Shantung, and includes islands and the bay, which were leased in 1898. The area is 285 square miles, and the poput lation was 147,177 in 1911. Under agreement made at the Shantung Settlement at the Washington Conference, January, 1922, Great Britain will restore the territory to China.

\section*{UNION OF SOUTH AFRICA.}

AREA, 473,089 square miles; divided, Cape of Good Hope, 276,966; Natal, 35,284; Orange Free State, 50,389; the Transvaal, 110,450. POPULATION, census of \(1921,6,922,813\); divided, Cape of Good Hope, 2,781,185; Natal, 1,234,000; Orange Free State, 628,360; the Transvaal, 2,085,837
CAPITALS, Cape Town (seat of Legislature), population, census, of 1921, 206,558; Pretoria (seat of Government), 73,770; other citles, Johannesburg, population, 284,191; Durban, 140.324; Port Elizabeth, 45.927; Kimberley, 39,320; Bloemfontein, 38,865 , and six others having more than 10,000 but less than 21,000 whites.
Gorernor General, H. R. H. Prince Arthur of Connaught, K. G.

Pramier, Gen. the Rt. Hon. J. C. Smuts (Natlve Affairs)
United States Consui General, at Cape Town, Alfred A. Winslow: Consuls, at Durban, Natal, Lewis V. Boyle; at Port Elizabeth, Monnett B. Davis; at Johannesburg, vacant.
The Union of South Africa, referred to by some Britons as "The flower of Brltish democratio development," includes the former colonies of the Cape of Good Hope and Natal, and the one-time Boer. republies, the Transvaal and the Orange Free State. These were all united May 31, 1910, under self-governing privileges. Leglslative power rests with a Senate of 40 members, eaeh with a \(£ 500\) property qualification, eight appointed and 32 elected; and a House of Assembly of 134 elected members.

The Government, to which the British Parliament granted broadest powers, is on a very advanced platform of expression of the people's will. There is an elected provisional eouncil in each state with an administration appointed by the Governor General which deals with local matters.

The Union of South Africa is a member of the League of Nations.

The census of 1921 returned \(1,522,924\) whites and \(5,399,889\) colored; of the \(4,697,152\) colored returned in the 1911 census, \(4,019,006\) were Bantu natives, 152,309 Aslatics and 525,837 of other races. Of the cities Johannesburg, Cape Town, Pretoria, Port Elizabeth and Cast London alone returned a majority of white inhabltants.

The defense force of the Union has been entirely responslble for the military administratlon since Dec. 1, 1921, and the imperial soldiers have been withdrawn.

The railways owned by the several colonies prior to the Union were in May, 1919, merged into one system, the South African Railways, under control of the Union Government. The total mileage in operation March 31, 1920, was 9,542 (Cape, 4,252; Natal, 1,302; Orange Free State, 1,342 ; and the Transvaal, 2,644). The capital expenditure up to March 31, 1921 , was \(£ 99,821,886\); gross earnings, \(1920-21\), were \(£ 23,618,457\); expendltures, \(£ 18,646,912\). The mileage of privately-owned lines was 507 (Cape, 453; Natal, 50 ; Orange Free State, 4).

The overseas shipping entering the ports in 1920 was 1,200 vessels of \(4,085,000\) tons; coastwise, 2,532 vessels of \(5,698,000\) tons.

The output of gold and diamonds from south Africa from the earliest dates of discovery to Dec. 31, 1920 , is given in the following table, the value of gold being ealculated at \(£ 4.2477\) per ounce.
Province.
Cape of Grood Hope..... Cold.

Orange Free State.
28,979,807
Total. . £673,914,796 £216,797,140
The value of the coal output for the Union in the same time was \(£ 48,871,775\), in all provinces; of copper, \(£ 22,917,558\), chiefly from the Cape; and of tin, \(£ 4,440,170\), chiefly from the Transvaal. The agricultural and dairying industrles have been well developed for African areas, and such produce is even shipped to the London market.

Progress is belng made in development of manufacturing to use the country's raw materlals, more than \(\$ 200,000,000\) being already livested therein.

The Union of South Africa spelt out of its loan funds for war services in the six fiscal years, 1915-21, £22,940,555.

\section*{SOUTH AFRICA.}

Basutoland, with 11,716 square miles, and, by the census of \(1921,500.554\) population, of which 1,396 were Europeans, lies in South Africa northeast from the Cape of Good Hope Province on an elevated plateau. It is well watered and has a fine climate. Stock-raising is most important Products are wool, wheat. cereals, with beginning of iron workings, and coal production promised. The terrltory ls governed by a resident Commlssioner under the High Commissioner for South Africa
Bechuanaland, area, 275,000 square miles and population, by the census of 1921, 152,983, is in the middle of Southern Africa between Southwest Africa and the Union of South Africa and Rhodesia. It is utterly undeveloped, but cattle growing and agriculture have gained momentum, and the live stock already totals more than 600,000 head. Gold is mined, the 1921 output being in excess of \(\$ 100,000\). It is a protectorate governed by a resident Commissioner.
Rhodesia, with 440,000 square miles, and 1,728,000 populatlon, estimated, and divided by the Zambesi River into Northern and Southern Rhodesia, about of equal size and importance, lles in Central South Africa, extending from the Transvaal to Belgian Congo and Tanganyika. The people are progressive, women voting, and good beginnings have been made in agrlculture and cattle raislng. Gold and silver are mined. The total output of gold from 1890 to Jan. 1, 1922, was £51,401,615.
The territory is under the administration of the Britlsh South Africa Company, who secured- a royal charter Oct. 29, 18518 There ls a Legislative Council of 19, of whom 12 are elected by direct, vote, women voting
Inl a referendum held Nov. 6, 1922, the people of Rhodesia cast 5,989 votes in favor of incorporation with the Union of South Africa and 8,774 against, being a majority of 2,785 against.
Swaziland, wlth 6,678 square miles, and a population, by census of 1921 , of 133,563 , lies at the southeast side of the Transvaal in South Africa, and produces chiefly tobacco, corn, vegetables, sweet potatoes, and livestock. Some gold is yieided. The country is undeveloped. it is governed by a resident Commlssioner under the authority of the High Commlssloner of South Africa.

\section*{BRITISH WEST AFRICA.}

\section*{NIGERIA.}

AREA, estimated, 332,000 square miles.
POPULATION, estimated, \(16,250,000\).
CAPITAL, Lagos.
Governor, Sir Hugh Clifford, G. C. M. G.
Nigeria lies in Western Africa, between Cameroon and Dahomey (French) on the Gulf of Guinea. The hinterland stretches back 600 miles to French West Africa. The tin, lead and iron ore industries are old and valuable. Other products are palm oil. rubber, nuts, ivory, hides, llvestock, ostrich feathers, drugs and tobacco.

Nigeria is a country, like most of Africa, of vast natural resources, with barely initial exploration done up to this time. The people, as in all Mohammedan countries, are backward, but Europeans with capital have gone in and are bringing resources into play. Slavery was abollshed by ordlnance in 1917, and slave-dealing suppressed.

Commerce is mostly by the trading stations common to such lands, at which simple manufactures are exchanged for native products. There are (1920) 1,126 miles of railroad.

The value of the imports in 1920 was \(£ 25,216,507\) and of exports, \(£ 16.987,018\).
Cameroon, 31,000 square miles, and 400,000 population, lies between Britisli Nigerla and the French Congo in Western Afrlca. It is part of the former Germin colony Kamorun, the eastern and larger part of which went to France (which see). It is a region of fertile solls, and progress is rapid toward bullding up valuable agrleultural produc-tion-cloves, vanilla, ginger, pepper and palm oil Ivory is a large product.

The seat of Government is Buea and the adminlstrator is the Governor of Nigerla.

Gambia, area, 4,130 square miles, and population, estlmated at 240,000 , is an independent West African Britlsil crown colony, from which huts, hides and palm kernels are exported, and the usual supply of manufactures imported from developed eountrles.

Its linports in 1920 were valued at \(£ 2,711,880\) and exports at \(£ 2,466,145\). The tonnage of vessels entering the ports in 1920 was 796,920.

It is administered by a Governor as a crown colony.

The trade of ali British West Africa with the United States was:

Txports 1921-22.
6,077,715
Exports, 1920-21.
7,051,365
9.338,098

\section*{THE GOLD COAST.}
(The Gold Coast, Ashanti and the Northern Territories and mandate for Togoland.)
AREA-about 80,000 square miles; area of that
part of Togoland under British mandate, 12,600 square miles.
POPULATION, census of 1921, 2,029,750; of Togoland, estimated, 350,000 .
CAPITAL-Accra; population, estimated, 20,000. Governor-Brig. Gen. Sir F. G. Guggesberg, K. C. M. G.

The Gold Coast lies along the Gulf of Guinea for 334 milies. The French Ivory Coast is on the west, and on the east is Togoland, formerly a German colony, and now divided by mandate of the League of Nations between Great Britain and France. The French portion, about 21,100 square miles, is attached for administrative purposes to Dahomey, in the east (which see), and the British, about 12,600 square miles, is administered by the Governor of the Gold Coast.

Under his administration also falis Ashanti, due north of the Gold Coast, and the Northern Territories. due north of Ashanti. These countries have enormous weaith in their forests, and the cultivation of cacao and rubber is being fostered. Palm kernels and oil are among the chief products.

There is a Government railway, 168 miles, from seccondee to Kumasi, and a line from Accra to Anyinam ( 85 miles), the extension of which to Kumasi was to be pushed in 1922.

\section*{SIERRA LEONE.}

AREA of colony, 4,000 square miles; of protectorate, 27,000 square miles; total, 31,000 square miles.
POPULATION of coiony, estimated, 1920, 80,000 (European, 1,028); of Protectorate, census of 1911; 1,327,560.
CAPITAL Freetown; population, 1911, 34,090.
Governor-Richard J. Wilkinson, C. M. G.
Sierra Leone lies on the west coast of Africa for 180 miles, between French Guinea and Liberia. In its capitai, Freetown, it has the greatest seaport in West Africa, with an excelient harbor and a naval coaling station. The colony has been in British possession since 1767 . The hinterland forms the protectorate, which extends inland about 180 miles. The chief exports are palm kernels, kola nuts and palm oil; the chief imports, textiles, spirits, tobacco and hardware.
The tonnage entering Freetown in 1920 was \(2,428,337\); the value of the imports was \(£ 3,548,478\), of exports, \(£ 2,949,380\).

\section*{BRITISH EAST AFRICA.}

Kenya, coiony and protectorate, extends from the Indian Ocean northeast to Italian Somaliiand and north to Abyssinia, west to Uganda, and south to Tanganyika. Its boundaries are the Umba, Juba and Uganda Rivers. It has 245,060 square miles of area, and estimated population of 2,630,000. On the coast the peopie are Mohammedans, and inland of crude tribal religions. Nairobi, a famous centre for big game hunting, is the capital; popuiation about 25,000 . A Government raiiroad runs from Mombasa on the coast through Nairobi to the lake Victoria Nyanza, 618 miles.

The country, of course, is undeveloped, but what deveioping has been done is in mining and agricuiture, with rice, cocoanuts, cotton, simsin, nuts, cassava, sugar cane, fruits, some cereals, and some goid, graphite, marbie, manganese, opals, copper, bitumen and kaolin produced, and with large possibilities for mineral development.

Tanganyika was formerly German East Africa, and was taken by the British in 1918, the Urundi and Ruanda districts going to Beigium, and the "Kionga Triangle" to Mozambique (Portuguese East Africa). It reaches from the coast to Lake Tanganyika and from Lake Nyassa to Victoria Nyanza. It is administered under a mandate frorn the League of Nations, by a Governor, with headquarters at Dar-es-Salaam.

The area is 365,000 square miles, estimated, and the population \(7,659,000\), estimated. Whites are negligible, numbering less than 2,500 .
Forest wealth is large, and there is much land susceptible of agricultural development for the production of tropicai fruits and other foodstuffs. Domestic animals figure in the wealth of the people, who are extremely crude and uncivilized.

The Usanda Protectorate, in East Africa, has 110,000 square miles, and the population in 1921 was estimated at \(3,200,000\). The country is well advanced in civilization, 750,000 of the people belonging to the intelligent class. Cotton is the chief product. Since the British took it over there has been expansion of foreign trade by 200 per cent.

The trade of all British East Africa with the United States was:
Imports, \(1920-21 \ldots . .\).
Exports.
1920-21. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . \(4,440,3439\)

Nyassaland, formerly known as British Central Africa, is situate on the southern and western shores of Lake Nyassa, and extends as far as Zambesi. It has 39,573 square miles, and in 1921 had \(1,200,000\) population, estimated. Coffee, tobacco, cotton, tea and livestock are the principal industries, foreign trade, imports and exports, totalling about \(\$ 4,500\),000 in 1921.

\section*{ZANZIBAR.}

Zanzibar is an island of 1,020 square miles, 23 miles off the eastern coast of Africa, having 196,733 population in 1910. Lord Salisbury, in 1890, traded Heligoland in the North Sea with Germany for it.

It is governed by a Sultan, Seyyid Khalifa bin Harub, K. C. M. G. (succeeded Dec. 9, 1911), but is administered by a British High Commissioner, Major Gen. Sir Edward Northey, K. C. M. G., and a British Resident, J. H. Sinclair. The Island of Pemba, 30 miles to the northeast, area 380 square miles, is included in the government.

The people are Mohammedans, and their ciove industry yields the bulk of the world's supply, there being, estimated, 48,000 acres, with \(4,750,000\) trees devoted to that product, with nearly \(\$ 15,000,000\) in annual exports to all parts of the worid. The copra industry is next, with 55,000 acres, on which \(2.500,000\) cocoanut trees produce.

Manufactures are pottery, rope, soap, oil, jewelry and mats.

Imports in 1920 were valued at \(£ 2,738,025\); and exports at \(£ 3,011,180\).

The revenue in 1920 was \(£ 330,212\), and the expenditures \(£ 403,808\).

Zanzibar, popuiation, 35,000, has one of the finest ports in Africa. In 1920 there entered the port 335 vessels of \(1,027,563\) tons.

\section*{MINOR AFRICAN POSSESSIONS.}

Mauritius. an island in the Indian Ocean, 500 miles east from Madagascar, has 720 square miles, and in 1921, 377,108 population, of which 122,424 were Roman Cathoilics, and most of the others Hindus. Port Louis, popuiation 39,900 , is the capitai and chief seaport.

Of the total of about \(\$ 42,000,000\) exports in 1920 , all but about \(\$ 1,000,000\) was sugar, it being one of the world's important sugar sources.
Seychelles and tributary dependencies include 90 islands of 156 square miles, and a 1920 population of 24,500, estimated, lying in the Indian Ocean near Mauritius. The capitai is Victoria, a port with an important coaling station. From 23,000 acres, in 1920 , there were \(23,000,000\) cocoanuts produced, other products being phosphates, mangrove bark, livestock and fish.

Somaliland, a protectorate, with 68,000 square miles, and 300,000 population, all Mohammedans, is in Northeast Africa, on the Gulf of Aden, with Abyssinia to the south and west and Italian Somaliland on the east. The chief town is Berbera, population 30,000 , and the products skins, resin, gum, cattle and sheep.

St. Helena, the island made famous by the exiie of the Emperor Napoleon, is 1,200 milies off the west coast of Africa, has 47 square milies, and about 3,800 population. Fruits, nuts, timber, flax, lace making, flax the chief, are the industries. It is an important naval coaling station, and, although volcanic and smaii, has large strategic value.
Ascension Island is in the South Atlantic off the coast of Africa, containing 34 square miles and 250 population.
AUSTRALIA, COMMONWEALTH OF.
AREA, 2,974,581 square milies, divided: New South Wales, 309,432; Victoria, 87,884; Queensland, 670,500; South Australia, 380,070; West Australia, 975,920; Tasmania, 26,215; North Territory, 523,620; Federal Territory, 940.
POPULATION, census of April, 1921, 5,496,794, divided: New South Waies, 2,099,703; Victoria, 1,531,529; Queensland, 757,634; South Australia, 495,336; West Australia, 332,213; Tasmania, 213,877: North Territory, 3,870; Federai District, 2,572; fuli blooded aborigines, not enumerated, estimated, at 60,000.

CAPITAL, Melbourne; population, 1921, 784,000; ehief cities, Sydney, population, 897,640; Brisbane, 209,699; Adelaide, 255,318; Perth, 155,129; Hobart, Tasmania, 52,163.
Governor General, Lord Forster of Lepe, P. C., G. C. M. G.

Prime Minister, the Rt. Hon. W. M. Hughes (Foreign Affairs). Australasian diplomatic interests are represented in Washington by the British Ambassador.
United States Consul General at Melbourne, Thomas Samnons; Consuls, at Sydney, Henry P. Starrett; at Newcastle, N. S. W., Romeyn Wormuth; at Adelaide, Henry H. Balch.
Australia, itsolf a continent, is situate between \(10^{\circ}\) and \(40^{\circ}\) south latitude and \(113^{\circ}\) to \(153^{\circ} 40^{\prime}\) east, longitude in the Pacific Ocean, with the Indian Ocean on the west. The states of the Commonwealth are: New South Wales, Vietoria, Queensland, South Australia, West Australia, the North Territory, and Tasmania, formerly known as Van Dieman's Land, an island the size of the States of Vermont, New Hampshire and Massacnusetts, which lies off the southeast corner of the mainland.

Australia is one of the important parts of the Britisl Empire, with that complete self-government that obtains in Canada. In the east mountains rise to about 7,000 feet altitude; the central portion extends westward in rolling plains, becoming sandy and in places desert, until higher elevatlons are reached along the west coast. The Murray River, rising on the slopes of the mountains, is navigable inland for 2,000 miles.

The elimate; belng in the South Hemisphere, is of the south temperate in the south, and in the north tropical. The interior portions are subject to high temperature, and in all parts the elimate is regarded as healthful; being dry. Rainfall is normal only on the north, northeast and southeast coasts.

Australia is governed on the Federal plan, with a Parliament, of Senate and House of Representatives. Like Canada, it accedes to imperial requests voluntarily in all economie matters, as well as military and naval, has been loyal but, "with a mind of its own." Australian troops in the late war served with distinction.

The Commonwealth of Australia is a member of the League of Nations

Products are not dissimilar to those of the United States, the 1920 reports showing a total tilled area of \(13,299,000\) aeres producing \(45,970,000\) bushels of wheat, \(12,559,000\). of oats, \(4,288,000\) of barley, \(6.764,000\) of corn, \(2,989,000\) tons of hay, 294,000 tons of potatoes, \(1,350,000\) tons of sugar cane, 13,000 tons of beet sugar, 139,000 tons of grapes, from whieh \(7,649,000\) gallons of wine was made, and about \(\$ 25,000,000\) values from orchards and fruit gardens. Total value of all agricultural production was \(\$ 360,765,000\).
Forests cover \(92,500,000\) acres, of which \(17,670,-\) 000 has been resorved for timber. In 1919 there were \(2,421,000\) horses, \(12,711,000\) cattle, \(75,554,000\) sheep, and 696,000 swine. Wool product in 1920 was \(663,249,000\) pounds, of whieh \(552,334,000\) were exported, much of it coming to the United States. Butter produced was \(165,648,000\) pounds, \(39,006,000\) belng exported.

Minerals abound and are growing in importance of develonment. The 1919 mineral production was valued at \(\$ 98,625,000\), consisting of gold, \(\$ 27,275,000\); silver and lead, \(\$ 9,610,000 ;\) eopper, \(\$ 9,460,000\); tin, \(\$ 5,250,000\); coal, \(\$ 33,355,000\); others, \(\$ 18,225\),000 . Total mineral production up to the end of 1919 had been \(\$ 4,986,995,000\). In 1851 , there was a spectacular rush to newly discoverod gold fields, similar to that of Caliornia.

Manufacturing production in 1920 was valued at \(\$ 490,000,000\), forest and fisheries products at \(\$ 95,-\) 000.000 . Miallufactures are not yet greatly developed, but capital is entering in ever larger volume to erect and maintain works for the utilization of the resources. Most of it has como from England but considerable is now going from tbe United States, and negotiations are making for the entranee of larger consignments of capital from this country

Freo trade rules botween the states of the Commonwealth, but customs duties aggregating more than \(\$ 100,000,000\) were. collected in \(1920-21\), in which fiscal year imports were valued at \(\$ 816,-\) 667,520 , and exports at \(\$ 660,146,900\). Imports were varied-textiles, metal manufactures, and most of the commercial articles of modern civllized life.

Next to Great Britaln, the Unlted States took the largest proportion of the exports, and more than half as much was inported from the United States as from Britain.

The net tonuage of the 2,247 registerod vessels in 1920 was 345,159 , and entrances of all vesisels in
ocean commerce at the ports numbered 2,981 , with 8,086,507 tonnage.

Railway mileage in 1921 was 23,295 , state owned, and of all gauges known to railroading.

In 1918 there were 3,424 public schools, and there are several technical schools and universities.

As in all parts of the Empire, there is religious freedom, and the Church of England predominates. Australia is insuffieiently explored, and is expected to develop rapidly in the ensuing years. Its possibilities seem boundless.

Its economic life is tied with the distant North Hemisphere, and its political life with Britain; and its prevailing poliey appears to be to erect barriers to the entrance of Asiatics.

Trade with the United States was:

\section*{NEW ZEALAND; DOMINION OF,}

AREA, 103,581 square miles, divided, Auekland Province, 25,364; Taranaki, 3,732; Hawke's Bay, 4,241; Wellington, 10,807 ; Marlborough, 4,225; Nelson, 10,875; Westland, 4,881; Canterbury, 13,858; Otago, 13,955; Southland, 11,355.
POPULATION, census of \(1921,1,218,913\), divided, Auckland, 369,618; Taranaki, 61,911; Hawke's Bay, 60,925; Wellington, 248,801: Marlborough, 17,788; Nelson, 47,628; Westland, 14,181; Canterbury, 199,034; Otago; 137,038; Southland, 61,989.
CAPITAL, Wellington; population, 95,235. Chief eities, Auekland, population, 157,757; Christchurch, 105,670; Dunedin, 72,225
Governor General, Viscount Jellicoe of Scapa, G. C. B., O. M., G. C. W. O., G. C. V. O.

Prime Minister, the Rt. Hon. W. E. Massey (Finance, Railways, Mines, Stamp Duties, Land and Income Tax, State Advances and Imperial Supplies). United States Consul General, at Wellington, David F. Wliber; Consul, at Auckland, Karl de G. MaeVitty
New Zealand lies 1,200 miles east from Australia, in the Pacific Ocean, and consists of South Island and North Island, extending north and south from \(35^{\circ}\) of southern latitude to \(46^{\circ}\). There are numerous outlying islands under the New Zealand flag

The agricultural possibilities are very great, twothirds of the area being tillable, with \(17,000,000\) acres forested. Actually tilled area in 1920 was \(18,004,776\) acres, with large \({ }^{\prime}\) areas being surveyed for settlement by farmers.

In 1921 production was \(6,872,000\) bushels of wheat, \(5,225,000\) of oats, \(1,587,000\) of barley. Wheat averages were twice per acre that of the United States, and the other crops on a relatively high level of area productivity

In 1921 there were 334,000 horses, \(3,113,000\) cattle, \(23,236,000\) sheep, and 342,000 swine. Wool production in 1919 was \(265,683,924\) pounds, of which more than two-thirds is normally exported.

In 1920 the value of the manufactured products was \(\$ 348,900,000\), in 4,357 ostablishments, employing 64,951 persons, with \(\$ 164,000,000\) wages and ralaries.

Mineral production in 1920 was gold, \(\$ 4,415,000\); silver, \(\$ 435,000\); tungsten, \(\$ 6,200\); eoal, exported, \(\$ 642,000\); consumed, \(\$ 8,815,000\)

In 1920 total imports were valued at \(\$ 307,975,000\); exports, \(\$ 232,205,000\); the foreign trade being heavlest with the United States next to Great Britain.

In 1920 there were 548 vessels of 86,060 tonnage net registered. Total entrances of vessels in 1920 wore 744 of \(2,062,370\) tonnage net. In 1921 there were 1,282 miles of railways Government owned, and 138 privately owned.

New Zealand is politically organized along very broadly democratic lines, with tendency to advance rather rapidly into the realm of cconomic and sociological experiment.

Its Government is by Legislative Council of 41 members, shortly to be enlarged by popular election to 64.

The Dominion of New Zealand is a member of the League of Nations.

Trade with the United States was:
Imports 1920-21
\$47,605,552

17,419,616
1921-22......................
German Samoa, which included Savail and Upolu, the largest of the Samoan Islands in the Western Pacific, were occupied by the British on Aug. 29. 1914, immedlately on the outbreak of the World War. Thls territory was assigned as a mandate
from the League of Nations to New Zealand under date of Dec. 17, 1920, and is now called Western Samoa.

Savaii is 48 miles by 25 and has an area of about 660 square miles. Upolu has an area of about 600 square mlles. Both are mountainous, fertle and well watered. The population of the two aggregated by the census of April, 1921, 37,051, of which 1,035 were Brltish and 292 Americans. The chicf product is copra.

\section*{AUSTRALASIAN POSSESSIONS.}

In the Paclicic reaches of Australasia, of the other areas under the British Empire these are the most important:

Papua, or British New Guinea, on the Island of New Guinea north from Australia, with 250,000 estlmated population, and 90,540 square miles, the people being crude tribes. The interior of the great island is unexplored.

New Guinea, formerly German New Guinea, has been mandated by the League of Nations to Brltain.

Bismarck Archipelago, 15,752 square miles, and with a native population of about 188,000 ,
and the Solomon Islands, 3,800 square miles, and with a populatlon of about 17,000 , both formerly German possesslons, have been placed under Britain by the League of Nations.

Nauru Island, formerly German, mandated by the League of Nations to Britain. It has valuable guano deposlts.

Fiji Islands, 250 in number, area, 7,083 square mlles, populatlon, estlmatcd, 1919, 163,416; products, troplcal frults, vegetables, slsal, hemp, domestic animals. Clvilization, barely in the beginnings.

Tonga Islands, or Frlendly Islands, about 385 square miles, wlth a population of 23,562 , export copra and llvestock.

The New Hebrides, area, 5,500 square miles; population about 60,000 , are under the joint administration of Great Britain and France.

The trade of British Oceania with the United States was:
Imports, 1920-21 \$841,701
Exports 1921-22 355,192
Exports, 1920-21.
2,131,849 635,584

Berlin figures cover Greater Berlin as offcially counted ln 1921. The old City of Berlln has about 2,000,000 inhabitants.

The figures for the cities in the above table are from the very latest official censuses and estimatcs.
There are 27 cities of the world with \(1,000,000\) or more populatlon, of which China has 9 ; the Unlted
States, 3; Indla, 2; Japan, 2; and Argentlna, Austria, Brazil, England, France, Germany, Hungary, Mexico, Russia, Scotland, and Turkey, 1 each.

\section*{(1)tyer foreigu Countrits.}

\section*{ABYSSINIA KINGDOM OF.}

AREA, estimated, 350,000 square miles. POPULATION, estimated, \(10,000,000\).
CAPITAL, Addis Abeba; pop., estimated, 50,000. Empress, Waizeru Zauditu, daughter of the late Emperor Menciek, born in 1876; elected Empress Sept. 27, 1916 after her nephew Lij Yaser was deposed.
Abyssinia is a mountainous, volcanie country In northeast Africa, bounded by Eritrea (Italian) on the north, Brttish Somaliiand (Berbera) and Italian Somalitand on the cast, British East Africa on the oruth and the Sudan on the west. The agricuitural and mineral resources of the eountry are comparatively undeveloped, and its wealth of water power is unused. In the lower country and deep valleys, which are very hot, sugar cane, cotton, colree and rubber are produced, whille grain, fruit, tobacco, potatoos, etc., are grown in the higher temperate country, The upper slopes are given over to cattle ralsing. Hides, skins, eoffee and beeswax are the chief exports, and cotton goods the chler importis. The total trade is estmated at about \(\$ 12,000,000\). A rallroad 495 miles long, built under French auspices, runs from Jibuti to the capital. Slavery is prevalent. The royal family claims deseent from Menelek, the son of King Solomon and the Queen of Sheba. Abyssinia is the only country in Afriea that was neutral in the World War. It is not a member of the League of Nations.
Trade with the United States was:
Imports, 1920-21.
.. \$19,477
Exports, \(1920-21\)
1921-22
9,500

\section*{AFGHANISTAN.}

AREA, estimated, 245,000 square miles.
POPULATION, estimated, 6,330,500.
CAPITAL, Kabul; population, estimated, 150,000; other eities, Kandahar, population 50,000 , and Herat, 20,000 .
Amir, Amanullah Khan, born June 1, 1892, sueceeded on the assassination of his father, Amir Habibullah Khan, Feb. 20, 1919. Heir, his son, born June 5, 1921.
Afghanistan occupies a mountainous country in Asta between \(61^{\circ}\) and \(72^{\circ}\) east longitude and \(29^{\circ}\) and \(38^{\circ} 20^{\prime}\) north latitude. Its extreme breadth northeast to southeast is about 700 miles, and from the Herat frontler on the west to the Khyber Pass on the east it is 600 miles. It is bounded on the north by Transeaspia (Russia) and Bokhara, on the east by British India, on the south by Beluchistan (British India) and on the west by Persia. The clevation is gencrally over 4,000 - feet. There are three great river basins, the Oxus and the Kabul in the northeast and the Helmand, which runs southwest through the middle of the country.

Arghanistan has been ealled "the land of rocks and stones and sanguinary feuds." Its people are neariy all Mohammedans. The Arghans havo been the dominant race for 200 years, the Tajiks, aborigines, being eultivators and traders. Along the frontier are warlike and independent tribes of Pathans and others with a fixed habit of ralding aeross the border and recelving punishment. Dlsturbances have been frequent. The language spoken is Pushtu.

There are many fertile plains and valleys in the mountains and good irrlgation makes available all proftable soil. There are two harvests a year, one of wheat, barley or lentils, and the otiler of rice, millet, maize and dal. Fruits of the temperato zone are plentifui. Sheep and transport animals are ralsed. The fat-talled sheen is native to the country. Its tail is or immense weight and size, formed of masses of fat, a store of nourishment drawn on by the animal in winter. These sheep furnish the Aighans their chlef meat diet and the fat of the tail is a substitute for butter. Wool and skins are the main articles of export together with fruits, nuts and ghi. The imports are textiles, metals and hardware, leather goods, tea and sugar. Transfrontier trade with India amounts to about \$15,000,000 annually. Copper, lead and iron are found.

There are no rallroads in the country, but plans have been developing looking toward the building of raliroads aeross the country in the northeast to conneet Termez, the rail head of the road trom Bokhara, with Peshawur in Britisis Indla, via Kabul, and another to connect with the railroad from Merv at itis rali head at Kuska, via Herat.
in the west, and Kandahar in the south, to New Chaman and Quetta in Beluchistan. Merchandise is now transported on camel or ponyback along the seven important trade routes.

The Government is monarchieal and the laws and customs those of Islam. The late Amir was reciplent of a subsidy from the Eritish Government but that was ended by a new treaty signed on Nov. 22, 1921, in which Great Britain recognized the complete independence of Arghanistan, established the frontiers, and withdrew the privilege Afghanistan had enjoyed of importing arms and ammunition through India. The Arghan army was reported to number 100,000 well armed men.

\section*{ALBANIA.}

AREA, estimated, 11,000 square miles.
POPULATION, estimated 1921, 1,700,000.
CAPITAL, Durazzo; pop., estimated, 5,000 ; chief elty, Scutari, pop. 32,000 .
United States Minister, Ulysses Grant-Smith.
Albania, after centuries of Turkish domination and of contention between its Balkan neighbors and Italy during and after the World War, has inad its independence assured under a treaty with Italy, Aug. 2, 1920, and was formaliy admitted into the League of Nations in January, 1921.

The country is mountainous, bounded by JugoSlavia on the north and east, Greece on the south and the Adriatic Sea on the west. It is an agricultural and cattle and sheep raising state. There are no railroads, banks or currency and few schools. Two-thirds of the population are Mohammedans, the rest Christians.

Legislative power rests in a Dlet of 77 members, elected in February, 1921. At the head of the state is a Council of Regents composed of a representative of each of the four religious bodies of the country, a Bektashi Moslem, a Sunni Moslem, a Greek Catholic and a Roman Catiolic. In December 1921, these Regents were Omer Pasha Vrioni, Refk Toptani, Sotir Peci and Antoine Pistuli.

The executive power was in the hands of a Cabinet, the latest being that headed by Djaffer Ypi, which assumed office Dec. 22, 1921.

\section*{ANDORRA, REPUBLIC OF.}

AREA, 191 square miles.
POPULATION, 1921, 5,231, scattered in 30 villages.
Andorra is a republle in a valley of the Pyrenees under the suzerainty of France and the Spanish Bishop of Urgel. It is governed by a Council of 24, elected for 4 years by heads of famflies in each of the six parishes. The Inhabitants speak Catalan and are Roman Catholics. Sheep raising is the chlef industry. Andorra is not a member of the League of Nations.

\section*{ARABIA.}

AREA, estimated, \(1,200,000\) square miles.
POPULATION, estimated, \(5,000,000\).
The Arabians oceupy a peninsula in the southwest corner of Asia between Palestine on the west, Syria on the north and Mesopotamia on the northeast (an indeterminate line), the Perslan Guir, the Guif of Oman, the Arabian Sea and the Red Sea, with the exception of Aden. a strongly fortified coaling station of 75 square miles with a protectorate of adjacent territory of 9,000 square mlles, pop. 54,923 , held by Great Britaln. Nearly one-hali of A rabia is desert. It is roughiy as large as that portion of the United States stretehing cast of California to the Mlssissippi and north from Texas to the Canadian line. Maps are very deficlent. The boundaries of the native states of Arabia are undefined. Turkey, in the treaty of peace, renouneed all rights to Arabia. The organization of the native states is to be devcloped under British auspices, the prinelpal rufers (the King of the Hejaz and the Iman of Yemen) being subsidized on condltion that they maintaln internal peace and place the control of foreign affairs in the hands of British advisers. These states are:

THE KINGDOM OF TIE HEJAZ.
King of the Hefaz, El Husein Ibn All, so proclaimed Dec. 1916 (Grand Sherlf of Meeca.)
The Hejaz was represented at the Peace Conference by the Emlr Feisal, third son of Husein, now King of Irar, and was admltted to the League of Nations in 1920. Its area is about 112,500 square
miles and popuiation (estimated) of about 900,000
The importance of the Hejaz is due to its posses sion of the holy cities of Islam, Medina, where the Mosque of the Prophet enshrines the tomb of Mohamet who died in the city June 7,632 , and Mecca his birthpiace, containing a great mosque sheltering the sacred shrine, the Kaaba, in which is the black stone given by Gabriel to Abraham. As many as 200,000 of the faithful have made the pilgrimage in a year. Medina (pop. 10,000) is 820 miles from Damascus, and is the terminus of the Hejaz railroad. Mecca (pop. 60,000), the capital, is 200 miles further south, and is 55 miles from Jiddah (pop. 20,000), the chief port on the Red Sea. The chief product is dates. Some hides, wool and gum are exported.

\section*{THE EMIRATE OF NEJD AND HASA.}

Emir, Abd-el-Aziz es Saud.
Known as "the true home of the Arabs," this province stretches east from the Hejaz across the oases of Central Arabia to the Persian Gulf. Its estimated population is 300,000 , mostiy nomadic Bedouins, and its capital is Ridyaoh.

\section*{THE EMIRATE OF JEBEL.SHAMMAR.}

Emir, Abdullah ibn Mitah, born 1907, succeeded
his father Saud ibn Rashid, assassinated May, 1920.

A Bedouin desert country to the north of Nejd, with an estimated population of 200,000. Capital, Hail; popuiation 12,000.

THE PRINCIPATE OF ASIR.
Imam, Mohammed ibn Ail el-Idrisi.
Asir is on the west coast of Arabia, south of the Hejaz and north of Yemen, with a population of about 1,000,000; capital, Sabia. Hides and livestock are exported.

THE IMAMATE OF YEMEN.
Imam, Yahya Mohammed ed-Din.
Yemen is in the southwest part of the peninsula between Asir and the British protectoratc Aden. Its area is estimated at 75,000 square miles and population 700,000 . Capital Sanaa (pop. .20,000); chief port Hodeida (pop. 40,000). On the plateau of El Jebel, the most fertile part of Arabia, grain and coffee are grown. Hides and coffee are exported. Mocha, once \(\Rightarrow\) flourishing coffee port, no longer counts.

THE \(\bar{\prime} U L T A N A T E\) OF KUWEIT.
Sultan, Hamed ibn Jobar succeeded March 1921.
Kuweit (pop. est., 50,000 ), extends along the Persian Gulf from Mesopotamia to Nejd. Its capital, Kuweit (pop. 25,000), is an important port on the Persian Gulf, and had been selected as the seaport terminal of the German Berlin to Bagdad railroad. Horses, wooi, dates and pcaris are exported.

THE SULTANATE OF OMAN
Suttan, Seyyid Taimur ibn Faisai, born 1886; succeeded 1913.
Oman occupies the southeast portion of the Arabian peninsula with a coast line about 1,000 miles long, extending from El Katar on the Persian Gulf to Ras Sajir on the Arabian Sea. It has an estimated area oi 82,000 square miles and a population estimated at 500,000 , chiefly Arabs. The nomadic tribes of the interior after seven years of rebellion have completely thrown off the controi of the Sultan and by an agreement October, 1920, have entire home rule and freedom of trade. The Sultan has for years been subsidized by the Government of India which maintains there a political agent, Major M. E. Rae (1921). The capital is Muscat (pop. estimated, 20,000). The best camels in Arabia are bred in the interior. The chief exports are dates.
Food supplies and textiles are imported. ' Trade is mostiy with India.

The trade of the Hejaz, Arabia and Mesopotamia with the United States is returned by the United States Department of Commerce. collectiveiy for the fiscal year 1921-22:
Imports, 1921-22
\(\$ 291,229\)
Exports, 1921-22.
734,523

\section*{ARCENTINA, REPUBLIC OF:}

AREA, 1,153,119 square miles.
POPULATION; 1921, 8,698,516.
CAPITAL, Buenos Aires, pop. estd., 1920, 1,674,000, Chief cities, Rosario, pop. 222,592; Cordoba. 156,000; La Plata, 90,435 ; Tucuman, 91,216 ; Santa Fe 59,574; Mendoza, 58,790; Avellande, 46,277; Bahia Blanca, 44,143.
President, Dr. Marceio T. de Aivear (1922-1928). Inaugurated Oct., 1922.
Premier, Sr. Ramon Gomez (Interior)
Ambassador to the United States, Tomas A. LeBreton.

Consuls General, at New York, Ernesto C. Perez; at San Francisco, Santos Goni. Consulates also at Mobile, Los Angeies, Apalachicola, Fla., Pensacola, Savannah, Chicago, New Orieans, Baltimore, Boston, Pascagouia, Miss., St. Louis, Philadelphia, Port Arthur and Norfolk.
U. S. Ambassador, John W. Riddie.
U. S. Consul General, at Buenos Aires, William H. Robertson; Consul, at Rosario, Wilber Z. Bonney. Argentina extends from Bolivia 2,300 miles to Cape Horn and from the ridge of the Andes to the South Atlantic, occupying the greater part of southern South Amcrica. Its greatest breadth is about 930 miles. In area it is about equal to the eleven mountain and Pacific States of the United States. It is bounded by Bolivia on the north, Paraguay on the northeast, Brazil. Uruguay and the South Atlantic ocean on the east and Chile on the west.

East of the Andes are great plains, heavily wooded and calied the Gran Chaco in the north, and vast treeless pampas, given over to wheat and cattle raising, stretching south down to the piains of Patagonia. Vast tracts of land amounting to \(237,768,000\) acres are publtc domain land, opened by the Federal Government to colonization. In the years 1857-1920 the number of immigrants by sea was \(5,121,958\). Immigration comes principally from Spain and Italy. A law passed in 1919 requires each intending immigrant to produce a certificate of good character and ability to work.

Wheat, maize, flax and oats are the principal crops. The sugar and wine industries are making great progress. Sheep, cattie, horses, goats and pigs form the chief wealth on the ranches. Packing houses have becn established and the export of frozen beef and mutton and other livestock products has become a great industry.

There is little mining, but some petroleum is produced. Textiles, oils and chemicals, iron, agricultural implements and machinery, glassware and crockery, and foodstuffs are the principai imports. Manufacturing is on the increase.
In 1919 there were entered at ail Argentine ports 36,356 vessels with a tonnage of \(17,043,869\), Argentina has 22,530 miles of railroads of which 3,816 are owned by the state; the privately owned railroads are almost entirely in the hands of English companies.

Argentina proclaimed its independence of Spain July 8, 1816, and the years until 1852 were years of disturbance and civil war. The Constitution then adopted and under which, somewhat amended, the republic is governed to-day is modelled closely after that of the United States. There are 14 provinces, with a very high measure of home rule, electing their own Governors and Legislatures, and 10 territories administered by Governors appointed by the President, also a Federal District (Buenos Aires, area 72 square miles) whose Mayor is appointed by the President and who is assisted by a deliberative council elected by the tax-paying inhabitants.

The President of the republic, who must be a Roman Cathoiic and Argentine by birth, is elected by an Electoral College for a six-year term and is ineligible for re-election. Congress consists of a Senate of 30 members, chosen by a special body of electors for six years, one-third retiring each two years; and a House of Deputies, numbering 158, elected by direct vote for four years, one-half retiring every two years. The Roman Catholic religion is supported by the state, but all creeds are tolerated. Primary education is free, secular and compulsory, but the percentage of illiteracy is still high. There are national universities at Cordoba, founded in 1613. with 1,603 students in 1920; Buenos Aires, with 10,404 students; La Plata, 2,979, and Rosario. There are also three provincial universities.

Service in the national militia is compulsory, the peace strength of the army being 1,750 officers and 25,600 men, with a reserve of 759,000 . The navy consists of two dreadnoughts of 27,940 tons each, mounting twelve 12 -inch guns; two pre-dreadnoughts, four armored cruisers and one ilght cruiser.

Argentina is a member of the League of Nations.

\section*{ARMENIA.}
(See under Russia.)

\section*{AUSTRIA, REPUBLIC OF.}

AREA, 30,766 square miles.
POPULATION, census of \(1920,6,131,715\).
CAPITAL, Vlenna; populatlon, 1920, 1,841,326; other citles, Graz, population, 157,644; Llnz, 94,072; Innsbruck, 55,650 ; and seven others of more than 10,000 .
President, Dr. Michael Halnisch.
Chancellor, Mgr. Ignatz Selpel.
Minister to the United States, vacant; Edgar L. G. Prochnik, Counsellor and Charge d'Affaires.
Consuls General in the United States, at New York, Friedrich Flscherauer; at Chicago, Ludwig Kleinwachter.
United States Minister, Albert Henry Washburn.
United States Consul, at Vienna, Carol H. Foster.
The Austria of to-day-mere remnant of the former Austrian Einplre-is now a republe in Central Europe, with Germany its neighbor to the west and the north, Czechoslovakia on the north and east, Hungary on the cast, and Serbia and Italy on the south. It is slightly smaller than the four New England States of Vermont, New Hampshire, Massachusetts and Connecticut, and has only about 100,000 more lnhabltants than the four together.

Austria is not only vastly reduced \(\ln\) area and population, but is in an economic plight equalled by few countries in world history, in the prewar days of Emperor Francis Joseph of the Hapsburg dynasty the Austrio-Hungarlan Emplre had 261,259 square miles and about \(51,000,000\) popula-
tion. The Dual Monarchy lncluded Austria proper, with Vienna one of the briliant polltleal, commercial, industrlal, financlal and art centres of the world; Hungary, Transylvanla, Czechoslovakla, Polish Galicia, the Trentlno, Slavonia, Croatla, Bosnia, Herzegovina, the Banat, territorles which gave it access to the Adriatic, and control of practically all the Danube Rlver. Next to Russia, it was the most populous in Europe. Hungary is an independent republic now. All the provinces mentioned have gone and Austrlan territory reduced from her prewar 115,822 square miles to 30,766 .
The lll-fated Hapsburgs-Francls Joseph and then Charles, his successor-maintalned a court in Vienna which was in some respects the most lnaccessible soclally of any in the world.

Although politically held together by the bonds of empire, Austria-Hungary and the very many components contalned so many dlverse racial strains whth such tenaclous \(n\) tionalistic tendencies that the non-progressive policies of the imperial rulers finally released centrifugal forces which tore the empire apart.

The World War was precipitated by the assassinatlon of the heir presumptive to the throne, the Archduke Franz Ferdinand, by a Sorbian in Bosnia in 1914.

Austria was proclaimed a republic on Nov. 12, 1918, the day after the armistice, a National Assembly assumed the government and appolnted a Cabinet. On Feb. 16, 1919, the National Constltutlonal Assembly, consistlig of one Chamber, was elected by the direct vote of all men and women over 20 years of age.

A Constitution Was adopted Oct. 1, 1920, which provides for a Parliament of two Houses, a Bundesrat of 46 members, chosen indirectly, and a Nationalrat, elected by dlrect vote for four years. These two Houses elect a President to serve for four years. All special privileges are abolished. There are seven provinces and the city of Vienna, each with a large measure of home rule. on local affairs, by elected Provinclal Assemblles. The army is limited to 30,000 men.

The lands lost to Austria were those from whlch the capital city and the manufacturing towns drew their food supply, and held the seaports and much of the rallroads and the Danube River. Only the German Atiantic port of Hamburg, via the Elbe Rlver, is left.

To-day, with so greatly reduced aroas, with no seaport, with one city, Vienna, comprising about 30 per cent. of the whole national population, rendering the distributlon of the population unbalanced and dimeult of economic adjustment, with immense industrial production and vast and iertile are sis of foodiands taken away, and wlth a depreciatrd currency and dislocation of every economic tunotion to degrees tar greater than in other countrins, Austria ls one of the problems of the day in Europe, and stands with liat in hand, asking the powers to find heip for lier, lest she porish as a national entity.

This plea has been listened to with sober realization by the other Dowers, and late in 1922 there were
proposals serlously entertained to advanco sumsfrom \(\$ 100,000.000\) up and down, accordlng to the source of the proposal-that the currency be stabillzed and the economic status rebuilt toward ultimate resumption of normal functioning

The depreclatlon of the currency has been so heavy that llving costs lave risen enormously leavlng especially the middle classes, salaried and those living from livestments, in a sorry plight.

Amld this apparently hopeless tangle of de structive currents there has appcarcd a trend toward resumption of industrlal production, and It has been bclieved that, wlth some help irom other nations in the form of long-term loans, Austrla will weather tho storm and emerge finaily able to steer Its so much smaller natlonal ship of state into safe waters

In the first two years of its exlstence as a republic it did reccive a total of \(\$ 72,000,000\) of credit from other countrles, but it was mostly for food for actually starving people. The inhabitants had been reduced to positive want, and lt is probable that only this relief prevented anarchy and the virtual wlping out of the people as a national entity

The United States, through the Hoover Food Relief agencies, was exceedingly actlve in that rellef, feeding stations being maintained in Vlenna and elsewhere

These condltlons of then and now transcend in importance any schedule of exlsting assets and liabilities, materlal and economlc. It is an utterly abnormal status, unprecedented and with nonbaiance of urban and rural interests, with which the other interested powers are striving to dcal. The League of Natlons is working on the problem, and financiers in the world capitals are taking part in the dlscussion

The unit of the currency is the crown, worth at par of exchange 20.26 cents. The rate of exchange oll Nov. 1, 1922, was . 000014 cents. In 1921, the deficit of the republic was \(50,000,000,000\) crowns, so rapid had been dcpreclation. Hence, figures avail little ln showing the fiscal and economic situa-
ion.
For 1922, budget estimates showed an apparent prospect for a deficit of from \(130,000,000,000\) to \(160,000,000,000\) crowns.

However, state expenditures have lately shown a tendency to decline, and that was regarded as a hopeful sign.

One element of aid is the pre-emlnent position which was heid by the Viennese banks, in the empire and in the Balkan states. There has been a gradual resumption of thesc functlons, and it is believed that Austria will readjust its affairs so as to obtain much of lts future strength from such financial operations. Also Vienna was a great commerclal centre, and it is believed that, after the anlmosities of the war and post-war periods shall have died down, Vlenna wlll again transact large business in movement of frelght and money and credlt

Agriculture showed improvement in the years 1919,1920 and 1921, but more than 25 pir cent. of the arable lands are not yet producing food, and the total amount produced ln 1921 of all crops was less than half that of 1913 on the lancs now included ln the republic.

The hamper on agricultural resumption has been the lnability of the pecpie of the cities to pay for the food. All sorts of Government remedies for the distress have bcen tried, but the sltuation has been so serious that they only slightly helped.

It is proposed to harness mere of the \(1,700,000\) water horse power in the Austrian Alps and the Danube, 170,000 being already in use.

In 1921 there was quite a boom in manufncturing, which did not last. Yet strangely the reports in May, 1922, showed only 60,000 unemployed of a population of more than \(6,000,000\).

The main lndustrles are the making of machinery, agricuitural and industrial, with conslderable making of automobiles; textiles, cotton and wool, whicl are exportlng yarns to Germany: leather and fancy goods, which have always had worid-wide repute woodwork, furniture and paper

As a means of stabllizing matters internally the Government lately has regulated wages on a sliding scale gauged by the vaiue of the crown, wages rising and falilng-mostly rising of courseas the crown fluctuates.

Labor condlitions pecullarly have not leen bad, compared with some other countries, the people as a mass having apparently fully reallzed the extreme seriourness of the sltuation, and therefore standing closer together
At times during 1920 and 1921 there havo been heard suggestions that Austria's only hope was to joln wlth Germany. But that courso has not been acceptable to the Allies.

Froin 1910 to 1920 the population decreased 3.8 per cent.. the men decreasing 6.53 per cent. In the war losses

In 1910 the present Austrian territory had 5,979,667 Roman Catholics, the Austrian Empire belng
the most powerful Catholic unit in Europe. The Catholics were 94.11 per eent. of all; Jews, 2.99 per cent.; and Protestants, 2.60 per cent.

The Austrian Tyrol ls one of the most beautiful mountain regions in the world, and a source of much revenue from tourlsts. Musical art is highiy developed, and Austrian composers and players liave always produced some of the world's best music, and are doing so to-day, white the literature has been accounted high by world schoiarship.

The recent conference of representatives of the other Centrai European countries on transport, and the agreement reached to pool equipment and facliitate shipments will help Austria much. The wardestroyed rallways have been somewhat improved, and work proceeds.

Cataclysmic as were the effects of the war on the former empire, the removal of the discordant racial efements, leaving a virtually homogeneous people, is expected to yleld at least social and political peace; so that, if industrial peace be maintained, and the immediate perils be passed safely, what remains of Austrla probably, almost certainly, wili slowiy emerge into reiative prosperity.

In 1921 imports were valued at \(\$ 314,000,000\), and exports at \(\$ 175,000,000\). Foodstuffs led the imports with \(\$ 73,500,000\), and textiles followed with \(\$ 44,400,000\). Exports were principaify wooden goods, \(\$ 11,750,000\); machinery, \(\$ 6,300,000\); vehicles, \(\$ 12,500,000\); with eight other lines.

Belgium is bounded on the north by the Netherlands, on the east by Germany and Luxemburg, on the south by France, and on the west by the North Sea. It has a frontier of 831 miles and a seaboard of 62 miles. It is not quite as large as the State of Maryland. The Scheldt and the Meuse are the principal rivers. Below Antwerp the Scheldt flows to the North Sea through the Netherlands and negotiations are in progress between the two countries aiming to make navigation as far as Antwerp free to both countries. The western part is low, fevel and fertile; the eastern,

Belgium formed part of the Low Countries from the readjustment of Europe in 1815 following Napoleon's downfall, until Oct. 14, 1830 when, foliowing a revoiution which broke out Aug. 25, a National Congress proclaimed lts independence. The Constitution of 1831 prociaimed it a "Constitutional, representatlve and hereditary monarchy," and the National Congress elected Prlnce Leopold of Saxe-Coburg, King of the Belgians on June 4 of that year. He died in 1865 and was succeeded by his son, Leopold II., who died in 1909. By the Treaty of , London, A prif 19, 1839, the famous "scrap of paper," separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by Austria, France, Great Britain, the Netherlands, Prussla and Russia. The Germans invaded the klngdom on Aug. 2, 1914, and held neariy all of Belgium throughout the war, evacuating it immediately after the armlstice. Under the Treaty of Versailies, Eupen and Malmedy and Moresnet were ceded by Germany, adding 371 square miles and 64,520 inhabitants to the kingdom.

Belgium is the most densely populated country in Europe, having 670 inhabitants to the square mile. In the province of Brabant the ratio is 1,237 . In 1920 the excess of births over deaths was 61,435 , and there were 2,195 divorces to 106,514 marriages.

The population is divided into two well defined groups, the Flemish and the Walloons. The former, who speak Dutch, are somewhat in the majority, preponderating in Flanders, Limburg and Brabant, including Antwerp. French and Flemish are joint official fanguages. The Roman Cathotic is the religion of the great majority, but compiete religious toleration prevails. The state does not interfere with the intimate affairs of the churches and part of the income of the ministers of all denominations is paid from the national treasury.

Belgium has four universities; those of Ghent ( 1,006 students in 1920) and Liege \((2,656)\) are state institutions, and those of Brussels \((1,644)\) and Louvain (2,783) are free. Attached to them are various technical schools with 3,034 students. There are 134 state high schools, 44 of which are for girls, and many private schools are under ecclesiastical control. Schools are supported by locai taxation and each commune must have at least one primary school. The percentage of illiteracy has been decreasing rapldly.

Belgium has 4,649 miles of railways, of which 2.759 are state-owned. The damage done by the war has been almost entirely made good. Plans for the electrification of the whole system are under consideratlon. The country has 6,177 miles of roads, the majority paved with stone (Belgian biocks), and 1,231 of navigable waterways-rivers and canals. The number of vessels entering Belgian ports in 1920 was 7,698; tonnage, \(10,852,341\); of this tonnage \(10,419,051\) entered at Antwerp. Of the vessels entered, Belgian were 949 ; British, 4,081; Norwegian, 525; French, 390; Ámerican, 362; Dutch, 354; German, 239.
The chief imports in 1920 were wool, cotton, flax, hides, buildipg wood, iron and steel, machinery, coal, chemical products, bitumen, zinc ore, wheat and wlne. The chief exports were manufactures of wool, cotton, flax, leather and glassware, iron, steel and zinc products and sugar. Agriculture and forestry are lmportant industries, the chief crops being wheat, oats, rye, potatoes and sugar beets, yet it is eminentiy a na anufacturing country and ls dependent on foreign suppiles for its food. The coal, iron and quarry industries are very valuable, as are the glass, textile and sugar, and the lace of Brussels, Malines and Bruges is famous.

Parliament consists of a Senate of 120 and a House of Representatives numberlng 186, all of whom are directly eiected by the people (except 27 Senators who are elected by provincial councils), Senators for 8 years and Representatives for 4. Universal male suffrage with plural voting up to three by property and educational qualification Was Introduced in 1894. Proportional representatlon was introduced in 1900. By an emergency measure the present Parliament was elected in 1919 on a one-man-one-vote basis and the law was revised to estabilish that iranchise in 1921. Pariiament must meet annualiy in November, and must sit for at least 40 days. The party strength of the present Pariiament is:

Senate-Catholic 73, Sociailists 52, Liberals 28. House-Catholics 80, Socialists 67, Liberals 33, miscellancous 6.

\section*{BELGIAN CONGO.}

AREA, 909,654 square miles.
POPULATION, estimated, 1921, 10,000,000.
CAPITAL, IKinshasa (replaced Boma as capital December, 1921). Provincial capitals, Elizabethville (IKatanga), Leopoldville (Congo-Kasai), Coquilhatville (Equator), and Stanleyville (Fastern).
Governor General, Maurice Lippens, appointed Jan. 25, 1921.
The Congo Free State had its origin in the vision of King Leopoid 11. of Belgium, who, roused by Stanley's discoveries, realized the great economic posaibilities in the development of the vast territory reached by the Congo. The International Association of the Congo, which he founded and largely financed, sent Stanley back in 1879. He founded the first station, Viyi, in February, 1880, and in all twenty-four before he returned in 1884. Leopold pushed the work with the aid of a handful of men, mostly offcers, and in 1885 the powers, In convention at Berlin rccognized the Association as an independent state under his sovereignty"the trade of all nations to enjoy complete frcedom." The indeterminate boundaries were held to include the basin of the Congo and Lalse Tanganyika, with its eastern tributaries. From 1895 the Belglan Government assoclated itself with this work, opening eredits, althougl Parliament was hostile. The administration of affalrs later provoked violent agitation to sccure the amelioration of the condition
of the natives. The Congo Free State was ceded to Belgium by the treaty of 1907 , becoming by the law of Oct. 18, 1909, Belglan Congo under eontrol of the newly created Ministry of the Colonies.

Belgian Congo has a short coast line on the South Atlantic at the mouth of the Congo, where is situated the village of Banana on a fine natural harbor. Equatorial French Africa lies to the north and west, and Angola (Portuguese) to the south beyond which and to the east is North Rhodesia; to the east Tanganyika, now British, but formerly German East Africa, and Uganda (British) ; to the north it also touches the soudan. Vast, sunless and well-nigh impenetrable tropical forests fil the upper reaches of the river, eovering about 25,000 square miles. The lianas yield 3,000 to 4,000 tons of rubber yearly. The oil-palm is cultivated, and palm kernels and palm oil to the value of 77,000 ,000 francs were exported in 1920. The export of copal in 1920 was about \(6,000,000\) pounds, valued at \(40,305,021\) francs. Ivory exports amounted to about 150,000 pounds, valued at \(35,860,023\) francs. Coffee, cocoa, rice, cotton and tobacco grow freely. Cattle thrive where there is no tse tse fly.

The chief industry is copper mining in Katanga, where the copper bearing belt is 250 miles long by 25 to 50 miles wide. The output in 1920 was 18,924 tons. Placer mining in Welle produced gold in 1920 to the amount of 3,324 Kilograms. valued at \(24,088,430\) francs. Small diamonds are found in the Vasai Basin, the export in 1920 being 274,103 carats. Coal, iron and tin are present, but are undeveloped.

The Congo is navigable for large vessels for 95 miles to Matadi. A railroad 249 miles long transships freight around the series of falls and rapids to Leopoldville on Stanley Pool. 1 rom here the river and its branches are navigable for about 5,000 miles. Railroads have becn built around the falls on the upper river, and to connect important points. The total mileage in 1921 was 2,663. There are 5,609 miles of roads, partly suitable for automobiles. At Boma, the former capital, 60 miles up the Congo from its mouth, 53 seagoing vessels of 160,374 tonnage entered in 1920.

Belgian Congo's territory was increased as a consequence of the war by the transfer of 19,000 square miles, the Ruanda and Urundi territories, from the former German East Africa. Both are in the high plateau region, are rich in cattle and of great economic value.

The European population, census of 1921, was 8.221 , of which 293 were American. The country greatily needs white colonists to develop its resources. Budget, 1921 -Receipts, francs, . . . . . . . . . 67,510,635

CAPITAL, Punakha (a strong natural fortress)
Ruler, Maharajah Sir Ugyen Wangchuk, chosen
hereditary Maharajah 1907.
Bhutan is a semi-independent native state having control of its internal affairs (treaty of 1910), lying on the southern slope of the Himalayas between Thibet on the north and British India on the south with Sikkam on the west. It is 190 miles long from east to west and 90 miles extreme breadth. The people are Mongolians, the original inhabitants baving been subjugated about two centuries ago by Thibetans. Thelr reigion is Buddhism of the Thibetan form. Agriculture and stock raising (sturdy ponies especially) are the chief industries. Trade with India in 1920-21 amounted to \(£ 129,474\).

\section*{BOLIVIA, REPUBLIC OF.}

AREA, 597,460 square miles.
POPULATION, estimated, 1920, 2,820,074.
CAPITAL, La Paz, pop., 1920, 107,252.
President, Bautista Saavedra, 1921-25.
Premier, Dr. Severo Fernando Alonso (Foreign). Minister to the United States, Adolfo Ballivian.
Consul General, at New York, Carlos Gumucio. Comsuls, at Boston, Arthur P. Cushing; at Baltimore, Raymond M. Glacken; at New Orleans, Georgio Garret; at San Francisco, Alberto Palacios: at Seattle, Nemesio Menacho; at San Diego, Philip Morse.
Unitcd States Minister, Jesse S. Cottrell.
Untted States Consul, at Ia Paz, Doyle C. McDonouglı.

Bolivia, the only country in South America without a seaport, lies between Peru and Chile in the west, Brazil on the north and east, Paraguay on the east and Argentina on the south. It lies across the Andes, and its chief topographical feature is the great centrai plateau at an altitude of 12,000 leet, over 500 miles long, lying between two great cordilleras having three of the highest peaks in America. Its area equals that of Oregon, California, Nevada, Arizona and New Mexico together. Over 50 per cent. of the population are Indians speaking their own dialects only and 25 per cent. are of mixed blood. The percentage of illiteracy is very high. Farming, grazing and mining are the chief occupations. The chlef exports are tin, copper, antimony, bismuth, silver, lead, tungsten, rubber, cocoa, hldes and alpaca wooi.

La Paz is connected by a raiiroad (264 miles) with Arico on the Pacific. The principal railroad line runs from Antofagasta to La Paz ( 735 miles). Bolivia is vitaliy interested in the disputes submitted in 1922 to arbitration by Secretary Hughes in Washington, between Peru and Chile over the provlnces of Tacna and Arica on the Pacific, seized by Chile during the war of the Pacific, 1879-83, for she claims a commercial outlet at the port of Arica. She has also a serious boundary dispute with Paraguay over Gran Chaco, a potential valuable grassland. The peace strength of the army is 7.100 with reserves of 230,000 . Bolivia is a member of the League of Nations.

Brazil is the iargest state in South America, exceeding the size of continental United States (exclusive of Alaska), by 250,000 square miles. It has a coast line on the Atiantlc Ocean of 4,106 miles and extends 2,600 miles from north to south and 2.500 miles east to west. It is bounded on the north by Coiombia, Venezueia, the Guianas and the Atiantic Ocean, on the east by the Atlantic, on the south by Uruguay, Paraguay and Boiivia, and on the west by Argentina, Paraguay, Bolivia and Peru. The northern half is the great heavily wooded basin of the Amazon (about 4,000 miles long, the longest river in the world), which rises in the Peruvian Andes, and with its tributaries drains \(2,000,000\) square miles and empties into the Atiantic at the Equator. It is navigable in Brazil for vessels of deep draft for 2,400 miles; and in all its rivers Brazil possesses 40,000 miles of navigable waterways. Mountain ranges, interspersed with fertile valleys, traverse the eastern and southern states. The majestic falls of the Iguassu, one of the natural wonders of the world, are in the southernmost state, Rio Grande do Sul.

The minerai wealth of Brazil is vast and but
little developed. Manganese is exported (450,000 tons in 1920), also the greater part of the world supply of monozite. The gold production is \(\$ 3,000\),000 a year. Coal deposits are extensive but of inferior quality. But a small part of the rich agriculturai land has been brought under cultivation. Four-fifths of the worid's coffee supply is grown in the states of Sao Paulo, Rio de Janeiro, Espirite Santo and Minas Geraes. The average annual crop is about \(12,000,000\) sacks of 132 pounds each; the produce 1921-22 was 8.030,000 sacks; in 1920 there were exported \(11,523,000\) sacks, valued at \(\$ 237,676,500\). Other chief exports are rubber (over haif of the world supply), about 23,531 metric tons being exported in 1920, cocoa, tobacco, sugar, yerba, cotton, leather, hides and meat.
Manufacturing of all kinds is being fostered. In 1921 there were 242 cotton factories with 1,521,500 spindles in operation. The census returns of 1920 snowed there were in all 11,335 factorles with 151.841 employees, capitai of \(665,676,000\) mireis. and an annuai output of \(741,536,000\) milreis. The vast forests are practically untouched. Stock raising is important. The chief imports are textiles, hardware, machinery, crockery and glassware, etc.

In 1920 there entered the ports of Brazil 24,829 steam and sailing vessels, of 24,941,829 tonnage. Brazil on Jan. 1, 1921, had 17,847 miles of railroads in operation. Of this 9,455 miles were owned by the Federal Government (3,980 of which were Government operated); 1,527 owned by the states and 6,231 miles privately owned. The principal system, the Central Brazil Railway ( 1,563 miles), is Government owned. The system is joined up with the rallroads of Paraguay, Argentina, and Uruguay.

Brazil, discovered in 1500 by Cabral, a Portuguese navigator, was developed as a colony of Portugal untii the royal house of Braganza, fleeing from Lisbon before Napoleon's army in November, 1807, transferred the scat of Government to Rio de Janeiro in March, 1808. In 1815 Brazil was proclaimed a kingdom, and in 1822 Dom Pedro, son of King John VI., who had been left as Regent on his father's return to Portugal, was crowned Constitutional Emperor and Brazll freed from Portugal. He abdicated in 1831 in favor of his son Dom Pedro II. who was then five years oid. Crowned in 1841 he ruled with varying fortunes until Nov. 15,1889 , when he was driven from the throne into exile by a revoiution which established a republic, the United States of Brazil. The Constitution was adopted July 24,1891 , and is modelled largely on that of the United States. There are 20 states, largeiy autonomous, one territory (Acre), bought from Bolivia in 1902 and a Federal District. All males over 21 who can read and write have the franchise. The President is elected by dlrect vote for four years. Congress consists of a Senate of 63 members chosen by direct vote for nine years, one-third retiring every three years, and a Chamber of Deputies, of 212 members, elected by direct vote for three years, representation of the minority being provided for. The Cabinet is responsible to the President only.

Ali but 100,000 of the inhabitants are Roman Catholics, but religious toleration is guaranteed. Education is free in the primary grades but not compulsory save in some progressive cities. In recent years, however, great progress has been made. The Úniversity of Rio de Janeiro was founded Sept. 7, 1920. Military service is compulsory. The standing army numbers 35,000 , with a reserve of 560,000 . The navy has two dreadnoughts and in 1918 a personnel of 693 officers and 9,650 men Brazil declared war against Germany on Oct. 26, 1917, following the torpedoing of three merchant ships.

On receipt of an invitation in 1922 from the Government of Brazil, the United States Navy Department assigned Rear Admirai Vogelgesang, with a staff of slxteen commissioned officers and twenty petty officers of the navy, to undertake the task of reorganizing and expanding the Brazilian Navy.

Brazil opened on Sept. 7, 1922, an exposition at Rio de Janeiro in commemoration of the centennial of the Brazllian nation. It was attended offcially by Secretary of State Charles E. Hughes and a mission from the United States.

Brazil is a member of the League of Nations

\section*{BULCARIA, KINGDOM OF.}

AREA, 40,656 square miles.
POPULATION. census of \(1920,4,337,513\), of which 3,203,000 were Bulgarians, Turks about 400,000 . CAPITAL, Sofia, pop.. 154,431; other cities, Philippopolis, pop., 63,418; Warna, 50,819 ; Ruschuk, 41.574; Slivno, 28,695; Plevne, 27,779; Stava Zagore, 25.491, and ten of more than 15,000 population.
King (sometimes known as Czar), Boris III,, born Jan. 30, 1894, succeeded on abdication of his father, Ferdlnand, Oct. 3, 1918.
Premier, Alexander Stambuliski (Foreign Affairs)
Minister to the United States, Stephan Panaretoff
Consuls in the United States-Consular affalrs in
charge of the Bulgarian Legation at Washington. United States Minister, Charles S. Wilson
United States Consul, at Sofia, Graham H. Kemper.
The Principality of Bulgaria was created by the Treaty of Berlin on July 13, 1878, as an autonomous and tributary principality under the suzerainty of the Sultan of Turkey. Bulgaria declared its independence on Oct. 5, 1908. Eastern Rumelia jolned Bulgaria on Sept. 18, 1885, after revolutlon against the Sultan.
In the first Balkan War, Bulgarla, with Serbla, Greece and Montenegro fought Turkey, the war ending in the Treaty of London on March 30, 1913, when Turkey ceded to the alled Balkan nations all territory west of the line from Midla on the Black Sea to Enos on the Aegean Sea, and also Crete. The Balkan League broke up soon after the treaty was signed, war breaking out between the allies-the second Balkan War. Roumania intervened and procured an extension (part of the Dobrudja) of her frontier at Bulgarla's expense. Peace came again with the Treaty of Bucharest on July 26, 1913, all signing.

Bulgaria was an ally of the Central Powers in the World War. By the Peace Treaty of Neuilly (Paris) of Nov. 27, 1919, Bulgarla ceded Thrace to Grecce and the "Strumnitza Line" and a strip of territory on the northwest to Serbla. The treaty deprived Bulgarla of the Aegean Sea front, but provided that which was alleged to be an efficient economic outlet thereto.

It leaves Bulgarla bounded on the north by Roumania, on the west by Serbia, on the south by Grecce, and on the east and southeast by the Black Sea. It is about the size of the State of Kentucky.

Bulgarla's language is Slavonic of Indo-European influence, allied to the Russian: The state church, Orthodox Greek, is governed by a Synod of Bishops, the clergy belng pald by the state.

Two-thirds of the people are engaged in agriculture. Although lands are held in fee, pastures and wondlands are held in perpetulty by the communes. Small holdings run from one to six acres. Methods are very primitive, although gradually machinery is belng brought in.

The cultivated area is \(9,290,175\) aeres of the total of \(18,019,840\) of the country. Production is low because of crude methods. The annual production of \(2,867.060\) tons from 5426,102 acres (eensus of 1921) indicates slightly more than one-half ton to the acre. Domestlc animals number 10,100,000. There is little other industry. Although there are coal deposits, 1920 production was only 748,085 tons. Iron, lead, copper, gold, silver and manganese are found.

Forests cover 30 per cent. of the total area-fir, beech, oak and pine.

Bulgaria had in 1921, 1,581 miles of rallroads owned and operated by the state. River navigation giving access to the Danube-a great traffic route-is important. In 1920, 2,724 vessels of 278,353 tons entered Danube ports and 2,112 vessels of 833,162 tons, Black Sea ports.

By the Constitution, adopted in 1870 and amended in 1893 and 1911, leglslative authorlty is vested in a slngle chamber, the Sobranje or Natlonal Assembly, of 227 members, elected for four years by unlversal suffrage. The King must give assent to all laws enacted before they become effective. Executive power is vested in the Councll of Ten Ministers nominated by the King.

Elementary education is obligatory for chlldren from 7 to 14 years of age. The state maintalns 5,400 schools with about 680,000 puplls, besides 33 speclal state instltutlons and other prlvate schools. Iliferacy is indicated by the 17.3 per cent. of it in the Bulgarian Army.

Pre-war Bulgaria's army was composed of 3,900 officers and 56,000 men, with a war mobillzation streng th of 500,000 . The Treaty of Neully llmits it to 20,000 men, who must be volunteers, obllgatory mlistary service havlng been abollshed. Bulgarla is a member of the League of Natlons.

The leva is the unit of currency, its gold par being \(\$ 0.195\). Imports (census of 1920) were \(2,214,080\), 225 leva, and exports \(1,642,771,900\); textiles, metals, oils, skins and machinery going in, and tobacco maize, hides, wheat, barley, and attar of roses going out. The publle debt (budget of 1922) is 3,209, 035,035 leva, forelgn, and \(3,399,190.960\) internal receipts, \(55,518,000\) leva; expenditurcs, \(88,687,025\) Trade wlth the Unlted States was:
Imports \(1920-21\)

Chile lies on the west coast of Scuth America, occupying the strip of land between the Andes and the South Paclfic, from Peru to Cape Horn, having an extreme length of about 2,800 miles with a coast line of 2,485 miles. The average breadth north of \(40^{\circ}\) is 100 miles. Its area is slightly greater than that of the eight South Atlantle States of the .United States. The Andes have many lofty peaks. notably Corcoputi (alt. 22,162 feet), El Muerto (21,227 feet), the Baya ( 19,993 feet), the Guallatiri ( 19,882 feet.) The land in the north part is arid, but the two provinces Tacna and Arlca, taken from Peru in the war of the Pacific 1879-82, produced 95 per cent. of the world's supply of nitrates until the process of producing nitrate from the air was made commercially profltable. The production of nitrate in 1920 was \(2,606,571\) metric tons, valued at \(\$ 172,-\) 800.000 , but was stagnant \(\ln 1921\). Agriculture is flourishing but the wealth of the country is chlefly in minerals.

Chile is the world's second largest producer oi copper, the amount in 1920 being 91,226 metric tons; there are also enormous iron ore deposits in the provinces of Atocama and Coqulmbo, estimated at a billion tons. Much gold and silver is produced. There are large deposits of coal south of Valparaiso, over a million tons being mlned in 1920.
The chief exports are nitrates, iodine, copper, sllver. cercals, flour, hides and wool; the chlef imports are textlles, food products, agricultural and mining machinery

The population is almost entirely of European orlgin; there are about 100,000 Araucans (natives) in the Andes and an indeterminate number of nomadic Fuegans in Terra del Fuego.

Clile has 5,403 miles of rallroads, of which 2.270 are privately owned. The state owns the longitudinal railroad traverslng the republic from north to south for a dlstance of 2,862 miles; with spurs its mileage is 3,133. Electriflcation of the railroad between Valparalso and Santiago, 117 miles, was begun in 1920. At the ports in 1920 there cntered 14,666 vessels of \(14,925,601\) tons.

Chile threw off the Spanlsh yoke in 1810-18, and in 1833 adopted the Constitution under which the people are now governed. Electors must be able to read and write. The President is elected for 5 years, Congress is composed of a Senate with 37 members, clected by popular vote for six years. and a Chamber of Dcputies, with 118 members, elected for three years. Education is free, supported by the state, and since 1920 is compulsory. The percentage of Illiteracy is high. The University of Clille (state) at Santlago had 4,502 students In 1920 and the Catholic Unlversity, 614. The Roman Catholic religion is maintalied by the
state, but by the Constitution all religions are protected.

All able-bodied citizens are liable for service in the state militia. The peace strength of the army is 23,782 , wlth 609,734 in the reserve. In the navy are one dreadnought-the Almirante Latorre (formerly H. B. M. S. Canada), 28,000 tons, mounting 10 14-inch guns, onc pre-dreadnouglit, the Capitan Prat, 6,966 tons, two armored cruisers and four protected cruisers. The strength of the navy is 6.000 men. An air force was formed in 1918 under British instruction, with a nucleus of 14 scaplanes and 80 aeroplanes, bought in Great Britain.

Chile was neutral during the World War; on specific invitation she joined the League of Nations Nov. 4. 1919.

President, Hsu Shih-Chang; born 1853; elected Aug. 10, 1918; inaugurated October, 1918.
Premier, Wang Chung-hui.
Minister 0 the United States, Sao-Ke Alfred Sze. Consuls in the United States, at New York. Ziangling Chang; at San Francisco, Chu Chao-Hsin (C. G.) ; at Panama for the Canal Zone, Juming C. Suez (C. G.) ; Honorary Consuls at Portland and Seattle.
United States Minister, Dr Jacob Gould Schurman. United States Consuls General, at Shanghai. Edwin S. Cunningham; at Hankow, F. Stcwart Heintzleman: at Mukden, Albert W Pontius; at Canton, vacant; at Tientsin, Stuart J. Fuller. Consuls, at Amoy, Algar E. Caricton; at Antung, vacant; at Changsha, vacant; at Chungking, vacant; at Harbin, George C. Hanson; at Chefoo, Stuart K. Lupton at Nanking. John K. Davis; at Foocho:v. Ernest B. Price; at Tsinan. Clarence E. Gouss: at Yunanfu, Myrl S. Myers; at Swatow, Lester L. Schnare; at Kolgan, vacant.
Chlna, the home of a highly civilized nation when Europeans were still in the bronze age, and with a history reaching back to 2205 B . C., occupies a terrltory in the eastern part of Asia about onethird larger than continental United States. To the north and northeast lies Siberia; to the west Russian Turkestan. to the southwest and south the wellnigh impassable barrier of the Hlmalayas form the Thibetan-Indian frontier. French Indo-China borders it on the south; and the China Sea and Yellow Sea on the east separate it from the Philippines, Formosa (now Japanese), the Japanese Empire and Korea. The country is of rolling topography, rising to high elevations in the north in the Kinghan and Tarbagatal Mountains in Mongolia; the Himalayan and Kwenlun Mountains ln the southwest, in Thibet, and the Hinghan Mountains of Manchuria.

China Proper-China of the I8 Provincesoccupies the rich fertile southeastern part of the country, an area nearly twice the size of the United States east of the Mississippi. There the population on the generally accepted estlmatcs has a denslty of 174 to the square mile. China Proper is one of the best watered countries of the world. From the
mountains on the west four great rivers run in gencral course eastward to the sea, through grcat alluvial plains stretching for hundreds of miles along the ocean and inland to a depth of 300 miles. These rivers drain four-flifths of the country. The Yangtsekiang, \(\mathbf{3}, 158\) miles long, rises in the centre of the high piateau of Thibet, 16,000 feet In altitude. At Pingshenhsien, 1,215 miles from its source, it becomes in part navigable, but with dangerous rapids, to the vicinity of Ichang, 2,193 mlles from itis source. From Ichang to Hankow it is navigable by smali river steamers and from Hankow \(1 ; 0\) lts mouth, 595 miles, by sea-going vessels. The Hanho, a trlbutary from the north at Hankow, is navigable for 600 miles. The Yellow Rlver (Hwangho), 2,700 miles long, and also rising in Thibct, is navigable only in part. It Is called 'China's Sorrow" because of the devastation it causes in flood time, when it overflows its banks, bursts its dikes and sweeps over the farm lands. In 1898, when a disastrous flood occurred, salt and sand were deposited over an arca of 200 square miles, below Lokow, to a depth of 2 to 10 feet, amountlng to over sixteen billion cubic feet. The Sikiang River, 1,250 miles long, waters South China, lts branches reaching the sea in the Canton delta from Hongkong to the west of Macas. It is navigable for steamers for 200 mlles, and for smaller craft for another 100 miles. The Paiho waters the piail of north China, and empties into the Guif of Chihil at Taku. The Amur River, 2,920 miles long. and navigable for 1,500 miles, which forms the boundary between Manchurla and Siberla; the Yalu, navigable for 600 miles, the boundary between Manchuria and Korea, and the Liao in Manchuria are also highly important. A network o canals helps to care for the inland navigation.
China's coast line is 2,150 miles long, or with indentations about 5,000 . Along the coast are 56 treaty ports, 8 voluntarily opened ports, and 25 ports of cail. The climate compares favorably with that of countries in simllar latitudes.
China is essentlally agricultural, and intensively so. The average holdings are small, and the im plements are crude, but there ls much irrigation crops are rotated, and fruit, cereal and vegetable production is regarded by scientists as relatively efficient, food values having for many years been replaced in the soils regularly. Deforestation of the' mountain slopes and hills have resulted in great eroslons. Large forests are rare. Bamboo is wldely used. The amount of cultivated land is estimated at \(341,163,500\) acres. Cotton is produced chiefly in the Yangtsekiang valley, the 1920 yield having been estimated by the China Cotton Association as \(6,696.612\) piculs (picul \(=133 \quad 1-3\) ibs.). Tea is produced exclusively in the west and south, the tea area being about 520,000 acres. Production is not officially indicated, but exportation is said to have declined from 1,576,136 piculs In 1908 to \(1,305,906 \ln 1920\), competition of Ceylon and Indian teas and the cessation of Russian purchases in late years belng responsible.
The silk industry has flourished for 4,000 years. China is now producing 27 per cent. of the world's supply, having in this century yielded first place to Japan. In 1919 production was \(73,078,709\) piculs, valued at \(\$ 139,624,755\). Wheat, barley, corn, mlllet, peas and beans are chiefly cultivated in the north, and sugar, indigo and several cereals in the south. Rice, the staple food of the Chlnese, is grown in all but three provinces, the average annual production being \(3,750,000\) tons. Besides the thousands of looms in prlvate dweliings, in 1921 there were 17 silk filatures, 57 cotton milis, with \(1,747,312\) spindies, 4 woolen mills, 125 modern flour miils, 445 glass factories, and developing iron and steel works. American cotton is bought by China; and in 1921 considerable wheat, owing to crop failures. Practically all of the 18 provinces of China Proper and 3 in Manchurla contaln lmmense stores of coal, China being one of the world's ehief coal countries. The known fields cover 133,500 acres, annual production running now at about \(25,000,000\) tons, of which \(8,000,000\) ls from modern mines.
Iron ores are abundant near the anthracite coal fields of Shansi. where, it is asserted, is the oldest iron industry in the world; and in Chihli, Shantung and Manchuria. There is estimated to be ln China \(600,000,000\) tons of the ore, annual production being about \(1,500,000\), of which nearly two-thirds are smeited in China.
Petroleum also is abundant, but the industry has not becn developed. American oil interests have done much exploration there, and driven many weils, most of which are not active. Copper ore abounds, the Yunnan deposits belng of the world's richest. Tin, antimony, gold, sllver, lead, mercury, tungsten, bismuth and molybdenum are also present.

In 1920, 210,609 vessels entered Chinese ports: American, 818 , of \(1,616,197\) tonnagc; 4,242 British, of \(4,761,060\) tons; 225 French, of 334,041 ; 24 Italian,
of 88,\(402 ; 4,065\) Japanese, of \(4,974,957\) tons; 274 Portuguese, of 48,160 tons; 264 Russian, of 117,636 tons, and 21,503 Chinese, of \(2,277,364\) tons; total entrances; 31,667 . of \(14,584,856\) tons.
The first railway was opened in 1876. At present there are more than 7,000 mlies, ineluding 1,857 miles \(\ln\) Manchuria, with 2,000 under construetion. About one-haif are under the Government

Up to Feb. 12, 1912, when China became a republic, lt was one of the most ancient monarehies. According to the Provisional Constitution the Government comprises a President, Vlce President and a two House iegislative body-the Senate of 264 members and the House of 596. The Centrai Government has not yet obtained fuil control, there being military governors in several provinces who refuse to obey. The executive authority is in a Premier named by the President, and nine Ministers nominated by the Premier, all to be confirmed by the Parllament. The Parliament, however, had failed to functlon up to late 1922, owing to the disturbed state of the country.

A Southern Government was formed at Canton, its authority being recognized in Kwangtung and Kwangsi.

Confucianisin, Buddhism and Taoism are. the religions of Cnina, although there are aiso between \(5,000,000\) and \(10,000,000\) Moslems in the country about 1,994,000 Catholics and 618,600 Protestant Christians.
In 1905 there began the new movement toward education of the masses, and since then progress has been marked. While the number of schools, 135,000 , and puplls, \(4,500,000\), is small relatlve to the total population, the number is srowing rapldly There are seven universities and many technlcai instltutions of learning.

The army numbers between \(1,400,000\) to \(1,800,000\) men, and is being wrought into a more modern organization. The navy is negligible-a protected cruiser of 4.300 tons, two cruisers of 2,600 tons and three 3,000 -ton cruisers, with auxiliary vessei complement. The whole tonnage is about 40,000 , wlth 8,000 men. China is a member of the League of Nations.

There is "unparaileled currency confusion" says in authority. The unit is the tael, which varies in goid par value from 67.08 cents in Shanghai to 74.86 In Taku. Mexican iollars are used in ail the treaty ports. Imports in 1920 were \(1,848,910,500\) taels; exports, \(1,3 i 3,778,300\). China's forelgn trade is but one-fiftleth of that of the United States pel capita. The last budget was in 1919, when receipts were estimated at 490,419,786 "Kuping" taels; expenditures, 495,762,888; deficit, \(5,343,102\).

China's national debt as compiled by the Government Bureau of Economlc Information in 1922 ls as follows, amounts being stated in Mexican dollars; \(\$ 1\) Mexican is worth about \(\$ 0.57\) United States currency at present rate of exchange:

Dollars
Mex.
General foreign loans
Foreign railway ioans
Foreign Indemnities
Internal long-term loans.
268,979,252 334,802,631
. 275,226,738
Internal sliort-term ioans 69,101,978
Treasury notes, etc
18,640,000
Total
1,449,592,343
The last items do not contain aii the short-term loans and treasury notes issues, as the amounts of some of these cannot be ascertained.

The reorganization of the Chinese finances and debt is a pressing necessity although the difficulties in the way are well-nlgh insurmountable.

The chlef exports of China are silk, beans and products, tea, sklns and furs, cotton, sesamum seed, tin, cereais, medicines, peanuts and peanut oil, animals, wool, antlmony and copper.

China's trade with the United States was:
Imports, \(1920-21\). . . . . . . . . . . . . . . . . . . . \(\$ 138,455,178\)
Exports, \(1921-22\). . . . . . . . . . . . . . . . . . . . . . . . . . . . . . \(1100,853,185,707\)

\section*{MANCHURIA.}

AREA, 382,630 square miles.
POPULATION, 1916, estimate of the Southern Manchurian railway, 20,112,100.
CAPITALS, Muikden, of Shengking Province; Kirin of Kirin; 'Tsitslinar, of Amur.
Manchuria is the extreine northeast territory of China, with Siberia on the northwest, north and east, Korea, on the southeast and Mongolia on the west. The Amur River flows aiong the northern border, the Ussurl on the east, and the Yalu forms the bounciary with Korea.

Its topography is extremely varied. Much of the castern portion is intensively agricultural. The soya bean, cuitivated on about \(6,000,000\) acres, is
a source of enormous weaith. The Chamber of Commerce at Dairen estimates that \(22.744,000\) acres are cuitivated for ail crops, \(19,460,000\) persons being employed. Wheat, beans, millet, rice and products of the soya bean are the chief crops. There are 50 flouring mills. Forests are extensive. There are rich deposits of coal, iron, lead, gold, silver and asbestos.

The Trans-Siberian railroad runs through Manchuria from Lake Kulun to Suirenko the border for about 100 mlles northwest of Vladivostok. From Harbin the railroad runs to Mukden and branches to Peking on the west, Port Arthur and Dairen on the south, and through Korea to Uokpo and Fusan on the southeast. Raiiway mlieage is about 1,000 .
In 1920 , direct lmports were about \(290,000,000\) taels; exports, about \(350,000,000\) taels. In 1920 , 5,300 vesseis entered Dairen, of \(5,509,314\) tonnage.

\section*{MONGOLIA.}

AREA. 1,369,600 square miles.
POPULATION. estimated, 2,600,000.
CAPITAL, Urga.
Mongoiia, aithough nominally of China, was somewhat shaken loose from Chinese adherence during the late war, the status of Outer Mongoiia belng now that its autonomy is recognized by China, and it is recognized by Russia as under Chlnese suzerainty. It is bounded on the north by Siberia, on the south by Sinkiang, on the southwest by Turkestan, on the east by China Proper and Manchuria.

There is little agricuiture, the great plains between the Tarbagatai and Kinghan Mountains belng desert, with camels, horses and sheep as principal interests. The rellgion of the peopie is Buddhist Lamaism.

Motor transportation from Kalgan on the Great Wali of China, northwest of Peking, and at the terminus of the Kalgan-Peiking railroad. with Urga, the capitai of Mongolia, a distance of 650 mlles across the plains, was cstablished in 1921. In the last three months of the year goods to the value of \(\$ 2,000,000\) silver were taken to Urga. The trip takes three to four days.

Mongolia has its own legal eurrency, adopted in 1915, equal to the gold par of the Russian ruble50 cents.

SINKIANG (Chinese Turliestan).
AREA, 550,340 square mlles.
POPULATION, estimated, \(1,200,000\).
CAPITAL, Ili.
Sinkiang, innown as the New Dominion, comprises Chinese Turkestan, Kulja and Kashgaria; and lncludes all Chinese dependencies between Mongolia on the nortl and Thlbet on the south. There are Turiki, Mohammedan and Chinese people resident there. Along the Kashgar and Yarkand Rivers there is much irrigation, and cereals, fruits and vegetables are grown, with wool, cotton and slik production.

It is from Sinklang that puch of the jade comes.

\section*{THIBET}

AREA, 463,200 square miles.
POPULATION, estimated, \(2,000,000\).
CAPITAT, Lhasa; pop. 15,000 to 20,000 .
Thlbet, in Western China, is a country iittle known, situated between the Hlmalaya and Kwenlun Mountains, and hitherto practicaliy shut to strangers. The trade is with India mostly, being carried on througil iofty passes, some of which are 14,000 to 18,000 feet high, which are impassable in winter. China's hold on Thibet was visibiy loosened when the 1911 revolution broke ln China. The Thibetans expelled the Chinese garrisons, and the status of that country is more or less indeterminate, although nominally part of the Chlnese Republlc.

The religion ls Lamaism, a modified form of Buddhlsm, and aiso \& fajth known as Shamanlstic. Ali economie phases are affected by the non-progresslve character of the peop'e, who are illmersed in thelr religious traditions. Some agriculture is carried on, and livestock husbandry.

\section*{COLOMEIA, REPUBLIC OF.}

AREA, 461,606 square miles.
POPULATION, cellsus of \(1918,5,855,077\).
CAPITAL, I ogota, pop. (estimater1, 1921); 160,000: chief cities, Medellin, pon. 79,146: Burranquilla, 64,543; Cartagena, 51,352; Caii. 45,825; Cucuta, 29,490; 13uearamanga, 24,919, President, Dr. Pedro Nel Ospina, Conservative (1922-26). Tnaugurated Aug. 7. 1922.
J'emier, Jimenez Lopez (Interlor).
Minister to the Untted States, Dr. Enrique Olaya.

\section*{Consul General at New York, J. M. Arango G.}

Consuls, at Boston, Enrique Naranjo M.; at Philadelphia, Ricardo Galvls; at Newark, Alfonso Sanchez S.; at Chattanooga, John L. Newkirk, Jr.; at Moble, Juan Llorea Marti; at Baltlmore, Roberto F. Velez; at New Orleans, Diego Jose Fallon; at Detroit, William J. Griffiths; at Chicago, Jorge E. Cavelier; at San Francisco, Alvaro Robolledo; at Los Angeles, Fortunato Pereira Gamba; at Seattle, Escipion Canal; at St. Louis, vacant; at Norfolk, vacant. United States Minister, Samuel H. Piles.
United States Consuls, at Barranquilla, Maurice
L. Stafford; at Cartagena, Leroy R. Sawyer.

The Republic of Colombia, situated in the extreme northwest of South America, extends up the Isthmus of Panama to the Republic of Panama-boundary line undetermined. It has a coast line of 465 miles on the Pacific Ocean, and 640 miles on the Carlbbean Sea. It has as neighbors Venezuela and Brazil on the east. and Ecuador and Peru on the south. Its area is estimated at 461,606 square miles, which is equal to that of California, Oregon, Washington and Montana combincd.

Threc great ranges of the Andes, the Western, Central and Eastern Cordilleras, run through the country from north to south. The eastern range consists mostly of high table lands, cool and healthy, the most densely populated part of the country. The Magdalena River, in the east, rises in the high Andes and flows north lnto the Caribbean Sea, 18 miles from Barranquilla. It is navlgable for river steamers for 900 miles, as far as Jirardot. Steamers ascend to La Dorado, 590 mlles. Railroads serve to transport freight and passengers around the rapids and from Jirardot to Bogota. The total mileage of railroads is 891, and the bulk of the transportation in the interior is on mule back. The populatlon, according to the census of 1918 , is \(5.855,077\), almost entirely whites and half castes, only 158,428 Indians being returned. Bogota, the capital, situated 8,600 feet above the sea, has a university, founded in 1572 , a large library, a museum and observatory. The Roman Catholic is the prevalling religion, but all are tolerated. The standing army consists of about 6,000 men, with a reserve of 362,700 . Mlitary service is compulsory. There is no navy.
The country is dlvided into 14 departments, 2 intendenclas and 7 comisarias, with Governors appointed by the President. The Federal Congress consists of a Senate of 34 members, elected for a term of 4 years, and a House of Representatives of 92 , elected directly by the people every 2 years.

The forests are extensive, much mahogany, cedar and dyewood being exported. Colombia contains the great emerald mines of the world, the chief mines being owned by the state. The country is rich In minerals-gold, silver, platinum, copper, iron, lead and coal are mined. The Government owned salt mines at Zipaquira are a great source of revenue. Coffee, cotton, bananas, cocoa, vegetables, ivory, tobacco, and wheat are the chlef agricultural products. Cattle raising is extensive. Some woolen and cotton stuff is manufactured for home consumption, also iron. The chief exports are coffee, hides, bananas, Panama hats, rubber, and precious metals.

The country, originally conquered by Spaln and ruled by her for 300 years, won its freedom in the revolt of the Spanish-American colonies in 1811-24, the liberator, Simon Bolivar, establlshing the Republic of Colombia in 1819. Venezuela and Ecuador withdrew \(\ln 1829-30\), and there were frequent uprisings during the century, culminating in the secession of Panama ln 1903, slnce which the republic has been tranqull. Under the treaty with the United States adjustlng the loss of Panama (ratified by the United States Senate April 20, 1921, and by the Colombian Congress Dec. 24,1921 ), Colombia is to receive in compensation \(\$ 25,000,000\) from the United States, to be paid in yearly instalments of \(\$ 5,000,000\). Thls sum of money it is planned to use in stabilizing the currency of the country, and in improving its transportation facilities.
A loan of \(\$ 5,000,000\)-year \(61 / 2\) per cent. bonds was floated on the New York market on Nov. 1, 1922. Colombla is a member of the League of Nations. Par of exchange, peso

COSTA RICA, REPUELIC OF.
AREA, estimated, 23,000 square miles.
POPULATION, estimated, 1922, 576,581.
CAPITAL, San Jose, pop., 38,930. Other cities, Cartago, 17,402; Limon, 10,231.
President, Sr. Don Julio Acosta Garcia (1920-24). Inaugurated May 8, 1920.
Premier, Sr. Don Jose Andres Coronado Alvarado (Foreign, Justice, Worshlp and Charlties).
Minister to the United States, Sr. Dr. Don Octavio Beeche.
Consuls General, at New York, J. Rafael Oreamuno; at San Francisco, Jorge Orozco Casorla; Consuls, at Boston, Mario Sancho Jimenez; at New Orleans, Julio Aguilai Soto; at Baltlmore, William A. Riordan; at Chicago, Berthold Singer; at Mobile, Truman McGonigal; at Milwaukee, Eduardo Azuola Aubert.
Uniled States Minister, Roy T. Davis (also accredited to Guatemala).
United States Consuls, at San Jose, Henry S. Waterman; at Port Limon, Stewart E. McMillin.
Costa Rica, the southern state of Central America, has Nicaragua for its ncighbor on the north and Panama on the south. The latter boundary has been a subject of arbitration and was fixed in 1900 by decision of President Loubet of France-a decision that by mutual consent was interpreted by the late Chief Justice White of the United States in 1914. Panama objected strenuously to this decislon and in 1921 started troops to occupy the territory she claimed and whlch Costa Rlca had occupied; but vielded to diplomatic pressure from the United States.

The lowlands by the Caribbean have a tropical climate. Bananas are cultivated, 8.652 .473 bunches being exported in 1920 The interior plateau, with an altitude of about 4,000 feet, has a temperate climate. Coffee is the chief crop. The forests are extensive but little lumbering is done. Agrlculture and stock raising are the chlef industries. Gold and sllver mining is an important industry on the Pacific slope. Port Limon is the centre of the banana trade. In 1920532 vessels, tonnage 760,801 , entered the ports. There are 402 mlles of rallroads; the line from Port Limon to San Jose, 103 mlles, has unusual scenic charm.

The Constitution, adopted Dec. 7, 1871, has been many times modifled. The legislative power is vested in a Chamber of Deputies, 43 in number, with four-year terms, one-half elected directly every two years by manhood suffrage. The President, elected for 4 years appoints a Ministry of six. The Roman Catholic is the religlon of the state. Primary education is compulsory and free. The National Police have taken over the duties of the army.

United States Minisier, vacant.
United States Consul General, at Havana, Carlton Bailey Hurst Consuls, at Antilla, Horace J. Dickinson; at Cienfuegos, Frank Bohr; at Nucvitas, George G. Duffee; at Santiago, Harold D. Clum; at Nueva Gerona, Isle of Pines, Charles Forman. Cuba, the "Pearl of the Antilles." largest island of the West Indies, lies between the Gulf of Mexico, the Strait of Florida and the Atlantic Ocean on the north and the Caribbean' Sea on the south. Key West, Fla., is about 100 mlles a little to the east of north of Havana. The Windward Passage, 50 miles wide, separates it from Haiti to the east, and Jamaica (British) lies 85 miles to the south. Yucatan is 130 miles to the west. From San Antonio, the western extremity, to Cape Maysi, the eastern, the length is 730 miles, and the breadth averages 50 miles, with a maximum of 160 miles. Its area nearly equals that of Pennsylvanla. The coast llne, including the larger keys, is about 2,500 mlles in length. It has numerous safe and commodious harbors, notably that of Havana, one of the finest and safest in the world. Other first-class harbors are Bahia Honda, Matanzas, Cardenas, Nuevitas and Nipe on the north shore, and Santiago and Cienfucgos on the south; also Guantanamo, now a Unlted States naval station.

Mountains rise in Plnar del Rio province in the west, and \(\ln\) Camaguey and Oriente in the east, where they reach a general elevation of about 3,000 feet. With Monte Turquino ( 8,320 fect) as the highest point. Santa Clara is rough and broken, but Matanzas and Havana are flat and rolling. The uplands and mountains are covered with magnlficent forests, the scenery is wild and very beautiful, and many points are inaceessible. Broad intervals of low upiand are frequent. Near the coast runs a continual belt of plantations. Grazing, tobacce and general farm lands cover the lower slopes of the hills.

The soil is alluvial, and under the tropical heat and humidity the vegetation is of rare riehness. It is estlmated officially that \(3,62 S, 434\) acres are covered with dense forest, mostly primeval. The royal palm is the most characteristic tree, rising to 75 feet, sometlmes 100 feet in height, dominating every landscape. All tropical fruits and vegetabies flourish. At Havana the mean temperature is \(76^{\circ}\) and the mean rainfall 40.6 inches, Hardly a decade passes without a destructive hurricane. The population is about 60 per cent native white, 30 per cent. Negro, and 10 per cent, forclgn white.

Sugar has been the dominant crop for 150 years and its price is the barometcr of prosperity for the island. Cuba exported to the United States, which takes about 98 per cent. of her totai product, in the fiscal year \(1920-21,4,925,630,505\) pounds, valued at \(\$ 378,209,386\); and in 1921-22, \(7,720,255,227\) pounds, valued at \(\$ 171,300,590\). About 1,375,000 acres are occupied by the sugar plantations. Rum, molasses and aicohol are important by-products

Tobacco raising and the manufacture of cigars and clgarettes is the second industry of the island. The total value of the crop is between \(\$ 40,000,000\) and \(\$ 50.000,000\) annually; the tobacco manufactured in Cuba in 1919-20 was valued at \(\$ 2,373.966\). Cuba's exports of tobacco to the United States in the year 1920-21 were \(18,292,521\) pounds, valued at \(\$ 22,278,840\); and in the year 1921-22 were 21,401,159 Dounds, valued at \(\$ 20,578.009\); the value of clears exported to the United States for the same perjods were \(\$ 4,000,000\) and \(\$ 3,214,000\) respectively. Banana raising is increasing in importance.

Stock raising is an important industry, though proportionally less so than in prevlous ycars. Mahogany and other valuable cabinet woods are produced and much cedar for the manufacture of cigar boxes. From the Iron mines 50,000 tons of ore are exported monthly to the United States. Copper is a vaiuable product, also asphalt.

Cuba had In \(1919,3,200\) mlles of railroads, including the private iines connecting the sugar plantations with the trunk lines. In 1919, 89.436 vessels With a tonnage of \(203,975,959\) entered the ports of the republic in the foreign trade. In the coastwise trade 14,684 vessels of \(2,582,829\) tons entered. The island has over 1,500 miles of splendid automoblle roads.

C'iba, discovered by Columbus in 1492, and first settled by the Spanish \(\ln 1511\), attained independence of spain by the Treaty of Paris, Dec. 1, 1898 , which ended the Spanish-Amerjcan War, A Constitution, morleled after that of the United States, ldent and Vice President, clected for four years by
direct vote; a Eenate of 24 members (four from each of the six provinces) and a House of Represer tatives of 118 members. The provinces and municlpailtles have a large measure of home rule. The Congress of the United States authorized the President to hand over the government to the Cuban people on the condition that the so-called Platt amendment adopted by Congress March 2, 1901, be accepted. This provided that the Cuban republic should never enter into any compact with a foreign power that would impair her independence; that she would contract no excessive debt; that the acts of the United States in Cuba during and after the war be validated; that the Cuban Government should carry out certaln plans for the sanitation of the island; that certain lands necessary for eoaling or naval stations be leased to the Unlted States, and "that the Cuban Government consents that the Unlted States may eyercise the right to intervene for the preservation of Cuban independence and to maintain a government capable of protecting life, property and individual liberty, and for discharging the obligations with respect to Cuba lmposed by the treaty of peace on the United States, now to be assumed and undertaken by the Government of Cuba." Thiz was made, on June 12, 1901, a part of the Constitution. On Feb. 24, 1902, the election of President (Tomas Estrada Paima) took place and the United States formally transferred control of the lsland to the National Government. The coaling stations, Guantanamo Bay and Bahla Honda, were leased to the United States on July 2, 1903, at an annual rental of \(\$ 2,000,000\).
Political disturbances occasioned intervention by the United States in August, 1906, which continued untii Jan. 28, 1909, when the National Covernment was resumed after the institution of electoral reforms, and the last American soldiers left the island April 1, 1909. A new electoral law, drawn with the assistance of Major Gen. Enoch H. Crowder, U. S. A., was passed in August, 1919. The electlon of Nov. 1, 1920, was very stormy and interpretations put on the new laws brought about a deadlock Gen. Crowder was sent to Cuba in January. 1921 , again as personal representative of President Wilson to straighten matters out, the result being the inauguration of Dr. Alfredo Zayas on May 20, 1921.

Under the influence of Gen. Crowder the Congress has passed durlng the summer session of 1922 five reform measures-the reorganization of the Federal system of accounting, the suspension of certain provislons of the civil service law to permit the President to shift the personnel of various Government departments in the interest of economy and cfficiency, certain judiclary reforms, the clearlng up of current lndebtedness, and the flotation of a foreign loan of \(\$ 50,000,000\), the latter authorized Oct. 7.

Cuba ls a member of the League of Nations.
Notable work had been aecomplished by the United States Military Government under Gens. Brooks and Wood, especially the stamplng out of yellow fever

The Education Act of 1899 established a system of primary and secondary schools, with compulsory attendance, under which education has progressed greatly. A wide system of kindergartens and night schools has been added. In 1919, 334,671 ehildren were enrolled, with 6,151 teachers. In that year 223 new schools were established. The University of Havana (founded 1721) in 1919 had 2,272 students. The Roman Catholic reilglon is dominant.

Premier, Antonin Svenla
Mintster to the United States, Dr. Bedrich Stenanek.

Consuls in the United States, at New York, Borivoj
Prusik; at Chlcago, Jaroslav Smetanka; at Cieve land, Bohusiav Bariosovsky; at Pittsburgh, Albert Mamatey; at Omaha, Stanley Serpan.
United States Minister, Lewis Einstein.
United States Consul, at Prague, Charies S. Winans. Czechosiovakia is a Centrai European republic, about the size of the State of Illinois, bounded on the north by Germany and Poland, and on the south by Roumania, Hungary and Austria. Its extreme length from east to west is 600 miles and lts width varies from 50 to 100 miles.

Czechoslovakia is onc of Europe's richest countrics agriculturaily. It is becoming a land of peasant hoidings; the number of farms being \(3,791,621\). Farming is unusuaiiy hlghly developed and is intensive, as indicated by the production of about \(14,500,000\) short tons of wheat, oats, baricy, rye, potatoes and sugar beets from about \(900,000,000\) acres. Beet sugar produeed annualiy is about \(530,0 \mathrm{co}\) short tons, of which 280,000 are exported; 600 breweries output \(5,700,000\) heetolitres of beer, and 413 distilieries \(27,500.000\) heetoiltres of spirlts. Livestock number \(9,000,000\).

Forests cover 32 per cent. of the total \(34,560,000\) aeres in Czcchosiovakia, the annual lumber yield being \(6,200,000,000\) board fect. Immense quantities of foodstuffs are exported, the net food surpius being larger than for any other country in Europe. Agricuiture has been restored to almost normal.

Mineral wealth Is great-coal, iron, graphlte, copper, lead, goid, sliver and garnets belng abundant. Coal production runs at about \(33,500,000\) short tons from 366 mines empioying 120,000 men.

Factorles number 8,800-textile, 2,000; giass and precious stones, 1,700; foodstuffs, 1,350 ; furniture and wood, 674; machinery, 595: metai, 590; paper, 300: ehemicals, 450.

The raiiroad mileage is 8,\(497 ; 5,105\) state owned, 3,320 privateiy owned; 1,000 miles are doubietracked. The peace treaty gave Czeehoslovakia, which has no outiet to the sea 200 miles distant, the right to certain wharves \(\ln\) Hamburg and Stettin; the Danube is the principai waterway, its chief port being Bratisiava (Pressburg). On the Elbe, which flows from Czechosiovakia through Germany, the main ports are Usti (Aussig) and Decon (Tesehen).

The Czeehosiovaks, two branehcs of the same Slav nation, formed the independent Kingdom of Bohemia in Central Europe ln the fifth century. In 1526- the Hapsburgs werc cieeted to the throne of Bohemia, which thus beeame united through a common dynasty to Austria and Hungary. Reiigious pcrsecution in the seventeenth century led to unsuccessfui rebeilions, leaving great bitterness. In its present form Czcchoslovakia is a ereation of the war, coming into existence Oct. 28, 1918, on the break-up of the Austro-Hungarian Empire, of which it was the northwest portion, bordering on Germany and Poiand. The Constitution of the repubiic was adopted by the Nationai Assembly on Fcb. 29, 1920, providing for a Nationai Assembly with legisiative authority over the whole eountry, Carpathian Ruthenia to have autonomy. The Assembiy, eiected by universai suffrage, and with proportional representation, Is composed of a Chamber of Deputies, six-year tenure, 300 members; and a Senate, eightyear tenure, 150 members, both in joint session to elect the President of the repubiic for a seven-year term; the President to be the head of the army, authorized to declare war with consent of the Assembiy, and appoint Ministers and officials. Freedom of speech and religion are guaranteed.

There are 11,675,187 Roman Catholies, 592,699 Greek Cathoiics, 929,203 Protestants, 361,000 Jews. In 1920 the Reformed Ciergy of Czechosiovakia decided to withdraw from the jurisdietlon of the Pope and found a national church.

Education is compuisory between the ages of 6 and 14. Literacy in aimost universal, excepting in Slovakia. There are 13,417 eiementary schoois, with \(1,900,000\) pupiis, and 1,411 advanced schools with 255,000 students. The Czeeh University of Prague is celebrated. Founded in 1348. students number 10,300; the German Unlversity at Prague having 4,000 and two other universities 2,300 .

Universal miiitary service for men between 20 and 50 was enacted in 1920 , service to be for 14 months. When mobilization ls decreed, all from 17 to 60 are liabie for servicc. Later a system of militia will be adopted. Peacetime army strength is 147.000 men. Reserve number 1,524,000. Czeehosiovaikla is a member of the League of Nations.

With Jugo-Siavia and Roumania, Czechoslovakia formed the "Littie Entente," designed for protcetion against Hungarian aggression, as a defense against Boishevism shouid the Soviet armies pass the Russiall frontier, and to promote trade on the Danubc.

\section*{DANZIG, FREE CITY OF.}

AREA, 709 square miles.
POPULATION, 1919, 351,380; 93 per cent. German, 7 per eent. Poles.
High Commissioner, Gen. Sir Riehard Haking, appointcd by the League of Nations; assumed offee Jan. 24, 1921.
United States Consul, Charles L. Hoover. Dipiomatle and consuiar representatives of Poland have eharge of the intcrests of the Free City of Danzig in the United States.
The Treaty of Versailles set Danzig (Gdansk) apart as a free elty, taking it from the former German Empire, givlng ail nations equal aecess, and to Poiand ecrtain espeeial privileges appertaining to pubiic utilities. Danzig proper (the administrative distrlet has 194,953 inhabitants), lying at the entrance of the (Poiish) Vlstuia River to the Baitie Sea, with an ocean frontage of 35 miles, is an important seaport and grain market, and was governed after the war by an Inter-Ailled commission, to be gradualiy taken over by the eitizens. A treaty was drawn between Danzig and Poiand, under lnstructions from the Parls Peace Conference, which eame in force with the prociaiming of the freedom of the city on Nov. 15, 1920. Tinere are storage capacities in wareliouscs for 50,000 freight tons, and pians for ultimate extensions of faeiiities to handie \(8,000,000\) tons of shipping annualiy. There are forty banks, hair of them Polish. The German mark is the eurrency.

In 19135,765 ships of \(1,861,691\) tonnage, entered Danzig; in 1921, 3,836 ships of \(1,967,000\) tonnage In 1913, no American ships made Danzig. In 1921 American tonnage was 233,403; British, 256,464; German, 204,958; German tonnage In 1913, 526,489.

Danzig dates from before 997 A. D., was onee Polish, became German, is the worid's greatest amber source, has predominant German popuiation with Poies increasing, and, when the Vistuia-Dnieper trans-Europcan route is perfected will be the most important Baltic port.

Danzig has many eherished historie treasures in cathedrals, notably St. Marian, abbeys, notabiy Oiivia, and other architecturai attractions much admired. Zoppot, six miles out, is the fasiionabie summer resort on the Baitie.

Deveiopment of Hamburg and Bremen by Germany as chief ports pressed Danzig down to relativc insignificance; but its ercation as a free city has reinvigorated it, rationai deveiopment now being in progress, foilowing tile disorders, immedlateiy post-war, which interfered seclously wlth its prosperity.

Poiand's cspecial privileges under the Treaty of Versaiiles Inciude predominant influence ln control of waterways, doeks, basins, traffle on the Vistula, railways, posts, teicphones and telegraphs, "the General Commission of the Poiish Repubilc in Danzig" adninisterlng Poiish Treaty rights, as intermediary between foreign representatives and the municipal government. For the Danzig and Poilsh trade with the United States see Poland.

The Constitution, approved by the League of Nations, Nov. 17, 1920, provides for a Volkstag or Diet of 120 members, elected by direct vote. suffrage being exercised by all men and women over twenty and by a Senate, President, Viee-President and 20 Senators, eiected by the Volkstag. The Senate is the highest state authority and meets \(\ln\) secret. The President of the Senate directs the administration.
The funded debt of the Free City on Jan. 1, 1921; was 43,034,647 marks.

DENMARK, KINCDOM OF:
AREA, \(\mathbf{1 6 , 9 5 8}\) square miles.
POPULATION, census of \(1921,3,283,000\). Denmark gaincd 164,500 of population by the peopie of Sehleswig voting in 1920 in the piebiscite to return from German rule to adherence to Denmark.

CAPITAL, Copenhagen, pop. without suburbs, 561,344.
King, Christian X, born Sept. 26, 1870; succeeded his father Frederick VIII, May 14, 1912; married April 26,1898 Princess Alcxandria of Mecklenburg; Heir, Crown Prince Christian Frederick born March 11, 1899. He is also King of Iceland (whicl1 see).
Premier, Niels Neergaard (Finance)
Minister to the United States. Constantin Brun.
Consuls in the United States, at New York, George Bech; at Chicago, Redmund Baumann; at Boston, Gustaf Lundberg; at New Orleans, Thorkil Hoff-man-Olsen; at Seattle, Henning Plaun; .at San Francisco, Fin Lunn.
United States Minister, John Dyneley Prince
United States Consul General, at Copenhagen, Marion Letcher.
Denmark occuples the peninsula of Jutland, thrustlng out to the north from Germany, which is its only land neighbor, between the North Sea and the Baltic Sea, wlth the adjacent islands. The Skagerrak separates it from Norway and Cattegat from Sweden. It is a little smaller than the States of Massachusetts and New Hampshire together. The country consists of low undulating plains.

Denmark has attained enormous agricultural productivity, annually (census of 1921) taking \(3,527,000\) tons of wheat, rye, barley, oats, potatoes and mlxed grains from \(3,750,000\) acres. Eighty per cent. of the whole land is productive; 4.8 per eent. forest covered: and 35 per cent. arable. wlth large supplies of peat. Domestic animals in 1921 numbered 5,191,000. Denmark sends agricultural products all over the world, notably from her dairies.

Normally, there are about 82,000 industrial and shop plants, about 15,000 using power, employing 350,000 , of whom 240,000 are skilled. In 1920 beet sugar production was 152,740 tons, and the Danish fishing flect of 15,350 boats took fish to the value of \(2,350,167\) kroner.

Danish activity of all kinds has been largely dependent on the purchasing power of the German people, whose normal purchases of 60 per cent. of their foodstuffs afforded Denmark a valuabie market. Prostration of German buying power has reduced Denmark to a current governmental budget deficit of the equivalent of about \(\$ 7,500,000\).

Industry is normally stable in Denmark, attributed by many in part to the Permanent Court of Arbltration and the Public Mediation Institution. The first is representative of employers and employees and interprets agreements and legal points involved therein. The second anticipates industrial troubles, and, when stoppage of work such as will affect the whole community is threatencd, takes steps to intervene and seeks to prevent it. The Court of Arbitration is national and no appeal iies against its findings to any superior court, being in themselves final and valid in law.

There are 2,662 miles of railroads, of which 1,283 are state-owned. In 1920 Denmark had 1,749 vessels of 592,724 tonnage and 23,038 vessels of 3,269 ,268 tonnage entered Danish ports.

Denmark is a constitutional monarchy, the succession being hereditary. The King and the Rigsdag (Diet) jointly hold legislative power. Executive authority vests in the King through his ten Ministers. The Rigsdag is of two bodies-the Folketlng (House of Commons) with 149 members; and the Landsting (Senate) with 75 members. Men and women of 25 years of age and a fixed abode have the franchise.
The Evangelical Lutheran is the established religion. By the census of 1911 there were 2,732,792 Protestants and 9,821 Catholics. The population is almost entircly Scandinavian.

Education is compulsory between seven and fourtecn years of age. Intelligence is widely diffused. By the census of 1920 there were 4,232 lower schools. instruction mostly gratuitous, with 473,310 pupils, and 70,000 students in the higher institutions. *The University of Copenhagen, founded 1479, has 3,300 students.
old age pensions are granted at 60 years of age to persons of good character, the number relieved in 1919-20 being 98,525.

The army is in the form of a national militia, every able-bodied male Dane being liable for scrvice, excepting only those living in the Faroc Islands. Even clergymen must scrve. About 11,500 recrults train annually. The effcctive strengtif is 60,000 , with 55,000 availiable on mobilization. The navy, for coast defense only is mostly monitors,

Denmark is a member of the League of Nations.
Par of exchange for the isroncr is 26.3 cents; exchange on Nov. 1,1922 , was 20.20 cents.
Imiports in 1921 were \(1,625,000,000\) kroncr; exports, 1.484.600.000. mainly beverages, textiles, metals.
wood manufactures, animals, cereals, provisions, butter, cheese, eggs

\section*{DOMINICAN REPUBLIC.}

\section*{(SANTO DOMINGO.)}

AREA, 18,750 square miles.
POPULATION, estimated, 700,000.
CAPITAL, Santo Domingo (founded 1496), pop. 1921, 45,021. Chief port, Puerto Plata, pop.
26,073; other cities, Santiago de los Caballeros, 71,956; La Vega, 58,041.
President (provisional), Juan Bautista y Burgos Secretary of Foreign Relations, Angel Morales.
Secretary of Interior and Police, Jose del Carmenariza Secretary of Justice and Public Instruction, C Armando Rodriguez.
Secretary of Hacienda and Commerce, Eladio Sanchez. Secretary of Fomento and Communication, Octavio A. Acevedo.
Secretary of Agriculture and Immigration, Pcdro A. Perez.
Secretary of Sanitation and Charities, Licenciado Manuel Maria Sanabia.
Minister to the United States, Emilio Joubert.
Consul General, at New York, Manuel De J. Ca-
macho. Consul, at Philadei phia, Rodman Wanamaker; at Boston, vacant
United States Minister, William W. Russell.
United States Consuls, at Santo Domingo, Tleodore B. Hogg; at Puerto Plata, William A. Beckers. The Dominican Republic oceupies the eastern portion, about two-thirds, of the Island of Santo Domingo, the second largest of the Greater Antilles, situated between Cuba on the west and Porto Rico on the east. The boundary between lt and the Republic of Haiti, which occupies the western part of the island, is 193 iniles long. It has a coastline of 1,017 miles. The land is very fertile, about 15,500 square miles being cultivable; agriculture and stock raising are the principal industries. Sugar, cacao, and tobacco are the chlef products and exports. The country has gold, copper, Iron, salt, coal and petroleum, but the mining industry is little developed. There are 153 miles of railroads, besides 255 of private lines on large estates. In 1920,714 ships, with tonnage of 957,826 , entered the ports. The population is a race of mixed European, African and Indian blood. Spanish is spoken. The religion of the State is Roman Catholic, but religious toleration prevails. Education is free and compuisory, and great advance in methods of Instruction has been made by the Military Government. The Dominican Republic is not a member of the League of Nations.

Continual internal disturbances from the "war of the restoration" (1863-65 to "1904), left the Dominican Republic under a crushing debt of \(\$ 32\),000,000. Her annual revenues werc about \(\$ 1\),850,000 , and her anuual expenditures \(\$ 3,900,000\). Rumors werc rife that European nations would intcrvene to colicet debts due their citizens. To forestall armed and indefinite intervention Secretary of State John Hay, in February, 1905, negotiated a protocol with thi rcpublic, which provided that the United States should adjust hor debts and administer her custom house receipts. Because a clause in the convention was interpreted as establishing a protectoratc, the United States Scuate refused to ratify the treaty. President

\section*{602} Foreign Countries-Dominica; Ecuador; Egypt.

Roosevelt, however, made an executive arrangement with the President oi the bankrupt republic essentially on these lines, and on April 1, 1905, put that modus vivendi into force, and placed an agent of the United States in charge of her fiscal administration. Marked improvement followed; her debt was adjusted and credit restored.
A treaty was signed on Feb. 8, 1907, which provided that the United States Government should for fifty years administer the customs of the Dominican Republic for the service of her debt, practically a receivership. Eight years of honest administration reduced the total debt to \(\$ 21,500,000\)

It was inevitable that the administration of the finances of the Dominican Republic by the United States could not proceed without friction and interference with the government of that country. Political troubles and serious disturbances followed, to suppress which the Dominican officials incurred fresh debts without the approval of the United States, which demanded a supplementary convention be arranged. The Dominicans refused to consent. A coup d'etat by Arias, deposing President Jimenez in April, 1916, was followed by disorders. The United States landed a detachment of marines and suppressed the insurrectionists; and on Nov. 29, 1916, Capt. Knapp, U. S. N., issued a proclamation announcing that the Dominican Republic was under the military administration of the United States, and declaring that his Government did not intend to destroy the sovereignty of the republic, but wished to enable her to restore internal order so that she might observe her international obiligations.

A Dominican commission, headed by Provisional President Henriques Carvaljal, in 1919 visited Paris and later Washington, seeking the restoration of individual liberty in the republic. Acting under orders from Washington, the Governor, Admiral Snowden, issued a proclamation outlining the plan of the United States Government for the conditional withdrawal of its military forces, the transfer of administrative responsibiiity to a native government duly elected, and the continuance of the fiscal arrangements of 1907 enlarged so as to include arrangements for a new loan
Rear Admiral Samuel S. Robison, U. S. N.. Who has been Military Governor of the Dominican Republic, installed on Oct. 21, 1922, a provisional government as printed above, for the purpose of promulgating legislation, to regulate the holding of elections and to provide for the reorganizing of the provisional and municipal governments. This foliowed the plan for ultimate evacuation by the American force of occupation, which had been tentatively agreed upon in Washington June 30, 1922, by the Government of the United States and a commission headed by Dr. Adolfo A. Nouel. United States Commissioner Sumner Welles will report on political conditions preliminary to an agreement for the withdrawal of the American Marincs who have now been concentrated in two or three points and have turned over the maintenance of peace and order to the Dominican police. The treaty of 1907 authorized the issue of \(\$ 20,000,0005\) per cent. bonds secured by a first lien on the customs revenues. Of this issue on July 31, 1920, there remained an unsettled balance of \(\$ 10,207,029\). Of -a further issue of \(\$ 4,161,300\), made under authority of Aug. 2, 1918, to settle claims arising before the establishment of the military government there was on July 31, 1920, an unsettled balance of \(\$ 2,893,757\), making a total bonded debt of \(\$ 13,100.786\). Customs collections for the calendar year 1920 amounted to \(\$ 7,577,244\). Par of exchange, peso,

\section*{ECUADOR, REPUBLIC OF.}

AREA, estimated, 276,000 square miles.

\section*{POPULATION, about \(1,500,000\).}

CAPITAL, Quito, pop., 70,000 ; chief port, Guayaquil; population, estimated, 100,000 .
President, Sr. Dr. Don Jose Luis Tamayo (192024), inaugurated Sept. 1, 1920.

Premier, Gen. Delfin B. Trevino (Interior and Public Works)
Minister to the United States, Sr. Dr. Don Rafael H. Elizalde.

Consuls General, at New York, Gustavo R. de Ycaza; at San Francisco, Manuel Cobeza de

Vaca. Consuls, at Philadelphia, Luis A. Mata; at Ncw Orleans, Ismael Aviles Mejia; at Chicago, vacant.
United Siates Minister, Gerhard A. Boding.
United States Consul General, at Guayaquil, Frederic W. Goding.

Ecuador, on the Pacific coast of South America, extends from about 100 miles north of the Equator to 400 miles south of it. It is larger than Texas by 10,000 square miles. It is bounded by Colombia on the north and Peru on the south. The boundary in the east is in dispute, much territory being claimed by each of these three countries. Two cordillera of the Andes cross the country, with a dozen peaks above 16,000 feet in height, of which chimborazo (alt 20,702 feet) and Cotopaxi ( 19,498 feet) are the highest.

Mining has been but little developed, though the country is known to be rich in minerals. Most of the land is covered with virgin forest. Rubber abounds in the upper reaches of the Amazon in the disputed eastern territory. Panama hats are manufactured, cocoa, ivory nuts, coffee, hats, hides and rubber are the chief exports. Textiles, foodstuffs, machinery and clothing are the chief imports.

Guayaquil, the seaport, was long a hotbed of yellow fever. After a survey made by the Rockefeller Foundation in 1916, a scientific fight was made under the direction of Gen. Gorgas and May 27, 1920, the Director General of Public Heaith announced that the disease had been stamped out. Guayaquil is connected with Quito by a railroad ( 280 miles), a two-day journey. In all, Ecuador has 413 miles of railroads.

Ecuador's independence dates from the Battle of Pichincha, May 29, 1822, but its history has been stormy even for a Latin-American republic. It is estimated that three-fourths of its population are Indians, one-fifth mixed and only a small fraction white. Education is very backward. Only aduits who can read and write can vote. The Constitution now in force was promulgated Dec. 28, 1906, and provides for a President, elected by popular vote for four years, a Senate of 32 members, elected for four years and a House of 48 members, elected for two years.
Ecuador has not joined the League of Nations.

AREA, estimated, about 360,000 , exclusive of the Soudan (which see). Cultivable land area, 12,226 square miles; Sinai desert, 11,200; Libyan and Arabian deserts, 340,000 .
POPULATION, estimated, 1921, 13,387,000.
CAPITAL, Cairo, pop. census of 1917, 790,939; other cities, Alexandria, pop. 444,617; Port Said and Ismailia, 91,090; Suez, 30,996; Damietta, 30,984; Tanta, 74,195; Assiut, 51,431; and thirteen others between 20,000 and 50,000 .
King, Fuad I., born March 26, 1868, son of the late Khedive Ismail Pasha, succeeded his brother Hussein Kamil on his death as Sultan Oct. 9, 1917, proclaimed King March 16, 1922, on termination of British protectorate and recognition of the independence of Egypt. He married Princess Nazii, May 24, 1919.
Heir, his son Prince Farik, born Feb. 11, 1920.
Premier, Abdel Khalek Sarwat Pasha (Interior and Foreign Affairs).
British High Commissioner for Egypt and the Soudan, Field Marshal Viscount Allenby.
United States Minister and Consul Generab, at Cairo, J. Morton Howell.

United States Consuls, at Alexandria, Lester Maynard; at Port Said, Coet du Bois.
Egypt occupies the northeast corner of Africa with the Mediterranean Sea on the north and the Red Sea on the east. Beyond that between the Gulf of Suez and the Canal and the Gulf of Akabahlies the Sinai peninsula, 150 miles long, flat and sandy, on the north, like the Egyptian coast line, but with granitic mountains rislng to an altitude or 8.680 feet in the southern third. Along the west coast of the Red Sea is the Eastern or Arabian
(highest altitude 7,150 feet) reaching to Abyssinla On the south ls the Sjudan, the parallel of the \(22^{\circ}\) north latitude forming the boundary. To the west is the vast Libyan desert, whlch begins a few Giza, of which the great pyramid is 451 feet high, and the Sphlnx. This desert stretches to Tripoli, a vast monotonous limestone plateau with a few depressions where wells and springs furnish water to lrrigate small arcas. These oase ~upport a population of several thousands. Egypt is about the slze of Arlzona, New Mexlco and Colorado, but its fertile territory is about the size of Massachusetts and Connectlcut.

The Valley of the Nlle and the delta are the real Egypt of sixty centuries. Here are 12,226 square miles of cultivated area; 1,900 square miles tlons, etc., and 2,850 by the surface of the Nile, its marshes and lakes. The great river runs between sandstone cliffs from Halfa to Esna, with a stretch of granite near Aswan, Where the valley narrows to half a mile, and limestone from there through Luxor to Calro, the valley widening to over 10 miles. The fertile lands occupy the floor of the valley between the river and the cliffs and north of Cairo they spread out in siltcreated delta, forming the richest soil of the country. The Nile has a total length of 3,470 miles from the Victoria Nyanza to the Mediterranean. In the 960 mlles of its course through Egypt lt recelves no tributary stream. The river has a regular yearly rise and fall, attaining its maximum the end of May. The average rise at Cairo is 13 feet. The great dam at Aswan (or Assouan), completed Dec. 10, 1902, and since then raised in helght, stores up the surplus water and regulates its flow, a task shared by smaller barrages at Esna, Assiut, Zlita and at the head of the delta. Irrigating canais distribute the silt-laden water to the flelds. Slxty miles south of Cairo to the west of the river is the fertile province of Fayum, with an area of 500 square mlles, watered by the canal Bahr Yusef (built by Joseph, the son of Jacob), over 100 miles long, whlch takes its water from the river at Deirut.

The Nile irrigates \(5,400,000\) acres and this number may be increased to \(7,600.000\) by englncering improvements. King Mena (clrea 4000 B. C.) is credlted with being the founder of the first scientific system of usling the water of the Nile for irrlgation purposes, and that plan, the basin system, is still used for all the land south of Deirut in Upper Egypt.

By this system the land is divided into rectangular areas from 5,000 to 50,000 acres in slze and surrounded by banks; water is admitted to these basins durlng the flood period (August) to an average depth of 3 feet and is left on the land for about forty days; it is then run off and the seed sown broadcast on the uncovered land. A system of perennial irrigation by digging dcep canals was introduced in 1820 by Mohammed Ali Pasha, whlch was restored and greatly improved during the Brltish occupation. Two million acres of cultivable land were added and under the basin system, cereals, beans and lentils are grown; under the new perennial system cotton, cereals, beans, sugar cane, vegetabies and fruit are the chief crops. Two and threc crops a ycar are grown. The yield of cotton in 1920-21 was \(597,515,391\) pounds, the exports for the year 1920 being 396.345 .306 pounds, valued at 75,096,026 Egyptian pounds ( \(\$ 260,345,306\) at par of exchange, the Egyptian pound equals \(\$ 4.94)\). The amount of acres under cotton in 1921 was \(1,341,096\).

The agricultural population (Fellaheen) forms about 62 per cent. of the whole, a large proportlon of them ( \(1,709,983\) in 1920 ) being small number of land owners \(\ln 1920\) was \(1 ; 866,761\), of whlch only 7,016 were forelgners. In 1920 the anount of sugar exported was 13,795 tons.

Petroleum has becn found in both the Arablan desert west of the Red Sea, and on the Mt. Slnal peninsula. To what extent, however, no announceinent has been made. Drliling is golng on. The reports for 1919 showed a production of 224,300 metric tons; 49,000 metric tons of manganese lron ore was produccd that year, also 29,000 tons of pliosphate rock.

The chief imports are textiles and yarns, machinery and hardware, tobacco (none is allowed to be raised in Egypt), chemicals and pcrfumes, coal, oli, cereals and animal food products and leather.

Egypt, on March 31, 1921, had 2,311 miles of rallroads owned and operated by the statc, and 721 mlles of ligint agriculturai railroads owned by prlvate companies, mostly in the deita. Calro was connected by railroad with the lialestine systeni by the opening of the swlng bridge over the Suez Canal. The first train left Jerusalem for Cairo on June 15. 1918. This brldge was removed f11 1921 and is
to be replaced by a tunnel. Passengers on the through train from Calro to Jerusalem, "The Mllk and Honey Express," now break their journey at Kantara to walk across a floating brldge. The Cape-to-Cairo llne is nearly flnlshed.

Commercial steamers entering Egyptian ports of Alexandria \(\ln 1920\) numbered 1,242, wlth a tonnage of \(2,527,436\). Commercial steamers passlng through the Suez Canal ( 103 miles long) In 1920 numbered 3,804 of \(16,892.244\) net tonnage; also 204 Government vesscls, of 678,197 net tonnage (of these 144 were Britlsh of 521,118 net tonnage). (For Sucz Canal statistics see page 722)

Four-fllths of the people are of the ancient Egyptian stock, whose forbears by their labor built the pyramids for alien Kings, and whose physleal characteristics were pictured in the mural palntings of the temples and tombs and on the papyrus scrolls six thousand years ago. The Copts embraced Christianity in the first century of the Christlan era, and hold the orthodox Patriarch of Alexandria as the successor of St. Mark. They numbered 854,778 in 1917. There are 155,168 Chrlstians of other sects, and 59,581 Jews. The far larger part of that anclent stock embraced Mohammedanism on the conquest in the seventh century, and speak Arable to-day. With the 32,663 Bedouins and 107,360 Soudancse and Berberins (of whom one-seventh are nomads), and in cluding also some Nubians, the Mohammedans numbered in 1917 11,658,148. They have a famous seat of Moslem learning in the University at El-Azhar, in Cairo. founded in 972 In 1914 It had 405 professors and 9,749 students and affillated with it were the Mosque of El-Ahmed at Tanta with 2,860 students, the Mosque of Damictta with 411, and the Meshia Khat Olama at Alexandria wlth 1,854. However, the percentage of illiteracy shown by the census of 1917 was 92 per cent. The Ministry of Education has under Its direct management 209 schools of all grades with 40,471 pupils. The Maktah schools care for about 200,000

By the census of 1917 the foreign residents numbered 209,998 , of whom 30,796 were Turks, 56,735 Greeks, 40,198 Italians, 24,356 British, and 21,270 French and Tunistans.

During the forty-two years of British rule the population has doubled (census of \(1882,6,831,131\) ) The irrigation system has been enormously improved and another great dam is being built far up in the Blue Nile to impound water. In the last seven years land has trebled in value. Motor trucks crowd camels from historic caravan trails. "Egypt," says one writer, "waxed fat off the World War It is said that England paid out over a billion dollars in Egypt for foodstuffs, camels, mules and supplies for use of her armies in the Middle East." "Tourlst travel up the Nile to the great monuments of ancient Egyptian civilization, interrupted by the war, is heavier than ever.

The present King of Egypt is the eighth of the line founded by Mohammed Ali, who was appointed Governor (Vall) of Egypt by the Sultan of Turkey in 1805 , made himself absolute master of the country, and became hereditary Governor by force of arms in 1811. Under the rule of Khedive Ismai revenues were wasted and debts were heaped up until bankruptcy resulted. Great Britain and France In 1879 assumed dual control, forced Ismall (18631879) to abdicate and appolnted his son Tewfik (1879-92) to succeed hlm. Reforms were institutcd. In 1882 Arabi Pasha headed a military revolt, which was quelled by a British expedition, the French Government deciining to intervene The dual control was abolished by decree Jan 18, 1883, and Great Britain carried on alone, the expcditlonary force remaining as an army of occupation, Egypt being technically a semi-inde-
pendent tributary state of the Ottoman Empire.

In January, 1884, Major Slr Evely'n Baring (created, 1901, Earl of Cromer), who had served as Comptroller-General, was made Britlsh Agent and Consul Gencral, a posltlon which he filled with extraordinary ability until he retired in 1907. He was succeedcd by Sir John Gorst, and on the latter's death Lord Kitchener filled the post. Thls perlod of British occupation lasted until the World War broke out. The Khedlve Abbas II. was absent and declared himself for Turkcy. He was deposed and his brother, Hussein Kamli Pasha, made Khedive. With a Turkish army headed for Gaza, on Nov. 18, 1914, Great Britaln declared a protectorate over Egypt, which was therefore taken from the suzeralnty of Turkey, and Husscln assumed the title of Sultan. In the unrest following the war disturbances were many and serious. Great Britaln following a promise of an lncreased measure of self-government. sent a commission under Lord Milner there in December, 1919, to investigate the re forms needed and the demands of the Nationalists for complete Independence. Much negotlatlon followed. in whicli the Higli Commissionor. Lord

Allenby (appolnted October, 1919), took a promlnent part, and to hlm is due the credit for effecting the peaceful arrangements announced by Premier Lloyd George in the House of Commons on Feb. 28, 1922, whereby the British protectorate was abolished. The British Government reserved to its dlscretlon four subjects: Safety of the Brltish Empire's communlcations; defense of Egypt agalnst foreign aggression, direct or indirect; protection of forelgn interests in Egypt and of minorities; and guarantees for British interests in the Soudan. The House sustained this policy later by a vote of 202 to 70. A promise was made that martial law would be withdrawn as soon as the Egyptian Government passed an act of indemnity.

On March 27 Marquis Curzon, the British Forelgn Secretary, sent despatches to all Brltlsh Ambas sadors saying that the termination of the protectorate involved no change in Egypt's status toward other powers, and the British Government would regard as unfriendly any attempted interference in the affairs of Egypt by another power, and would repel any aggression upon Egyptian territory

Sarwat Pasha formed a Cabinet on March 1 , and Fuad was proclaimed King on March 16 . The United States recognized the new Government on April 27, but decllned to accept the abolitlon of the capitulation, and made this refusal a condition of recognitlon. Dr. J. Morton Howell, the Consul-General, was made Minister to the new court on June 19. Drafting a constitution has been proceeding slowly by a Government Commission headed by Rushdi Pasha, a former Prime Mlnister. The preliminary draft incorporates the Soudan in Egyptian territory. (See Soudan following). Disturbances continued throughout the summer

The debt which has been handled by Caisse de la Dette, a body representing the creditors of the Treasury, was as follows on April 1, 1921: Guaranteed loan, 3 per cent Privileged debt, \(33 / 2\) per cent Unified debt, 4 per cent

31, 127,780
55,971,960
Total.
£92,971,740
The receipts and expenditures in the fiscal year 1920-21 were: Receipts, \(£ E 46,446,921\); expenditures, £E62,051,182. The budget for 1921-22 estimates receipts of \(£ E 38,682,000\), with expenditures to balance.

Imports and exports for 1921, exclusive of reexports of \(£ \mathrm{E} 6,527,894\), and transit trade of \(£ E 7,-\) 473,616, were:
Imports.
£E55,507,984
Exports
£E36,356,062
Trade with the United States was:

\section*{ESTHONIA, REPUBLIC OF:}

AREA, 18,000 square milcs.
POPULATION, \(1,250,000 ; 95\) per cent. native.
CAPITAL, Reval; population, 120,000.
State Head, Konstantin Pates.
President of the State Assembly, John Kukk.
Consul at New York, Hans Leoke (acting).
United States Minister, Frederick W. B. Coleman, also accredited to Latvia and Lithuania.
United States Consul, at Reval, Charles H. Albrecht. Esthonia, formerly under the Russian Emplre, known as the Government of Estland, is sltuate on the Gulf of Finland, with Russia on the east, Latvia and the Gulf of Rlga on the south, and the Baltlc Sea on the west. It is about the size of the States of Vermont and New Hampshlre.

Of its \(11,520,000\) acres about \(1,300,000\) are devoted to agrlculture, and 1921 production was: rye, 95,747 tons; balley, 58,400 ; oats, 76,465 ; flax, seed 4,700; fibre, 5,077; potatoes, 570,000; and wheat, 7,370.

Forests cover \(1,995,000\) acres, and \(\ln 1920\) there were 164,502 horses, 442,668 cattle, 530,291 sheep and goats, and 260,695 swlne.

Esthonia declared her independence Feb. 24, 1918, after the Bolshevist coup d'etat. The republic, on June 15, 1920, adopted its Constitutlon by which power is vested in the Legislative Assembly of 100 members, chosen for three years wlth proportional representatlon by unlversal direct equal suffrage. The inltlative and referendum to the people is an important feature. The State Head and Ministers are chojen by the Assembly and are responsible to it.

Esthonia appears to have settled down to production, with no boundary or other disputes to dlsturb it. The productlon of more than 800,000 tons of food, with some auxlliary wealth coming Irom the beginnlngs of industry, classes Esthonia as self-supporting.

While Esthonla was adjusting herself to the new
reglme many American Esthonians went there to assist as well as to Paris, to contribute money and personal effort to the new republic

Esthonia is a member of the Ieague of Nations.
There is no state religion, and 80 per cent. of the people are Lutherans. In 1919, illiterates above 10 years of age numbered 3 per cent.

Trade with the United States in the fiscal year 1921-22 was: imports, \(\$ 5,064 ; 091\); exports, \(\$ 494,355\).

\section*{FAR EASTERN REPUBLIC.}
(See under Russia.)

\section*{FINLAND, REPUBLIC OF.}

AREA, 125,689 square miles.
POPULATION, 3,241,000.
CAPITAL, Helslngfors; population, 188,922; other chief cities, Turku, 59,914; Tampere, 46,819; Vilpuri, 30,039; and five others with more than 10,000.

\section*{President, Dr. Kaarlo Juho Stahlberg}

Minister to the United States, Axel Leonard Astrom. Consul General in the United States, at New York, Vice Consuls at Boston, Ashtabula Harbor, O.; Calumet, Du uth, Seattle, Portland, and San Francisco.
United States Consul, at Helslngfors, Leslie A. Davis.
Finland, formerly an autonomous Grand Duchy of the Russlan Empire, is bounded on the north by Norway, a narrow strip of land separating it from the Arctic Ocean, on the east by Russla, on the south by the Gulf of Finland, an arm of the Baltic Sea, and on the west by the Gulf of Bothnia, Sweden, and Norway. In territory it is as large as New England, New York and New Jersey.

Although extending far north into very cold, latitudes, with rugged climate and topography Finland has developed conslderable agriculture, with 284,000 farms, of which about 130,000 are of less than 30 acres, producing \(n 1919,8,465,000\) bushels of rye, \(4,578,060\) of barley, \(19,105,000\) of oats, \(19,531,000\) of potatoes, hay, \(2,105,000\) tons, and 951 tons of flax and hemp. Butter production was about \(330,000,000\) pounds, butter belng a chief articlc of export. Cattle, \(1,100,486\); sheep and goats, 827,791 ; pigs, 110,993 , and horses, 273,271 , add to the wealth.

Figures for 1918 show a total of \(1,458,000,000\) marks factory output, iron and machinery with \(254,000,000\), and textiles with \(260,000,000\) leading.

Forests cover more than half the total area, and produced \(140,000,000\) marks, paper with \(200,000,000\) marks, coming largely from the forests. Leather was important, with \(167,000,000\) marks.

There were 4,098 large factories employlng 82,471 persons, and 8.5 per cent. of the total area was in agriculture.

The Evangelical Lutheran Church ls the state religion, although there is absolutely free worship. All but 2 per cent. of the people are Lutherans.

Two universitles have 2,700 students, and about 33,000 are in other schools. There were, in December, 1920, 2,685 miles of railroads, all but 186 being owned by the state. Canal transportation is highly developed

Finland, after the downfall of the Czar, had representative government restored to her by the Provisional Government. Following the Bolshevist coup d'etat the Dlet and Senate on Dec. 6, 1917, proclaimed the independence of the republlc. Civil war between the "Reds" and "Whites" followed, with German interventlon. The "Reds" were defeated and driven back into Russla in two battles at the end of April, 1918, and the German troops went home in Dccember of that year. On July 17, 1919, the Finnlsh Diet resolved to establish a republic, and a peace treaty acknowledglng the independence of Finland was signed wlth Russia at Dorpat, Oct. 14, 1920.

Finland is governed under the constitutional law of 1906, by a Legislative Chamber of 200 members elected directly on a proportional representative basis. Men and women of 24 years of age have the suffrage. The Presldent is chosen for slx years by direct vote and appoints the Cabinet.

A dispute with Sweden over the Aland Islands arose and became acute. By mutual agreement it was referrcd to the League of Natlons, of which both are members, and its adjudlcation was accepted•by both nations, marking the flrst success of the League in averting war

The Finnish mark ls . 193 at par of exchange. Rate of exchange Nov. 1,1922 , was .025 .

In 1921, imports were 3,583,000,000 Finnlsh marks, and exports, \(3,385,000,000\) Finnlsh marks, an almost ldeal economic balance of trade. Of the 1921 imports about one-third came from Great Britain, and less than 10 per cent. from the United States; Great

Britain sending a third of the imports, and the United States nearly 20 per cent.

Trade with the United States was:
Imports, 1920-21
\(1921-22\)
\(1920-21\)
\$11,969,036
8,5550,155
7,353,681
5,226,130

\section*{FIUME, FREE STATE OF.}

AREA, 11 square miles.
POPULATION, 1921, 53,000.
United States Consul, Wiibur Kebiinger.
The Free State of Flume, a former Austrian port on the Adriatic Sea, on the eastern side of the Istrian peninsula, was created by Italy and JugoSlavia by the Treaty of Rapallo, Nov. 12, 1920 Each recognizes its independence in perpetuily. Equai rights to the port are guaranteed to all three. The clty is Jugo-Slavia's outlet to the sea and is connected by raii with the hinterland.

The suburb of Susak to the east, separated by a narrow stream, remains a part of Jugo-Siavia.

A Government was set up with President Zanella at the head, and an elected Assembly, but in February the city became the scene of much Fascisti violence, and on the March 3, the Government was forcibly ousted from the palace after severe fightlng by the Fasclstl. led by. Deputy Giunta, who deciared that the National Committee of Defense had assumed full power. This committee, while Italian carabineers were maintaining order, asked the Italian Government to take over the administration.

President Zanella and 49 other members (a twothirds majority) of the Fiume Constituent Assembly took refuge in Jugo-slavia. The Government sent Lieut. Cabruna, who took charge of the eity with his troops and organized a provisional government, which was later turned over to Col. Marra. Efforts to arrange the situation diplomatically had no achieved results by Nov. 12, 1922.

\section*{FRANCE, REPUBLIC OF.}

AREA, pre-war, 207,054 square miles; present area, inciuding Alsace-Lorraine (5,605), 212,659 square miles. This included the Island of Corsica, 3,367 square miles.
POPULATION, census, March, 1921, 39,209,766, to which should be added 192,973, military, naval forces and seamen abroad. Grand total, 39,402,739.
CAPITAL, Paris, population, census 1921, 2,906,471; clties above 100,000: Marseilles, 586,341; Lyon, 561,592; Bordeaux, 267,409; Lille, 200,952; Nantes, 183,704: Toulouse, 175,434; St. Etienne, 167,967; Strasbourg, 166,767; Nice, 155,839; Le Havre, 163,374; Rouen, 123,712; Roubaix, 113,265; Nalley, 113,226; Toulon, 106,331; there are 33 clties in addition having a population exceeding 50,000 .
President, Alexandre Millerand, born Feb. 10, 1859; eleeted Sept. 23, 1920.
Premier, Raymond Poincare (Foreign Affairs).
Ambassador to the United States, J. J. Jusserand, appointed Feb. 7, 1903 (Dean of the Diplomatic Corps at Washington).
Consuls General in the United States, at New York, Gaston Ernest Liebert; at New Orleans, Charles L. C. M. P. Barret; at San Francisco, Hippolyte Charles Julien Neltner. Consuls, at Chicago, Antonin Barthe'lenry; at Philadelphia, Maurice E. A. Paillord (V. C.). There are consular agents at twenty-seven other eities.
Uniled States Ambassador, Myron T. Herrick.
United States Consuls General, at Paris, Alexander M. Thackara; at Havre, Augustus E. Ingram. Consuls, at Bordeaux, Theodore Jaeckel; at Brest, Herbert O. Williams; at Calais, Thomas D. Davis; at Cherbourg, Charles C. Broy; at DunKirk, John S. Caivert; at La Rochelle, William W. Brunswick; at Lille, Hugh H. Watson; at Limoges, Eugene L. Belisle; at Lyon, vacant; at Marseilles, Nesley Frost; at Nancy, Paul His A. Glazcbrook; at Rouen, Milton B. Kirk; at St. Etienne, Wiillam H. Hunt; at Strasbourg, Wiiilam J. Pike; at Algiers, Edward A. Dow; at Guadeioupe, W. I., Shelby F. Strother; at Marlinique, W. I., Thomas R. Wallace; at Salgon, Frencil IndoCinna, Leland L. Smith: at Tahiti, society Lslands, Howard F. Withey; at Tananarivo, Madagascar, James G. Carter; at Tunls, Tunis, Harris N. Cookinghem.
France, a republic in Weatern Europe, is siightly sinaller in area than a group of flve Middle West States-Iilinols. Indiana. Olso, Kentucky and Ten-
nessee. Belgium and Luxemburg are its neighbors on the north. On the east Germany iles beyond the Rhine, the boundary; the Jura Mountains and Lake Geneva separate it from Switzerland and the Graian Alps and the Maritime Alps from Italy. On the south is the Mediterranean Sea, and Spain with the crest of the Pyrenees for the boundary line. On the west lies the Bay of Biscay and the North Atlantic Ocean and on the north again the English Channel and the Straits of Dover separate it from England From north to south its length is about 600 miles, and from the western extremity near Brast to Strasbourg on the Rhine it is about 560 miles wide. The coastline on the north is 700 miles iong; aiong the Atlantic and the Bay of Biscay, 865; on the Mediterrancan 384 miies.

In the French Aips it has the highest mountain in Eurore, Mont Blanc (alt. 15,781 ft.). On the French side of the Pyrences are several peaks of over 10,000 feet in height. Forming the western border of the Rhone valley rise the Cevennes, highest point being Mont Lozere (alt. \(5,584 \mathrm{ft}\).\() . The\) Massif Central continues north as the mountains of Auvergne, where the Plomb du Cantal attains a height of 6,096 fect to the Cote d'Or containing Puy de Sancy (alt. \(6,188 \mathrm{ft}\).). Further north are the Vosges, which run parallel with the Rhine; their crest formed the boundary iine between France and Alsace. Thence the wooded highlands of the Argonne and the Ardennes bear off to the frontier. The western and northwestern part of France consists of fertile plains save for the hills of Normandy and the picturesque clifís of Brittany.

On the North Sea and the Channei are the seaports of Dunkirk, Calais and Boulognc, with the great port of Havre at the mouth of the Seine, and Cherbourg between Cape Hague and Cape Barfleur. In the extreme northwestern projection, sheltered by Cape St. Mathieu, is the roadstead of Brest, the great navai station. Further down the coast is Lorient, St. Nazaire, at the mouth of the Loire, with Nantes further up the river, Rochefort and La Rochelle. Up the estuary of tine Garonne is the important port of Bordeaux, fourth city of the republic; and at the mouth of the Adour, in the extreme southwest corner, is Bayonne with its neighboring seaside resort of Biarritz. On the Mediterranean coast, which on the west is low, with lagoons and sand dunes, there is no great port till the mouths of the Rhone are passed and Marseilles, the second city of the country, is reached. Beyond lis the great naval base, Toulon, and from there by Nice and Monaco to the Italian frontier and beyond runs the beautiful Riviera-the cote d'Azure.

\section*{USE OF RIVERS.}

France has four important rivers, tle seinc, the Lolre, the Garonne and the Rhone, the left bank of the Rhine from Basle, Switzerland, to Lauterbourg, and a dozen others, some with new fame from World War battles, but all of great value because of canaiization, which binds them together. The waterways total 7,543 miles in length, of which canals cover 3,031. They, are the property of the state and are tree from tolls. The system was of the greatest utility in the north and northeast and suffered great damage during the war but is now almost entireiy restored. The principal canals arc:
Est (uniting Meuse with Moselle and Saone) . Miles. 270
From Nantes to Brest. . . . . . . . . . . . . . . 225
From Nantes to Brest.
Berry (uniting Monticon witir the canalized Cher and the Loire canal)

163
Midi (Toulouse to Mediterranean via Beziers).. 175
Burgundy (uniting the Yonne and Saone)...... 151
Lateral canal of Loire. ........................ 137
From Marne to Rhine (on French territory).... 131
Lateral canal of Garonne. . . . . . . . . . . . . . . . . . . 133
Rhone to Rhine (on French territory) . . . . . . . . . 119
Nivernais (uniting Loire and Yonne). . . . . . . . . . . 111
Canal de la Somme
Centre (uniting Saone and Loire)
Canal de l'Ourca.
. . . . . . . .. . . . . ...... . 67
Ardennes (uniting Aisne and Canal de l'Est).
From Rhone to Cette.
Canal de ia Haute Marne 60
St. Quentin (uniting Scheldt with Somme and
Olse).
58
The Seine is navigabie for 339 miles, of which 293 miles is first-class navigabillty, glving Rouen acceas to the sea. The Alane is navigable for 37 the Marne 114; the Saone 234; all first-class. The Olse is navigabie for 99 ( 65 first-class) ; the Rhone 309 (30 first-class) ; the Loire 452 (35 nist-class) ; the Garonne 289 ( 96 nrst-class) ; and the Dordogne 167 (26 first-class). Tho river traffic in normal times is \(42,000,000\) tolls a year.

A programmo was adopted in 1919 for the extension and improvement of the canal system. There is in procetis of working out a project for a interal canal along the Rhlne from sitrasbourg to

Huningue, near Basle, Switzerland, which will provide for the very heavy river traffic up to Basle and will furnish much hydro-electric power as well. It is proposed to give this canal a breadth of over 86 metres and a depth of between 6 and 7 metres, dimensions not much below those of the Panama Canal, with locks \(25 \times 170\) metres. This would accommodate in 300 days of 12 hours 1,800 strings of barges, each with a capacity of between 2,000 and 2,400 tons yearly, a total of between \(3,600,000\) and \(4,300,000\) tons. Night traffic would double this figure.

France has six great railway systems constructed under various concessions which expire at various dates from 1950 to 1960 , when they revert to the state. They represent an instalment cost of 25 ,\(000,000,000\) francs. The deficit in 1920 is estimated as not less than \(3,300,000,000\) francs. These lines with their mileage in 1919 are:

Of the main lines, 1,030 miles were destroyed in the war. All had been rebuilt by May 1, 1921; of local lines 1,490 miles were destroyed and 1,262 miles had been rebuilt.

In addition, there were in 1919 the Paris belt line, 20 miles; the Grand belt line, 78 miles; secondary lines, 839 miles; and non-concessionary roads, 20 miles; and 1,083 miles in Alsace-Lorraine, making a grand total of 26.250 miles.
There entcred French ports in 192122,920 vessels of \(27,298,555\) tons register, of which 7,776 vessels of \(8,595,738\) tons were French

\section*{ALSACE-LORRAINE REDEEMED.}

Alsace-Lorraine had been taken from France after the Franco-Prussian War by the Treaty of Frankfurt, May 10, 1871. The reason had been briefly given by Bismarck cight days betore, saying: "We could do nothing but take these territories with their powerful fortresses within the framework of Germany, so as to make of them a glacis of Germany against France." The solemn protest which the Dcputies of the provinces made then at Bordeaux against separation from France never was stilled. As the "Reichsland" Germany governed the country under a system of dictatorship until 1902, when its weight was lightened. A Constitution was granted in 1911, but it failed to satisfy. By the Treaty of Versailles, June 29, 1919, the provinces were transferred back to France as of Nov. 11, 1918. The day after the armistice the Parliament of Alsace-Loraine, elected by universal suffrage in 1911, had declared itself a National Assembly and greeted with joy the return to France as a "constant and unalterable desire" and an "inviolable right." The entire unanimity of people and parties was brought out in the general elections of Nov. 16, 1919.
Germany, during her occupation of 48 years, had introduced her own administrative methods and laws. France set a High Commission, assisted by a Consultive Council, at work at Strasburg to administer the provinces. The present General Commissioner is M. Gabriel Alapetite, who succeeded M. Millerand in January, 1920. The law of Oct. 17, 1919, maintains in force the legislative arrangements and local regulations until French laws can effectively replace them. The Concordat therefore remains; also denominational schools.
As before 1871, the departments now are BasRhin (lower Alsace, capital Strasbourg), HautRhin (upper Alsace, capital Colmar), and the Moselle (Lorraine, capital Metz). The territory restored to France and its population by the census of 1921 was Lower Alsace (again the Department Bas-Rhin), 1,848 square miles, population 651,586 ; Upper Alsace (Haut-Rhin), 1,354 square miles, population 468,943; and Lorraine (the Moselle), population 468 square miles, population 589,120 ; total, 5,605 square miles; population 1,709,649. By the German census of 1910 the population was \(1,874,014\); of these the Germans and Austro-Hungarians domiciled there were 301,764 . After the war, up to April, 1921, German citizens had left to the number of 76,467. Alsace-Lorraine lost 45,000 men in the war. The pre-war religious figures were: Catholic, 1,428,343; Protestants, 408,274 ; Jews, 30,483 .
Alsace has rich potash fields, discovered in 1904, which gave Germany a monopoly of this product. The output under French hands for 1919 was 512,000 tons, and in 1920 1,222,609. An annual yield of five to six million tons is expected soon. Pctroleum output near Woerth is about 50,000 tons a year, and up to 1921 the total yield was 900,000 tons,
with over five million tons estimated to be available. The state acquired these deposits in 1921 and turned them over to a private company for exploitation. Lorraine is rich in iron and coal. The output of each rcached its maximum in 1913, with 21,133,676 tons of iron and \(3,795,262\) tons of coal. - The 1920 production was \(8,074,989\) tons.
France is now the largest European producer of iron ore.
The exclusive rights of exploitation of the coal mines in the Saar Valley were given to France by the Treaty of Versailles as a compensation for the destruction of the.coal mines in the north of France. The Saar Valley lies north of Lorraine and contains about 751 square miles and 657.870 population. For 15 years it is to be governed by a commission of five, appointed yearly by the League of Nations. At the end of the period a plebiscite will decide whether it will have a continuance of that rule in a semi-autonomous form, union with France, or union with Germany. Free trade with Germany is assured the district until Jan. 10, 1925. France bccomes the sole owner of all the fields and mining concessions and the value of the mines thus ceded were credited to Germany in the reparation account. The average pre-war production of the basin was \(12,000,000\) tons a year. The output in 1920 was \(9,410,433\) tons.
Metallurgical industry is highly developed also, there being thirty-one furnaces and steel plants.

FOREIGN TRADE.
The foreign trade of France for 1921 as compared with 1920 and 1913, the last year before the war, is as follows:

IMPORTS.
\(1921 . .\).
\(1920 .\).
1913. .

\hline 1913 & 431,360,000 & 83,252,500 \\
\hline
\end{tabular}

Considerable progress has bcen made in opening up the devastated coal mines, as is shown by the output for 1921, which exceeds that of 1920 by over \(3,500,000\) tons. Total consumption of coal in 1921 was \(6,000,000\) tons less, due to the industrial depression. The figures for production, imports and exports and consumption are:
\[
\begin{array}{lll}
\text { 1921. } & \text { T920. } & 1913 . \\
\text { Tons. } & \text { Tons. } & \text { Tons. }

On merchandise account the excess of imports over exports in 1921 decreased to \(1,995,372,000\) francs, compared with \(23,009,959,000\) francs in 1920
and \(1,541,115,000\) francs in 1913. If the present inflated prices are taken into account the 1921 trade balance was more favorable than the prewar figure of 1913. In pre-war days France usually had an excess of imports on merchandise accounts Which was offset then by income derived from foreign investments.

The import of cereals in 1921 was \(1,660,796\) metric tons, compared with \(3,569,903\) in 1920 and \(2,929,720\) in 1913. The figures for 1921 are the lowest for 10 years, due to an abundant wheat harvest. The imports of meats were indicative of the return of French herds to pre-war conditions. So also that of the beet sugar crop. The figures were:
\begin{tabular}{crrr} 
& \multicolumn{1}{c}{ 1921. } & \multicolumn{1}{c}{ 1920. } & \multicolumn{1}{c}{ 1913. } \\
Imports of MEATS. & \multicolumn{1}{c}{ Tons. } & \multicolumn{1}{c}{ Tons. } & Tons. \\
Fresh and refrigerated. . & 65,260 & 153,246 & 3,189 \\

Preserved, etc. . . . . . . & 5,519 & 14,694 & 3,633
\end{tabular}

\section*{Imports of Sugar}

Sugar
\(341,787 \quad 626,337 \quad 114,957\)
The imports of raw wool, silk, cotton, and copper in 1921 were about one-haif the amount of 1913.

Exports of flsh, fresh and preserved, reached in 1921 record figures for 10 years at 31,362 tons, as did potatoes and dried vegetables, 282,272 tons. Fresh and preserved vegetables and olive oil increased over 1920, though not reaching pre-war figures. Milk, butter and cheese were down even beiow the 1920 figures, being 14,933 tons in 1920 , as compared with 45,981 tons in 1913 . Wine, brandy and liquor exports were:
\begin{tabular}{crrr} 
Exports. & \multicolumn{1}{c}{ 1921. } & 1920. & \multicolumn{1}{c}{1913.} \\
Tons. & Tons. & Tons. \\
Wine. . . . & 207,122 & 215,144 & 190,830 \\
Brandy and spirits. . . . . . & 26,790 & 56,987 & 54,523 \\
Liqueurs. . . . . . . . . . . . & 4,862 & 7,792 & 6,103
\end{tabular}

In the export of some manufactured articles and of iron, steel and pig iron these figures were made in 1921, all but two reaching record figures:
\begin{tabular}{|c|c|c|c|}
\hline EXPORTS. & 1921. & \[
1920 .
\] & Tons. \\
\hline 110n, steel and & & & \\
\hline pig iron. & 2,091,609 & 1,246,717 & 1,008,327 \\
\hline Machinery & 103,077 & 90,571 & 82,309 \\
\hline Tools and metal & 187,867 & 150,877 & 9 \\
\hline Cotton goods & 58,646 & 47,870 & 55,355 \\
\hline Woolen goods & 15,554: & 14,272 & 23,408 \\
\hline Prepared hides & 21,366 & 18,764 & 15,420 \\
\hline Chernlcal products & 963,096 & 919,654 & 1,112,620 \\
\hline Oiis, other than olive. & 57,578 & 29,112 & 56,414 \\
\hline
\end{tabular}

There were decreases over 1920 In the exports of perfumes, soap, pottery and glass, and silk goods.

The United States remained in 1921, as in 1920, France's principal source of supply, with Great Britain a close second, Germany third, and Belgium fourth. Shipments to America, which in 1920 had bcen only 20 per cent. of purchases there, rose in 1921 to nearly 60 per cent. Beigium was France's best customer in 1921, as in 1920, followed by Great Britain, Germany and the United States in that order.

The prewar figures and those of the last two years of French imports and exports, by countries, are:
\begin{tabular}{|c|c|c|c|}
\hline UNTRIES OF & 1921. & 1920. & 1913. \\
\hline ORIGIN OR & Thousands & Thousands & Thousands \\

\hline
\end{tabular}

It might be noted that American and British purchases of lingerie and wearing apparel in 1921 greatly exceeded normai figures and that the export. of wines to the United States were 6,568 hectolitres (a hectoiltre is 26.4 U. S. gallons) in \(1921,4,168\) in 1920 and 37,553 in 1913
"The figures indicate that Germany is steadily regaining its old position as one of France's bes customers and principal source of supply," says U. S. Consul General A. M. Thackara, of Paris reporting the above figures to the United States Dcpartment of Commerce, "while France is rapidly becoming not oniy independent of foreign supplies of metals and metal goods but seems likely to secure markets abroad for these goods in place of ita nrincipal competitors.'

Agriculture is still the chief occupation of the French. The acreage given over to wheat, rye, barley oats and corn in 1921 (including Alsace-Lorraine) was \(26,881,000\); to potatoes, \(3,806,900\); to sugar beets, 254,500 ; to tobacco, 35,900 ; and to hemp and flax 62,300. The production of appies and pears for cider in 1921 was \(3,639,701\) tons of fruit and 21, 942,850 hectolitres of cider. The crop of table apples was 144,188 tons; of pears, 52,067 tons; of chestnuts, 165,557 tons; of olives, 72,613 tons; ali greatly exceeding the 1920 output. Forests cover \(25,000,000\) acres, over 18 per cent. of the land and about \(10,000,000\) acres are returned as moor and uncultivable. Stock raising suffered greatir during the war but is reviving

\section*{RECONSTRUCTION}

A few figures will set forth the burden the war laid upon France. Her prewar population, consus of 1911. Was \(39,601,509\). During the war the birth rate was less than one-half the normal. The number of births in 1913 was 790,355 ; in \(1916,315,087\); in 1917, 343,310; in 1918, 399,041; in 1919,403,502; and in 1920, 834,411.
The number of men from 19 to 50 mobilized for the defense of France was \(8,400,000\); the number of men kiled, \(1,364,000\); the number mutilated, \(740,-\) 000 ; the number wounded, \(3,000,000\).

Alsace-Lorraine, redeemed, brought back to the tri-color, as shown by the census of \(1921,1,709,749\) Yet this census of 1921 returned the total population of enlarged France as \(39,209,766\), a loss of 391,743 Moreover, France, always a most attractive country to foreigners, counted as residents in 1911, 1,152,096 foreigners, and in 1921, 1,550,449, au increase of 398,353. This would indicate a net ioss of French citizens amounting to 790,696 . Moreover, the loss to France was almost wholly of her workers.

The invading German army for nearly five years occupied ten departments in the most populous part of France where industrial plants were most numerous, mines highly important, and fields in tensely cultivated. The invaders sent machinery and movabies across the Rhine. Battle trenches high explosive shelis, mines, and all the might of war left these regions devastated. But as the invaders were driven back the refugees, stout-hearted and undaunted, returned to what had been their homes, their fields, their factories, and then and there began the work of reconstruction. American visitors travel through these departments in railroads, once ruined, now rebuilt, without a thought of the work that has been done. Statesmen said and the Peace Conference decreed, that Germany should make reparation for the devastation her armies wrought, should pay for the reconstruction

France went steadfastly and courageously at work. The Ministry of the Liberated Regions was established. The district covered ten departments the Aisne, Ardennes, Marne, Meurthe-et-Moselie Meuse, Nord, Oise, Pas-de-Calals, Somme and Vosges; comprised roughly by a line south from Dunkirk to Senlis, east to st. Die, thence north to the Beigian frontier. The first task of the GOV ernment was to restore the ruined railroads and roads, and of the farmers and workmen to clear out cellar's and build shacks of any kind out of any materials, mostly the wastage of war that could be found. The Government pledged its credit and issued .bonds for this work up to \(45,000,000,000\) francs. German prisoners were set at work clearing up the batticfields and 300,000 laborers, mostly Poles and Italians, have been brought in to worl at wages averaging 20 francs a day. The work done has been enormous. The amount of money spent is the reason for the insistence of the French. demand that Germany shall pay.

In figures the record is:

The Ministry for the Liberated Regions, it might be added, as part of the worls had furnished, up to January, 1921, the farmers who were putting the land back in order with 15,400 ploughs. 28,733 harrows. 14,935 mowers, 11,680 reapers and binders, 11,353 cream separators and churns, 25,150 carts, 56,638 sets of harness, and 185,865 other machines.

\section*{GOVERNMEN'T OF FRANCE.}

The constitutional law under which France is governed was adopted in 1875 and was partially modified in 1879, 1884, 1885, and 1889. Legislatlve power rests in a Senate and a Chamber of Deputies. The 610 Deputies are elected by direct vote by manhood suffrage every four years; a form of proportional representation is in effect. The 314 Senators are elected for nine years, one-third retiring every three years; the election is indirect and made by an electoral body in each district made up of delegates chosen by the municipal councils of each commune, and of the Deputies, councillor-generals and district councillors of the department. The two Houses meet yearly on the second Tuesday in January and must remain in session at least five months out of the twelve.

The complexion of the Senate elected Jan. 11, 1920 was: Radicals, 120 ; Republlcans of the Left, 58; Progressives, 23 ; Conservatives, 20; Liberal Republicans, 14; Socialist Republicans, 2; Unified Socialists, 2.

The Chamber of Deputies, elected Nov. 16, 1919: Republicans of the Left, 133; Progressives, 130; Socialist Radicals, 83 ; Action Liberale, 72; Unified Socialists, 68; Radicals, 60; Conservatlves, 31; Republican Socialists, 27; Dissident Socialists, 6.

The two Houses, united as a National Assembly, elect a President, of the Republic to serve seven years, meeting immediately whenever a vacancy occurs. The President selects a Ministry generally from the two Chambers but may go outside the membership. In practlce the President summons a leader who can obtain a majority in the Chambers in support of his policies as President of the Council (Premler) and he makes up his list of Mlnisters and submits it for approval. The number of portfolios varies, numbering in the Ministry of M . Polncare (1922) fourteen, viz.: Forelgn Affairs, Justice, Interior, War, Marine, Finance, Colonies, Public Instruction and Flne Arts, Public Works, Commerce, Agriculture, Labor, Liberated Regions, and Hygiene, Asslstance and Social Welfare. Each Minister is responsible to the Chambers for h is acts and the Ministry as a whole is responsible for the general policy of the Government.
The unit of local government is the commune, of which the 90 departments (excluding the three in Algeria) had, in 1921, in all 37,963 . Of these 22,024 have less than 500 inhabitants; 11,962 have between 500 and 1,\(500 ; 140\) only have more than 20,000 .

Each commune elects by universal suffrage a munlcipal councll which in turn elects a Mayor, who is both the representatlve of the commune, the agent of the central government, and the head of the police. Each department has representatives of all the Minlstries and is placed under a Prefect nominated by the Government and having wide functions. The elected Conseils d'arrondissement (385 in France) are charged with allotting the direct taxes.

France has not extended the franchise to women, although in May, 1919, the Chamber of Deputies voted a bill recognizing the full political rights of French women.

Diplomatlc relations with the Vatican, broken off June 30, 1904, were restored in May, 1921, when M. Jonnart was sent there as Ambassador. No religion is recogulzed by the state.

France has an act passed in 1905 for the relief of the aged, poor, infirm, and incurable. The age limit, first placed at 70, was five years later reduced to 65. This act was supplemented by the Old Age Pensions act of Aprll 5, 1910, which provides a system by which both employers and workers contribute. On Dec. \(31,1918,10,475,272\) persons were registered under it.

The school system of France is highly developed. Primary instructlon is tree since 1881 and compulsory since 1882 for all children from 6 to 13. The teachers are, by the law of 1886, lay. The publle schools, primary, secondary and superlor form the University of France, and are admlnistered by the Ministry of Public Instructlon, with the aid of a Superior Council and a force of seven InspectorsGeneral and Inspectors. There are seventeen circumscriptions called academies, each with a council to deal with instruction. Each department has a councll, presided over by the Prefect, for primary school matters with large powers regarding inspection, management and maintenance, and each department must maintain two primary normal schools, one for men and one for women.

The expenditure on the public schools and for technical schools, not including those under the Ministry des Beaux-Arts, was:

France offlcially notified the League of Nations on September 10 that the strength of the French Army, metropolitan and colonial, was 690,000 men, although the new French law proviries for 725,000 . Of this 690,000 men it is stated that 335.000 are statloned in France proper, 92,000 on the Rhine, 70,000 are used \(\ln\) carrying out treaty stipulations in the Saar, Syria, the Cameroons and Togoland, while the rest are stationed in the French colonies. In the total are 100,000 professional soldiers, 375,000 conscripts, 205,000 colonial natives and 10,000 foreigners. The War Department authorized a statement on September 26 that the Senegalese contingent numbered 48,129 on Jan. 1, 1922, and that not one of these had been on the Rhine since 1920, though 7,903 were quartered at Toulon.

France has not yet ratified the treaties reducing naval armaments, signed at the Washington Peace Conference (which see).

France is a member of the League of Nations.

TUNIS.
(French Protectorate.)
AREA, about 50,000 square miles.
POPULATION, census of 1921, 2,093,939, of which 156,115 were Europeans (54,476 French, 84,799 Italians) ; and \(1,937,824\) natives ( \(1,889,388\) Arabs and Bedoulns, 48,436 Jews).
CAPITAL, Tunls, population, 1921, 170,381, of whlch 22,206 were French and 42,592 Itallans. Bey, Sidi Mohammed el Habib, born 1858, succeeded his cousin, sidl Mohammed Ben Nasr Bey, who died Juiy 10, 1922
French Resident Generaü, Lucien Saint, appointed Nov. 24, 1920.
United States Consul at Tunis, Harris N. Cookingham.
Tunis, one of the former. Barbary states under the suzerainty of Turkey, is situate on the northern coast of Africa, with the Mediterranean Sea on the north and east, on the southeast Italian Libya, on the squth the Sahara Desert and on the west Algerla.

The French were obliged to send a milltary iorce into the country in 1881 to protect Algeria from the raids of the Khroumer tribes, whieh resulted in a treaty signed May 12. 1881, placing Tunis under the protectorate of France. Most of the tribes have settled down to agriculture and stock raising. Difficulties of administration whlch followed the oid Turkish system have been great but the French have met them admirabiy and have made the country prosperous.

There are large fertile valleys in the mountalnous north, excellent land for fruit culture in the northeast peninsula, high tabiclands and pastures in the centre, and famous oases and gardens in the south where dates grow in profusion. The chief industry is agriculture and there are \(7.925,000\) acres of arable land, \(2,740.000\) acres of forests, including 12,000.000 olive trees and 2,137.975 date paim trees, 58,835 acres of vineyards and \(11,535,000\) acres of pasturage. The vineyards produced 11, 000,000 galions of wine in 1920 and the date orchards \(87,520,000\) pounds of dates.

Iron, zinc, and lead mines are being developed and the output from the very rich phosphate deposits \(\ln 1920\) reached \(1,075,000\) tons. The railway mileage was 2,493 on Jan. 1, 1921. There are 2,886 miles of good roads. In 1920 there entered the ports 8,428 vessels of \(2,355,319\) tons.

The vaiue of the imports in 1919 was \(285,761,000\) francs and of exports \(202,028,000\) franes.

The administration ls under the French Foreign Office.

FRENCH WEST AFRICA.
AREA, about \(1,800,566\) square miles, exclusive of
the Sahara Desert, about \(1,500,000\) square miles. POPULATION, census of \(1921,12,283,962\), of which 6,829 are French and 1,826 other Europeans.
CAPITAL, Dakar, in Senegai; populatlon, 1918, 25,468 , of which 2,791 are French.
Governor General, M. Meriin, appolnted January,
1918.

French West Africa reaches from the Atlantic Ocean at about \(17^{\circ}\) west longltude across Africa to the soudan at about \(24^{\circ}\) east longitude and from the southern desert boundaries of Morocco, Algeria, Tunls and Italian Libya to the Gulf of Guinea and the indeterminate boundary of French Equatorial Africa. It has been formed by consolidatlon of existing colonles as follows:
\begin{tabular}{|c|c|c|}
\hline & Square & \\
\hline Colony. & miles. & Popuiation. \\
\hline Sencgal & 74,112 & 1,225.523 \\
\hline Guinea & 95,218 & 1,875,996 \\

\hline Dahomey & 42,460 & 842.243 \\
\hline French Souda & 617,000 & 2.474.589 \\
\hline Upper Volta & 154,400 & 2,974,142 \\
\hline Mauritanla & 345,400 & 261,746 \\
\hline Territory of Niger & 349,400 & 1.084,043 \\
\hline ot & 800,56 & 2,283,96 \\
\hline
\end{tabular}

Total
\(1,800,566 \quad 12,283,962\)
Of Togoland, the only German colony that was self-supporting, France rcceived 20,200 square miles, about two-thirds. It ì attached to French Dahomey

The colonies. are cach under a Lleutenant Governor. There is a gencral budget for ali, that for 1921 baiancing at \(64,604,240\) franes.
The colonies export fruits, paim nuts and oil. rubber, eotton, cacao, and timber. The chief ímports are foodstuffs, textiles, macilinery and hardware. and spirlts. Imports for 1920 were \(654,638,301\) francs and exports, \(589,051,244\) francs.

In 1921 tie rallroad inlleage was 1,860 miles

There entered the ports 3,169 vessels of \(6,430,949\) tons \(\ln 1919\).

Dakar is the best port on that coast, having modern equipment.

\section*{FRENCH EQUATORIAL AFRICA: (French Congo.)}

AREA, 982,049 square mlles.
POPULATION, estimated, 1915, 6,370,000.
CAPITAL, Brazzavilie, on the Congo.
Governor-General, M. Alfassa, appointed 1921.
French Equatorial Afrlca extends from Spanish Gulnea, just south of the Cameroon, to Belglan Congo. Its eastern boundary is the Ubangl and Congo Rivers and the Soudan. On the west is the Cameroon. French acquisition began in 1841 and its territory has since been extended by exploration and occupation, and the limlts defined by international convention. That part (107,270 square miles) ceded to Germany as componsation for acknowledgment of the Moroceo protectorate in 1911 was restored to France in the Treaty of Versailles and incorporated in thls territory. France, on Jan. 15. 1910, renamed the French Congo French Equatorial Africa and subdivided it into three colonies under one administration, subsequently adding Chad as a colony. The four colonies are:

There are 30,000 square miles of tropical forest, rich in timber, but the output as yet is only wild rubber, of whlch 2,122 tons were exported in 1920. Palm oil output for export was 7,352 tons. Copper, fand and zinc are found. The import figures for 1920 were \(18,370,512\) francs; exports, \(31,246,248\) trancs. A railroad to connect Brazzaville with Pointe Novic on the Atiantic was begun February, 1921.

CAMEROON.
(French Mandate.)
AREA, 166,489 square miles.
POPULATION, estimated, 1921, 1,750,000.
CAPITAL, Yaounde.
That part of the former German colony Cameroon not returned to France (see French Equatorial Afrlca) was by the Treaty of Versailles placed under a French mandate and by decree of March 28, 1921, has been constituted an autonomous territory. It has 359 miles of rallroad. The products are for 1921 baianced coffec, and ivory. The budget railroad budget of \(3,115,100\) francs.

FRENCH SOMALILAND.
AREA, 5,790 square miles.
POPULATION, 1921, estimated, 65,000.
CAPITAL, Jlbuti; population, 1921, 8,366 (190 French).
French Somaliland lies between Eritrea (Italian) Abyssinia and British Somaliland and is separated by the Stralts of Bab-el-Mandcb from Aden (Brltish). Its port, Jibuti, is on the Guif of Aden. A port Was acquired by France in 1862 , but active occupation did not begin until 1884. It is administered by a Governor. The colony has few industrles; hides, coffee and lvory are exported, and textiles, food products, sugar and coal imported. The figures in 1919 were: imports, 106,301,216 francs; exports, \(66,816,294\) france, of which \(14,990,097\) were Abyssinian goods brought down to Jibuti by the rallroad ( 485 mlles long) from Addis Abeba. In 1917272 steam vessels of 643,290 tons entered Jibuti.
\[
M A D A G A S C A R
\]

AREA, estimated, 228,000 square mlles.
POPULATION, census of \(1918,3,545,575\), of whlch 15,157 were French, and 3,101 other Europeans.
CAPITAL, Tananarivo; population, 63,115. Ports: Tamatave, Diego Suarez, Majunga and Tulear.
Governor General, Hubert Garbit, appointed March 14, 1920.
United States Consul at Tananarivo, James C. Carter.
Madagascar, an island off the east coast of Africa, from which it is separated by the Mezambique Channcl (240 miles wlde at its narrowest part), is about 980 miles long and 360 mlles wide at its greatest brcadth. It is therefore nearly as large as the State of Texas, To it is attached for government
the prosperous archipelago of the Comoro Islands, with an area in all of about 790 square milos, and with 97,617 inhabitants; also Nossi Be ( 130 square miles).

Madagascar came under a Fronch protectorate in 1885. In January, 1896, it became a French possession and on Aug. 6, 1896, it, together with its dependencles; was declared a French colony. It is administered biv a Governor General with a consultlve councll. Over 2,500,000 acres are under cultivation, the chief crops being' rice, manioc, beans, coffee, sugar, tobacco, vanilia, cocoa, cloves, mulberry trees and rubber. The forests are rich in cabinet and dye woods, resins and gums.

Agricuiture and stock raising are the chief lndustrles; mining is being developed and 35,000 tons of graphite were produced in 1917 and 27,141 ounces of gold in 1918.

The total railroad milcage in 1919 was 776 mlles. In 1918 the tonnage entering the ports was \(630,320\). The lmports for 1919 were \(98,972,737\) francs and exports \(177,167,590\) francs. The budget for 1921 balanced at \(66,232,500\) francs. The debt amount to about \(£ 4,200,000\).

Trade with the United States was:
Imports 1920-21
\$201,830
Exports \(1921-22\). . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . .

\section*{REUNION.}

AREA, 970 square miles.
POPULATION, census of 1921, 173,190, of which 167,789 were of French European origin.
Reunion is in fact an integral part of France, as it is represented in Parliament at Paris by a Senator and two Deputies. It is an island in the Indian Ocean, about 240 miles east of Madagascar, and has belonged to France since 1643. It is administcred by a Governor and an Elective Council. The chief products are sugar, rum, coffee, manioc taploca, vanilla, and spices. The chief imports, rice and cereals. Imports for 1920 were 58,541,861 trancs; exports \(88,980,113\) trancs. There are 80 miles of railroad, state owned. In 1920,68 vessels of 133,181 tons entered the ports. The budget for 1920 balanced at \(12,170,760\) irancs. The debt was 1.122,500 francs.

\section*{FRENCH INDIA.}

AREA, 196 square miles.
POPULATION, census of 1921, 265,200.
CAPITAL, Pondicherry; population 46,849
- The French possesslons in India lie along the Coromandel coast, on the Bay of Bengal, in the southeastern part, to the north, of the island of Ceylon. The most important is Pondicherry; catabllshed by tho French, East Indian Company in 1674, and after changing hands eight times flnally rested in the control of France in 1814. The colonies are divided In five dependencics: Pondlcherry population, 1921, 170.84f; Karikal, 53,027; Chandernager, 25.423; Mahe, 11,199; and Yanson, 4,705. The administration ls in the hands of a Governor, and there is a general electlve council. The colonies send one Senator and one Deputy to Parliament at Paris. Agrlculture is the chief industry and oll seed the chief export. Pondicherty has five cotton milis; 71,213 splndles. There are 43 mlles of rallroad and in 1920244 vessels entered the ports. The imports in 1920 weré valued at \(673,076,798\) franes and the exports at \(23,805,649\) irancs.

\section*{FRENCH INDO-CHINA.}

AREA, Cochin-China, estimated, 22,000 square miles; Annam, 39,758; Cambodia, 57,900; Tonkin, 40,530; Laos, 96,500; Kwangchow, 190; total 256,878.
POPULATION, Cochln-China, 1921, 3,795,613; Anuam, 1920, 5,731,189; Cambodla, 2,000,000; Tonkin, 1919, 6,470,250; LaO日, 800,000; Kwangchow, 168,000 ; total \(18,965,052\). Of these about 23,700 were Europcans.
CAPITAL, Hanol (Tonkin), populatlon, 1921, \(90,303 .{ }^{2}\) Chief port, Saigon (Cochln-China), population, 72,372 , of which 4,601 were Europeans.
Uniled States Consul, at Salgon, Leland L. Smlth.
French Indo-Chlna, situate in the southeastern part of Asla with Chlna on the north, Siam on the west and the Gulf of Tonkin and the South China Sea on the east and south, comprises five states: the colony of Cochin-China, the protectorates of Annam, Cambodla, Tonkln and Laos, and also Kwangchow, leased from. China (1898) and Battambang, ceded by Slam (1907).

The whole country ls under a Governor General with a Secretary General and a superior council, and each state has a head, that of the cclony belng in Goyernor, and those of the protectorates being
ealled Residents Superieur. There is a eommon budget for Indo-China, which in 1921 balaneed at \(54,878,400\) piastres (par of exehange, 49 eents), and in 1920 a debt of \(403,000,000\) franes. There is a military force of 25,000 men and a smali navy for polieing the waters.

Coehin-China sends a Deputy to the Chamber of Deputles at Paris. Saigon, population, 1921, 72,372 , is its eapital and the ehief port of IndoChina.

Annam has a King, Khai Dinh, sueceeded 1916, who governs the eountry with the assistance of his Ministers under the guidance of the Freneh Resident Superieur.

Cambodia also has a King, Sisowath, sueceeded in 1904 lis brother Norodom, who had reeognized the Freneh proteetorate in 1864 . The land is very fertilc but only a part is euitivated. Some eotton is grown. Fishing is the prineipal native industry. The ruins of a former eivilizatlon which had developed a strikingly distinetive art, are very extensive; those of Angkor being especially famous.

Tonkin became a French proteetorate in 1884. Its chlof town, Hanoi, whieh was made the capital of Indo-China in 1902 instead of Saigon, is a fine, large, well-built modern eity. Though its wealth is in agriculture, like the other provinees, it has valuable hard eoal deposits, exporting in 1920 501,665 tons. From the rieh limestone quarries in 1920115,984 tons of eement were exported. There are also valuable zine mlnes.

Laos, a protectorate sinee 1893, has extensive teak forests. and gold, tin and lead are being worked. The Mekong River is its great highway.

Kwangehow, leased from China in 1899, has a free port.

The provinees have been a eustoms union sinee 1887, and in 1885 when France, forced China to give entircly her sovereignty over Annam, agreements were made for a reduction in tariff rates for goods entering China from Tonkin. Franee in 1895 obtained speeial privileges for raiiroads in southern China.

The railroad mileage in 1921 was 1,427 . twothirds of whieh is Government-owned. In 1920 there entered the port of Saigon 4,698 vessels of \(2,166,464\) tons. The imports in 1919 were \(791,073,-\) 000 franes, and the exports \(1,050,893,000\) franes. Indo-China ranks seeond to Burma as the greatest rice exporting eountry in the world.

Tradc with the United States was:
Imports, 1920-21

\section*{GUADELOUPE}

AREA, entire group of islands, 688 square miles. POPULATION, census of 1921, 229,822.
CAPITAL, Basse-Terre; population, 1921, 8,318; Port Pointe-a-Pitre, 27,679.
United States Consul, Shelby S. Strother.
Guadeloupe, consisting of two large isiands, Basse-Terre and Grande-Terre, separated by a narrow ehannei, and five smaller islands, is a group of the Windward Islands in the West Indies, between Antigua and Dominlea. They have been in the possesslon of France since 1634 and are represented in Parliament at Paris by a Senator and two Deputies. The Government eonsists of a Governor and an eleeted Couneil. The soil is very produetive. The ehief exports are sugar, 1920, 14,265 tons; coffee, 1,069 tons; rum, \(16,615,518\) litres; eacao, 666. tons, and van lla, 26,636 tons. The value of the exports in 1920 was \(146,389,180\) franes, and of imports 117,858,064 francs. The budget for 1921 balaneed at 16,954,562 franes. The debt, Jan. 1, 1921 , was 472,254 franes.

The trade of Guadeloupe and Martinique with the Unlted States was:
Imports, \(1920-21 \ldots . .\).

1921-22. . . . . . . . . . . . . . . . . . . . . . . 86,537

\section*{MARTINIQUE.}

AREA. 385 square miles.
POPULATION, eensus of \(1921,244,439\).
CAPITAL, Fort-de-France, population 26,399.
United States Consul, Thomas R. Wallace.
Martinlque, one of the Windward Isiands, in the West Indles, has been a posiession of France sinee 1635. It is represented in the Freneh Parllament by a Senator and two Deputies. It is administered 1) y a Governor, a general counell, and ciective munielpal councils. It has the fanous voleano Mt. Pelee, whlch in eruptlon \(\ln\) May 8, 1902, destroyed the elty of St. Picrre witl all lts 40,000 Inhabitants.

The island is the blrthpiace of the Empress Josephine.

Rum, sugar and eacao are the chief productions. The value of the imports in 1920 was \(132,186,470\) franes, and of exports, 128,953,479 franes. In 1920 there entered the port 643 vessels of 455,561 tons. The budget for 1920 balaneed at \(16,198,662\) iranes. 'ST' PIERRE AND MIQUELON.
AREA, St. Pierre, 10 square miles; Miquelon, 83.
POPULATION, eensus of 1921, St. Pierre, 3,419;
Miquelon, 499; total 3,918.
CAPITAL, St. Pierre.
St. Pierre and Miquelon are two groups of roeky, barren islands elose to the southwestern eoast of Newfoundiand, inhabited by fishermen. The Government is headed by an Administrator. The exports, cod, fresh and salt, and fish products, in 1920, were valued at \(28,047,100\) francs, and the imports at 40,846,742 franes. The loeal budget for 1921 showed expenditures of \(1,818,383\) francs, toward which Franee contributed 280,607 franes.

FRENCH GUIANA
AREA, estimated, 32,000 square miles.
POPUKATION, census of \(1918,26,325\), exeluding Indians.
CAPITAL, Cayenne; population, 1919, 13,609.
Freneh Guiana is on the north eoast of South Ameriea on the Atlantic Oeean, with Duteh Guiana on the west and Brazii on the east and south. The eountry has lost heavily in population in the last decade, the eensus of 1911 returning 49,009 inhabitants. It sends one Deputy to the Chamber at Paris. The colony has a Governor and a eouneil general of slxteen elected members. Franee has had a penal colony there sinee 1885 and in 1918 it cared for 9,000 eonviets. Only 8800 aeres are eultivatcd. Placer gold mining is the most important industry. The produet in 1910 was 123,168 ounces, and in 1918 80,477 ounces. The forests are large and rieh in eabinet timber. Imports in 1920 were valued at 40,405,823 francs and exports at 42,674,734 franes. The budget for 1918 balaneed at \(3,490,000\) franes.
Trade with the United States was:
Imports, 1920-21
\(\$ 1,312,021\)
499,836
Exports, 1920-21
329,771

\section*{OCEANIA.}

AREA, estimated, 1,520 square miles.
POPULATION, about 30,000 , of whieh about 2,500 are Freneh and 2,500 other Europeans.
CAPITAL, Tahiti, population, 3,617 , of whom 1,909 are French.
The French possessions, widely seattered in the southern Pacifle Ocean, were grouped together in 1903 as one homogencous colony under one Governor, with headquarters at Papeete, 'Tahiti, one of the Society Islands. The other groups are the Marquesas, the Tuamotl Group, the Leeward Islands, the Gambler, the Tubuai, and Rapa Islands.

The ehief exports are copra, mother of pear', vanilla, eocoanuts and oranges. The budget in 1921 balanced at \(5,980,000\) franes

Trade of Freneh Oceania with the United States was:
Imports, 1920-21 . . . . . . . . . . . . . . . . . . . . . . \(\$ 1,447,405\)
Exports, 1921-22
999,978
1,971,936
1.130,363

NEW CALEDONIA.
AREA, 7,650 square miles.
POPULATION, census of \(1911,50,608\).
CAPITAL, Noumea; popuiation, census of 1921; 10,053.
France aequired New Caledonia in 1854. Its dependencies are: The Isle of Pines, the Wailis Archipelago, the Loyalty Islands, the Huon Islands, Futuna and Alofi. A Governor adminlsters the eolony, assisted by an eleetlve couneil-general. France has maintained a penal eolony on Nou Island, but no convlets have been sent there sinee 1896.

Minlng is becoming the chief industry, the output of niekel from the blast furnaces in 1920 was 3,701 metrie tons, and the export of nickel ore was 3,424 tons; of ehrome ore, 91,634 tons, and of manganese, 2,693 tons. Exports in 1920 we e valued at 43.043,000 franes; imports at 47,472,000. In 1920, 124 vessels of 128,631 tons entered the ports. The budget for 1921 balanced at 18,35, 125 francs.

The New Hebrides since 1906 have been jointly administered by IIlgh Commissloners of Great Britain and Franee. Their area is about 5,500 soluare iniles and population about 60,000 .

\section*{CEORGIA.}
(See under Russia.)
GERMANY, REPUBLIC OF:
AREA, 185,889 square mlles, divlded Into these states: Prussia, 113,852; Bavaria (with Coburg), 29,501; Wurttemberg, 7,629; Baden, 5,817 Saxony, 5,789; Mecklenburg•Echwerin, 5,068 ; Thuringla, 4.546; Hesse, 2,966; Oldenburg, 2482 ; Brunswick, 1,418; Mecklenburg-Strelltz, 1,131; Anhalt, 888; Lippe, 469; Walcleck, 433; Schaum-burg-Lippe, 131; Hamburg, 160; Lubeck, 115; Bremen, 99.
POPULATION, census of Oct. 8, 1919, 59,858,284, dlvided: Prussia, \(36,696,151\); Bavarla (with Coburg), 7,140,333; Wurttemberg, 2,518,773; Baden, 2,208,503; Saxony, 4,663,298; Mecklen-burg-Schwerin, 657,330; Thurlngia, 1,508,025 Hesise, 1,290,988; Oldenburg, 517,765; Brunswick, 480,599; Mecsicnburg-Strelitz, 106,394; Anhalt, 331,258; Llppe, 154,318; Waldeck, 55,999 ; Schaum-burg-Lippe, 46,357; Hamburg, 1,050,359; Lubeck, 120,568; Bremen. 311,260.
CAPITAL, Berlin; population, with suburbe, census of \(1919,3,803,770\); other cities of over 100,000 population, Hamburg, 985,779; Cologne, 633,901; Munlch, 630,711; Lelpzig, 604,38u; Dresden, 529,326; Breslau, 528,260; Essen, 439,257; Frank-forton-the-Main, 433,002 ; Dusseldorf, 407,338 ; Nurnberg, 352,675; Hanover, 310,431; Stutt gart, 309,197; Chemnltz, 303,775; Dortmund, 295,026; Madgeburg, 285,856; Koenigsberg, 260,895; Bremen, 257,923; Duisburg, 244,302; Stettin, 232,726; Mannheim, 229,576: Kiel, 205,330; Halle-on-saale, 182.326; Altona, 168,729; Gelselkirchen, 168,\(557 ;\) Cassel, 162,\(391 ;\). Elberfeld, 157,218; Barmen, 156,326; Augsburg, 154,555 Aachen, 145,748; Bochum, 142,76u; Brunswick, 139,539; Karlsruhe, 135,952; Erfurt, 129,646; Mulheim-on-Ruhr, 127,027; Crefeld, 124,325; Lubeck, 113,071; Hamborn, 110,102; Mainz. 107,930; Plauen, 104,918; Muenster', 100,452 and forty-two cities with population of between 50,000 and 100,000 . Among the latter is Coblenz, population 56,676 , whlch has been occupled by Amerlcan troops since the armistice.
President, Friedrich Ebert, born Feb. 4, 1871, elected Feb. 11, 1919, term extended to five years. Chancellor, Wilhelm Cuno.
Ambassador to the United States, Dr. Otto Wiedfeldt. Consul General, at New York, Erich Kraske.
United States Ambassador, Hanson B. Houghton
United States Consul General, at Berlin, Wllliam Coffin; Consuls, at Bremen, Francis R. Stewart; at Breslau, John E. Kehl; at Coblenz, Elliott Verne Richardson; at Cologne, Emil Sauer; at Dresden, Louis G. Dreyfus Jr.; at Frankiort-on-the-Maln, Frederlck J. F. Dumont; at Hamburg, J. Klahr Huddle; at Koenlgsberg, Albert W. Donegan; at Leipzlg, Hernando de Soto; at Munich, vacant; at Stettin, Cornellus Ferris; at Stuttgart, Maxwell K. Moorhead.
It is estlmated that the areas and population subtracted from prewar Germany glve a total of 27,275 square miles and \(6,471,581\) population. divided; Alsace-Lorraine, returned to France, 5,604 square miles, and \(1,874,014\) population; Eupen and Malmedy, ceded to Belgium, 386 square mlles, and 60,924 population; part of Eastern and Upper Silesia, ceded to Poland, 17,787 square miles; and 3,853,354 population; Memel, ceded to the Allies, 1,057 square miles, and 140,746 population; Danzig, made a free city, 794 square miles, and 330,252 population; Schleswig northern zone, ceded to Denmark by the plebisclte, 1,537 square mlles, and 166,895 populatlon; part of Upper Sllesia, ceded to Czechoslovakia, 110 square miles, and 45,396 population.

In addition, the Saar Valley, area 751 square miles, populatlon, 657,870 , is to be under the League of Natlons and exploited by France for 15 years, then submitted to a plebisclte.

The pleblscite in Upper Sllesia, March, 1921, resulted in a majority for retention in the Relch, but, notwlthstanding, that territory of 1,255 square miles wlth a population of 891,669 was annexed to Poland.

The area of the occupied territory is about 9,650 square mlles, containing about \(7,000,000\) inhabltants.

Germany (Deutsches Reich), now a federation of republics in Central Europe, is bounded on the north by the North Sea, Denmark and the Baltic Sea, on the east by Poland, Czechoslovakia and Austrla, on the south by Czechoslovakla, Austrla and Switzerland, and on the west by France, Luxemburg, Belglum, Holland and the North Sea.

In climate it is characteristically mild \(\ln\) summer and rather cold in winter, as in all western Europe. Its soll is not naturally fertile, belng largely a glaclal plaln over whicli the action of the lce moved much sand; it has always demanded unusual artlficlal fertllization. The land naturally was heavlly wooded, there being ln the country about 160.000 , 100 acres, of whlch \(35,552,930\) acres were forested In 1913 , latest avallable figures. Forestry is far advanced, perhaps more perfected as a science than in any other country. The Black Forest of Germany is famed for its timber and as a resort.

Excepting in the Black Forest, Germany is mostly flat, with slopes toward the north and west

Mining is a large industry, wlth much Iron and coal lifted, mostly in Prussia, mlning dlstricts belng Westphalia, the Rhine Provinces, Upper Silesia, and Saxony.

In agrlculture, the \(160,000,000\) acres yleld 65,148,060 acres arable, grass, meadow and pastures, \(21,760,000\); vineyards, 206,500 ; and other, 12, 811,500 .

Crops in 1921 were: \(2,663,460\) metric tons of wheat from 3,603,902 acres; rye, 6,608,023 metric tons from \(10,741,417\) acres; barley, 1,792,904 metrle tons from 3,846,897 acres; oats, 4,715,697 metrle tons from 7,974,457 acres; potatoes (1920), 28,248,765 metrle tons from \(6,149,680\) acres; bects (1920), \(7,964,024\) metric tons from 817,435 acres; lay (1920), \(23,659,144\) metric tons from \(13,721,665\) acres.
In 1913 there were in the German Empire 196,084,642 friult trees-apples, pears, plums, cherries, apricots, peaches and walnuts.

In 1920 the area devoted to vines was 181,653 acres, the wlne yield being \(53,683,256\) gallons, valued at \(2,395,274,480\) marks.

Domestic anlmals in 1920 numbered: horses, \(3,588,005\); cattle; \(16,805,950\); sheep, 6,149,676; swine, \(14,178,375\); goats, \(4,458,422\).

Mlning products in 1919 were: Coal, 116,707,234 metric tons; lignite, \(93,648,264\); iron ore, \(6,153,834\); zlnc ore, 285,596 ; lead ore, 85,187 ; copper ore, 616,809 ; rock salt, \(1,487,849\); potash, \(7,888,152\).

Of the coal mlned about a third was from Upper Stlesta, which has mostly gone to Poland.

Plg iron production ln 1913 was \(16,763,809\) tons, \(\ln 1915,10,154,721 ; 1916,11,342,077 ; 1917,11,-\) 622,\(168 ; 1918,9,208,252 ; 1919,5,654,215\)
Ingot steel productlon in 1914 was \(13,520,654\) tons; 1916, 13,601,451; 1917, 13,778,852; 1918, 11,392,135; 1919, 6,731,699.
Before the war Germany had a virtual monopoly of potash for the world. The return to France of Alsace-Lorraine divided the potash territory.

Industrial development in Germany is not only far advanced but also, extremely diversified. The necessity of buylng about hall of the food consimed compelled large developinent of inclustry and mining, with effort to sell products \(\ln\) all forelgn markets. Germany's prewar forelgn trade assumed large proportions and was growlng rapldly.

The common dislocation of all production, agricultural, mineral and lndustrlal, followed the war, although there was some rehabllitation after the armistice, especially before the German mark (par gold at 23.8 Amerlcan cents) began to fall so rapidly in exchange value. The rate of exchange on November 1 was .000224 cents.

Production of foodstuffs has now approxlmated closely enough to normal to remove that as an especial problem, excepting that the mark is so low as to render purchases abroad very costly \(1 n\) the German currency. The same is true of the purchases of raw materials for industry, much of which the country must import to carry on industrial production.

The loss of the coal productlon of the Saar Valley subtracted about \(12,000,000\) metrlc tons of annual coal output from Germany, and the dlvision of Upper Silesia took away also about \(35,000,000\) metric tons, the two making about a fourth of the normal coal production of the country.

The spurt by the German export manufacturers for about 24 months following the war, In extending contracts and sales into foreign fields, was checked soon, Germans apparently being unable to deliver on the terms laid in the contracts and sales. The rising scales of labor and the low mark value causlng
higher prices when expressed in marko for raw materials bought abroad seemed to have estopped the surge of German business across the earth

Two days before the armistlce, that ls, on Nov. 9, 1918, the abdicatlon of the German Emperor Whllam II., was announced. He had fled to Holland, where he has since been living under Dutch sur velliance at Doorn. The self-constltuted Council of People's Commissioners took over the Government and declared the exlsting Imperial Parlament dissolved and proclalmed the republic. The reigning Princes of the Finderal states were elther deposed or abdicated. A call was lssued for the election of a Natlonal Assembly. Electiong, at which all

Germans, men and women over 20 years of age, voted, were held in January, 1919. The composition of the National Assembly thus chosen was: Majority Socialists, 165; Centre (Catholic) Party, 90; Demoerats, 75; Conservatives, 42; Independent Socialists, 22; German People's Party, 22; scattering, 7; total 423. It met at Weimar, Feb. 6, 1919, and elected Friedrich Ebert President of the republic on February 11.

The National Assembly adopted a Constitution July 31, 1919. Foreign relations, defense. customs, taxation, and railway service are declared Federal matters; each component state must have a republican constitution; universal suffrage, secret ballot, and proportional representation are provided for. Freedom of speech, of the press and of assembly is guaranteed. The Cabinet appointed by the President must have the confidence of the Reichstag. The Reichsrat consists of 66 members (Prussia 26 ; Bavaria 10, Saxony 7, Wurttemberg 4, Baden 3, and other states 16).

The Reichstag elected Feb. 20, 1921 is of this complexion: Majority Socialists. 108; Independent Sociaiists, 61 ; Centre (Catholie) Party, 72; German
National People's Party, 71; German People's Party, 65; German Democratic Party, 40; Bavarian People's Party, 20; scattering, 7; total 469.

Germany's total mobilization in the World War, as given out officially on Oct. 1,1922 , numbered \(13,250,000\) men, of whom \(8,000,000\) still were engaged at the end of the fighting. At the height of its expansion, at the beginning of the western offensive, March 31, 1918, these igures state, the German army totalled \(3,500,000\) enlisted personnel and 140,000 offlcers on the western front, besides 160,000 enlisted men and 3,000 ofncers in recruiting depots.

These fighters were distributed among 190 infantry divisions and two defensive eavalry divisions. They were equipped with 32,218 light and 27,143 heavy machine guns, 8,845 mine throwers, 5,652 field rifles, 3,158 light howitzers, 3,083 guns for heavy fring at high elevations, 1,747 guns for heavy fire at low elevations, and 1,137 aerial guns.

Horses to the number of 764,563 were "mustered" into the military service of the Fatherland.

It is estimated that Germany's war expenditures were \(186,000,000,000\) marks, Which is about \(\$ 46,-\) \(500,000,000\) at gold par for the mark. This includes the cost of technical demobilization.

The Allied estimate is that the total imperial revenues from 1914 to 1918 were \(17,000,000,000\) marks, or about \(\$ 4,250,000,000\), and the total debt incurred in the war of \(157,000,000,000\) marks, or about \(\$ 39,250,000,000\) at par of exehange.

Economists have noted also that Germany met the major part of her war needs by issuing evidences of indebtedness and by inflation of eredit, taxation devoted to earing for current interest being only about heavy enough to pay that.

Since the armistice, inflation of the eireulating medium has been enormous, so much as \(3,000,000\),000 marks being printed per day in one certain week, and for many wecks \(1,000,000,000\) a day. The result of these various operations, with credit in outsjde countries falling constantly, has been that so late as mid-November, 1922, it was estimated that debt and excess circulating medium combined totalled about \(750,000,000,000\) marks, whieh at gold par, were such a thing conceivable, would equal par, were such

The pre-war debt was \(4,504,000,000\) marks, or about \(\$ 1,126,000,000\) at par of exchange.

In 1920 the German states surrendered to the Berlin Cential Government the right to eontrol direct taxes, hitherto held jealously by the several states. Increases of the direct tax rates followed, income taxes rising 50 per cent.

The stabilizing of German finances and fiseal policies and the ereation of a meaningful budget system is rendered more or less impossible by the utter instability of the mark, and its constant tendency to fall in exchange value. Each year that which was to be a' "balanced budget" was drafted early in the year, only to appear absurd in midyear, and not to be recognized when the autumn came.
Late in 1922, it was cabled from Berlin that the prospects for considerable trade and activity by Germans in Russia had been destroyed by the instabillty and lack of organization in that country, the Krupps and Hugo Stinnes laving witlidrawn from Russla. After Nov. 1, 1922, the tentative proposal emerged froin France that both German marks and Russian rubles be abolished, that Germany be declared bankrupt, and that there be then a building up again froin the bottom, with gold as the basis of whatever eirculation was to be permitted after the reorganization plan had been formed.

Gerinany has freedom of religious worship, and there is no state church. Protestants in 1910 numbered \(39.991,421\), mostly Lutherans; Catlolles,

23,821,453; other Christians, 283,946; Jews, 615,021; others, unclassed, 214,152 .

Instruction is widespread and comp:ulsory. The 1911 census indicated more than \(10,000,000\) in the lower schools, about 23,000 in the technical sehools, and about 80,000 students in universities, some of which are celebrated and ancient. The University of Berlin, although only sllghtly. over 100 years old, led with 11,807.

Imports in 1920 were \(99,077,000,000\) marks in value, and exports \(69,420,100,000\) marks.

Vessels entering German ports in 1919 numbered 39,420 , of \(7,718,780\) tonnage.

The railway mileage of Germany totalled in 1920 35,919, of which 34,689 miles are government owned.

Trade with the United Ştates was:
Imports, 1920-21
. \(\$ 381,869,349\)
Exports
19210-21
350,442,438
1921-22
90,773,014

\section*{GREECE, KINGDOM OF.}

AREA, 41,933 square square miles of old Greece; 6,919 square miles of the newer territory; total, 48,852-the new territory being Macedonia, Epirus, and the Aegean Islands.
POPULATION, census of \(1920,4,777,380\); divided, old Greece, 2,800,164: newer territories, \(1,977,216\) -Macedonia, 1,144,310; Epirus, 213,276; Crete and six other Aegean islands, 619,630.
CAPITAL, Athens; population, 1920, 300,701; other eities, Salonica, 170,195; Piræus, 133,482; Patras, 52,133 ; and 27 of more than 4,500 population.
King. George II., born July 19, 1890; married on Feb. 27, 1921, to Ellzabeth, eldest daughter of King Ferdinand and Queen Marie of Roumania; succeeded his father, King Constantine, who abdicated for the second time, 1922. Constantine who succeeded his father George I., assassinated March 19, 1913, had abdicated in favor of his second son, Alexander, on June 11, 1917, but had been recalled to the throne by a plebiscite following the death of King Alexander, Oct. 25, 1920.
Premier, M. Krokidas (Interior.)
Minister to the United States, Lambros A. Coromilas Consuls in the United States, at New York, George Dracopoulos; at Boston, Leonidas Mateis; at Chicago, Panayiotis Armyriotis: at New Orleans, Leonidas Crysanthopoulis; at St. Louis, Hector M. Pesmazoglou; at San Francisco, C. Panagopoulos.
United States Minister, vacant.
United States Consul General, at Athens, Will,L. Lowrie. Consuls, at Patras, George K. Stiles; at Salonica, Leland B. Morris.
By the Treaty of Sevres, 1920, Greece obtained western and eastern Thrace, which stretched along the north shore of the Straits of the Dardanelles and the Sea of Marmora as far as tne Bosporus, Turkey being expelled from ali except Constantinople and a triangular district about 30 by 40 miles. The Straits were placed under Allied control,' the European shore to be under Greek sovereignty, but a neutral zone being established nine miles inland. Thrace, however, has reverted to Turkey by agrecment between Great Britain, France, Italy, Turkey and Greece, following the defeat in September. 1922, of the Greek Army in Anatolia by the Turkish Nationalist Army under Mustapha Kemal Pasha. (See Turkey.)
Part of the west coast of Asia Minor, of which Smyrna was the chief city and port, aiso given by the treaty to Greece for administration, though under Turkish sovernignty, was lost in this campaign and reverted to Turkey. Greece also recelved the whole coastline of the Acgean Sea and the land back to the crest of the mountains from Bulgaria. Greece's net gain in territory from the war was part of Macedonia, Epirus and six Aegean islands. Crete (Candia) had been annexed in 1913.

In 1912 and 1913 Greece warred with Turkey, and with Bulgaria in 1913, and added to the Grecian area 16,919 square miles of territory, Macedonia Epirus, the Aegean Islands, and Thrace, which the Treaty of Sevres, as heretofore shown, confirmed to Greece as her permanent territory.

Greere occupies the southern peninsula of the Balkans, stretehing down into the Mediterranean Sea, with the Ionian Sea in the west, and the Aegean Sea in the east. On the northwest lies Albania, on the north Jugo-Slavia and Bulgarla, and on the northeast corner Turkey, the exact boundary being as yet undetermined. It is about, the slze of the State of New York. The Indus Mountains, with many spurs, a contilluation of the Balkans, runs tinough the country from north to south. Gulfs and bays are many; the Gulf of Corinth, connected by an 18-nile canal with the Gulf of Aegina, prac-
tically cuts off Sparta from Africa and the northern part of the country.

The authentic history of Greece begins in \(776 \mathrm{~B} . \mathrm{C}\). and it obtained its greatest glory and power in the anth century B. C. It became a province of the Roman Empire in 46 B . C., of the Byzantine Empire 395 A. D., and conquered by the Turks in 1456. Greece won its war of independence in 1821-29 and became a kingdom under the guarantee of Great Britain, France and Russia.
Greece proper is chicfly agricultural, with little manufacturing. Oniy one-fifth of the total area is arable, \(12,350,000\) of the total of \(16,074,000\) acres are covered by mountains and lakes and rivers. The forests have been seriously destroyed, but efforts are making to reforest. About \(1,300,000\) short tons of crops were taken in 1919 from \(2,500,000\) acres, of which wheat was the chiel crop, at 290,000 tons from 373,400 acres. Currants are largely cultivated: 149,000 tons were produced in 1919 and 95,000 tons in 1920. Also barley, oats, corn, tobacco, cotton and wine are produced. Olives abound on about 117,000 acres, and nuts, figs, rice and fruits are produced. Dairy products are of value. Mineral wealth, naturally great, is being rapidly developed, the 1920 output being 155,000 tons. The minerals are lead, magnesia, nickel, zinc, salt, iron pyrites, manganese, iron, emery and chromite, and lignite coal.

The 1917 industriai census showed 2,313 factories, employing 36,124 persons, the output being valued at \(260,363,000\) drachmas. Cotton mills employed 10,875 persons working 168,000 spindles.

Railway mileage is about 1,470 , mostly state owned. There are about 50,000 miles of highways.

The merchant marine in 1921 had 1,192 salling vessels of 113.726 tonnage, and 408 steamers oí 402,221 tonnage. In 1920, there were 2,936 steam vessels entered Grecian ports, of a total tonnage oi \(3,640,017\) tonnage, and 2,600 sailing vesseis of 62,083 tonnage.

The Greek Orthodox Church claims the great majority of the people, that being the state religion.

Instruction between ages of 6 and 12 is compulsory, but the law is not weil enforced in rural regions.

The unit of the currency is the drachma, its gold par being 19.3 cents. Exchange Nov. 1, 1922, was 4.03 .

Imports in 1920 were \(2,131,038,321\) drachmas; exports, 664,112.647.
The budget of 1921 showed receipts of \(1,298,759,-\) 754 drachmas, with expenditures the same. No budget was submitted for 1921-22.

The public debt, March, 1921, was 4,200,000,000 drachmas.

\section*{CUATEMALA, REPUBLIC OF.}

AREA, 47,500 square miles.
POPULATION, estimated, \(2,000,000\).
CAPITAL, Guatemala, pop. estd. in 1910, 90,000. It was completely destroyed by earthquakes Jan. 3 and 4, 1917, and rebuilding has bcen very slow. No estimate is available of its present population.
President, Gen. Jose Maria Orellana, 1922-26.
Premier, Sr. Aldrian Recinos (Foreign).
Minister to the United Staies, Sr. Don Francisco Sanchez Latour.
Consuls General in the U.S., at New York, vacant; at Jersey City, Virgilio Rodriguez Beteta; at Chicago, Julio J. Brower: at Boston, A. C. Garcia; at New Orleans, vacant. Consuls, at San Francisco, Gregorio Cordoza; at Mobile, Guillermo Valenzuela; at Providence, Eduardo G. Kelton. United. States Minister, Roy T. Davis (also accredited to Costa Rica).
Untted States Consul, at Guatemala, Arthur C. Frost.
Guatemala, the northern state of Central America, lias Mexico for its neighbor on the north and west, British Honduras on the east, Honduras and Salvador on the east and south and the Pacific on the southwest. A range of mountains containing many volcanic peaks runs from northwest to southeast near the Pacific. The narrow west slope is . Well watered, fertile and the most densely settled part of the republic.

The broad eastern slope is sparsely settled and its chief commercial importance is the production of bananas and timber and chicle (gum) in the Peten district. Coffcc and sugar are the chief crops. Stock raising is an important industry. Though rich in mineral resources little is mined owing to lack of transport. Tcxtlies, machinery, etc., and foodstuffs are the chiel imports.

Guatemala has about 612 miles of railroads, privatefy owned but subsidized by the Government. Good roads are few. In 1919 there entered her ports 601 ships of 695,835 tonnage.
Guatemala has a Constitution proclaimed in Dccember, 1879, modified on four occasions, that now provides for universal suffrage, a President elected for six years, a National Assembly, elected for four vears and a Council of State of 13 members, partly elected by the Assembly and partiy appointed by the President. The Roman Catholic is the prevailing religion. Therc is complete freedom of worship. Education is free and nominally compulsory. About 60 per cent. of the population is pure Indian and most of the remainder are half castes. Many are held on plantations under a system of peonage. The army numbers 6,200 , With a reserve of 126,000 .

Manuel Estrada Cabrera ruled the country as a dictator for 22 years. He was turned out in April, 1920, by a revolution which put Carlos Herrcra in the President's chair. The latter was overthrown by a coup d'etat Dec. 6, 1921, and Gen. Orellana made Provisional President, being inaugurated for a six-year term, Maich, 1922.

Guatemala is a member of the League of Nations.
Guatemala is on a silver basis; the peso is 25 grammes in weight, 900 fine. Its value varies, therefore, according to the price of silver. No silver is In circulation. Nominally, silver peso \(=50.7\) cents. Impolts, 1921. Exports, 1921.

\section*{HAPTI, REPUBLIC OF:}

AREA, 10,204 square miles.
POPULATION, estimated, 2,000,000.
CAPITAI, Port-au-Prince, pop. (estd.), 120,000. President, Louis Borno, 1922-26.
Premier, Leon Dejean (Foreign and Worship).
Minister to the United States, Albert Blanchet.
Consul General, at New York, Andre Faubert; Consuls, at Boston, B. Preston Clark; at New Orleans, Emile Marcelin; at Mobile, T. G. McGonigal.
United States Minister, Arthur Bailly-Blanchard.
United States Consul, at Port-au-Prince, vacant; at Cape Haiten, Damon C. Woods.
Haiti occupies the western portion of the Island of San Domingo, the second largest of the Greater Antilles, lying between Cuba on the west and Porto Rico on the east. The boundary which separates it from the Dominican Repubilc to the east is 193 miles long. The island is the most fertile of the West Indies. The mountains are covered with rich forest and can be cultivated to the top. Prospecting indicates great mineral wealth, wholly undeveloped, Stock raising is negiected. Coffee is the most im portant crop and the production of logwood, sugar, cocoa and cotton is increasing.

The majority of the population are Negroes, the rest mostly mulattos descended from the former French settlers. There are about 5,000 foreigners, of which 10 per cent. are white. The Roman Catholic religion prevalls. Education is nominally compulsory, but the system is poor and very lax. French ts the language of the country.

Flaiti, discovered by Columbus in 1492, and a French colony from 1677, attained its independence in 1803 following the revolution headed by Toussaint l'Ouverture in 1791. Its history has been a series of political disturbances and bloodshed. From 1910 to 1915 there were seven Presidents; the last, Gen. Sam, assumed office March 4, 1915; took refuge in the French Legation, July 26, 1915 , whife 200 political prisoners were massacred in jali, and at the funeral of the victims he himself was dragged out and killed. Two hours later a United States cruiser arrived at Port-au-Prince and landed marines. Unlted States forces occupied the country and restored order.

Sudre Dartiguenave was elcrted President on Aug 12, 1915, by the Nationai Assembly which in November ratified a treaty with the United States (which ratlfied it Feb. 28, 1916), establishing a political and fiscal protectorate by the United States over Haiti for a period of 20 years. The treaty provides that the President of Haiti dppoints on nomlnation by the President of the Unlted States a general recelver of customs to take charge of the custom houses; a inancial adviser; American officers (drawn
from the U.S. M. C.) to organlze a Haitian constabulary to replace the armed forces, and engineers to supervlse publle works and sanitation. Haiti agreed not to increase the public debt without consent of the United States. The United States undertook to intervene when necessary for the preservation of Haitlan independence and the maintenance of a stable and efiective government. The armed constabulary now numbers 2,644 men and order has been maintained. The reserve numbers 20,000 . Several hundred miles of roads have been built and a rallroad from Port-au-Prince to Cape Haitien, 169 miles distant, \({ }^{\text {P }}\) is under construction. In 1919 there entered the ports 1,469 ships with tonnage of 91,489 .

The Constitution of 1918 provides for a Senate of 15 members for 6 years, and a Chamber of Deputies of about 40 members for 2 years, all elected by popular vote, and a President elected for 4 years by the Natlonal Assembly in joint session. The division of authority between the Constitutional Government, the treaty officials and the military occupation has been the cause of much friction, and a delegation visited the United States in 1921 to urge a rearrangement. In September, 1922, Haiti floated a \(\$ 16,-\) 000,0006 per cent. 30-year loan in New York, belng part of the \(\$ 40,000,000\) loan provided for in the protocol betwcen Haiti and the United States, concluded Oct. 3, 1919. It is secured by the customs and internal revenues. The average annual income of Haiti for the past six years has been \(\$ 4,776,448\), ?nd the revenues for the first eight months of the iscal year, 1921-22, amounted to \(\$ 3,922,558\).
Following the floatlng of a Haltian loan of \$16,000,000 30-year 6 per cent. bonds in New York, for the refunding of the two outstanding French loans, John A. McIlhenny resigned as financial adviser to the Haitian Government and was succeeded by John S. Hord.

Haiti is a member of the League of Nations.

Honduras is an agricultural and eattle raising state of Central America, bounded on the north by the Caribbean Sea, on the east and south by Nlcaragua, on the south and west by Salvador and on the west by Guatemala. The latter boundary is now being determined by a scientific party administered by the Amerlcan Geographical Soclety. The coast line on the Caribbean is 400 miles long, the ehief ports being Truxillo, Tela Puerto Cortez, Omon, Roatai and La Ceiba. On the Pasific side it has a corst llne of 40 miles on the Gulf of Fonseca with a port, Amapala, on Tiger Island, three hours by motor boat from San Lorenzo on the mainland, connected with the capital, 82 miles, by a good automoblle road. The country is mountalnous, very fertile, though mostly uncultivated, and covered with rich forests.

Mineral resources are abundant but undeveloped. The chief export is bananas, grown on the Carribhean coast \(11,524,149\) bunches belng exporter in 1920; exports of cocoanuts that year beinis 12,64.7,508. Cattle and hides are also exported. Trans-
port is very backward but is being improved. The country has 463 miles of railroads, laid mostly to provide for the fruit trade. The inhabitants are chiefly Indians with an admixture of Spanish blood.

The country is governed under - a Constitution, adopted Sept. 2, 1904, which provides for the direct election by the people of a President for a six year term and a Chamber of Deputies of 42 members, chosen for four years. The President appoints a Cabinet of five Ministers. Education is free and compulsory. The Roman Catholic is the prevailing religion. There is a university at the capital. Military service is compulsory, with 2,900 in the regular arny and 43,577 in the first line of the reserve. Of the export and import trade 95 per cent. is with the United States.

The five Central American republics proclaimed their independence as a confederation, July 1, 1823. This confederation soon broke down but renewed efforts were made again and again to re-establish it. The last attempt was made on Sept. 15, 1921 when Honduras, Guatemala and Salvador signed the Constitution of the Federation of Central America. This was to come into effect on Feb. 1, 1922, but collapsed after the Herrera administration in Guatemala was overthrown.

In 1907 representatives of the five Central American states, Mexico and the United States, met in Washington and agreed to adjust any differences that might arise \(\ln\) a Central American Court of Justice. whieh trlbunal was later set up at Cartago, Costa Rica, composed of five Judges. one from each state. On Aug. 20, 1922, on board the U. S. S. Tacoma, In neutral waters of the Gulf of Fonseca, the Presidents of Honduras, Nicaragua and Salvador signed a treaty renewing the treaty of 1907 and extending its scope especially to make impossible the fomenting of revolutions from the territories of neighboring states. The Presidents of Guatemala and Costa Rica were lnvited to adhere to this agreement and a commercial and economic conference was called. Guatemala declined.

Honduras ls a member of the League of Nations.
Honduras is on a silver basis. The peso nominally is equal to 50.7 cents, but fluctuates with the value of silver

\section*{HUNGARY.}

AREA, 35,654 square miles. (Some boundaries to be determined).
POPULATION, census of \(1921,7,840,832\).
CAPITAL, Budapest, census of 1921, population, 1,184,616; other cities, Szegal, 109,896; Debreczen, 103.228; Kecskemet, 72,76S; and eight others from 40,000 to 60.000 .
Regent, Admiral Nicholas von Horthy, born 1867; elected March 1, 1920.
Premier, Count Stephen Bethlen (April 14, 1921). Minister to the Unitrd States, Count Laszlo Szechenyi. Consul General, at New York, Charles Winter.
United States Minister, Theodore Brentano.
United States Consul, at Budapest, Edwin Carl Kemp.
Hungary for a thousand years has been the abode of the Magyars. Formerly a klngdom forming an integral part of the Austro-Hungarian Empire, becoming an independent republic after the war. it was much reduced in slze by the Treaty of the Trianon, June 4, 1920, losing Transylvanla to Roumania, Croatla and Slavonla to Jugo-Slavia. Pre-war, it had \(25,000,000\) population on 125,608 square miles of territory, or about the size of the States of Ohio, Kentucky and Tennessce; now it is slightly smalier than Indiana, wlth \(7,840,832\) population on 35.654 sq . mles. Hungary is now a flat plain with insufficient fuel, no watcrpower and a scarclty of raw materials. The Jugo-Slavia and Roumanla boundaries are to be determined by a mixed commlsslon. The subtraction of territory took away from the country \(21,841,143\) domestlc animals, \(7,821,362\) for Roumania, \(3,239,164\) for Czecho-slovakia, 2 439,066 for Jugo-Slavia and 325.687 for German Austria, leaving Hungary 6,432,744.

Agricuiture is the chief activity, with great varlety. The soli is fertile; in 1920 , from \(3,700,000\) acres Hungary produced \(10,600,000\) qulntais o wheat, barley, rye, and oats. From the 533.000 acres of vineyards excellent wine is produced.

Forests cover \(1,357,433\) of the total of \(22,784.000\) acres of the country. Coal production in 1920 was \(4,458,694\), plus brown coal and lignite. There were 4,372 miles of railroads in 1921, of which 1.858 were state owned. Hungary now has no seaport. She has 687 miles of navigable rivers.

On the breakup of the Dual Empire, Oct. 31, 1918, a revolution began the movement for a republic, King Charles abdicating Nov. 13. Three days later the republic was proclaimed with Count Michael Karolyi as Provislonal President. Disorder followed; a Bolshevik government with Bela Kun dominant was set up March 22, 1919, but was swept away with asslstance of the Roumanian army. A national government was re-established on Aug. 7, 1919. Electlons, with universai suffrage, were held in January and February, 1920, a bloc of parties of the Rlght succeeding to controi of a Provisional National Assembly which elected a Regent offcially styied "Protector of the Magyar Republic." On March 23, 1920, a Government order declared Hungary a monarchy. However, two attempts of the late King-Emperor Charies to regain the throne in 1921 falled dismally.
Freedom of religion is a fundamental tenet of the new state, wlth equality between the many divergent sects. Four state universities have 4,750 students. The national army under the treaty is limited to 35,000 men and officers, all volunteers; other forces numbering 31,500 being police, gendarmerie and customs guards. Hungary has no air force.
Hungary became a member of the League of Natlons in Septembcr, 1922.

The crown is the unit of currency, goid par of exchange being 20.26 cents (exchange, Oct. 15, 1922, being .0415 eents). Imports in 1916, last reliable figures, \(3,250,000,000\) crowns; exports, \(2,650,000,000\). Buđget 1922

\section*{ICELAND, KINCDOM OF.}

AREA, 39,799 square miles.
POPULATION, census of \(1920,94,690\).
CAPITAL, Reykjavik; population, 17,976; other towns, Akrureyri, 2,700; Vestmannaeyjar, 2,519; Hafnarfjordur, 2,310; Isafjordur, 2,175.
King, Charles X. (See Denmark).
President of the Council, Siggudur Eggers (Justice and Ecclesiastical Affairs).
Iceland is an island in the North Atlantic Ocean wlth an area nearly equai to that of Kentucky. It is of voicanic origin and has many geysers and hot springs. It is treeless. Agriculture engages 43,411 ot the people, who produce hay, potatoes and turnips mostly. Domestlc animals number 651,000 , including 579,000 sheep (census of 1918) and furnish five-slxths of the exports. The fisheries output in 1918 was valued at \(22,600,000\) kroner. Imports include all necessaries. There are no railways, but 320 miles of roads. In 1917, 178 vessels with tonnage of 61,432 entered the ports.

Iceland was an independent republic from 903 to 1263, when it joined with Norway. The two came under Danish rule in 1381. When Norway separated from Denmark in 1814, Iceland remained under Denmark. In 1918 Denmark acknowledged Iceland as a sovereign state, united with Denmark oniy in that the Danish King, Christian X., was also to be King of Iceland. Its permanent neutrality was guaranteed. Provislonally untii 1940 Denmark has charge of its foreign affairs, and a joint committee of six reviews bllls of importance to both states.
Iceland has evolved strange social customs and traditions; is admitted to have attained approximately to absolute justice of the sterner sort, and in its constltutional monarchy to have developed an excellent democracy

Leif Erlcsson, the Norseman, sailcd from Iceland in the year 1000 and discovered the American mainland, starting a colony calied Vinland, probabiy at New Bedford, Mass.

MESOPOTAMIA.
(British Mandate.)
AREA, 143,250 square miles.
POPULATION, census of \(1920,2,849,282\); divided, Sunni Mohammedans, 1,146,685; Shi'ah Mohammedans, 1,494,015; Jews, 87,488; Chrlatlans, 78,792 ; of other reiligions, 42,302.
CAPITAL, Bagdad, population, 1920, 170,000; port, Basra, population, 85,600 ; Mosui (on the site of Nineveh), 90,000
King, Feisal, third son of Ei Husein ibn Ali, King of the Hejas, crowned Aug. 23, 1921.
Premier, The Naqib of Bagdad.
High Commissioner of Great Britain, the Mandatory Power, Sir P. Z. Cox.
U. S. Consul, at Bagdad, Thomas R. Owens.

Mesopotamia (in classical days "the country from Mosul and Tikrit on the Tigris to the borders of Syria") is the name now appiled to the whole Euphrates country in southwest Asia-the former Turkish Villayets of Basra, Bagdad and Mosul. The Arab name for this territory is Iraq. It is bounded on the north by Kurdistan; on the east by Persia; on the south by the Persian Guif and Kuwait and on the west by the Arabian and Syrian deserts. The boundary ines are indeterminate. It is as large as the States of New York, New Jersey, Pennsylvania and Ohio

The country is a great ailuviai plain stretching from the Persian Gulf 400 miles north, rising in roliing hills in Mosul and beyond to the limestone mountains of Kurdistan. The climate is subtropical and the rainfall (all in the winter months) is scanty, Bagdad averaging 6.64 inches in 29 years. The temperature varies widely; 120 in the shade is not uncommon, and severe frosts in the winter. The country is unhealthy, demanding extreme care. Mosquitoes and sand flies are pests, and maiaria and "Bagdad boils". are common. Dysentery and fever are prevalent; cholera, the bubonic plague and typhus fever have frequently. scourged the country.

The soil is of extraordinary fertility and engineers estimate that the Tigris-Euphrates Fivers couid irrigate \(7,000,000\) acres in winter and \(3,000,000\) of varied crops in summer. Half of this area, the report of Sir William Willcocks further declares couid be immediately reclaimed if the ancient system of canais and drains were restored. Oniy regulatory work is attempted at present and about \(1.500,000\) are under water and improvements in methods of cultivation are urged. Wheat, bariey, rice and millet are the chief crops with tobacco in the Kurdish hills. Cotton is being grown and large yields are possible. Dates are grown in the tidal stretches of the shatt el Arab and the hundred mlles from Fao to Qurna on both sldes of the river is a continuous date grove Dates are a staple food of the Arabs and in \(1919 £ 1,470,000\) worth were exported. Large flocks of sheep are raised in the north and wool and skins form a considerable export. Industries, weaving, silk spinning, leather working, etc., are for the iocal market only.

The chief port is Basra, 70 miles up the shatt el Arab from the Persian Gulf. A raiiroad runs from Kalat just south of Mosul to Bagdad (designed to be part of the Berlin to Bagdad railroad) and the English have connected Bagdad and Basra by rail (opened Jan. 13, 1920).

The great value of the country to Great Britain is its petroieum. In southeastern Mesopotamia, Great Britain has built great refineries to handle the product of the country and of Persia which is now comparativeiy small but the reserve is great The mandate under the Treaty of Peace with Turkey, 1920, for Mesopotamia as an independent state, was lntrusted to Great Britain by the Allies, British and Indian forces having conquered the country durlng the World War, occupying Basra on Nov. 22, 1914 and Bagdad March 11, 1917. A Britisll High Commissioner set up a provisionai Arab Government with the Naqlb of Bagdad at the head, in November, 1920. Emlr Felsal, thlrd son of the Grand Snerif of Mecca, now King of the Hejas, who made a notable reputation as a soidier during the war and as a diplomat at the Paris Peace Conference, presented himsclf as a candidate for the throne. He was chosen ruler by acclamatlon as a constitutlonai democratic sovereign, a choice subsequently ratifled by a rcferendum, and was crowned at Bagdad Aug. 23, 1921. Since then the British garrison has been gradualiy reduced.

A treaty of ailiance between Iraq and Great Britain was signed on Oct. 10, 1922. Under it King Feisal agrees to be guided by the advice of King Gcorge on International and financial obligations and interests for the whole period-twenty years-of the treaty. Great Britain agrees to give
such support and assistance to the armed forces of the Klng of Iraq as may be necessary Budget, 1919-20-Receipts

\section*{ITALY, KINCDOM OF.}

AREA, Prewar Italy, 110,632 square miles; terrltory added by the war, Alto Adige, 618 square miles; Carinzia, 113; Carniola, 782; Gorizia and Gradlsca, 1,138; Triest, 37; Istria, 2,035; Trentino and Ampezzano, 2,627; total, 7,350. Grand total, 117,982. Colonial possessions, Eritrea, 45,435 square mlles; Somalliand, 139,430; Llbya, estimated (southern boundaries undetermlned), 406,000 ; total, 590,865 .
POPULATION, Prewar Italy, census December 1921, \(37,270,493\); population added by the war, Alto Adige, 24, 345; Carlnzia, 7,667; Carniola, 88,505; Gorizia and Gradisca, 260,749; Triest, 229,510; Istria, 404,309; Trentlno and Ampezzano, 393,111; Zara, 32,551; total, 1,564,691; grand total, \(38,835,184\). Colonial possessions, Erltrea, pop. census of 1920, 402,893; Somaliiand, estimated, 650,000 ; Libya, estimated, \(1,000,000\) total, 2,052,893.
CAPITAL, Rome, pop. 1920, 650,000; other eltics, Naples, pop. 723,208; Milan, 663,059; Turin, 451,994; Palermo, 345,891; Genoa, 300,139; Florence, 242,147; Catania, 217,389; Bologna, 189,770; Venlce, 168,038; Messina (1921), 126,557; Bari, 109,218; Leghorn, 108,585; Padera, 105,135; Ferrara, 102,550; Brcslre, 89,622; Verona, \(86,448\).
King, Victor Emmanuel III., born Nov. 11, 1869, succeeded his fatber, King Humbert I., July 29, 1900; married Helena, daughter of Nicholas, King of Montenegro, Oct. 24, 1896; children, Crown Prince Humbert, Prince of Piedmont, born Sept. 15, 1904; Princess Yolande, born June 1, 1901; Princess Mafalda, born Nov. 19, 1902; Princess Giovanna, born Nov. 13, 1907; and Princess Maria, born Dec. 26, 1914.
Premier, Benito Mussolini (Interior and Foreign Affairs)
Ambassador to the United States, Prince Gelesio Caetari.
Consul General in the United States, at New York, Tenistode Bernardi; Consuls, at Boston, Marouis Agostino Terronte di Ruffano; at Philadelphia, Chevaiier Luigi Stillitti; at New Orleans, Count Guglielmo Silenzi; at Washington, Salvatore Floria; at Chic:ago, Count Giuiio Bolognesi; at San Francisco, Vincenzo Fileti; at Denver, vacant. There are consular agents at many other cities. United States Ambassador, Richard Washburn Child.
United States Consuls General, at Rome, Francis B. Keene; at Genoa, John Ball Osborne. Consul., at Catania, Carl I. Loop; at Florence, W. Roderick Dorsey; at Leghorn, Lucien Memminger; at Messina, Benjamin F. Chase: at Miian, Clarence Carrigan; at Napies, Homer M. Byington; at Palermo, Edward L. Nathan; at Triest, Joseph F. Haven; at 'Turin, Dana C. Sycks; at Venice, James B. Young.
The Klngdom of Itaiy occupies the entire Italian peninsula, stretching from the Alps southeast into the Mediterranean, with the islands of Sicily, Sardinia, Elba and about 70 smailer ones. On the east is the Adriatic Sea which it dominates, on the south, the Mediterrancan, on the west between the malnland, Sicily and Sardinla is the Tyrrhenian Sea, and further north the Ligurian Sea. The marltime Aips on the west separate it from France, the Swiss Alps in the north from Switzeriand, and the Dolomites Alps from Austria, and the Carnac and Julian Alps on the cast from Jugo-siavla. The great piain shut in by these huge mountains, and the Ligurian Apcnnines, and watered by the Po ( 220 miles long) and the Adlge, shared by the provinces of Pledmont, Lombardy, Emilia and Venetia, stretches across the top from the Maritime Aips to the head of the Adrlatic. Its maximum length is 360 mlles. The Ligurian Mountains circling the Gulf of Genoa run down the middle of the penlnsuia as the Apennines, with many summits ilke Monte Cimonc Gran Sasso d'Italia ( 0,560 1cet) In Centrai Italy, ncaring the western coastline in Campagna and running down (with altitudes of about 6,000 feet), through the southern province, Calabria, to the "toe of the boot" at Cap Spartivento. Across the narrow stralt of Messina the mountalg range
continues theough the Isiand of Siclly with its
famous voicano Mt. Etna (altitude 10.755 feet). The active voicano Mt. Vesuvius rises to an altitude of about 4,000 feet on the Bay of Naples, and north of the Strait of Messina is the isiand volcano of Stromboli (3,040 feet).

The length of the peninsula is 760 miles, while its breadth nowhere exeeeds 150 miles and does not generaliy measure more than 100 miles. Italy is about equal in area to New England and New York together, and has morc than twice their population.

Two rivers, having the greatest historlc importance, rise in the Apennines, and flow west to the sea-the Tiber, whieh flows through Rome, and the Arno, which waters the Fiorentine plain. The rlvers in the south are unimportant. Between the spurs of the Aips lie seven beautiful Itaiian lakes, especialiy noteworthy being Como, Lugano, Magglore and Garda, the last being the largast and the last two over 30 miles long. All are of great depth.

The Adriatic coastline from Rimlni to Otranto is fiat with but one indentation, and with no harbors worthy of the name save Brindisi. The siit brought down by the Po, the Adige and the eastern streams, also rising in the Alps, have built out the iand from Ravenna to the Gulf of Triest, with marshes and lagoons so marked a peature of the mouths of the Po and of Venlce. Triest on the western side of the Istrian peninsula, and Fiume on the eastern side, were Austro-Hungary's seaports on the Adrlatic. Triest has been joined to Italy as a prize of war, and Fiume, after a bitter quarrel, oecupation by d'Annunzio's troops, and mueh negotiation, has been ereated by the Italian-JugoSlavian treaty (Nov. 12, 1920) a free city. Itailans who have not acquiesced in this settiement (the Fascisti) have tried during 1922 to upset this verdict (see Fiume; also chronology of the year for later developments).

The elimate of Italy is sunny, although northern Italy has a cold winter; snow is rarcly scen in Naples, and olives, oranges, lemons, figs, sugar cans, cotton and pomegranates flourish in Calabria. The soil is fertile and the peopie industrious and frugal. Italy, through drained before the war by emigration, is one of the most densely populated states in Europe.

The population is unusually homogeneous. In prewar Italy there were about 85,000 of Freneh origin, 10,000 Teutonic \(\ln\) the Val d'Aosta, 81,000 Albanian in Calabria and Sicily, 29,000 Greek, 43,000 Siav, mostly \(\ln\) Civldale, and 12,000 Spanish (Catalang) in Sardinia. In the "redeemed" provinces, formerly Austrian, annexed after the war, there are 215,345 Germans in Alto Adige and 13,920 in the Trentino; 326,715 Slovenes in the northeastern distriets, and 141,663 Croats in Istria. The religion of the great majority is Roman Catholie, the census reporting 123,253 Protestants; 34,324 Jews; and 847,532 of no religion. Emigra tion has been very heavy. The United States census of 1920 reported \(1,610,109\) Italian-born in the United States alone. In the decade before the war about 650,000 immigrants left Italy annually, and about 500,000 returned each year, being a net loss to Italy of \(1,500,000\) in that pcriod. It was estimated that the emigrants sent or brought home some \(500,000,000\) iire a year. In 1914 there were about \(1,500,000\) residing in Brazll, 1,000,000 1n Argentina, 450,000 In France, 220,000 in Switzerland, 120,000 in Germany, and 150,000 in Northern Africa. The war ehecked emigration greatiy, but it reached 230,000 in 1919 and 365,000 in 1920.

Agriculture is the ehief lndustry. Of a total of \(71,692,592\) acres \(65,995,000\) are under crops The number of peasant proprietors is large, es pecially in Northern Italy. The census of 1921 returned \(3,796,561\) as proprletors of lands, build ings or both. The wheat acreage in 1921 was 11,927,000 ; sugar bect, 125,000 . There are \(5,735,500\) acres given over to ollves and \(10,590,000\) to vineyards. The sugar output in 1921 was 170,466 tons Silk culture flourishes. Dairy farming and checse making is important in Northern Italy. Italy has suffered greatly from deforestation, but a determlned effort has of late been made to reafforest the country. The chestnut crop is of great value There are about 30,000 vessels and boats and about 110,000 men engaged in fishing

Italy is not rlch in mineral deposits and is especially lacklng in coal. Much hydroelectric power is going to waste in the mountains, but the work of harnessing the water is going on. In 1919 Itaily lmported \(6,220,000\) tons of coal, of which \(1,160,000\) were from the United States. The amount dropped in 1920, and about 1,200,000 tons of lignite were mined in lier 200 mines. Italy is almost the worid's laryest produccr of sulphur, chlefly in the volcanic reglons of Slclly, the amount in 1920 being 296,099 metric tolls. Poor in iroll. she produced 389,876 metric tons from 529 mines in 1920. The productlon
of zinc was 95,985 metric tons, and of lead 40,634 metric tons. The possession of the quicksilver mines of Idria in the territory taken from Austria, north of Fiume, makes Italy the foremost producer in the world, the output boing about 1,700 metric tons in 1919, and 1,400 in 1920 . The quarry metric tons in 1919, and

Italy's industrial development since 1880 has been great. The chlef industries have been stecl product-3, textiles, chemlcals, paper, etc. The difficulty of obtaining coal during and after the war, and the fall ln exchange, depressed all lndustry; unemployment was widespread, and strikes and in some clties the seizure of the plants by the working torces disarrangcd all industry.

Italy in 1920 had \(S, 761\) miles of state railroads operating under a heavy deficit, and 950 mlles of privately owned lines; the state had electrifled 639 miles by June 30, 1921, and will electrlfy about 4,000 miles in all. The number of shlps entering Italian ports in 1919 were: Italian. 93.397 , of 15,164,409 tons: foreign, 4,792 of \(8,929,230\) tons. The chief ports in order of tonnage entered were Gonoa, Naples, Palermo, Leghorn, Venice, Messina and Catania. in her 129903 tons In in 1922 were 825 steamers of \(3,129,903\) tons. In this vear the amount of ship subsidies granted was estimated as \(300,002,0\) ) 0 lire, the subsidy poilcy having begun in 1877 when \(9,000,000\) Was given.

Italy, divided, dismembered even for centuries, began to take shape as a unlty when, following the war of 18.59 , Lombardy, by the peace of Zurich, came under the crown of Klng Victor Emmanuel II. of Sardinia of the house of Savoy. By plebisclte In 1560 Parma, Modena, the Romagna and Tuscany jolned, to be followed at once by Sicily and Naples, and by The Marches and Umbria. The first Itallan Parllament assembled in February, 1861, and on March 17, 1861, declared Victor Emmanuel King of Italy. Mantua and Venetia were added in 1866, an outcome of the Austro-Prussian war. The Papal States were taken possession of by Itailan troops on Sept. 20, 1870, after the twithdrawal of the French garrison in the Franco-Prussian war (see Rome, See of), and by plebisclte on Oct. 2 were annexed to the kingdom, thereby rounding out United Italy. Italy suffered heavily in the World War, hor northeast provinces having been overrun by the Austrians and Germans after a crusbing defeat at Caporetto. Her loss in men was 650,000 killed and misslng. and the cost to the kingdom was 48,000,000,000 lire. The increase in territory that followed the war ls glven in detail above.

The country is governed under an expansion of the Constitution granted to Sardinia in 1848. The executive authority is exercised by the Kiag, acting through a Minister. The legislative power rests with the King and a Parliament of two Houses. The Sente is composed of nine Princes of the Blood and eminent men nominated for life by the King; the number in 1920 was 368 . The Lower House consists of 535 Deputies ( 1 to every 71,000 of the population) elected by districts directly. The electoral law of 1920 provldes for universal sutfrage of all men and women 21 years old, and the electoral reform of 1919 provided for proportional representation. The complexion of the House elected in May, 1921, was: Constitutlonalists, 275 ; Socialists, 122; Catholics, 107; Communists, 16 ; Republicans, 7 ; Germans, 4 ; and Slavs, 4.

The duration of Parliament is 5 years, but the King has power to dissolve the Lower House at any tlme; a new election must follow within four months. All money bills must originate in the Lower House.

The army on a peace basis numbers 250,000 men, with \(2,350,000\) in the reserve. Service is compulsory and universal. The navy has two strongly fortlfied naval bases, Pola and Spezia. Many of its prewar units have been discarded. (For present condition see Washington Arms Conference.)

Italy is a member of the League of Nations.
The percentage of illiteracy has been high in Italy, especiaily in Calabria, and the other southern proyinces, but in the last decade much progress has baen made in correcting it. Lower. grade education is compuisory. Italy has ten universities dating from the thirteenth. century or the first years of the fourteenth. Famous among these are Bologna (founded 1200), with 3,031 Students; Genoa (1243), 2,459 students; Naples (1224), 9,266 students; Padua (1222), 2,082 students; P3via (1300), 1,512 students; Pisa (1338), 1,729 students; and Rome (1303), 5,178 students. The total number of students at the 21 universities in 1919 was \(37,768\).

The lira ls the unit of currency. At par of exchange, lira \(=19.3\) cents; exchange rate on Oct. 15 , 1922, was 4.23 .

\section*{Italian Colonial Possessions.}

ERITREA.

\section*{AREA, 45,435 square miles.}

POPULATION, census of \(1920,405,681\), of which 2,435 are Italians.
CAPITAL, Asmara; population, 14,711
Governor, Marquis G. Ceirina Ferani; appointed 1919.
Italy's colonial venture in Arrlca began in 1870 When the port of Assab ln the extreme southern part of Eritrea was purchased. Lagging interest was revived in 1985 when the colonial project was vigorousiy pushed. An effort to establish a protectorate over Aby ssinia was made in 1889 but was upset by King Menelek who with an army of 80,000 annihilated a force of 12,000 Italians at the Battle of Adowa in 1896. Fritrea was constituted a colony in 1890.

Eritrea stretches for 620 miles along the Afrlcan coast of the Red Sea from Cape Kasar to Cape Dumeireh. To the west it is bordered by the Soudan and on the south by Abyssinia. The lowlands along the coast are very hot but the uplands are cool, sometimes cold. Irrigation is necessary to supplement rainfall for the crops and the soli is poor. Agriculture and stock raising are the chief industries. There is a railroad 75 miles long connecting the seaport Massawa (population, 2,275) with the capital, Asmara (altitude 7,765 feet), which is being extended via Keren to Agordat ( 109 miles) to open ut a cotton-growing district. Gold is mined in Hamassen and petr leum is found, but there has been as yet no development.

Efforts to settle large numbers of Italians in the uplands, the only part of the eountry where Europeans can live permanently, have been abandoned.

The budget for 1921-22 balances at 25,044,000 lire, but this includes a state contribution to the receipts of 6,650,000 lire.

The imports, 1920, were \(39,969,000\) lire, and exports, \(31,126,555\) lire.

\section*{ITALIAN SOMALILAND.}

AREA, 139,430 square miles.
POPULATION, about 650,000.
CAPITAL and port, Mogadishu; population, estimated, 14,000
Governor, Carlo Riveri.
Italy's African coxony, the Italian Somaliland, extends along the Indian Ocean from the Gulf of Aden to the Juba River. The coast line runs in a north-east-southwest direction, is \(1,100 \mathrm{~m}^{i}\) les long with no indentation of importance. Jubaland, the valley of the Juba River. Was taken from Kenya (German East Africa) and added to the eolony to balance British and French acqulsitions of 1ormer German possessions. Agrlculture and cattle and camel ralsing are the chief induatries. In 1920, 619 steamers of 161,481 tons, entered the ports.
The budget for 1921-22 balances at 12,992,000 lire; this includes a state contrlbution to the receipts of 5,593.000 iire.

The imports for 1920 were 28,44\%,389 lire and exports \(17,623,109\) lire.

TRIPOLITANIA AND CYRENAICA. (Italian Libya.)

\section*{AREA, 406,000 square miles.}

POPULATION, estimated, \(1,000,000\) (30 per cent. Arabs, 40 per cent. Negroes, 23 per cent. Jews, 7 per cent. Euroneans)
CAPITAL, Trlpoli, population, estimated, 73,000. and Benghazl, population, 35,000 .
Governor of Trinolitanta, Guiseppe Volpi, appointed 1921.

Governor of Cirenaica, Luigi Pirtor, appolnted 1922. Trlpolitanla and Cyrenaica, or Itallan Libya, in North Afrlca, extend along the Mediterranean Sea from Egypt on the east to Tunis (French) on the west. On the south they extend lnto the desert, the boundary line being unmarked though settled by treaty with France Sept. 12, 1919.

Tripoli, formerly one of the Barbary States and independent slnce 1714. was reconquered by Turkey
in 1835. During the Turko-Itailan war of 1911-12 Italy proclaimed the annexation of Tripoli, which was recognized in the Treaty of Ouchy, Oct. 18, 1912.

The terrltory was divided Into two independent districts for administrative purposes May \(17,1919\). In both provinces natives have equal rights with itaiians and there is a certain amount of local autonomy by elected locai Farliaments.

The prevaillng religion is Mohammedan and Arabic is generally spoken.

The country is rather barren but has date palm orchards, ollve groves, lemon, almond and fig trees, and vineyards. Some cereals. chiefly barley, are grown. Pasturage is abundant In Cyrenaica. Sponge flshing is important: the value of the product in 1920-21 was \(16,424,250\) lire. There is considerabie caravan trade to the south. The total railroad mileage is 163

The budget for \(1921-22\) balanced at \(176,752,200\) lire. This Includes a state contribution to the recelpts of \(86,821,100\) lire

The imports for 1920 were \(196,176,950\) lire and exports 62,897,225 lire

Trade with the United States was:
Imports 1920-21
212,758
1921-22

\section*{JAPAN, EMPIRE OF.}

AREA, Japan proper, 148.756 square miles. Korea (Chosen), 84,738 square miles; Formosa (Taiwan), 13,944 square miles; Pescadores (Hokoto), 47 square miles; Japanese Sakhalin (Karatuto), 13,253 square mlles. Total 260,738 square miles. POPULATION, Japan proper census of Oct. 1, 1920, 55,961.140; Korea, 17,284,207: Formosa, 3,654,398; Sakhailn, 105,765; total, 77,005,510. CAPITAL, Tokio, (Greater) population, 1922, \(5,164,300\); other cities with over 100,000; Osaka, 1,252,972; Kobe, 608,628; Kyoto, 591,305; Nagoya, 429,990; Yokohama, 422,942; Nagasaki, 176,554; Hiroshima, 160,504; Hakodate, 144,740: Kure, 130,354; Kanazawa, 129,320; Sendal, 118,978; Otaru, 108,113; Sapporo, 102,571; Kagoshima, 102,396 ; Yawata, 100,227 ; and 59 other cities with more than 30,000 Inhabitants.
Emperor, Yoshihito, born Aug. 31. 1879, succeeded his father, Mutsuhlto Juiy 30, 1912, married Princess Sadako, May 10, 1900; four sons.
Regent, Crown Prlnce Hírohito, born April 21, 1901, constituted Regent because of his father's Ill health, Nov. 25, 1921; betrothed to Princess Nagako Kuni.
Premier, Admiral Baron Tomosaburo Kato (Marine), born 1859, assumed office June 11, 1922.
Ambassador to the United States, Baron Kijuro ShIdehara.
Consuls General, at New York, Kyo Kumazaki; at San Francisco, Shichitaro Yada. Consuls, at Seattie, Hiroshi Saito; at Los Angeles, Ujiro Oyama; at Chicago, Kadzue Kuwashima; at Portiand, Ore., vacant.
Uniled States Ambassador, Charles Beecher Warren. United States Consuls General, at Yokohama, George H. Scidmore; at Seoul, Korea, Ransford S. Miller; Consuls, at Kobe, Erle R. Dickover; at Nagasaki, Henry B. HItcheock; at Nagoya, Harry F. Hawley; at Taikoku, Formosa, Harvey T. Goodier.
The island empire of Japan lies in the north Pacific Ocean off the coast of China and Siberia from the \(22^{\circ}\) north latitude, the southern point of Formosa (Taiwan) due east of Hongkong, to the \(51^{\circ}\) of north latitude, the last of the Kurile Islands, a few miles south of Kamchatka. It includes also the southern half of the island of Sakhalin, and the ancient Kingdom of Korea, annexed May 25, 1915, on the mainland. Japan also hoids the Kwangtung peninsula (Port Arthur and Dairen) on a 99-year lease, and has the mandate for the Marshall, Caroilne, Ladrone and Pciew Islands, former German possessions in the Pacific.

The southernmost island is subtropicai; the northernmost subarctic. Were the empire stretched out in the A tiantic off the eoast of the United States at the same latitudes Formosa would lie across Cuba and Southern Fiorlda. Tokio would be due east of Norfoik, Hakodate due east of New York, and Sakhaiin would ile athwart Newfoundiand with the northernmost isiand, Paramushir, off
Labrador. In area Japan proper is about the size of New York, New Jersey, Yennsylvanía and Ohio combined.

Japan proper, the ancient empire, bears a strong likeness to the British Isies, similarly separated from the continent of Europe; its 148,756 square miles compares with Great Britain and Ireland's 121,633 and its \(55,961,140\) inhabitants with the United Kingdom's 47,307,601. The Japanese coast is even more deeply indented, its coast line measur-
ing 17,150 miles. Few piaces in Japan are far removed from the mountains or really distant from the sea. The northern islands are a continuation of the Russian Karafuto chain running down through Yezo and the mainland. The continuatlon of the Kuentun mountain range of China appears in the zouthern islands, the ranges meeting in the grand Japanese Alps. In the vast transverse fissure crossing the mainiand from the Sea of Japan to the Pacific rises the group of voicanoes, mostly extinct or dormant, with the majestic sacred mountain Fujisan lifting its whlte cone 60 miles west of Toklo to an altitude of 12,425 feet. The earthquake zone -where the average is said to be four slight ones a day, with very serious ones only every six or seven years-has its greatest centre along the Pacific Coast near the Bay of Tokio.

The Pacifie Ocean here on the eastern coast of Japan is very deep. Soundings show 4,655 fathoms in what is known as the Tuscarora Deep (named after the United States man-o-war which made the survey). Many of the earthquakes with accompanying tidal waves seem to have their origin here and the configuration suggests a subraarine crater.
Separating the isiands of Shikoku and Kiushiu from the mainland is the wonderfully beautiful Inland sea opening both into the Sea of Japan and the Pacific. It is 255 miles long and 56 wide, with a coast line of 700 miles and a surface expanse of 1,325 square miles.

Heavy snowfalls are frequent on the Japan Sea slopes of the mountalns of Yezo, while the Pacific side, by which flows the Japan current, enjoys delightful winter weather. There is an abundant ralnfall. The streams are short, swift and often unruly, of little value for transportation, but offering a vast but as yet little developed supply of hydroelectric power. Myriads of waterfalls add their charm to the wonderfully beautiful scenery. The "Splendor of the Sun"' at Nikko makes an unbroken plunge of 350 feet. There are a thousand mineral springs.

Three-fourths of the mountain land is uncultivable, and the soil of the rest is only moderately fertile, yet by intenzive cuitivation, hard work and great frugality more than half the people wrest their living from the land. There is a rich supply of fish of many kinds in the sea and fish is a staple diet, so a hardy, daring, seli-reliant race of fishermen has been developed.

About three-fifths of the arable land is owned by small peasant proprietors, with holdings of an acre more or less, each. The rest is mostly worked by tenant farmers. More than half the land is used for growing rice, the staple food of the country. The number of acres planted in 1919 was \(7.761,527\); about \(300,000,000\) bushels is produced annually, the crop in 1920 reaching \(450,000,000\). Large crops are raised of wheat, barley, rye, millet, buckwheat, malze, beans and potatocs, also tobacco and tea. Mulberry trees are widely grown and in 1919 the number of families engaged In sllz culture was \(1,940,000 ; 6,294.736\) cocoon egg-cards were hatched, providing \(35,387,751\) bushels of cocoons. There were 3,848 factories engaged ln the slik Industry, employing 64,188 men and 430.110 women.

Forests cover \(36,000,000\) acres, about \(17,000,000\) belonging to the state and to the imperial household. Much cablnet wood is produced: the lacquer tree is largely cultivated in the north and the camphor tree furnishes much of the wealth of Formosa.

In the decade 1908-18 the number of industrial establishments doubied, increasing from 11,390 to 22,391 , with horsepower increased from 379,556 to 2,006,098; men operatives increased from 248,751 to 646,115 , and Fomen operatives from 400,925 to 763,081 . Government factories in the same decade decreased in number from 196 to 161 but doubled in power and jncreased somewhat in number of operatives, the figures for 1918 being men, 123,087 and women, 36,349 .

The cotton mills aiso prospered greatly during the War, the capital was increased 288 per cent. by June, 1920, over the pre-war figure, with 3, ©89,000 spindles as compared with \(2,409.900\) in 1914 . At the end of 1918 there were 6,710 factories with 65,316 men and 218.041 women operatives.

Japan has become a heavy producer of coal, \(31,271,000\) metric tons were mined in 1919, valued at \(442,540,941\) yen. The value of petroleum produced was \(42,562,023\) yen. Copper, \(67,581,475\) yen: of silver, 11,131,055 yen; and of gold, \(9,681,494\) yen. The difficulty of getting iron during the war compclicd Japan to lncrease its foundrips from 20 to 250 , and in 1919 these produced 613,000 tons of pig iron and 553,000 tons of steei. About 2,700 factorles were engaged in machine making, etc.

Shipbuilding enjoyed an enormous boom during the war. The number of shipyards increased from 6 to 57, with over six times the amount of capital and in 1914-18 the twelve leading yards built 233 steamers of a gross tonnage of 972,807 .

Trade with the United States was:
Imports, 1920-21...

\section*{1921-22.}

1921-22
\(\$ 189,181,585\) 248,716,339 253,217,835 307,514,995
Japan in 1920 had 6,202 miles of state owned railroads and 2,005 privately owned, a total of 8,207. Announcement has been made of plans to make the standard gauge 4.55 feet and to complete the work of rebuilding in 20 years. Comprchensive plans-have been made for the electrification of the Goverument railroads, the first snction to be the Takaido line, 408 miles, from Tollo to Kobe. A railway tunnel 7 miles long is under construction between the islands of Fiishu and Honshu under the Moji Shemonoseki Straits.

The Government subsidizes five shlpping companies for the foreign trade. The merchant navy in 1920 consisted of 3,031 steamers of \(3,011,634\) gross tons, 14,415 sailing vessels of 976,286 tons.

There entered the Japanese ports in 1920 11,948 steamers of \(25,239,591\) tonnage. Of these, 804 of \(3,148,126\) tons were American; 1,121 of \(4,781,888\) tons, British; and 9,802 of 16,756,868 tons, Japanese.

There are 60 harbors open to foreign trade, the most important being Yokohama, Kobe and Osaka on the Pacific Coast of the main island, and Nilgata on the Japan Sea coast, the port of transshipment for Vladivostok. Nagasaki, on IFyushu Island, Tamsul, in Formosa, and Fusan, in Korea, are the important ports.

The Japanese in continental United States, by the census of 1920 , numbered 111,010 (in 1910 there were 72,157). Of these there were 11,952 in California (an increase of 30,000 ), 17,387 in Washington, 4,151 in Oregon, and 2,686 in New York. In Hawail they number 100,274 of which about 17,000 in Honolulu are tradesmen and the rest labor on the sugar and pineapple plantations or are farmers. In the Philipnines there are 10,000 . There are abou?

16,000 in Canada, 3,000 in Mexico, 7,000 in Peru, \(\mid\) according to offcial reports, there were 181,206 in 30,000 in Brazil, 3,000 in Argentina. 18,000 in 1919, and in China proper, 31,987. The forelgn Malaysia, and 12,000 in Austraiasia. In Manchuria, \(/\) visitors to Japan number about 30,000 yearly.

Figures 1922-23 are budget estimates.
The financial years from 1877-78 to 1884-85 consist of 12 months each, from July 1 to June 30 ; the financial year 1885-86 comprises 9 months, from July 1 to March 31 ; and those subsequent to \(1886-87\) inclusive consist of 12 months each,

The Japanese fix 660 B. C. as the date of the accession of their first Emperor, Jimmu' Tenno, and count the present Emperor the 122 d of that dynasty. Ethnologists trace the origin of the Japanese people to Chinese, Korean, Mongol and Malayan sources, a stock mixture that has become thoroughly amalgamated. The hairy Ainus, now surviving in meagre numbers in the island of Yezo, are believed to be the remnants of the aboriginal inhabitants.

For eenturies closed to foreign influence or even contact the nation developed a high civilization and a wonderful body of art.. Efforts to penetrate the island empire by Dutch traders and by missionaries were equally barren of results. The United States expedition, commanded by Commodore Matthew C. Perry, U. S. N., which arrived in Yokohama in 1853, broke through the reserve and the treaty he sought of amity and the opening of the port to trade was signed in March, 1854 . This treaty was followed by a much broader one negotiated by Townsend Harris, the United States Minister, in June, 1857. In Japan then the ruling power was that of the Shogunate, whieh had been in control since the twelfth eentury. In 1868, however, the de jure Emperor Mutsuhito (ruled 1867-1912 and pos thumously styled Meiji) overthrew the Shogun after a short war and by 1872 had entirely suppressed the feudal system. The change and modification of Japan's soclal, industrial and political instltutions that followed has been the most eomplete and radical in history.

Able men visited foreign countries and adapted ideas and methods they found there to the needs of their country. The first railroad was begun in 1870. Compulsory military service was made obligatory in 1872, and army training and development on European llnes followed. In 1875 Japan got the Kurlle Islands from Russia, rounding off hrr empire to the north. In exchange she relinquished her claim to Sakhalin, the southern half she recovered in 1905 as spolis of the Russo-Japanese War. In 1876 she seized the Liukiu Islands, extending southward to Formosa and In the Chino-Japanese War of 1895 that great island, Formosa (13,944 square miles), larger than the State of Maryland, with a population of \(3,654,398\) and great potential wealth, was with the Pescadores her prize of War, and eompleted the southern half of lier territory. In that year of her first great mliitary success Japan drove the Chinese out of Korea, Southern Manehuria, and the Liaotung peninsula. Diplomatle pressure from Russia, France and Germany forced Japan to give up Port Arthur and withdraw from Korea, while Russia then obtained for herself from China a 25-year lease of the Liaotung peninsula with Port Arthur and Dalny the lee free seaport terminus, via the Manchurian railroad. of her Trans-Siberian railroad. Germany also to avenge two murdered missionarles compelled China to glve her a 99-year lease of Klaochow and 254 square miles of hinterland in Shantung.

In 1902 Japan made a defenslve alilance wlth Great Brltain whieh protected her from European interference when she fought Russla from February, 1904, to September, 1005. By the Treaty of \({ }_{1}\) Portsmouth Japan obtalned the recognition of her Lparamount rights in Korea (though that country reismained Independent), aiso the Russian lease of the
from April 1 to March 31. The figures for the financial years from 1875-76 to 1919-20 represent the settled accounts, those for the financial year 1920-21 the actual account on October 31, 1916
National debt (Feb. 28, 1922) yen \(3,524,336,596\)

Liaotung peninsula (later to be extended by China to 99 years), and also the southern half of the Island of Sakhalin. Moreover, Russia evacuated Manchuria, the development of which Japan coveted. In 1910 she annexed Korea.

Japan came into the World War under the treaty with Great Britain and drove the Germans out of Kiaochow and took the Marshall and Caroline Islands, former German possesslons. She took occasion to press her claims for control in China by presenting, on Jan. 18, 1915, the "twenty-one demands." To this China was then unable to reslst. By these Japan was to acquire all German rights in Shantung and no part of that province was to be leased to a third power. She also was to receive valuable railroad concessions there and in Southern Manchuria, commercial ports, special trading privileges and mining rights in Southern Manchuria and Mongolia: China also agreed to employ influential Japanese advisers in political, financial, military and police development. In fact, it was a virtual surrender of Chlna to Japan. In July, 1916, Japan and Russia slgned a treaty, practicaily an alliance, whereby Russia recognized Japan's special interests in China and recelved recognition of her special interests in Mongolia and Turkestan.

Japan announced on Oct. 10, that the former German leasehold of Kiaochow In Shantung, which was captured during the World War, would be restored to China nn Dec. 2, 1922, in carrylng out restored to chins of the treaty signed at Washington on the terms of the treaty signed at washington on
Feb. 4,1922 . On that date the official announcement of the Japanese members of the Shantung commission said, "the Japanese troops will wlthdraw, civil and military authority will be handed over and the Chinese flag will be hoisted for the first time since Germany acquired the territory in 18.8."

The last troops of the Japanese Expeditionary Army in Siberia left Vladivostok on October 25. The stores of arms and munitions, amountling to 300,000 tons, stored near that port belonging to the Allies and the United States were handed over to the "Red" army before their departure

Japan has announeed her determination to hold the northern half of Sakhalin Island untll her demands for reparation for the Nikolaievsk affair, where 600 Japanese were killed in 1920, have been satisfled.

Japan, previously an absolute monarchy, is now governed under a constltutlon promulgated Feb. 11. 1889. The Emperor, who is declared to be "sacred and inviolable," exereises the whole of the executive powers with the advice and asslstance of the Cabinet Ministers, whom he appoints and who are responsible to him. He deelares war, makes peaee and eoncludes treatles; he "exereises the legislative powers with the consent of the Imperial Diet;" he has supreme command of the army and navy; and he "determines the organlzation and peace standing of the army and navy". The Emperor has a privy councll to consult with on important affairs of state and which interprets the Constitution.

Every law requlres the consent of the Imperial Diet, which consists of two Chambers. The House of Peers numbers (1921) 394 members, 16 Prinees of the Biood, 13 Princes, 43 Marqulses, 20 Counts, 73 Viscounts, 20 Barons, 120 Iniperial nominees, and 45 representatives of the largest taxpayers,

The Hoise of Representatives has 464 members, elected for four years by \(2,800,000\) voters, who must be maies over 25 paying a direct national tax of not less than three yen. There has been much agitation for universal suffrage. The Cabinet has an entirely free hand to formulate polfcies of state quite independent of the political parties and of the House, and is often organized independent of it. When it can't control the House it dissolves the Diet. Every law requires consent of the Diet.

The power of the Diet is growing steadily and it has now become an absolute necessity for the Cabinet to control a majority of the Diet, for without its approval no important matter of state can be carried out. The power and influence of the military men, it is said, are declining.

An extra-constitutional but hitherto most influential body is the Genro or Elder Statesmen, consulted on grave matters of policy by the Emperor. Death has reduced their number to four-Prince Saionji, Marquis Matsukata, Viscount Kiyoura, and Admiral Count Yamamoto, all men who have played a distinguished part in public affairs. In Japan the outgoing Premier does not always recommend his successor, for the Ministry is not responsible to the Diet. In such instances the Emperor depends on the decision of the Genro.

Governors and sheriffs of prefectures are appointed by the Government. The Mayor is that one of three candidates elected by the municipal assembly who obtains the Emperor's approval. The elected Chief Magistrates of towns and villages must obtain the Governor's approval.

There is absolute religious freedom. The chief forms of religion in Japan are Shintoism and Buddhism. Neither has state support, Elementary education is compulsory. In 1919 there were 612 kindergartens with 51,834 pupils, and 25,625 elementary schools with 172,979 teachers and \(8,137,347\) pupils. Japan had in 1920 five imperial unjversities, and 11 other institutions of university rank; the total number of teachers was 1,868 and 32,434 students. The most influential is the Tokio Imperial University established in 1877, which has 417 teachers and 5,283 students.

Japan has twelve sects of Buddhism, 71,750 Buddhist temples, 181,100 Buddhist priests and \(51,511,100\) believers. The thirteen sects of Shintoism, which originated in the combined spirit of Japanese ancestor worship and Imperial veneration, centre in the shrines which number 171,725 , but the Shinto priests number only 14,900. There are twelve forms of Christianity in the empire. The Greek communicants number 65.615 , with 131 churches; the Roman Catholics, 14,200 with 189 churches; the Anglican and American Episcopalian Mission, 16,215 with 213 churches; the Methodist Mission, 13,356 with 181 churches, and the Congregational Mission, 15,847, with 151 churches.
Service in the army is universal and compulsory; actual service begins at 20 and lasts two years in the ranks for all arms. The peace strength of the active army is 300,000 men with a reserve of 2,350 ,000 . (For detailed figures of the navy see the special article on the Washington Arms Conference.)

\section*{KOREA (CHOSEN).}

AREA, 85,229 square miles (including islands)
POPULATION, 1920, 17,284,207, including about 337,000 Japanese and about 23,000 foreigners.
CAPITAL, Seoul; population, 1919, 250,942 (Koreans. 182,207; Japanese, 66,943); other cities, Fusan, population, 1919, 63,567: Pingyang, 62,775; Taiku. 40,065; Kaisong, 39,855; Chemuipo, 29,989 .
Governor-General, Admiral Baron gaito.
United. States Consul General, at Seoul, Ransford S. Miller.
Korea is an ancient kingdom with a history extending back to the twelfth century B. C. but during recent centuries the "Hermit Kingdom." It occupies a peninsula in northeastern Asia dividing the Yellow Sea from the Sea of Japan. The boundaries on the mainland are the Yalu River and the Tamean River. The mainland is as large as the State of Minnesota. Its coastline is over 6,000 miles long. Southern Manchuria lies along its northwest frontier for 500 miles and it touches Siberia for a few miles, a scant 100 miled from Vladivostok, in the extreme northeast. Situated between that Russian port and Port Arthur, then a Russian leasehold and subject to diplomatic control and penetration by Russia, Korea became to Japan "a dagger pointed at her heart"-the chief immediate cause of the Russo-Jananese War of 19041905. Atter this war the "complete independence" of Korea that had been recognized in the treaty followling the Chino-Japanese War of 1894-95 (Which also was for the control of Korea), gave way to a recognition by Russia ot Japan's paramount interest
in Korea. Japan continued her military occupation of the country, and in 1910 annexed Korea outright

The administration of the country has been in the hands of a military governor of high rank directly responsible only 10 the throne. The first was Gen. Terauchi, who on becoming Premier of Japan relinquished the office to Gen. Count Hasegowa.

Recent reforms, following nationalist disturbances make the Governor General responsibie to the Premier of Japan, open the office to clvilians, and promise steadily increasing measures of local autonomy and reduction of military rule.

The former Emperor of Korea is now known as H. I. H. Prince Yi Wang; he receives the treatment of a Prince of the Blood in Japan and enjoys an annual grant of \(1,500,000\) yen; the same as before annexation

Korea had no system of education when brought under Japanesc control, only about 10 per cent. of the children of school age, and these all of the upper classes, attended school where they learned something of the Chinese class es. At the end of 1918 , 462 public common schools had been established, attended by 76,898 boys and 10,481 girls. In addition there were 809 private schools of Which 323 were connected with foreign missions. There were also 380 purely Japanese elementary schools with 42,811 pupils. Secondary and technical schools in that year numbered 109.

Confucianism and Buddhism are the chief religions and Christianity has galned a great vogue among all classes. The mission force numbere about 2,500 with about 300,000 Korean converts.

The country is mountainous, especially in the north where the forests are of great value, and there is much mineral wealth awaiting development. There are extensive fertile plains well watered by good rivers in the south and west where are he five excellent harbors of Fusan, Mokpo, Chemulpo and Chinnampo. The larger rivers in the west can at full tide float boats far up the streams.. At Ninsen is a tide of 33 feet.

The climate is dry and bracing. The mulberry tree thrives, 60,000 acres being planted with them. Silk worm culture has been much encouraged by the Japanese and the quality of the cocoons improved. Some 400,000 families are engaged in the industry. The cultivation of tobacco is also fostered. Stock raising is everywhere an important industry. Af. forestation and irrigation are being systematicaliy carried on by the Government.
Mining concessions covering 270,000 acres,
nostly gold-bearing, which had been in the harids of mostly gold-bearing, which had been in the hands of about fifteen foreign corporations (four American) and individuals (four Americans) before annexation are respected, but a new law (April 1, 1916) prohibits foreigners from acquiring mining rights. Gold, silver, zinc, copper, lead, iron, tungsten, graphite, anthracite coal and kaolin are present. In 1919 the value of gold produced was 25,314,500 yen. The output of Pyongyang coal, anthracite (Government owned), in 1919. was 128,274 tons.

The trade of Korea is almost entirely in the hands of the Japanese, who also have provided 85 per cent. of the capital for the 1,500 factories already established.
The mileage of the Government owned railroads in 1921 was 1,603 . The chief line is the transpeninsula line ( 585 miles), from Fusan, where the Fusan-Shiminoscki ferry service connects with the Imperiai Japanese railroads, to Antung, at the mouth of the Yalu River across the Manchurian boundary where it connects with the Antung-Mukden line of the South Manchurian Raliway, thus forming part of the two international through traffic lines-Japan to China, and Japan to Furope via the TransSiberian Railway. The total investments in the Government railroads amount to over \(130,000,000\) yen, and the profts in 1920 and 1921 were 3,874,000 and \(6,627,000\) yen, respectively. There are 230 miles of privately owned railroads.

The unit of currency is the yen- 49.8 at par of exchange.

Korea was a drain on the Japanese Imperial Government until 1919 when the administration became for the first time financially independent. The budget for 1921-22 is balanced at 156,942,000 yen. Debt, Oct., 1920.

\section*{KWANGTUNG.}
\[
\text { (Leased for } 99 \text { years from China.) }
\]

AREA. 1,300 square miles.
POPULATION, census of 1919, 600,644 (534,849 Chinese and 65,692 Japanese)
CAPITAL, Dairen (formerly called Dalny) ; population, 1919, 108,228.

Civil Governor, I. Yamagata.
United States Consul, at Dairen, (vacant).
Kwangtung is the southern part of the Liaotung peninsula, the southernmost portion of Manchuria, which has the Bay of Korea on the east, the Yellow Sea to the south and the Llaotung Gulf on the west. Japan had taken it as spoils of war from China by the Treaty of Shiminoseki but was forced to turn it back by diplomatic pressure from Russia. Germany and France. Russia then leased it for 25 years from China, and constructed the strongly fortified clty of Port Arthur and the nearby commerclal port of Dalny (now Dairen).

Japan took Port Arthur by seige ending with a brilliant assault in 1905 and at the conclusion of the Russo-Japanese War took over the lease in the Treaty of Portsmouth, 1905. In May. 1915, the lease was extended to 99 years by China. Kwangtung by Imperial Ordinance of April 12, 1919, was given a civil government superseding the former military government.

Dairen is a free port, the chlef seaport of Manchuria and the southern terminus of the South Manchurian railrcad which connects with the Peking and Korean Ilnes at Mukden and, with the TransSiberlan at Changchun. It is a well-bullt, wellgoverned modern city with varied industries.

The number of vessels that entered the port in 1920 was 2,142 with a tonnage of \(4,864,904\); of this tonnage \(3,408,369\) was Japanese; 483,073 Chinese; 421,028 Britlsh; 381,729 American; 34,146 Russian; French, 18,277, and Norwegian, 11,618. Beans ( 567,129 tons), bean cake ( \(1,131,208\) tons), and cereals ( 707,237 , tons) furnished the bulk of the exports. The value of the foreign trade was:

(See Serbs, Croats, and Slovencs, Kingdom of.)

\section*{LATVIA, REPUBLIC OF.}

AREA, 25,000 square miles.

\section*{POPULATION, 1921, 1,813,000.}

CAPITAL, Riga; population, 1920, 185,137; other cities, Libau, population, 51,583 ; and six with more than 10,000 .
President, Jan Chakste.
Premier, Zigfrld Meierovics.
Minister to United States, vacant; C. Louis Seya, Charge d'Affaires.
Consul, at New York, Arthur B. Lule.
United States Minister, Frederick W. B. Coleman; also accredited to Esthonia and Lithuania.
United States Consul, at Riga, Daniel B. MacGowan. Latvia, formerly a Russian province, became a republic Nov. 17, 1917, final elections being held on April 17, 1920, and the Legislative Asscmbly meeting first on May 1, 1920. It ls bounded on the north by the Gulf of Riga and Esthonla, on the east by Russia, on the south by Lithuania and Poland, and on the west by the Baltic Sea. It is one of the three Baltlc states of North Central Europe. It is about the slze of the State of West Virglnla and has a little larger population.

About half the people engage in agriculture, dairying, llvestock and other food producing industries. Flax ls the important product. Pre-war flax acreage was 275,000 , and anmual crops were 30,000 tons of flbre and 25,000 tons of seed, exported mostly to Germany, Holland, Belgium and England. War devastation reduced the flax acrcage to 70,000, and another cause was the flight of 500,000 farmers as refugces. Wheat, rye and potatoes are also produced.
The last census figures showed in 1913 there were 297,645 horses, 940,319 cattle, \(1,100,481\) sheep, and 538,920 swlne- \(2,877,365\) head in all, or one and twothirds hearl per capita.

Forests cover \(3,775,000\) acres of the total ln the country of \(16,000,000\), so that exportation of tlmber will be important, whlle scicntifie prescrvation of the forests will be obscrved.

Jidustry is beglining to count in the national wealth, the paper, match, wood distilleries and woorlwork output having already attained large proportions for so small a country.

Other industries-metals, chemicals, textiles, and scattering-produce annually about \(\$ 113,500,000\) worth.

Latvia's Importance is enhanced by the fact that it is the natural routc for through internatlonal trade between Russia and western nations. Prewar, 20.6 per cent. of all Russian imports and 28 per cent. of all exports passed through Latvian territory. Excellent harbors at Riga, Liepaja and Ventspils made this possible, and three Russian main railway lines converge at Riga, Windau and Libau, all ports of Latvla. In 1920, there entered the ports 1,679 vessels of 479,801 tons. The coast line is 340 miles long. The railway mileage is 1,829 miles.

Latvia ls Protestant by 76.54 per cent., Roman Catholic by 18.49 per cent., and there are Baptists, Moravians and other faiths.

In 1910 only 3.2 per cent. of the people were illiterate, and the native Letts form 80.41 per cent. of the total population.

Latvia Is a member of the League of Nations.
Trade wlth the United States in the fiscal year 1921-22 was: Imports, \(\$ 6,660,589\); Exports, \(\$ 275\),432.

\section*{LIEERIA; REPUBLIC OF.}

AREA, estimated, 40,000 square miles.
POPULATION, estimated, 2,000,000.
CAPITAL, Monrovia, population, estimated, 1920, 4,000.
President, Charles D. S. King, 1920-24.
Consuls in the U. S., at New York, Edward G. Merrill; at Philadelphia, Thomas Hunt; at St. Louis, Hutehins Inge; at Mobile, George W. Lovejoy; at Galveston, J. R. Gibson; at San Francisco. Oscar Hudson.
United States Minister and Consul General, Solomon Porter Hood.
Receiver of Customs and Financial Adviser (designated by the United States Government), H. F. Worley.
Liberia lies on the southwest (Guinea) coast of Afrlca between Sierra Leone (British) on the west and the French colony of the Ivory Coast on the east, with a coast line on the South Atlantic of about 350 miles. It extends inland about 200 miles. Beyond 25 miles there is no civilized settlement. Most of the country is covered with tropical forests rich in timber and oil nuts but lacking in transportation. There ls one motor road, 20 miles long. The Government is trying to float a loan of \(\$ 5,000\),000, based on custom recelpts, with the United States Government, with the proceeds of which it will build roads to open the hinterland to commerce. The House has acted favorably on the resolution, which was waiting action in the Senate at its adjournment in Sentember. The country has now a bonded indebtedness of \(\$ 1,700,000\) floated by New York bankers in 1912, with an internal floating debt of about \(\$ 500,000\).

The population ls entirely of the African race; about 100,000 of the dwellers along the coast may be considered clvilized. The number of American Negroes is estimated at 12000 . Liberia was founded in 1822 , when a settlement was made at Monrovia by Negro frcedmen from the Unitcd States with the assistance of American colonization societies. It was declared a free and independent republlc on July 26, 1847. Its Constltution is modelled on that of the United States. Electors must be of Negro blood and owners of land. The Government rests with a President, elected for four years, a Senate, elected for slx years, and a House of Representatives, elected for four years.

The control of customs since 1912 has been in the hands of a General Receiver and Financlal Advlser, deslgnated by the Unlted States.
Government schools are supplemented by mission schools, mostly of Protcstant denomination. The Methodists maintaln a college at Monrovia. There Is an organized ml itia of 650 men, wlth rescrves of 2,500.

Liberia was a signatory of the Versailles Treaty and is a member of the Leaguc of Nations.

Coffce, rubber, oll nuts, raffla, lvory and glnger arc the chief exports and textiles, hardware, glass and earthenware, tobacco, spirlts, rice alld foodstuffs are the princlpal imports. In 1920 there entered at Monrovla 446 vessels of 525,314 tonnage. Customs duties in 1918 were \(\$ 162,120 ; 1919, \$ 226,-\) 720 ; in 1920, \(\$ 314,690\).

Trade with the Unlted States was:
Imports, 1920-21
. 189,002
Exports, 1920-21 .178,048 178,048 \(.3,532\)

\section*{LIECHTENSTEIN.}
(Princlpality).
AREA, 65 square miles.
POPULATION, \(1912,10,716\).
CAPITAL, Vaduz; population, 1,376 .
Prince, John II., born Oct. 5, 1840; succeeded his father Nov. 12, 1858.
Administrator, appointed by the Prince, Joseph Ospelt.
Liechtenstein is on the Upper Rhine between Austria and Switzerland. It was a member of the German Confederation until 1866 . Since that time it had practically been a dependency of Austria, but on Nov. 7, 1918, the Diet declared its complete independence. By treaty With Switzerland in 1921 that country administers its posts and telegraphs. The population is agricultural; stock raising is highly developed. The monarchy is hereditary. By the Constitution, October, 1921, legislative powers rest in a Diet of 15 members, elected for four years by direct vote, on a basis of universal suffrage and proportional representation. The budget for 1922 balanced at 384,500 francs.

\section*{LITHUANIA, REPUBLIC OF:}

AREA, 33,000 square miles.
POPULATION, \(4,500,000\), of which 70 per cent. are Lithuanians, 13 per cent. Jewish, 8 per cent. Polish or Polanized Lithuanians.
CAPITAL, Kovno, temporarily; population, 190,000. President, Alexsandras Stulginskis.
Premier, E. Galvanauskas.
Minister to the United States, vacant; Voldemar Carneskis, Charge d'Affaires.
Consul, at New York, Dr. J. J. Bielskis (acting).
United States Minister, Frederick W. B. Coleman; also accredited to Esthonia and Latvia.
United States Consul, at Kovno, Clement S. Edwards. Lithuania, a Baltic state, is bounded on the north by Latvia, on the east by Russia, on the south by Poland, and on the west by Poland and the Baltic Sea. It is about the size of the State of Maine.

Lithuania was a Grand Duchy under the Russian Empire, having shared the fate of Poland. After the Bolshevists captured the Russian Government, the republic proclaimed its independence on Feb. 16, 1918. It was recognized by most of the powers and by Russia in the Treaty of Moscow, July 12, 1920. The dispute with Poland, relative to whether or not certain Lithuanian areas were to be left as a part of the country or become part of Poland has been constant since 1918.
The League of Nations has had the matter in hand. On Oct. 9, 1920, General Zeligowski, with 15,000 Polish troops, occupied Vilna, historic Lithuanian capital, and declared it annexed to Poland. The Polish Government proclaimed Zeligowski a rebel, but he remained there many months. Vilna has beer lately claimed as a part of Poland, but the Lithuanians refuse to consent and late in 1922 the matter was in status quo, with proposals afoot that it be referred to the International Court of the League of Nations, Poland not consenting. Lithuania is a member of the League of Nations.

Legislative power is vested in a constituent Assembly of 112 members, elected directly on a basis of proportional representation by universal equal suffrage. The Assembly elects the President.

Eighty per cent. of the people engage in agriculture, there being in all the country \(21,120,000\) acres, of which \(5,638,426\) are arable, 1921 production being 530,000 tons of rye, 145,350 of barley, 77,300 of Wheat, 263,500 of oats, \(1,386,000\) of potatoes, 23,100 of flaxseed and 18,800 of flax fibre.

Agriculture was close enough to making the people seli-supporting to enable export in the crop year of 1920-1921 of 10 per cent. of the rye, barley and wheat, half the flax and much of other products.

Forest wealth also gives export of timber. Forests cover a fourth of the total area, pine, fir and hardwood.

Livestock is abundant, in 1921 there being 370,000 horses, 780,000 cattle, \(1,262,000\) swine and \(1,036,000\) sheep. This was a gain of 50 per cent. over the 1920 figures.

The industries employed, in \(1922,42,000\) persons, and concerned utilization of the country's products.

Exports are of the country produce, plus the output from textile mills, and imports are manufactures. The total in 1921 was \(631,964,148\) marks. Imports totalled \(876,874,930\) marks.

Memal, chiel port, is under Allied control; there are 1,800 miles of railway.

Lithuania is on the through railway route from Paris, Berlin, Warsaw to Riga, Dvinsk and Petrograd, and regards the international rail traffic as
one of its principal points of importance, it beling the intention to develop facilities for its proper care. About 75 per cent. of the people are Roman Catholic, 12 per cent. Jewish, 9 per cent. Greek Catholic and 4 per cent. Protestants.
Pre-war there were 871 schools with 40,330 pupils. In 1922 there were 1,801 schools with 177,379 puplls. A state university was opened in Kovno Feb. 16, 1922. The old university at Vilna was declared Polish by President Pilsudski soon after Poland was made a republic, and along with Vilna and adjacent territory remains in question as to control.
Trade with the United States in the fiscal year
1921-22 was: imports, \(\$ 63,968\); exports, \(\$ 62,850\).

\section*{LUXEMEURG, CRAND DUCHY OF:}

AREA, 999 square miles.
POPULATION, census of 1916, 263,824.
CAPITAL. Luxemburg, population, 1921, \(45,986\).
Grand Duchess. Charlotte, born Jan. 23, 1896; succeeded on the abdication of her sister, Marie Adelaide. Jan. 9, 1919; married Prince Felix of Bourbon-Parma on Nov. 6, 1919; Heit, their son. Prince Jean, born Jan. 6, 1921.
President of Government, Emile Reuter.
Minister to the United Statcs, vacant.
Consuls, at Chicago, Plerre Kransz; at Minneapolis, Emile Ferrant.
United Slaits Minister, vacant. (Diplomatic matters cared for by the legation at The Hague, Netherlands.)
Luxemburg is a European Grand Duchy fourfifths the size of Rhode Island, situated between Germany on the east, Belgium on the west, and France on the south. Its integrity and neutrality were guaranteed by the Treaty of London, May 11, 1867, having been previously, since 1815, a part of the Germanic Confederation. It, however, remained in the German Customs Union, formed in 1842. German capital built its railroads and its iron and steel furnished material before and during the war to the Germans, who occupied the country throughout the war:

A referendum (under universal suffrage) taken Sept. 28,1919 , to settle some of the problems brought to the front by the World War resulted in the following vote out of a total of 90,984: For the reigning Grand Duchess, 66,811 ; for a continuation of the dynasty under another Grand Duchess, 1,286 ; 1or another dynasty, 889; for a republic, 16,885 ; lor an economic union with France, 60,133; for an economic union with Belgium, 22,242. France declined the union in favor of Belgium. A treaty was then negotiated between Luxemburg and Belgium eliminating the customs barrier and providing for the use of Belgian money in the Grand Duchy. The agreement came in force April 1, 1922, and is for 50 vears.
The Grand Duchy is governed under the Constitution of 1868 as amended in 1919. Legislative power rests with a Chamber of 48 Deputles, elected by universal suffrage (men and women over 21). Executive power rests with a Minister of State and President of Gorernment and a Cabinet of four DlrectorsGeneral. The population is almost entirely Catholic. Education is compulsory for children between the ages of six and thirteen.

Agriculture gives occupation to 90,000 of the population, but mining is the chief industry. The production in 1920 was: Iron, \(3,704,390\) tons; steel, 732,457 tons. There were in 1920,330 miles of railroads.

AREA, estimated, 767,198 squarc miles.
POPULATION, estimater, \(15,800,000\).
CAPITAL, Mexico City, population estimated, 1920, \(1,080,000\); chief citles, Guadalajara, pop. 119,468; Puebla, 95,121 ; Vera Cruz, 48,633 ; Tampico 16,313; San Luis Potosi, 85,000; and Monterey', 85,000.
President, Gen. Alvaro Obregon. 1920-24, inaugurated Dec. 1, 1920.
Ambassador to the United States, vacant; Sr. Salvad or Diego-Fernandez, Minister Plenipotentiary, Charge d Affaires ad interim; Dr. Manuel C. Tellez, Secretary of the Embassy.

Consuls General in the United States, at New York Gumaro Villabos; at New Orleans, Arturo M Elias; at San Francisco, Jose Garza Zertuche; at Laredo, Enrique D. Ruiz. Consuls, at Mobile, Pablo Tamayo; at Los Angeles, Gustavo Luders; at Boise, Miguel Angel Rico; at Baltimore, Roberto Garcia; at Boston, Rafael Calvo y Arias; at Kansas City, Luis Villalpando; at Cincinnati, Raoul G. Dominguez; at Norfolk, Jose Antonio Valenzuela; at Clifton, M. A. Limon; at Phoenix, Manuel Esparza; at Calexico, Manuel G. Paredes; at Corpus Christi, Lisandro Pena; at Dallas, Bengno Cantu V.; at El Paso, Hermenegildo Valdez; at Galveston, German Meade y Fierro: at Hidalgo, Francesco Perez; at Port Arthur, Guillermo Prieto Laurens; at Presidio, Cosme Benegoecha; at Rio Grande, Renato Cantu Lara. There are also consulates (vacant) at Naco, Nogales, Tucson, Brownsville, Del Rio, Eagle Pass, Houston, San Antonio, Seattle, Denver, Chicago, St. Louis, Jacksonville, Salt Lake, Portland, Ore., and Philadelphia.
United States Ambassador, vacant; George T. Summerlin, counselior of Embassy, Charge d'Affaires ad interim.
United States Consul General, at Mexico City, Claude I. Dawson; Consuls, at Vera Cruz, John Q. Wood; at Monterey, Paul H. Foster; at Acapulco, George A. Bucklin; at Ciudad Juarez, John W. Dye; at Matamoros, Gilbert R. Willson; at Mazatlan, William E. Chapman; at Mexicali, Walter F. Boyle; at Progreso, O. Gaylord Marsh; at Nogales, Francis J. Dyer; at Tampico, vacant at Frontera, Robert L. Rankin.
Mexico is bounded on the north by the United States, on the east by the United States (Texas), the Rio Grande forming the boundary line, and the Gulf of Mexico: on the south by Guatemala and on the southwest and west by the Pacific Ocean. The Gulf of California, 739 miles long with a maximum width of 190 miles, makes a huge indentation in the western coast, completely separating the narrow mountainous sterile and sparsely inhabited peninsula of Lower California, 760 miles long, from the mainland. On the east the province of Yucatan juto out into the Gulf of Mexico, conneeted with the main territory of the country by a narrow strip northwest of the Guatemala frontier. The coast line on the Pacific is 4,574 miles long and 1,727 on the Caribbean.

The Sierra Madre range runs north and south near the western coast turning near Colima and continuing nearly due east paralleling the coast into Central American countries. Near the Guif Coast a range of mountains-a continuation of the eastern range of the Rocky Mountains-runs down nearly to Vera Cruz. Loftiest of the extinct volcanoes are Popocatepetl, altitude, 17,888 feet, Ixlaccihuatl, altitude, 17,343 feet, and Orizaba, altitude, 18,209 feet.

Between the two ranges lies the vast tableland of Mexico, altitude from 5,000 feet to 8,000 feet, with a delightful climate (like New York in September) and with the vegetation and products of the temperate zone varying with the altitude. The lowlands along the coast are tropical, rising to sub-troplcal in the foothills: hot, and unhealthy with a heavy rainfall on the Gulf side. Along the Pacific slope and in the interior irrigation is needed and natural streams from the mountains are put to use with increasing zeal.

Agriculture and stock-raising are the chief industries. The country is marvellously rich, but the land is barely scratched except on the larger ranches; primitive methods of cultivation prevall. The cultivated lands amount to about \(30,000,000\) acres (of which \(20,000,000\) require lirigation) the grazing lands \(120,500,000\) acres and forests \(44,000,000\) acres, of which \(25,000,000\) are estimated to be rich in pine, spruce, cedar, mahogany, rosewood and logwood. The principal products are corn, cotton, henequen (sisal), wheat, coffee, beans, tobacco, sugar and molasses. In 1920 there were 2,162,984 cattle, 929,385 horses, 354,331 mules, \(1,089,976\) sheep 1,987,869.goats, and 1,654,089 pigs. Cattle, hides and tallow were among the chlef exports.

Next to agriculture, the chlef wealth of Mexico is in its minerais, and mlning has been the most hlghly developed of her industries since the days of the Spanish conquest. The total value of siliver mined from the first year of the Spanlsh conquest (1521) to January, 1922 , was \(\$ 3,000,000,000\), somewhat more than 155,000 tons in welght, according to figures complled by the Bureau of Mlnes of the Mexican Department of Commerce and Industry, belng two-thirds of the world's silver production for the last 400 years. About \(\$ 500,000,000\) Amerlcan capital is invested in mining. Mexico now yleids
over one-third of the world's production of silver and about 5 per cent. of its gold

Mexico has an abundance of low grade coal, much like that of Texas, with \(300,000,000\) tons in sight.

PETROLEUM PRODUCTION.
The petroleum industry in Mexico, which, in 1920 , produced 23.5 per cent. of the world's output, became a commercial factor in 1910. The total production from 1901 to 1920 has been \(563,524,000\) barrels, or \(80,470,000\) metric tons. Oil had been discovered in 1901 in the Tampico district. In 1910 the famous Juan Casiano No. 7 well was drilled, and the equally famous Potrero del Llano No. 4, came in later with an initial flow of 10,000 barrels daily, increasing to 160,000 barrels, establishing itself as the largest producer up to that time. These were in the southern part of the Tampico district

In January, 1914, in the Panuco pool, a well with a flow of 100,000 barrels daily was brought in. On Feb. 10,.1916, the Cerro Azul No. 4 well, in the southern district, was completed and on the 19 th flowed 260,858 barrels, being estimated the largest producer ever drllled. In 1921 it was still continuing its steady yield.

Plenty of wells with large initial capacity have been completed in the Casiano pools. The Alamo pool, the southernmost producing area in the Tam-pico-Tuxpam region, came into prominence ln October, 1914, when the famous Alamo No. 2 well began to flow. It is estlmated to have produced by May, 1921, 27,000,000 barrels of oil.

In 1919 and 1920 large gushers came in in the Naranjas pool in the southern field which produced about \(90,000,000\) barrels in 1920 , considered to be the largest output in history.

The Potrero del Llano No. 4 well suddenly went to salt water in December, 1918, after producing up to that time about \(100,000,000\) barrels of oil. The Juan Casiano No. 7 well went to salt water in November, 1919, after producing about 80,000,000 barrels of oll. Many of the large welis in the Tepetate pool and the Panuco field were affected by salt water in 1919 and 1920. There are important wells in the Toteco district, and in 1920 it was estimated this field produced 120,000,000 barrels, all in a strip of land 42 miles long and less than 1 mile wide.

The petroleum production of Mexico, from 1908 to 1920 is estimated:
1908
1909
1910.
1911.
1912.
1913.
1914.
1915.
1916.
1918.
1919.
1920.
1908
1909

1911
1912
1913
1914
1915
1916
1917
1918
1919
1920 to supply home consumption 140 with 762,200 spindles, and 27,100 looms) and woolen mills have been established under a high protective tariff. There are about 1,500 tobacco factories. Some smelters, paper mills, flour mills, saw mllls, sugar mills, and reñeries and breweries are also in operation.

Mexico had in 1918 15,942 miles of railroads. In 1909 the main lines were united in one Govern-ment-controlled corporation-the National Railways of Mexico, the operation of which, with virtually all the private lines, was taken over in 1914 and operated by the Government under the name of the Constitutionalist Railways of Mexico. The Natlonal Railways of Mexico own 6,818 miles of treck and control 1,220 more; the Mexican Railroad has 520 miles of track; the Tehuantepec, 184; the Mexico Northwestern, 512; the Southern Pacific Railroad of Mexico about 1,000 ; and the United Railroads of Yucatan about 500. Vera Cruz, Tampico, Puerto Mexico, Salina Cruz, Manzanilia and Acapulco, are the chief ports.

CIVIL WARS AND INSURRECTIONS.
Mexico has been much torn by civil war and Insurrections since achieving its lndependence from Spaln (proclalmed Sept. 15, 1810, and effected in 1821). Conditlons resultling almost in a state of war with the United States followed the coup d'etat by which, in February, 1913, Gen. Victoriano Huerta replaced Franclsco I. Madero (murdered Feb. 22, 1913) in the Presidency. The United States did not recognlze his Government (he resigned July 15, 1914), but on Oct. 19, 1915, dld recognize that of Gen. Carranza who had driven Huerta's successor Carbajal from the capitai, and assumed executlve power, Aug. 20, 1915. Carranza
held power until May, 1920, when he fled from the capltal before an uprising, and was killed trying to reach Vera Cruz. Adolfo de la Huerta, then Governor of Sonora and now Secretary of the Treasury, was made Provisional Presldent in May, 1920, and Gen. Alvaro Obregon was chosen President at a general election in September, being inaugurated Dec. 1, 1920. The United States has not yet recognized his Government, no common ground having been found following the suggestions of Secretary of State Hughes, presented May 27, 1921, suggesting the preliminary signing of a convention covering boundary dlsputes, claims, and the stipulation that Article 27 of the new Constitution (1917) is not to be interpreted retroactively.

Article 27 affirmed that the title to mineral and other subsoil deposits was vested in the people of Mexico, and stipulated that only Mexicans and Mcxican companies had the right to acquire concessions to develop mineral fucl in the republic. A foreigner might secure that right only if he renounced the privilege of recourse to his Government for redress through diplomatic channcls. The intent to safeguard future concessions in the interest of the commonweal ls clear, but whether or not the article is retroactlve has been the subject of much debate.

However, following decisions of the Mexican Supreme Court to that effect, President Obregon in September, 1922, declared Árticle 27 to be nonretroactive. Foreign corporations holding concesslons, however, hold that the intent under the article and the manner of its interpretation by the Mexican authorities was confiscation. President Carranza had on Feb. 10, 1918, issued a decree imposing heavy taxes on petroleum land and on contracts and royalties and exacted license fees for new drilling and exploratlons. Other provisions in decrees at various times have aimed to bring the cntire oil industry under the Federal Government. Citizens of the Unlted States and the United Kingdom appealed to their Governments for' protection against what they asserted to be threatened confiscation, A new source of trouble is the asserting of an independent right to tax oil production recently made by some of the tax oil production
individual states.

\section*{AGREEMENT ON THE DEBT.}

The Secretary of Finance, Adolfo de la Huerta, signcd an agreement in New York, June 16, 1922, with the International Committee of Bankers, deslgned to settle the eight-year-old question involving the Mexican external and internal debt. This agreement was approved by both Houses of the Mexican Congress and has been signed by President Obregon.

The plan of adjustment relates to all external Mexican Government debts, direct or guaranteed, the National Rallways dcbt and certain so-called Internal Government debts largely hcld outside Mexico; the total face value of the securities covered being over \(\$ 500,000,000\) gold, on which the interest in arrears amounts to approximately \(\$ 200,000,000\).

This \(\$ 700,000,000\) includes Mexlco's direct debt and guaranteed rallroad bonds, totalling approximately \(\$ 322,000,000\) gold; the railroad debt, not guaranteed, amounting to about \(\$ 230,000,000\) back intercst on bonds, and railroad debt amountling to about \(\$ 115,000,000\); sinking fund dcfaults amounting to about \(\$ 28,000,000\).

As to current interest, cash payments, in varying proportions among the different bond issues, are to be begun after Jan. 2, 1923, out of a special fund as provided for in the agreement; the schedule of disbursements in general to be based on the relative values and prioritles of the different issues of bonds. For such part of current intcrest as is not in cash, scrip will be lssued and redeemed in due course, certain bonds being made available for this urpose.

The special fund for current interest will be increascd each year until Jan. 1, 1928, when full service of the debt, will be resumed. The oil export taxes and a surcharge of 10 per cent. on railway gross recelpts will be paid into this special fund.

As to back interest, all cash payments are to be waived. The matter will be arranged by the deposit of overdue coupons with a trustce. Against these coupons receipts will be issued to be amortized without interest over a pcriod of time. This arrangement is, in effect, equivalent to cancellation of a part of the back interest.

As to the railways, they are to bc operated by private management as before the revolution. The Government will assume by indorsement all rallway debts not prevlously guaranteed. The rlghts of foreclosure hitherto held by the bonds will be suspended so long as the plan is being carried out, thereby protccting both the stock ownership of the Mexican Government and other shareholders, as well as the ultimate rights of the bondholders.

In general, in order to give time for full resumption of all cash obllgations, all classes of bondholders are to agree to temporary suspension of sinking fund rights during a five-year period, after which all contract clauses will again become effective.

\section*{THE NEW CONSTITUTION.}

Mexico is now governed under a new Constitution promulgated Feb. 5, 1917, replacing the Constitution of 1857. By it Mexlco is declared to be a federated republlc of 28 states, each with a large measure of home rule and with Governor, Legislature and Judiciary elected by popular vote; two territories and a Federal District whose Governors are appointed by the President. Interstate customs duties are not permitted. The legislative power rests in a. Congress consisting of a Chamber of Deputies, and a Senate of 58 members, two for each state, all elected for two years by universal suffrage. The President is elected for 4 years by direct popular vote and cannot be re-elected. He appoints a Cabinet of ten Secretaries. Article 33 confers on the President the right to expel from Mexico without "judlcial process" any foreigner whosc presence he might deem "inexpedient." The prevailing religion is Roman Catholic but the new Constitution provides for the separation of church and state, and all religions are tolerated

Education is under Federal control and is free and compulsory from 6 to 16 . The percentage of llllteracy among the peons is very high, and therc are many Indian tribes, about 20 per cent. of the population, quite uncivilized. The present administration is making every effort to extend elementary education to all classes of the people; 2,000 volunteer teachers of illiterates were enrolled in 1921. The appropriation by the Government for schools in 1922 was \(\$ 49,826,716\); number of schools supported was 8,388 . Vocational education, particularly in agriculture, is belng promoted. There are normal schools for both sexes throughout the country and some hundred technical sohools. The Natlonal Unlversity of Mexico, founded in 1553, is famous among Latln-American unlverslties, and in the capltal are many higher Instltutions of learning and culture and scientlic institutions and societles.

The army numbers 68,316 men, with a reserve of 833,000 . Military education is compulsory in the schools.

\section*{AREA, 8 square miles.}

POPULATION, 1913, 22,956.
CAPITAL, Monaco, population, 1913, 2,247; other towns, La Condaminc, 11,082; Monte Carlo, 9,627.
Prince, Louis, born July 12, IS70, succeeded his father, the late Prince Albert, June 26, 1922.
Monaco is a small Principality on the Mediterranean surrounded by the French department of the Alpes Maritimes. An indcpendent Principality for 800 years, the reigning Prince was dispossessed by the Frcnch Revolution. Tlie linc was re-cstablished in 1814 and placed under the protectorate of the Kingdom of Sardinia. In 1861 King Charles III. ceded his rights to France. The Prince of Monaco

Was an absolute ruler until Jan. 7, 1911, when a Constitution was promulgated which provides for a National Council of 21 members, elected by universal suffrage for four years. The revenue is mainly derived from the gaming tables of the Casino at Monte Carlo. The annual grant for the concession was \(£ 80.000\) in 1917: in 1927 it will be \(£ 90.000\). and in \(1937, £ 100,000\). The yearly average of visitors is over \(1,500,000\). The late Prince established an important oceanographic museum and laboratory at Monaco.

Spanish High Commissioner, Gen. Domaso Berengues, appointed Jan. 25, 1919.
United States Consul General, at Tangier, Joseph M. Denning: at Casablanca, Robert R. Bradiord.
Morocco of to-day is the remnant of the great Shereefian Empire founded by the Arab invaders who carried the crescent of Islam west at the close of the seventh century and ruled all northwestern Africa and most of the Iberian peninsula. It is bounded on the east by Algeria, on the north by the Mediterranean, the extreme point opposite Gibraltar being Ceuta, a city which, with its four-mile-long peninsula (dominated by Jebel Musa, one of the Pillars of Hercules), has belonged to Spain since the close of the sixteenth century. This narrow northern strip, about 60 miles wide, from the Atlantic nearly to the Algerian border, is one of the Spanish zones.

On the west is the Atlantie Oeean and on the south Rio de Oro (Spanish) and the Sahara Desert. The extreme southern end forms a second Spanish zone, and a strip 50 miles long by 15 deep on the Atlantic eoast, inclosing the town of Ifni, the third.

Along the 200 miles of the Mediterranean littoral run the Rif hills, still unexplored.. Through the country from northeast to southwest run the Atlas Mountains in five great ranges rising to an altitude of 12,000 feet ( M t. Ayashiu, altitude 14,150 feet). Between these ranges lie fertile, well-watered plains, and the northern slopes of the mountains are well wooded. Irrigation is much used, though all agricultural methods and implements are primitive.
The climate is good and healthy, especially on the Atlantic coast, which is shielded from the hot winds of the Sahara by the Atlas Mountains, and where there is a "tell" or fertile region. Tangier is a recognized health resort, also Mogador, where the temperature never rises above \(80^{\circ}\) or falis beiow \(40^{\circ}\).
The most numerous of the inhabitants are the aboriginal Berbcrs, mountain dwellers, whose foremaintained the independence of their country. The plains are mostly occupied by Arabs and a mixture, of the two races, known to foreigners as "Moors." The latter are also town dweliers. The third race is Jewish, in two sections, one settled there from time immemoriai, gnd the other driven from Europe in comparatively modern times, who live near the ports, are progressive and have much of the forelgn
trade. The European popuiation in 1921 numbered about 100,000 , oi which two-thirds are French.
The peopie are agricultural and pastoral. Eggs and pouitry have become the chief articles of export, reaching even to Engiand. In 1919 the value of eggs
exported was \(44,948,779\) francs. and in 1920, 29.910,442 francs. Other important exports are skins, hides, wool, beans, bariey, linseed and wheat, almonds, cummin and gums. The chief imports are textiles. sugar, tea, machinery and hardware. candles and spirits. Fruit and vineyards are abundant and dates a regular crop. Under proper cultivation Morocco should become a rich, cereal-producing country. Carpets, leather goods, fezzes, woolen and silk stuffs are among the manufactures, chiefly for domestic consumption. Mineral deposits are undeveloped, but much copper, lead and tin are known to exist. An oil field extends from Fez to Laraish. Phosphate exists in great abundance, estimated at \(100.000,000\) metric tons with a yield of 65 per cent., and a decree of 1920 reserves to the Sultan's Government the right of exploitation.

The country had no roads or bridges, transportation being by mule and camel back, but the French have built about 3,000 kilometres and have more surveyed; the most important being from Tangier to Fez . Little has been done in the Spanish zone. In the French zone, in 1920, there were 610 miles of railroads, those of narrow gauge being rebuilt at standard gauge. The Spaniards have a narrow gauge road from Ceuta to Tetuan Is Rio Martin. The French use aeroplanes for mail, martin. The French use aeroplanes for mail, 845,708 tonnage entered the ports of French Morocco.

French interests in Morocco had been steadily growing because of its proximity to Algeria for years and had been recognized in the agreements of 1906 and 1909. A general rising of the tribes in October, 1910, culminating in the siege of Fez called out a French expedition of pacification which occupied Fez in 1911. The need of this had been notíeed to the powers, but was resented by Spain, Who in June suddenly occupied two towns, and by Germany, who on July 1, 1911, sent the gunboat Panther to Agadir, a seaport on the Atlantic, ostensibly to safeguard German subjects in the Sus, but really to challenge the extension of French influence. The crisis became acute and war seemed inevitable. Great Britain, however, stood by the Entente and made formal objection to Germany's acquiring territorial influence in Morocco. Diplomatic conversations followed, which resulted in the FrancoGerman treaty of Nov. 4, 1911, by which France ceded to Germany some territory in French equatorial Africa on the southern and eastern borders, the Cameroons, in return for recognition of her political protectorate over Morocco. A treaty with Spain adjusted the limits of their respective spheres. On March 30, 1912, the Sultan Mulai Hafd signed a treaty with France accepting the protectorate, which was recognized by the powers who withdrew their dipiomatic representatives. Gen. Lyautey was appointed Resident General and his advice the Sultan, an absolute despot, and his six viziers have to follow. Risings occurred later in the year and Mulai Hafid abdicated in favor of his brother. The rebellious tribesmen made much trouble and were stirred up to more by the Germans during the World War. The last outbreak, in October, 1920, was crushed by the French capture of Wazzan, who thus consolidated their rule in most of the districts.
A severe outbreak near Melilla in July, 1921, seriously thrcatened the Spanish rule in its protectorate and has but recently been suppressed by a vigorous military expedition. The notorious brigand, Raisuli, now dead, was probably the directing spirit.

Gen. Lyautey's wise administration of the protectorate, to which he returned in 1917, after service in 1916 as Minister of War in Paris, has been one of peaceful penetration, extension of railroads and roads, public worlss and social welfare. Agricultural and industrial enterprises have been fostered, public health and education improved. The country lias become safe and orderiy. Able army offlcers and civilians have assisted him. Colonization is encouraged. Economic opportunity, the "open door' is guaranteed to all.

Tangier, a seaport of 52,000 inhabitants, including 11,700 Europeans and 12.000 Jews, which occupies the extreme northwest corner of Africa on the Atlantic, was temporarily internationalized in the negotiations of 1911-12, with a hinteriand of about 100 square miles. It is administered by the resident diplomatic corps, which does not make for economic progress. Both France and Spain desire eomplete possession, but no agreement has been reached.

The revenue and expenditures of the French protectorate are estimated for the year 1921 at about \(£ 10,750,000\) each. The Moroccan debt (three French loans) amounted in 1921 to \(£ 16,224,960\).

\section*{NEPAL, KINGDOM OF.}

AREA, estimated, 54,000 square miles.
POPULATION, 5,639,092.
CAPITAL, Kathmandu, population, 60,000
Sovercign, Maharajah Tribhubana Bir Bikram, born
June 3, 1906, succeeded his father Dec. 11, 1911.
Prime Minister, Maharajah Sir Chandra Shumshere Jung, Bahadur Rana, appointed June 26, 1901 ;
he holds the rank of General in the British Army Nepal is an independent state on the southern slope of the Himalayas, bounded by Thibet on the north, by Sikkim and Bengal on the cast and by Bengal and the United Provinces of British India on the south and west. Though friendiy, a policy of seclusion is followed and travel discouragen. The Ghurkas, whose Aryan ancestors from Rajputana mixed with the Mongolic aborigines, overran the country in the latter half of the eighteenth century, and are the dominant race. From their ranks the British Indian Government recruits regiments of most valuable soldlers. The kingdom maintains a well-drilled and effcient army of 32,000 infantry and 2,500 artillery. There are many fertile valleys lying in the slopes of the bleak and lotty mountains (which include Mt. Everest, altitude 29,141 feet), and its territory runs into the Terai on the plains of India. It has rich forests. Nepal exports rice, grain, hides and cattle, and imports textiles, sugar, salt, hardware, etc. The capital is in a most fertile valley cultivated from end to end, 15 miles long and 20 miles wide, which supports 300,000 inhabitants and is noted for its 2,700 Buddhist shrines, nearly all lavishly decorated examples of Nepalese art Paton is the largest city and Pashpoti a holy centre or pilgrims. In 1920-21 its exp.rts to India were \(£ 4,112,000\) and imports \(£ 1,913,000\).

\section*{THE NETHERLANDS, KINGDOM OF. HOLLAND}

AREA, 12,582 square miles. Colonial possessions Dutch East Indies, 683,000 square miles; Dutch Guiana, 46,060 square milcs; Curacao Islands, 403 square miles; total, 742,045. Grand total 756,627.
POPULATION, census of 1920, 6,841,155. Collonial, Dutch East Indies, 49,161,047; Dutch Gulana (1921), 113,181; Curaca, 53,702 . Grand total, \(56,169,085\).

Queen, Wilhelmina, born Aug. 31, 1880, succeeded; on the death of her father, Willem III., Nov. 23, 1890; crowned Sept. 6, 1898. Married Prince Henry of Mecklenburg-Schwerin (Prince Consort), Feb. 7, 1901. Heir, her only daughter, Princess Juliana, born, April 30, 1909.
Premier, Jonkheer Dr. Ch. J. M. Ruys de Beerenbrouck (Interior), born Dec. 1, 1873, appointed Sept. 9, 1918.
Minister to the United States, Dr. J. C. A. Evelwijn. Consuls General in the United States, at New York, D. J. Steyn Parve; at San Francisco, H. A. van Coenen Torchiana; at Chicago, J. Vennema; Consuls, at Boston, J. H. Reurs; at Philadelphia, A. P. van der Burch; at Baltimore, R. H. Mottu; at Norfolk, J. P. A. Mottu; at Charleston, J. L. C. Diemes: at New Orleans, W. J. Hammond; at St. Louis, W. A. J. M. van Watcrschoot van der Gracht; at Kansas City, H. Visscher; at Mobile Palmer Pillans; at Galveston, O. S. Flint; at Grand Rapids, J. Steketee; at Cleveland, P. Plantings; at Seattle, J. C. J. Kempees; at Port Arthur, L. F. J. Wilking.

United States Minister, vacant.
United States Consul General, at Rotterdam, George E. Anderson. Consuls, at Amsterdam, Frank W Mahin; at Curacao, W. I., Bradstreet S. Rairden; at Batavia, Jova, Charles L. Hoover; at Soerabaya Java, Parker W. Buhrman; at Medan, Sumatra, Carl O. Spamer.
The Netheriands (Holland) a kingdom in northwestern Europe, 196 miles long by 109 miles wide, is bounded by Germany on the east, Belgium on the south and the North Sea on the west and north. Its surface is flat with an average height above sea level of 37 feet and with about one-fourth of its land below sea level, reclaimed and protected by dikes, of which there are 1,500 miles. A plan to drain hall of the shallow Zuyder Zee has been prepared by enginecrs designed to add 817 square milies to the cultivable land (polders), adopted June 14, 1918, but not yct begun. The work is
expected to take 15 years, the first outlay to cost \(\$ 26,500,000\). Of the country's \(8,052,480\) acres. \(6,089,200\) are cultivated intensiveiy and 615,165 given over to forests equally well cared for. Great crops of cereals, potatoes, etc., are raised. Dairy products are an important industry, her cheese products being famous, and her cattle high grade; tulips and other flowering bulbs and roots are grown and exported extensiveiy. In \(1920,1,965,552\) tons of sugar beets were raised on 158,675 acres. Fisheries engage about 6,500 vessels and 18,000 men, and the product of the herring fisherles alone is about \(\$ 3,750,000\).

Shipbuilding and sugar refining are important industries, also brewing and distilling. Amsterdam is famous for diamond eutting. Coal is found in Limburg where \(2,168,590\) tons were mined from privately, owned mines and \(1,772,210\) from state mincs, total \(3,940,590\)

Canals, of which there are 2,000 miles, are most important in internal communication; elaborate systems are in the cities and feed the harbors. The Rhine and the Sohcldt reach the sea through the Netherlands and carry enormous traffic. There are 3,000 miles of roads, 1,830 miles of tramways and 2,377 miles of railroads. Holland's merchant marine in 1921 numbered 1,069 vessels of a total gross tonnage 226,318 . In 1921 there entered the ports of the Netherlands 14,074 vessels with a tonnage of \(8,051,114\).

The first Constitution after the reconstruction of the Netherlands as a sovereign state was promulgated in 1814, and revised in 1815, after the addition of the Belglan provinces, and again in 1840 , 1848, 1887 and 1917. It assures a hereditary constitutional monarchy. Executive power rests exclusivcly in the sovereign, legislative power in the soverelgn and the States-Gencral of two ChambersFirst Chamber, 50 members, elected for 9 years (one-third each third year) by the provincial states, and the Second Chamber, 100 Deputies, elected for four years directly. Universal suffrage for citizens of both sexes over 25 years of age and proportional reprcsentation is in force. The sovereign exercises the executive authority through a Council of Ministers, the President thereof corresponding to a Prime Minister. There is a State Councii of 14 members, named by the sovereign of which she is President, to be consulted on all legislative and some executive matters

The kingdom has a unique system of frontier defcnse, besides the fortresses, inasmuch as twothirds of the total arca is surrounded by the sea, with dikes to hold back the waters, an advance by an enemy may be stopped by inundating the lands. Army service is partly compulsory and partly voluntary: Every Dutchman is liable for service from ages nineteen to forty. Actual service may be by lot, substitution being prohibited. Annually 25,500 are recruited, with 600 for sea service. The reserve numbers 450,000 .

Entire liberty of worship and conscience is guarantecd. The royal family belong to the Dutch Reformed Church. The state budget containg allowances for different churches, Protestant, 1,388,000 guilders; Roman Catholic, 2,053,000; Jewish, 14,000.

Education is obligatory from ages six to thirteen. Intelligence is most widely diffused. Conscripts called in 1913 showed only six-tenths of 1 per cent. unable to read. There are universitles at Amstcrdam, Utrecht, Leyden, Delft and Groningen. The Netherlands is a member of the League of Nations.

The guilder (or florin), is the unit of currency, gold par being 40.2 cents. Rate of exchange, Nov. 1, 1922, 39.05 cents.

The budget voted for 1921 and estimates for 1922 were:

Gn:ilders

\section*{DUTCH EAST INDIES.}

AREA, 683,000 square miles; viz. Borneo, 212,737 ; Molucca Isiands, 144,620; Celebes Islands, 72,070; Java and Madura, 50,557; Sumatra, 159,739; Timor Archipelagó, 17,698; Rian-Lingga, Archipelago, 16,301; New Guinea and others.
POPULATION, census of \(1920,49,161,047\). Java, \(35,017,204\); Borneo, 1,625,453; Sumatra, 5,848,868, etc. (No figures available for New Guinea.)
CAPITALS, Batavia, Java, population, 234,697; Banjermasin, Borneo, 52,000.
Governor General, Dr. D. Foek.
Uniced States Consuls, at Batavia, Charles L. Hoover; at Soerabaya, Parker W. Buhrman; at Medan, Sumatra, Carl O. Spamer.
The colonial possessions of the Netherlands in the East Indies consist of great islands and archipelagoes lying along the Equator irom about \(6^{\circ}\) north latitude to \(10^{\circ}\) south latitude, between the Asiatic mainland and the Philippines, and Australia. They form the bulk of Malaysia. The census of 1920 gave the native Malay population as \(48,112,706\) : Europeans, 169,355 and Orientals, chiefly Chinese and Arabs, 878,986 . Java is the most densely populated land mass in the world. The great majority of the natives are Mohammedans. Much attention is given to edueation.

The islands are luxuriant, even for the Tropics, of enormous natural and annually produetive wealth. Dense forests abound in valuable timber. Besides raising sufficient food for the dense population, there is produced for export in Java and Madura alone, sugar ( \(1,480,346\) tons in 1926), coffee, tea, eocoa, indigo, spices, einchona, tobacco, rubber, copra, tin and petroleum. Of coal the mines of Java, Sumatra and Borneo produced, in \(192 \mathrm{G}, 1,055,-\) 832 tons.

There are 3,923 miles of railroads, 3,130 in Java and 793 in Sumatra. In 1920, 12,167 vessels of \(5,106,156\) tonnage entered the ports. The Colonial army numbers 40,000, about one-quarter European, with 20,000 in the reserve.

The guilder with native coin is legal eurrency, guilder gold par being 40.2 cents. Imports were \(1,310,823,000\) guilders; exports, 2,267,871,000. Receipts, budget of 1922 were: \(734,491,841\) guilders; expenditures, \(924,717,380\); deficit, \(190,225,539\). Debt, \(446,868,584\) guilders.

United States Minister, John E. Ramer.
United States Consul, at Corinto, Harold Playter at Bluefielis, William H. Heard.
Nicaragua lies between the Caribbean Sea, with a coastline of 280 miles, and the Pacific ( 200 miles), with Honduras on the north and Costa Rica on the south. In area it is a little larger than the State of New York. The Cordillera range of mountains including many volcanic peaks runs from northwest to southeast through the middle of the country. Between this range and a range of volcanic peaks to the west, lies Lake Managua, 30 miles long by 15 miles wide, and Lake Niearagua, 100 miles long and 45 miles wide, of great importance in the transport system of the country; and with the San Juan River on the Costa Riean boundary, the latter forms the route for a trans-isthmian ship eanal planned to conneet the Atlantic, and Paeific. The right to construct a canal over this route for 99 years, together with a naval base in the Gulf of Fonseca on the Paciftc and Corn Island in the Caribbean was aequired for \(\$ 3,000,000\) by the United States in a treaty ratified Feb. 18, 1916; the United States was to supervise the expenditure of that money. The Paeifie Raliroad running from Corinto to Leon and from Managua to Granada ( 171 miles), the only one in the country, was Government-owned, but 51 per cent. of the stock was sold to New York bankers who also hoid the rest of the stock in escrow for a loan of \(\$ 1,060,000\).

The eountry has valuable forests, some gold is mined, but it is esscntially an agrieultural and stock raising community. On the broad tropical plains of the east coast, bananas and sugar cane are cultivated, and coffee is grown on the mountain slopes. The chief exports are coffee, sugar, bananas, timber and hides. Textiles, maehinery, etc., chemicals and flour are the chief imports

In 1920, 779 ships with a tonnage of 463,925 entered her ports.

The Constitution of March 12, 1912, amended in 1913, provides for a Congress of two Houses, a Senate of 13 members electcd ior six years, and a House of 40 Deputies elected for four ycars by univarsal suffrage. The President is appointed for four years and has a Council of five Ministers. The Roman Catholic is the prevalling religion. The army numbers 2,000 men, selected by conscription. Nicaragua is a member of the League of Nations. (For part in Federation of Centrai America, see Honduras.)

Norway occupies the west part of the Scandinavian Peninsula in Northwest Europe from the Skagerrack, which, separates it from Denmark, to the North Cape in the Arctic Ocean, where on the east it meets Lapland and Finland. The Kjolen Mountains, which separate Norway from Sweden to the east, give to Norway in the northern part but a narrow fringe of country washed by the Arctic and North Atlantic Oceans, and cut deep by fjords of scenic grandeur. The climate is mild and moist, like Engiand's, on the west coast, but cold and dry in the interior and in the north and east sections. Norway has but 4,400. square miles of land under cultivation; rivers and lakes occupy 5,000 , and forests 25,000: three-fourths of the land is unproductive. Norway is essentially a maritime country. Her merchant fleet, though neutral, suffered heavily in the World War by sinking and torpedoing, the total loss being 831 vessels with a total of \(1,238,300\) registered tons, and 1,200 men killed. She dropped from fourth place to sixth in mercantile tonnage. Norway's merchant marine on Jan. 1, 1921, was 3.828 vessels of \(1,528,104\) net tons. Her sailors are known the world over. Fisheries constitute a leading industry and provide a large part of the exports. In 1921 more than \(112,000,17\) per cent. of the entire male wage earning population ( 600,000 ), earned their living directly or indirectly by the sea.

The forests have an estimaied value of a billon kronen (approximately \(\$ 250,000,000\) ) and about three-fifths of the acreage is covered with pine and fir trees. The export of timber and wood pulp in 1919 .was valued at \(113,048,100\) kronen; and in 1920 at \(226,669,000\). The Norwegian Afforestation Association has planted since 1906 between ten and fifteen million new trees annually. Agriculture is limited and the country imports much food supply.

The country lacks coal but has become a great power producing country by utilizing by electrical transmission its greatest natural asset-water power, which is estimated to amount to \(15,000,000\) horsenower day and night. Of this the Government owns \(2,000,000\), and has developed 75,000 . Private enterprise has developed about \(1,200,000\) horsepower. Engineering plans are under way to transmit hydro-electric power to. Central Europe. Already Norway is feellng the impulse on its industries which, on Jan. 1, 1921, numbered 8,069 establishments, giving employment to 158,259 workers; and which have been developing on an export basis.

The chief mineral products are pyrites, copper ore, iron ore, nickel ore, silver and feldspar.

Norway, in 1921, had 2,139 miles of railroads, of which 1,771 are state owned; the work of convertling these to electrical power is golng on rapidly. The number of ships entering Norwegian ports in 1920 was 8,031 with a net tonnage of \(4,402,277\).

The population of Norway is singularly homogeneous, there being numbered of non-Norweglans only about 1 per cent., 20,000 Lapps or Finns and 8,000 Quains, both of Mongollan ancestry. This excludes about 50,000 forelgn-born residents of the country beiore the war, many of whom returned to their native countries. Norwegians have emlgrated in great numbers, chiefly to the United States and Canada. The United States Census of 1920 returned 363,862 residents of the United Staters as born in Norway.

Norway under Its Constitution, adopted May 17, 1814, is a constitutional hereditary monarchy. Independent for centurles. Norway entered into a union with the Kingdom of Denmark in 1381. By treaty of Jan. 14, 1814, the King of Denmark ceded Norivay to Sweden, but the Norwegian people declared themselves independent and elected a

Danish Prince as their King. The foreign powers refused to recognize thls election: as a result a convention on Aug. 14 proclaimed the independence of Norway in union with Sweden, and on Nov. 4 elected Charles XIII. of Sweden King of Norway. This union lasted until 1905. Disagreements having arisen, culminating in Norway's claiming the rlght to maintain its own consular service, Norway declared the union dissolved on June 7 , and after negotiations a rcpeal of the union by mutual agreement was signed Oct. 26, 1905. After a plebiscite Prince Charles of Denmark was elected King and ascended the throne, taking the name of Haakon VII. A treaty guaranteeing the integrity of Norwegian territory was signed in October, 1907, by Norway, Great Britain, France, Germany and Russia.

The legislative power is vested in the Storthing, the members numbering 150 , elected for three years by direct vote on universal suffrage of citizens, both male and female, of 23 years of age. The Storthing divides itself into two sections, one-fourth of the membership forming the Lagthing, and three-fourths the Odelsthing, which consider the legislation separately, sitting in joint session on failure to agree separately, when decision is made by a two-thirds majority. The King may exercise the veto twice, but if the same bill is passed a third time it becomes law. The King appoints an executive Cabinet of at least eight Ministers, who may speak in the Storthing, but have no vote. There is a large measure of holne rule throughout the country through local governing bodies elected by universal suffrage.

The Evangelical Lutheran religion is endowed by the state and its clergy are nominated by the King. All religions are tolerated.

Education is compulsory from seven to fourteen, and the school system is highly organized. There is. So to speak, no illiteracy. The University at Christiania, founded 1811, has 1,500 students and is subsidlzed by the state.

The army is a national militia with universal and eompulsory service. The peace strength is 40,000 men, with a reserve of 315,000 . The navy is designed for coast defense only and numbers about 1,200 officers and men. with all seafaring men between the ages of 20 and 44 enrolled on the active list and liable to conscription.

The Norweglan Meteorological Serviee established in October, 1922, a station at Mygbugten, in eastern Greenland, and weather reports are now being transmitted daily by radio-telegraphy. Greenland is one of the "factories" of polar air.

Norway in the reaction from the World War found herself in the grip of hard times in the year 1921, and her industries and commerce have suffered heavily. The unit of eurrency, the kroner (par of exchange, 26.8 cents), being quoted in October, 1921, at 8.45 to the dollar. Great recovery has been made during 1922, and the dollar now (Oct. 15, 1922), equals 5.40 kroner. Norway's: commerce was:
Imports, 1920, calendar year ...kronen, 3,029,900,000 1921, calendar year...kronen, \(1,460,000,000\) Exports, 1920, calendar year. . .kronen, 1,241,800,000 1921, calendar year. . .kronen, \(576,000,000\) Norway's trade with the United States was:

AREA, about 25,000 square miles.
POPULATION, \(1921,1,503\).
Spitzbergen, a mountainous group of islands in the Arctle Ocean between \(76^{\circ} 26^{\prime}\) and \(80^{\circ} 50^{\prime}\) north latitude and \(10^{\circ} 20^{\prime}\) and \(32^{\circ} 40^{\prime}\) east longltude, the largest being West Spitzbergen \((12,000\) square miles), lies about 370 miles due north of Norway, half-way to the Pole. Discovered by Norsemen in 1194 and rediscovered by Barents in 1596 the islands had been the resort of whalers of several nations. Ever since 1261 Norway has periodicaliy asserted her claims to the islands, and from 1870 the demand became more insistent, increasing as Norwegian exploration discovered. rich outeropping seams of coal-a necessity which Norway lacks. International conferences were held without result, the islands remaining a No Man's Land. The war put an end to negotiations, but following action by the Peace Conference in 1919, a treaty was signed in Paris Feb. 9, 1921, by the United States, Great Britain. Denmark, France, Italy, Japan, the Netherlands, Sweden and Norway, which put Spitzbergen under the flag of Norway. but not with unlimited sovereignty, as they set certain specified guarantees

Foreign Countries-Palestine; Panama; Paraguay.
signatories to enjoy hunting and fishing privileges there; and equal treatment must be shown to all.

The development of the coal fields has proceeded rapidly. Norwegians own the two largest mining companies. The coal exported has been good steam coal; the output in 1919 was. 90,000 tons, and in 1921, 172,500 tons, practically all of which went to Norwegian ports. There are large deposits of lowgrade iron ore and gypsum, and signs of oll have been reported.

\section*{PALESTINE.}
(British Mandate)
AREA, estimated, 9,000 square miles.
POPULATION, estimated, July 1, 1921, 770,000;
divided 600,000 Mohammedans, 80,000 Jews,
84,500 Christians, 5,700 Druses, 170 Samaritans. CAPITAL, Jerusalem, population, estimated, 64,000. British High Commissioner, Sir Herbert L. Samuei. United States Consul, at Jerusalcm, vacant.

Palestine, the Holy Land, lying between the Mediterranean Sea and the River Jordan, was formerly a villayet of the Turkish province of Syria. It was conquered during the World War by British troops under General, now Field Marshal, Viscount Ailenby, Jerusalem being surrendered Dec. 9, 1917. Jerusalem had been in Moslem hands since 1244, had been conquered and reconquered in the crusades, and had been under the rule of the Turk since 1517. It remained under British Military Administration untll July 1, 1920, when Sir Herbert L. Samuel was appolnted High Commissioner and a civil government set up. The announced policy of Great Britaln is to accord equal treatment to the people and to provide a national home for the Jews, permitting them to return to Palestine only as the development of that country guarantees the normal absorptlon of immigrants for rising industries and reclalmed agricultural lands. There were about 60 colonies in 1921 with about 17,000 colonists living on 163,000 acres, about 10 per cent. of the cultivated area. Jews maintaln an agricultural experimental station in Haifa.

Jerusalem, the Holy City, is visited annually by large pilgrimages of Orthodox Greek Christians. The Mosque of Omar occupies the site of Solomon's Temple. It contains the sacrificial stone of Abraham and a relic of Mahomet. Bethlehem is also visited, the Church of the Nativity being reputed the oldest Christian church in existence.

Palcstine proper is about the size of the State of Vermont wlth twice as many inhabitants. On the west is the coastal plaln a hundred miles long and fifteen wide, fertile and well watered. In the centre is the plateau of Judea. The eastern border drops sharply into the depressed valiey of the River Jordan and the Dead Sea, 46 miles long, with an average width of 8 miles, 1,292 feet below sea level. The country ls capable of great agricultural development, dependent on irrigation. Oiives, figs and grapes are grown in large quantities; also cereals. There are large flocks of sheep and goats. The Government is making an effort to reforest the country. Rice, sugar, petroleum and cotton textiles are the chlef imports.
There were 625 miles of railroads in 1921; and for the year ending March \(30,1921,603\) steamers of 779.521 tons, and 2,688 saillng vessels of 29,578 tons entered the seaports-Jaffa, population, 45,000 ; Halfa, 26,000 ; Acre, 6,500 ; and Gaza, 15.000 .

Transjordania, an ill defined tarrltory of Arabia east of the Jordan, has been set up a an Emirate by the Brltish Government with Abduliah, the second son of the King of the Hejaz and brother of the King of the Iraq, as its Emir. The seat of Government is at Amman.

\section*{PANAMA REPUBLIC OF.}

AREA, 31,890 square mlies
POPULATION, 1920, 401,428, excluding the Canal Zonc.
CAPITAL; Panama, population, 1917, 61,369; Colon, 26,076.
President, Dr. Beilsario Porras, 1920-24.
Premier, Sr. Rodolfo Chiari (Interior and Justice). Minister to the United Staies, Dr. Ricardo J. Alfaro. Consuls General, at New York, Belisario Porras, Jr.; at New Oricans, vacant; Consuls, at Boston, Mrivin Maynard Johnson; at San Francisco, Francisco Jimenez; at Atianta, John Ashicy Jones; at Kansas Clty, Loren O. Booram; at St. Louls, vacant; at Fort Worth, L. T. Rogers; at Galveston, A. A. Van Alstync.
United States Minister, John Glover Smlth.
United States Consuls, at Panama, George Orr; at Colon, Julium D. Dreher.

United States Governor of the Canal Zone, Col. Jay J. Morrow, U. S. A., appointed March 28, 1921.

The Republic of Panama, formerly a department of Colombia, deciared its independence Nov. 3, 1903, and was rccognized Nov. 13 by the United States. It occupies the entlre isthmus of that name connecting North and South America, lying between the Caribbean Sea on the north and the Pacific on the south. The Costa Rican boundary line on the west has been a matter of dispute (see Costa Rica). The Colombian boundary line to the east was determined in 1921 by the ThompsonUrrutla Treaty.

By treaty Nov. 18, 1903, ratified Feb. 23, 1904, and with a supplemental (Taft) agreement of 1904 , the United States acquired the right to construct the Panama Canal across the Isthmus, a strip (the Canal Zone) extending for five miles on each side of the Canal, the terminal cities of Cristobal adjacent to Colon, and Balboa adjacent to Panama, and islands for defensive purposes ln the bay, in perpetuity and exclusive control for police, judiclal. sanitary and other purposes. The United States also has complete jurisdiction over sanitary and quarantlne matters in the two Cities of Colon and Panama and owns and operates the Panama Railroad, 47 miles long, connecting these cities. In return the United States paid Panama \(\$ 10,000,000\), and \(\$ 250,000\) a year, beginning after nine years
President Harding recommended to Congress on Sept. 5, 1922, the negotiation of a new treaty with Panama to superspde the 1903 treaty with the Taft agreement under which the Canal was constructed. The Panaman Government is anxious to have clarified the provision regarding the right recognized for the Government of the United States to intervene in behalf of peace and order in Panama; also that relating to relations with the Canal authorities; and also that on land valuations.

The civil population of the Canal Zone by census of June 30, 1921, was 23,757 , of whom 8,158 were Americans, and 2,825 American men and 323 Amcrican women were employed by the Panama Canal and Rallroad. The other employees numpered 5,168 , chiefly British West Indian Negroes.

The Canal Zone is a mllitary regervation and is administcred by the War Department. No private individuals are permitted to acquire land. (For statistics of the Panama Canal see page 720).

The soul of Panama is very fertile, but of the whoie area more than half is wholly uncultivated. Immigration is encouraged. The forest resources are great. Stock raising is extensively carrjed on. The chief exports are bananas (from Almirante) cocoanuts, balata, hides, gum and tortoise shell.

The Constitution, adopted Feb. 13, 1904, and amended Dec. 26, 1918, provides for a Chamber of Deputles of 33 members (election to be held every four years beginnlng with 1924) and a President also elccted by direct vote for a four-year term and not ellgible for re-election. He appolnts a Cablnct of five Ministers. There are clght provinces each under a Governor elected by popular vote The Roman Cathoilc religion prevails, but rellgious freedom is guaranteed. Primary education is free and compulsory. A university has bcen opened There ls no army; the national pollce numbers 69 officers and 750 men. The finances of the republle have been reorganized by a fiscal agent of the United States.

\section*{PARACUAY, REPUBLIC OF.}

AREA, estlmated, 75,673 square miles.
POPULATION, estlmated, 700,000.
CAPITAL, Asuncion, populatlon, 1920, 99,836.
President, Dr. Euscbio Ayala, 1920-24, assumed offlce, Oct. 29, 1921.
Premier, Sr. Rogeiio Ibarra (Interior)
Minister to the United States, none; legation in charge of the Consui Gencral.
Consuls General, at New York, Whiliam Wallace White; at Philadelphia, Rodman Wanamaker Consuls, at Norfolk, Carlos Barrett; at New Orieans, James Lloveras; at Chicago, Alberto W. Holmes; at Seattle, Erastus Braincrd.

United States Minister, William J. O'roole. United States Consul; at Asuncion, Harry Campbell. Paraguay is an lnland agricultural and pastoral country of South Ainerica, communlcating with the South Atlantlc by the Paraguay River, a tributary of the River Plata, and navigable by vessels of llght draft up to Asuncion. A railroad, British owned, 232 miles long, connects the capital with the Argentlne raliroad system. It ls bounded on the north by Bollvla and Brazil, on the east by Brazil and Argentina, on the south by Argentina, and on the west by Argentina and Bolivia. In area it is about the size of Ncbraska. The high plateaus are sultable for cattle raising. The chief exports are hides, timber, cattle, yerba (mate) and tobacco.

The Constitution of 1870 is modelled on that of the United States, but more centralized. The history of Paraguay since its declaration of independence from Spain in 1811 has been one of constant dissensions, dictatorships, revolutions and wars. The Roman Catholic religion is established but others are tolerated. Education is free and nominally compulsory. The university at Asuncion had 247 students in 1919.

Paraguay is a member of the League of Nations. She has a standing army of 1,900 and a reserve of 100,000 .

Minister io the United States, Hurza Hussein Khan Alai
Consu! General-at New York, H. H. Topakyan. Consul, at San Franclsco, vacant
United Siates Minister, Joseph Saul Kornfeld.
Uniled States Consul, ät Teheran, Gordon Paddock.
Persia (Iran) is an ancient kingdom occupying the western and larger half of the great Iranian plateau, between the rivers Indus and Tigris in Southwestern Asia. It is bounded on the north by Transcaucasia (Russla), the Caspian Sea and Turkestan; on the east by Alghanistan and Beluchistan (British India); on the south by the Arabian Sea and the Persian Gulf; on the southwest by Mesopotamla (the Klingdom of Irag); and on the west by Armenia. The boundaries are indeterminate-a causc of much friction. In size it equals the States of Idaho, Colorado, Utah, Nevada, Arizona and New Mexico combined. It is described as a "vast and miserably poor country with scanty population." The people are Moslems, mostly of the Shi'a sect, and education is largcly llmited to reading the Koran.

Across thls plateau, which lles at an altitude of 4,000 to 8,000 feet, in the north central part, from northwest to southeast, stretches a dcsert, 800 mlies long, varying from 100 to 200 miles wide. There are many peaks from 9,000 to 10,000 feet high. Flne forests cover the maritime plains and mountaln slopes. Mineral deposits are undeveloped, but known to be considerable. Turquolse mincs are worked crudely in Nishapur. Oil is produced near Ahwaz in Karun Valley, at the head of the Perslar Gulf. The Anglo-Persian Oil Company holds the concession, covering nearly 500,000 squarc miles, and has large refineries at Abadan \(\ln\) the Shatt el Arab on the Persian side of the Tigris bclow Basra. The British. Government bought control in this company in 1914 and lncreased its holdings ln 1917 to \(\$ 25,000,000\). Prospccting is vlgorousiy pushed.

Agrlculture is the chief industry, wheat, barlcy, rice, frults, gums, drugs, wool and cotton being the chief products. Some wines are lamous. Persian
carpets, all madc on hand looms, are produced in Tabrlz; Sultanabad and Kerman. The chief exports in 1920 were petroleum, cottons, carpets, fruits, oplum and rice; the chlef imports. were textiles, sugar, tea and manufactures of metals. The Britlsh Emplre, Fiussia, Egypt and Turkey are the best customers. There are fifteen regular trade routes along which goods are carried by caravans. Persla has but 350 miles of railroads. At the southern ports, all small, there entered in 1919-20 vessels of a total tonnage of 1,551,129, nearly all British; and at the Caspian ports 808,921 , all Russian.

Persia has been in political turmoil for twenty years. A Constitution was forced from the Shah in 1906 which provides for a National Assembly, which has been convencd three times. Government is in the hands of a Cabinet. In 1907, Great Brltain and Russla, by a convention, while mutually engaging to respect the integrlty and independence of Persia, marked off special "spheres of influence" for each, Russia taking about two-fifths of her territory in the north and Great Britaln about one-quarter in the South, the remainder belng a buffer zone. Persia, though a neutral in the World War, was constantly fought over, suffered heavily and the northwest provinces brought nearly to tamine. The province of Azerbaijan, peopled by Tatars, In the extreme northwest, adjoining Armenla and Transcaucasia with Baku, the great oil port on the Caspian as lts capital, declared is independence in 1917 after the Russian debacle, and later became a Sovlet republic.

On Aug. 9, 1919, Great Brltaln and Persia signed a treaty by which the former agreed to furnish expert advis 3 rs, military officers, munitlons and modern military equipment, a loan of \(\$ 10,000,000\) to be secured by customs dutles, and to build certain rallroads. This agreement was never put in force and was denounced by Persia wlth the consent of Great Britain ln February, 1921. Immediately (in March) Persla signed a treaty with the Russian Soviet Republic as a substltute for all previous Russo-Persian treatles, which establlshed diplomatic relations, restored Firuzeh and Ashurada to Persia, annulled all concesslons prevlously granted to Russians in Persia, turned over the Russian Discount and Loan Bank to the Perslan Government, cancclled all Persian debts to Russia and abolished the capltulations.

Persia sent a delegatlon to Paris ln 1919 to lay its clalms before the Peace Conference, but was denied a hearing Persia is a member of the League of Nations.

Peru is situated on the Pacific Coast of Soutl America, bounded on the north by Ecuador, on the cast by Brazil and Bolivia, and on the south by Chilc. In arca it almost equais the comblned area of Texas, Oklahoma, Kansas, Nebraska, Colorado and New Mexico. The territory 11 the northeast corner in the Amazon basin is in dispute betwecn Colombia, Ecuador, Brazil and Peru, and the possesslon of the provinces of Tacna and Arica on the Pacific, containlng the very vaiuable nitrate deposits, whlch were retalned by Chile on defeating Peru in
the war of the Pacifie, 1879-82, has been long in dispute and is now the subjeet of diplomatic negotlations with the United States as mediator. The Protocol and Complementary Aet, signed at the Washington Conferenee, was ratified by the Peruvian Congress on Sept. 12 by a vote of 94 to 3 .

The Andes reach their highest altitudes in Peru, whlleh contains seven peaks tower'ng about 19,000 feet, of which Huasaran (altitude 22.050 feet), Huandoy (21,100 feet), Arequipa or Misti ( 20,013 feet) and Hualcan ( 20,000 feet) are the loftlest. The thirty mile wide strip of land along the Pacifie is a desert except as it is lrrigated from streams from the inountains; the uplands or western slopes of the Andes are well watered and also the eastern descent to the Amazon basin, whieh is covered with forests. The mountalns are rich in minerals and many valuable mines, some dating back to the Incas, are being worked. Peru produces 95 per cent. of the world's vanadium. Sugar, cotton, copper. silver, vanadium, guano, petroleum and wool (both alpaca and sheep), are the prineipal exports, and textiles, wheat lumber and coal the ehief lmports.

There were in 1920, 1.984 miles of railroads, 1,385 being state railroads under control of the Peruvlan Corporation. At Callao in 1920 in the forelgn trade there entered 721 steamers of \(1,767,032\) tons, of these 194 were British, 192 Ameriean, 135 Peruvian, 131 Chilean, and 11 Japanese.

Under the new Constitution, Jan. 18, 1920, the Government is highly centralized. The President, the Senate ( 35 members) and the House of Representatives are all elected for five years. Absolute political and religious freedom is guaranteed. The Catholic relision is the state religion. The law of Feb. 5, 1921, makes elementary edueation compulsory and free. At Lima s the Univers ty (w th, in 1920, 1,308 students) founded by Charles V. in 1551. Over 50 per cent. of the population are full-blooded Indians, ineluding many uneivilized and unenumerated tribes, 40 per eent. are Mestizos, or of other mixed blood, and bat 2 per cent. entirely of Caueasian blood. The lot of the Indians has been very bad. President Legula put in motion an elaborate series of reforms to modernize the country, including the sanitation of 31 Peruvian cities, the reorganizatlon of the army and navy, the reconstruction of the educational system, huge irrigation works, and the stamping out of yellow fever
Mllitary service is compulsory; the standing army numbers 7,500 , with 99,000 in the reserves. The navy is small. Peru is a member of the League of Nations.
Par of exchange, libra.
and Prussia. It is about the size of the states of Ohio, Kentucky and Tennessee.
Poland is bounded by Germany on the nortli and west; Latavia and Lithuania, north; Czeehoslovakl: and Roumania, south; Ukraine and Russia, east. Of the population about \(18,000,000\) are Catholie Poles and Slavs; \(3,000,000\) Jews; the others are Ruthellians, Germans, Lithuanians, Russians, etc. Fifty elties have over 25.000 .
Poland is, except in the extreme south, an unbroken plain, aeross which three glacial movement; have swept; average elevation, 480 feet; averagi rainfall, 21 to 23 inches; snowfall, 10 to 20 per cent of total precipitation lasting 40 to 100 days.

Access to Free City of Danzig (Gdansk), formerly of German Empire, port on Baltic Sea, was granted by Treaty of Versailles. Poland also has developed lts own Baltie port, Gdania, on Pollsh soil, tho "corridor"' granted her just west of Danzig
The Vistula River gives navigation from Danzig south through. Poland. A trans-European trade route is projected by eanalizing the Vistula, eutting a canal to the Dneiper, and eanalizing that river to the Black Sea at Odessa.
Fifty-one per cent. of the population engage in agrieulture. There are approximately \(45,000,000\) aeres arable; \(13,000,000\) pastures; \(23,153,000\) forests \(9,000,000\) gardens and other uses. Heavy wal losses have been recouped to within approximately 80 per cent. of normal agrieultural produetivity Normal cereal crops run about \(60,000,000\) bushel of wheat; \(185,000,000\) rye; \(124,00 \mathrm{C}, 000\) oats; \(60,-\) 000,000 barley; \(800,000,000\) bushels potatoes; sugar beets, \(4,828,000\) tons; more than \(1.000,000\) tons of elover. Domestic animals normaliy number 17,000,000 ; distillerles, 2,000 , with an output of 40,000 ,000 gallons; 422 breweries, \(75,000,000\) gallons; normal sugar produetion, 600,000 tons.
In Galicla there are large deposits of petroleum. Operations are closely controlled by the Government, but French and English capital for 25 years has been predominant and is permitted to retain their interests. The oil measures are estlmated at several bllion tons. Ore production has ranked Galicia eighth in the world. The output in 1921 was 790 , 478 short tons, less than half that of 1909 , which was the highest ever known, \(2,309,793\) tons. The market is mainly in Poland, the Ukraine, Czechoslovakla, Germany, Austria and the Baltic states.

Forests cover 23 per cent. of area; totai, \(22,153,000\) aeres; state-owned, 29.5 per cent.; private, 70.5 per eent. Conlferous trees predominate, mostly Seotch "pine, spruce, fir, lareh; deciduous trees beeeh, oak, alder, bireh, elm, aspen, ete. Woodworking industries are important. Annual regrowth is estimated at \(9,000,000,000\) feet board measure, permitting exportation of about \(5,500,000\) tons or about \(8,000,000,000\) feet, with constant detons

In Upper Silesia, Poland aequlred 1,300 square miles of 4,100 involved. Most of mineral and industrial values were in Polish-aequired territory, which contains enough coal to mine annually 50 ,000.000 tons for 300 years. The normal coal production in Poland proper, Dumbrowa district, is \(10,000,000\) tons. Poland acquired virtually all the zine mines, whenee anntally 180,000 tons are taken -18 per cent. of world's zinc; most of iron industry 22 out of 36 blast furnaces. Railways, which are natlonalized, are to remain undivided for 15 years, with Pollsh-German commission to supervise them and industries. The major part of steel industry remains German
Commercial treaties exist with all neighboring natlons, espeelally close political and eeonomic relations with France. Polish exports run at about 650,000 tons; imports, exeluding coal, 850,000 tons. Poland is self-supportlng, foodwise, produeing normal fond surplus more than enough to pay for necessary foorl imports. Exports include live animalz, fond, raw inaterials, manufactures and semi-manufactures. Upper Sileslan coal acquisitlons will glve Poland large surplus for exportation. Heavy trade with Russla is antielpated. Trade with others is approacling normality by removal of lampering post-war restrietlons. Imports from Unlted States, raw cotton, automobiles, tires, machinery, locomotlves (of whlch \(\$ 7,500,000\) worth was bought ill 1919), foodstuffs up to 1920 , when they practically ceased.
Poland is governed under a Constltution adopted March 17, 1921, which ealls for a two-chamber leglslatlve body, Senate and House, elected by universal suffrage. Freedoin of press, religion, etc.. is guaranteed. The Presldent of the republie is to be chosen by Parllament for a seven-year tellure, and appoints a Cabinet of Ministers responsible to Parilament. There are slx political parties.

The Pollish Army, which numbered more than \(1,000,000\) during Soviet-Pollsh war of 1920 , was re-
duced to 230,000 by Sept. 1, 1922, and it is announced will be reduced by January, 1923, to \(200.0 \cup 4\) Four universities and two polytechnics have 17,000 students; public schools, 2,000,000.

Poland is a member of the League of Nations Par of exchange is mark.
Exchange rate, Nov. 1, 1922.
23.8 cents
... 0072 cents 138,000000 marks pus 18,96 debt, \(732,138,000,000\) marks, plus \(\$ 18,969,120\) bond exchange rate, about \(\$ 10\) per capita; total all debts, \(\$ 15\) per capita.

The budget for 1922 shows a deficit at exchange rate of about \(\$ 50,000,000\). The estimates are: Budget-Receipts, marks. . . . . . . . . .459,000,000,000

\section*{PORTUCAL, REPUBLIC OF:}

AREA, 35,490 square miles; which includes tlie Azores, 922 square miles, and Madeira, 314, islands in the North Atlantic Ocean. Colonial possessions in Africa-Cape Ver de Islands, 1,480 square miles; Guinea, 13,940; Principe and St. Thomas Islands, 360; Angola, 484,800; Mozambique, 426,712; total Africa, 927,292 ; in AsiaGoa, India, 1,469; Damao, India, 169; Timor, Malaysia, 7,330; Macao, China, 4; total Asia, 8,972. Grand total, 965,754 .
POPULATION, census of \(1911,5,960,056\). Colonial possessions-Africa, 7,734,701; Asia, 1,001,153; total colonial possessions, 8,735,854. Grand total, 14,695,910.
CAPITAL, Lisbon, population, 1920, 500,276. Other cities, Oporto, population, 1920, 215,981; Setubas, 30,346; Funchal (Madeira) 24,687.
President, Dr. Antonio Jose de Almeida, born 1866, elected Aug. 6, 1919.
Prime Minister, Antonio Maria Silva (Interior), appointed Feb. 9. 1922.
Minister to the Unired Siates Viscount d'Alte.
Consuls General in the U.S., at New York, Jorge da Silveira Duarte d'Almeida; at Chicago, S. Chapman Simms; at Boston, Eduardo Rodrigues de Carvalho; at New Orleans, Luiz da Costa Carvalho; at San Francisco, Mario do Nascimento. Consul, at Panama for the Canal Zone, Jose Augustin Arango.
United States Minister, Fred Morris Dearing.
United States Consul General, at Lisbon, W. Stanley Hollis; Consuls, at Loanda, Angola, Reed Paige Clark; at Oporto, Samuel H. Wiley; at Funchal, Madeira, Stillman W. Eells; at St. Michaels, the Azores, Drew Linard; at Lourenco Marques, East Africa, Cecil M. P. Cross.
Portugal occupies the western part of the Iberian Peninsula, being bounded on the north and east by Spain and on the south and west by the Atlantic Ocean. Its area is 34,254 square mlles, a little larger than the State of Maine. The Azores and Madeira, Islands in the North Atlantlc, are politically an integral part of the republic. \({ }^{-}\)The country is mountainous and well watered to the north. About onethird of the land is cultivated. Vineyards abound, and wincs, olive oil and fruit are largely produced. Winc-making is the chief industry. Forests of pine, oak, cork and chestnut cover 19 per cent. of the country, and cork, of which \(175,000,000\) pounds are produced annually, is the second largest industry. Portugal has much mineral wealth, but is undeveloped because of a scarclty of coal and poor transportation. The sardine fisheries are important. Hides and wool are also exported.

Portugal had in 19202.128 mlles of railroads, of which 733 were state owned. The merchant marine in 1917 numbered 206 vessels, with tonnage of 122,726 ; in \(1918,5,566\) vessels of \(3,284,995\) tonnage entered the ports.

Portugal, an independent state since the twelfth century, was a kingdom until Oct. 5, 1910, when a revolution drove King Manuel II. from the throne and procialmed a republlc. It is governed under a Constitution, adopted Aug. 20 , 1911, whlch provides for a National Council of 164 members, elected by direct vote of three years, and an Upper Chamber of 71 members, elected by the Municipal Councils, half renewable every three years. The President is elected by both Chambers for a four-year term; he appoints the Ministers, who are responslble to the Chamber. Voters must be able to read and write (1919). The army is ralsed by conscription and numbers 33,000 . with reserves of 620,000 . The navy personnel is 6,000 .

The dominant religion is Roman Catholic; there
ls freedom of worship. Primary education is irce
and nominally compulsory; the republic has been showing increascd interest in education, but t.1s percentage - of illiteracy is about 75 . There are three universities.

Portugal is a member of the League of INations.

PORTUGUESE COLONIAL POSSESSIONS. Asiatic.
Portuguese India includes Goa (capital, Panju), on the Malabar coast; Damao, near Bombay; and Diu, a small island 140 miles from Damao; area 1,638 square milcs; population, 548,472 . Salt is produced in Goa and Damao, and manganese near Mormugao, where there are 20 mines. Manganese is imported into the Unlted States for steel-making as an essential. The 1921 estimated revenue of this group was 1,651,000 escudos; expenditures, 2,086,000; imports, 4,751,000; exports, chiefly cocoanuts, copra, fish, spices and salt, 1,401,000.

Macao, China, is on an island of the same name at the mouth of the Canton River; it has 74,866 population (1910); 2,171 of. which were Portuguese. the rest Chinese; a military force of 488 natives; and had (budget of 1922) a revenue of \(2,665,000\) escudos, and expenditures of \(2,519,000\). Wlth imports in 1920 of \(9,519,000\) escudos, and exports of \(7,016,000\). The trade is mostly transit.

Portuguese Timor is the eastern part of the Malay island of that name, off the north coast of Australia, Holland having the western part. The population in 1915 was 377,815 . Tile. 1922 budget estimate shows revenues 378,125 e cudos, expenditures the same -a balanced budg? ; imports, 1919 814,612 escudos; exports, coffee, sa dalwood, siandal root, copra and wax, \(365,595\).

\section*{PORTUGUESE AFRICAN FOSSESSIONS.}

The Cape Verde Islands, in the North Atlantic, longitude \(25^{\circ}\), latitude \(15^{\circ}\), 14 in number, Prala. capital, had a population of 149,793 in 1912, of which 4,799 were white. Chlef products are coffee, medlcinal products, hides and. millet. Receipts, budget of \(1922,2,783,000\) escudos; expenditures, the same-a balanced budget.
Portuguese Guinea, on the coast of Senegambia, chief port Bissau, has a populatlon estlmated at 289,000 . In 1920 imports were \(15,659,000\) escudos; exports, chiefly rubber, wax, oils, ivory and hides, 9,540,000

Angola, Portuguese West Africa, has a 1,000-mlle coast line stretching south from the mouth of the Congo. It is governed by a High Commissioner, who resides in Loanda, with large powers. The Portuguese have owned it since 1575. Its area covers 484,800 square miles.

The native population in 1914 was estimated at \(2,124,000\). There were 52 Government schools, witn 2,400 pupils. The budget cstlmatred revenues and expenditures for 1922 were \(53,507,000\) escudos.

Chicf products are coffee, rubber, wax, sugar, oll seeds, cocoanuts, lvory, cattle, fish, tobacco for local use, cotton, petrolcum and asphalt. There are large deposits of malachite, copper, iron and salt, and gold has been found. Railway mlleage is 818 .

Mozambique, Portuguese East Afrlca, extends from Cape Delgado ( \(10^{\circ} 40^{\prime}\) couth latitude) to the Unlon of South Africa just below the capital, Lourenco Marquez. To the west lles the Union of South Africa and Rhodesia (British). On the north is Tanganyika, formerly German East Afrlca, but surrendered to the British November, 1918; over 400 square miles of that territory, the Kionga Triangle, was transferred to Mozambique \(\ln 1919\).

Mozambique has 428,132 square miles, and an estimated population of \(3,150,000\) natives and \(10,-\) 500 whites. The budget estimates for receipts and expenditures for 1922 were \(13,749,000\) escudos. Chief products are sugar, cocoanuis, beeswax and mining products. Gold has been discovered and coal dcposits exlst. It has vast natural resources practically untouched. The princlpal ports are Mozambique, population in \(1910,363,000\) (lncluding

472 Europeans) ; Ibo, Quliame, Chinda and Beira In 1919 imports were \(27,923,000\) escudos; exports 11,730,000, re-exports and transits, 66,463,958

Raiiroads are being pushed. the most important line being the Deiagoa Bay to Pretoria, 347 miles.

The isiands of St. Thomas and Principe, 125 miles off the coast of Airica in the Guif of Guinea, were discovered in 1471. The popuiation in 1914 was 63,500. Chief products are cacao, coffee, rubber and cinchona. The 1921 estimated budgct, revenues and expenditures, were \(1,718,000\) escudos. Imports in 1920 were 12,398,000 eseudos; exports, \(17,490,000\)

Trade of Portuguese Africa with the United States was:

ROME, THE SEE AND CHURCH OF. Supreme Pontiff, Pius XI. (Achilles Ratti), born at Desio, May 30, 1857, created Archbishop of Milan, September, 1921, Cardinai, June 13, 1921, eiected Pope (261st) in succession to Benedict XV., Feb. 6, 1922.

Secretary of State, Cardinai Gasparri.
(For members of the Coilege of Gardinals consuit the index).
Apostolic Delegate to the Unted States, Arehbishop Bonzano.
The Popes for many centuries, with some slight breaks, heid temporal sovereignty over mid-rtaiy (the so-called Papal states), extending from sea to sea. comprising an area of some 16,000 square miles with a popuiation in the nineteenth century of over \(3,000,000\). This territory in tne retgn of Pius IX. was incorporated in the Kingdom of Itaiy, the sovereignty of the Pope being confined to the paiaces of the Vatican and the Lateran in Rome and the villa of Castel Gandoifo by the Itallan law of May 13, 1871; this law aiso guaranteed to the Pope and his successors in the chair of St. Peter a yeariy indemnity of \(3,225,000\) iire ( \(\$ 622,425\) at par of exchange), which allowance, however, remains unciaimed and unpaid.

The centrai administration of the Roman Cathoiic Chureh is carried on by eleven committees cailed Sacred Congregations, viz: Holy Offce, Consistorial Discipline of the Sacraments, Council, Reilgious, Propaganda. Fide. Under Rites, Ceremonial, Extraordinary Ecciesiastical Affalrs, Seminaries and Universities, Tribunals and various offices.

The Holy See maintains diplomatic reiations with Austria, Bavarla, Beigium, Czechosiovakia, France, Germany, Great Britain, Hungary, JugoSiavia, Monaco, the Netherlands, Poland, Portugal, Roumania, Russia, Spaln, together with the most of the American repubiles except the United States and Mexico.

\section*{ROUMANIA, KINCDOM OF.}

AREA, 122,282 square miles; divided, Old Roumania, 53,489; additions confirmed by the 1919 peace treaties, Bessarabia, 17,146; Bukovina, 4,030; Transylvania, 22,312; Crisana, 8,038; Maramuresh, 6,258: Banat, 11,009.
POPULATION, 17,393,149; divided, Old Roumania, 7,904,104; Bessarabia (joined March, 1918), 2.344,800; Bukovina (joined November, 1918), 800,098; Transyivania (joined December, 1918), 2,678,367; Crisana, 1,316,981; Maramuresh, 766,666; Banat, 1,582,133 (Census of 1917).
CAPITAL, Bucharest; popuiation, 345,666; other cities. Chisinau, popuiatlon, 114,100; Cernauti, 87,128: Ismail, 85,600; Iasi (Jassy), 76,120; and 20 others from 25,000 to 75,000
King, Ferdinand I., born Aug. 24,1865 ; succeeded his uncic King Caroi, Oct. 11, 1914: married Jan. 10, 1893, Princess Marie, daughter of the Duke of Saxc-Coburg and Gotha, granddanghter of Qucen Vietoria. Heir, Crown Prince Caroi, born Oct. 15, 1893, married March 10, 1921, Princess Heien of Grecce; one son Michei.
prime Minisler. Jon Bratiano (War)
Minister to the United States, Prince A. Bibesco. Consul General in the United States, at New York, T Tileston Weils; Consuls, at Chicago. Ivan C. Popovici; at Pittsburgh, Samuei A. MeCiung. United States Minister to Roumanta, Peter Augustus Jay
Untterl States Consuls, at Bucharest. Ely E. Palmer; at Constanzia, Richard B. Haven. Roumania, whose history began as a Roman coiony, was formed within furkey in-Europe by
and Moldavia, in 1861; proclaimed its independence May 21, 1877, during the Russo-Turkish war: and was so confirmed by the Treaty of Beriin in 1878 losing Bessarabia, however, to Russia. The Worid War resuited in the return of Bessarabia, the addition of Transyivania from Hungary and of Bukovina with part of the Banat, Crisana and Maramuresh from the Austro-Hungarian Empire, based on ethnoiogical grounds. The country. is now lounded on the north by Hungary, Czechosiovakia and Poiand, on the east by the Ukraine (Russia) and tile Black Sea, on the south by Bulgaria and Serbia, and on the west by Jugo-Siavia and Hungary It is equai in size to the State of New Mexico. For about 300 miles the Danube forms its southeri boundary: the iast 250 miles of its course (from Oitenitza to the Black Sea) it flows through Roumania. The Dniester forms its northeast boundary for 300 miles. The Carpathian Mountains extend irom north to south to the middie of the country, whence the Transyivanian Alps extend 200 miles due west. .These mountains formed the oid western boundary.

The forests are extensive (18,750,000 acres) and the timber industry important. The soil is very fertile, making the country a granary of Europe. Four-fifths of the population engages \(\ln\) agriculture and stock raislng. The production of wheat in 1919 was \(1,320,000\) tons and \(\ln 1920640,000\) tons: other cereals, \(3,148,000\) and \(2.710,000\) tons respectlvely The tobacco crop in 1920 was 5,000 tons. About 50,000 are empioyed in the oil fields, the iargest industry, and \(1,160,885\) metric tons of petroieum was produced in 1920 . Salt mining in the lower Carpathians is a state monopoly.

Roumania had in \(1920 \quad 7.240\) miles of ratiroads, with a navigation servlce in the Black Sea and the Danube River, ail state operated. t The merchant marine has 158 vesseis of 71,158 tonnage. In 1919 there entered Roumanlan ports 10,546 vessels of 2,991,000 tonnage. The European Commission of the Danube, establlshed in 1856, wlth sovereign powers over the navigation of that river, has its seat at Galatz.

A Constituent Assembiy was eiected in May and June, 1920, by universal, direct and secret suffrage. Work is in progress on harmonization of the Constitutions of the several countrles which before had Constitutlons-Old Roumania, Bessarabia, Transylvania and Bukovina. The Constitution of Oll Roumania was adopted in 1866, and amended in 1879 and 1894. It provided for two legisiative chambers. The Senate now consists of 170 members, 82 for Oid Roumania, 45 for Transyivania, 24 for Bessarabla, 19 for Buikovina, four for the universities, and 19 blshops. The Chamber of Deputies now consists of 347 members, 168 for Old Roumania, 112 for Transyivania, 51 for Bessarabia, 16 for Bukovina. The King has veto power over the acts of the Assembiy. Executive power is vested in a Councii of twelve Ministers. Milltary service is compulsory. On Jan. 1, 1922, the effective strength was 230,000 men, there having been disorders in 1918 which cailed 400,000 men to the coiors. Further reduetions are in progress.

The navy consists of a smail crulser, slx destroyers two scout boats, and four gunboats, with a special Danube Rlver naval force of 12 gunboats, nine sioops, four river monitors, eight destroyers and seven torpedo boats. The navai base is at Suiina, on the Biack Sea, chief port.

Of the population in 1918 there were \(9,695,000\) of the Orthodox Greek Church, 1,456,000 of the Greek Cathoiic Church, 1,483,000 of the Roman Cathoile Church, 1,334,000 Protestants, 17,000 Armenians, 834,000 Jcws and 44,000 Mohammedans. Liberty of worship is assured. Orthodox ciergy are pald by the state, other cicrgy being subventloned. Instruction is frec and compuisory, "wherever there are schoois." Inteiligence is spreading, but in 1909 , by a speciai census, 60.16 per cent. ot the population over seven years of age was iliterate Roumania is a member of the League of Nations

The leu is the unit of currency, goid par being 19.3 cents. Exchange, Nov. 1, 1922. was 63 cents. Imports in 1919 were \(3,575,000,000\) ici; exports. 102,\(875 ; 000\). The ton heavy adverse trade baiance caused Roumania to defauit the interest of her two-year treasury notes eariy in 1922. Nationalization of minerai resources is serlousiy proposed.

Budget, 1922-23-Receipts, 10,250,000,000 iel; expenditures, theoreticaliy equai.

The public ciebt on April 1, 1921, was 20,311.293,312 iei, besides the portions of the diebts of Austria-Hungary and Russia wbich have been assumed by Roumania, \(10,000,000,000\) lel.

(Russlan Soclalist Federal Sovlet Republlc.)
AREA, $8,166,130$ square milcs; dependencies (Khiva, estimated, 24,000 square miles, and Bokhara, estimated, 83,000 ), 107,000 square miles; grand total, $8,273,130$ square miles.
甲OPULATION, estlmated, 1922, 131,546,065; dependencies, Khiva, estimated, 646,000; Bokhara, estimated, $1,250,000$; total 1,896,000; grand totai, 133,442,065.
CAPITAL, Moscow, succeeding Petrograd (St. Petersburg) as capital of Soviet Russia: population, 1920 census, 1,050,011; other principal citles, Petrograd, population, 1915, 2,318,645; popuiation, estimated, 1922, 700,000; Kharkov, capital of the Ukraine, population, 1913, 258,360; Odessa, port on the Black Sea, population, 1912, 631,000; Kazan, 1913, 195,300.
Council of People's Commissaries (as of Aprll, 1922): President, of Council, Vladimir Ilich Ulianov-Lenin, born April 23, 1870.
Minister of Foreign Adfairs, Georges Chicherin.
War and Marine, Leon Trotzky; Finance, Krestinsky; Healt?, Semashko; Posts and Telegraphs, Dovgalevsky; Ways and Communications, Dzerzhinsky; Supreme Economic Council, Bogdanov; Agriculture, Yakovenko; Food, Brlvkhanov; Justice, ture, Yakovenko; Food, Brivkhanov; Justice,
Kursky; Social Welfare, Vinckurov; Labor, Schmidt; Education, Lunacharsky; Nationalities. Stalin; 'Workers' and Peasants' Inspection, Stalin; Home Affairs, Dzerzhinsky; Foreign Trade, Krassln.
Chairman of the Central Executive Committee of Soviets, Kainin (eiected by the All-Russian Congress for period of one year).
Ambassador to the United States, no diplomatic relatlons with the Soviet Government. The United States State Department still recognized (May, 1922) Boris Bakhmeteff, appointed July 5,1917 , by the Kerensky Government, as Ambassador from Russia.
Consuls General in the United States, at New. York, Michel Ostinow; at Seattie, Wash., Nikolai Bogoyavlensky (also for Nome, Alaska); at Chicago, Antoine Volkoff. Consuls, at Boston, Joseph A. Conroy; at Philadelphia, William Tucker; at Pittsburgh, Georges Tchirkow; at San Francisco, George Romanovsky.
United States Ambassador to Russia, vaeant.
United States Consuls, at Vladivostok, Siberia, S. Pinckney Tuck.

Russia stretches across two continents from the North Pacific to the Baltic. It occuples the northern part of Asia and the eastern half of Europe, from the Arctic to the Black Sea.

On March 12, 1917, the day of the revolution that destroyed Czardom, Imperial Russia comprised $8.764,586$ square miles of territory, $\mathbf{F}^{-i}$ ith $182,182,600$ (official "revision" estimate of 1915) of population; this included 131,796,800 ln European Russia; $13,229,100$ in the Caucasus, $10,377,900$ in Siberia, and $11,254,100$ in the Central Asiatic provinces. The population analyzed $100,331,516$ Aryans, the several branches of the Siavs forming 92 per cent. thereof, with half a dozen other races represented. The changes wrought by the world war, the revolutionary movements in minor regions, treaty decrees of the Allied and Associated Governments, and negotiations of the Russian Sociaiist Federal Soviet Republic as to political and economle relations, brought dismemberment to the old empire and great modifications of terrltory and reiationship toward the new federations (R.S. F. S. R.) of many of the old distrlcts and provlnces. Five independent states have rlsen in the west. In 1920 the Russian Soviet Government concluded treatles of peace with each, Esthonia, Feb. 2; Lithuania, Juiy 12; Latvia, Aug. 11; Poland, Oct. 12; and Finland, Oct. 14; which recognized the territoriai limitations of each or provlded for further settlement. That same year agreement was reached by the Allied Powers whereby Rumania received Bessarabia, taken from her ln 1878, subject to later discussion by Russia. The former Turkish province of Kars, also taken in 1878, was renounced by the Soviet in the Treaty of Brest-Litovsk, March 3, 1918 . The area and population lost were:

|  | $\begin{aligned} & \text { Square } \\ & \text { miles } \end{aligned}$ |
| :---: | :---: |
| Poland (lndependent) | 43,804 |
| Finland (lndependent) | 125,689 |
| Esthonla (independent) | 16,000 |
| Latvia (lndependent) | 27,000 |
| Lithuania (independent) | 22,890 |
| Bessarabia (to Roumania) | 17,330 |
| Kars Area (semi-autonomou | 7,780 |

Total.
260,493

The Ukralne, nine provinces, 174,510 square miles (about the size of New England, New York, New Jersey and Pennsylvania), with $26,001,802$ of population, was, by the Treaty of Riga, 1921, technieaily left as an independent state, so recognized by Sovlet Russia and Poiand. The subsequent establishment of a Soviet form of government, under direct Soviet lnfluence, placed Ukrainia virtuaily in Russian territory, and it appears now to be regarded by practically all authorities as properly inclusive in the areas and population of the R. S. F. S. R. These are the statistics given out March 1, 1922, by the People's Commissar of Internal Affairs.

## RUSSIA OF TO-DAY.

INDEPENDENT REPUBLICS:

|  | Square |  |
| :---: | :---: | :---: |
|  | Miles | Population |
| Sovlet Russia Proper. | 1,290,440 | 65,751,898 |
| Ukraine. . . . . . . | 174,510 | 26,001,802 |
| White Russia | 23,290 | 1,634,223 |
| Azerbaljan | 33,970 | 2,096,973 |
| Armenia | 15,240 | 1,214,391 |
| Georgia | 25,760 | 2,372,403 |
| Far Eastern Republlc | 652,740 | 1,811,725 |
| Siberia. . . . . . . . | 4,210,420 | 9,257,825 |

A UTONOMOUS REPUBLICS:

| Bashkir | 40,420 | 1,268,132 |
| :---: | :---: | :---: |
| Tartar. | 25,960 | 2,852,135 |
| Crimea | 15,060 | 761,600 |
| Mountain Repubiics | 17,420 | 808,480 |
| Daghestan. | 13,730 | 798,181 |
| Kirghiz. | 843,640 | 5,058,553 |
| Turkestan | 577,400 | 7,201,551 |
| A UTONOMOUS AREAS: |  |  |
| Votiak | 11,300 | 686,049 |
| Zyrian | 107,060 | 186,878 |
| Kalmyk | 38,440 | 126,256 |
| Mari (Cheremiss) | 6,040 | 300,069 |
| Chuvash | 6,720 | 758,161 |
| LABOR COMMUNES: |  |  |
| Karelia. | 28,890 | 144,392 |
| German Volga Commune. | 7,680 | 454,368 |
| Total. | ,166,130 | 1,546,045 |

Because of permanent agreement the Aslatic states of Khiva and Bokhara should be considered as dependencies of the R. S. F. S. R. Their statistics are:

Of the group under the heading Independent Rcpubiics, the Ukraine is the southwestern division of European Russia. (See following.)
White Russia iies along the Polish frontier with Mlnsk as its chiel city.

Azerbaijan (the size of the State of Maine), has the southern half of the Caspian Sea shore line for its eastern boundary with Persia on the soutli.

Armenia (the size of Massachusetts, Connectlcut and Rhode Island), also of the independent rcpublic group, on the south and west. and Georgia (the size of West Virginia), another on the north and Daghestan (the size of Maryland), classed as an autonomous republic, along the Caspian, on the north; Baku, the great oil port on the Caspian is lts chief city. Armenia has Persia on the south, Turkey on the west and Georgia on the north. Erivan is lts chief city.

Georgia also has Turkey as lts neighbor on the south and Daghestan on the northeast. On the west lt lies along the Black Sea with Tiflis as lts capitai and Batum as lts port.

North of Georgia and west of Daghestan, with Russia on the north and the Black Sea on the west are the mountain republics of the autonomous group-four of them-(about the slze of Vermont and New Hampshire). These five divisions are a rearrangement of the former Transcaucasia:

Of the other autonomous republics, the Crimea (about the size of Maryland and Delaware) occupies the peninsula between the Black Sea and the Sea of Azof. Sebastopoi ls its chief city and seaport. Turkestan (twice the size of Texas) lies ln Asia east of the south half of the Caspian Sea. North of lt In Asia and enclosing the north side of the Caspian Sea so that the westcrn portion lies along the European side of the Ural River is Kirgiz (as large as the eight mountain states of the Unlted States), and still north of that, in European Russia, Bashklr (a province as large as Kentucky), Tartar (the size of West Virglnia), lies further to the west on both
sides of the Volga with the so-called autonomous area Votiak as its nelghbor on the north, and Marl and Chuvash as neighbors on the west. Kazan is its ehlef city. These three neighbors together are about equal in slze to Tartar. Further to the north Zyrlan stretches up to the Arctic Ocean with the Ural Mountalns as its northeast frontier. In territory it equals Nevada, with nearly twice its populatlon. Kalmyk has the Caspian Sea on the southeast and the Volga runs along its northeast frontier. It is about the slze of Indiana. Astrakhan is the chief city

The so-called Labor Commune, Karelia, lles along the Finnlsh. frontler, to the north, between Lakes Ladoga and Onega and the Arctic Circle wlth the White Sea on the northeast. Beyond is the Murman coast. The other Labor Commune, the German Volga Commune, is an irregular group like lslands on both sides of the Volga east and south of Saratov, and is somewhat smailer than the State of New Hampshire with about the same number of inhabitants.

## DECLINE OF POPULATION.

M. W. Mlkhallovsky, director of the Central Statistlcal Offce at Moscow, in an article on the third Russian census, as quoted in a bulletin of the health sectlon of the League of Natlons, September, 1922, gives these figures on the decline of population in Russla. He bases his study on data for European Russia, Northern Caucasus, Siberia up to the Baikal Sea, the Kirghiz Republic and two governments of the Ukraine. He finds that in this area the population has declined from 102,793,000 in which was then estimated at $3,000,000$ men), a decrease, including the army, of nearly 10 per cent. Instead of this decrease of $9,000,000$ lnhabitants, there would have been an increase of about $12,000,000$, it is stated, if the rate of naturai increase obtaining before the war had continued.

European Russia is said to have been the principal sufferer, whereas the population has diminished only slightly in the far-away Asiatic territories. The percentages of decrease given by M. Mikhailovsky are 14 per cent. for Northern Caucasus, 3 per eent. for Siberia, and 4 per cent. for the Klrghiz Republlc.

The decline in populatlon is given as due to the followlng causes: (1) Emigration foliowing the eivil war, which is estinated as high as 2,000,000; (2) milltary losses in the World War, $2,500,000$; (3) loss of life ln the civil war, estimated at not less than $1,000,000$; and (4) excess mortality, largely due to the great epidemles, about $3,500,000$. The latter figure is stated as being probably an underestimate.

The census of Russia was taken in August, 1920, it should be noted, and since that time the famine has occurred whlch overshadows all previous scourges of this klnd from which the country has suffered, and the loss of lives from whlch is estimated in mllilons.

The disproportion of the sexes, especially in the rural districts, is highly significant. The sex distribution ls given as follows:

|  |  | Female. | Total. |
| :---: | :---: | :---: | :---: |
| Urban. | 9,788,000 | 10,904,000 | 20,692,000 |
| Rural | 51,241,000 | 59,613,000 | 110,854,000 |
|  |  | 70,517,000 |  |

The blrth rate in Russla, stated to have been extremely high before the war, averaging about 45 per 1,000 . population, is said to have declined by more than 40 per cent.

The London Times, on Sept. 1, 1922, printed a despatch from Riga, saying that according to officlal Bolshevist flgures the Cheka executed $1,766,118$ persons before being renamed the supreme political adminlstration last February. The total includes 6,775 professors and teachers, 8,800 doctors, 355,250 other intelicctuals, 1,243 priests, 54,650 officers, 260,000 soldlers, 59,000 policemen, 12,950 landowners, 192,350 workmen and 815,100 peasants.

## RESOURCES OF RUSSIA

The political home of the Russian Socialist Federal Soviet Republic is in Eastern Europe; centrallzed in fact, in Moscow, the ancient capital.

The russian domains comprehend every phase of climate except the dlatinctly tropical, and have varied topography. It has vast plains, some virtually desert, some fictualiy or potentially productive; many high mountain ranges, and a distinctlve geologle Peature is the Russian steppes-broad plains of shifting sandy formatlon.
in the main, however, Russia proper beglns in the centro with a serles of low tablelands, and slopes in the dircction of the Baltic, Black and Casplan Seas, and toward the White Sea and the Arctic Occan to the north.

The Ural Mountains form tho boundary between.

Russla proper and the main body of Asia; the Caucaslan Mountains aré on the soutliern line, between the Black Sea and the Casplan. Extensive forests occupy much of the central portions, total forest area being about 500,000 square miles.

The rivers are important as actual or potential channels of commerce-the Dnieper and Dniester, flowing into the Black Sea, the Dnieper being part of the proposed trans-European waterway from the Black Sea at Odessa to the Baltic Sea at Danzig the Volga and Ural flowing into the Casilian Sea; the Neva flowlng into the Gulf of Flnland; and the Petciora flowing into the Arctic Occan. There are 42,091 miles of rivers, lakes and canals navigable for steamers.

The areas controlled by Russia compreliend nearly every materlal natural resource of modern civilization-minerals of all kinds, base and precious; every variety of timber, excepting tropical, every character of cereals, vegetable and fruit lands; being as near to self-contained, economically, as any other, ower, exceptlng the British Empire.

The clief lnterest is in agriculture, the other physical resources -not yet being well developed. The oil measures, however, have bcen quite well developed, there being petroleum in large quantity ln the Baku region, in the Caspian ficlds, with considerable pre-war production, and production now being resumed in small measure; and in several other parts petroleum exists in large measure. Several working concessions have lately been reported as granted by the - Sovict Government to American and British oil interests, but no development has been unciertaken as yet.

Russia is normally the world's greatest source of platinum, the Russian share $\ln 1912$ and 1913 being from 250,000 to 300,000 troy ounces of the world total of 267,000 to 313,000 .

Unmined iron ore is estimated at nearly 1,000,000,000 tons, considerable of it being in the Ukraine, economically convenient to transport to the Black sea.

There ale very large mineral resources in the Ural Mountains. Gold and silver are mined there and in many other localities, also coal, salt, zinc and copper.

Before the war, Russia was a heavy exporter of foodstuffs; since the war, Russia has had to call on other countries, chiefly the United States, for food to feed miliions who were starving. (See special article elsewhere in The ALMANAC on the Russian famine and the work of the American Relief Administratlon.)

The cotton crop of 1917 was reported as about $526,000,000$ pounds, or about $1,000,000$ bales, around one-eighth to one-tenth of the crop of the United States.

Approximately $500,000,000$ acres of forested areas are to a large degree potentially agricultural when the tlmber lias been removed. The by and large estimate is that under development such as has been attained in other civilizer countries Russia would have close to $700,000,000$ acres of cultivable lands, or the equivalent of more than $1,000,000$ square miles of actualiy tllled lands, whlch is more than like areas in the United States

Industry is not well advanced, although in some of the western portions there has been considerable progress in iron, steel and tin maklng, with rather heavy productlon of sugar from the beet.

Railway mileage is relatively small, the figures for lines actually operated in 1921 being 29,909 mlies, with about 130,000 miles of telcphone lines ln 1913. On the vast plains area and in the more settled areas in the west there were enormous totals of domestle animals, the 1914 figures showing 33,875,000 horses, mostly the smaller Russian type; 50,038,000 cattie; $14,543,000$ swine and $71,708,000$ goats.

Development of industry has run coincidentally with the freeing of the seris 60 years ago, and the further progress toward modern conditions up to the time of the late troubles. Industrial employment was about $2,000,000$ when the war began, In about 15,000 factories. The cotton industry normally is lmportant. In 1916 , Russia had $8,000,000$ splndles, produced nearly $700,000,000$ pounas of yarn, and wove nearly $750,000,000$ pounds of cotton cloth. Russian flax and linen also were extensively produced.

Since the 1917 revolutlon, industry has been much upset. Reliabie flgures are not casily obtalned. The no mal Russia imported much machinery from England and Germany, and agricultural machines from the Unlted States; raw cotton from Egypt, and $1 r o n$ and coal from England.

PRODUC'ION OF PRE-WAR RUSSIA.
What Russia was capabie of producing before the war and the 13olshevil: revolution is indleated by these offclal statistics of the former empire; tbe cultivable areas ln acres were as follows:

European Russia, cereal crons, 196.997.000 acres:
potatoes, 8.059,000: flax and hemp, 4.733,000: totai, 209.789,000: meadows. 61.330.000 acres. Poland, ccreal crops, 11,377,000: potatoes. 2,586.000: flax and hemp. 110.000; total, 14,073,000: meadows, 2,280,000 acres.

Caucasia. cereal crops, 22,073,000: potatoes, 247,000 : hemp and flax. 292,000; total. $22,612,000$; meadows. 5,676,000 acres.

Siberia. cereal crops, 14.925,000; potatoes, 292,000: hemp and fax, 147,000: total, 15,364,000; meadows. 17.132,000 acres.

Central Asia. cereal crops, 11,458,000; potatoes, $67.000^{\circ}$ hemp and flax, 236,000: total, 11,751,000 acres. meadows, $9.338,000$ acres.

Acreage totals, cereals, 256,830,000; potatoes, 11.251.000 hemp and flax. 5.518,000; total, 273,599.000 acres: meadows, $95,756.000$ acres. The grand totai of cultivable and meadow lands was. therefore 369.628.500 acres.
In round numbers, tbe crops produced in 1913, in Russia. exclusive of Finland, were:

Winter wbeat. $20,800,000$ tons, or about 624,400.000 bushels: spring wheat, $9,900,000$ tons, or about 297,600,000 busheis.

Winter rye, $27,600,000$ tons, or about $827,800,000$ busheis; spring rye, 634,000 tons, or about 19,000,000 bushels.

Oats. 19,900,000 tons, or about 598,400,000 bushels. Other cereals, 8,677,000 tons.
Total cereais, $45,092,800$ tons, or about $3.000,000-$ 000 bushels.

Potatoes. $39,400,000$ tons, or about $1,183,300,000$ bushels. Hay, $58,400,000$ tons. Tobacco produced in 1913 was about $200,000,000$ pounds.

Russia in 1914 had the return from 34.973,000 horses; $52.053,000$ cattle; 72,273,000 sheep and goats; 14.995,000 pigs.

Cotton production in Ferghana, Samarkand, Bokhara, Transcaspia, Khiva, Syr-Daria, (not including Amu-Daria,) Erivan, Elizavetpol, Baku, Tiflis and Kutais, in 1915 was $1,125,675$ of 500 pound bales. Russia imported considerable cotton from Egypt and other countries, raw cotton consumption being larger than production, and using 416.274 spindles.

The forests netted annually about $\$ 30,000,000$ profit.

In 1912, mineral production was given as 58,462 kilograms of gold, 5,525 kilograms of platinum 18,018 kilograms of silver, 1,699 metric tons of lead, 11,708 metric tons of zinc. 33,531 metric tons of copper, $4,198,000$ metric tons of pig iron, $3,727,000$ metric tons of iron and steel, 30,910 metric tons of coal, $9,260,000$ metric tons of naphtha, and 1,906,000 metric tons of salt.

Oil production in 1915 was $9,152,000$ short tons, four-fifths of it coming from the Baku region; aicohol, $60,812,000$ gallons; sugar, $1,697,760$ short tons from 1,888,136 acres; the 1914 cat.ch of the fisheries being $996,500,000$ pounds, or 33 per cent. less than former years, with $35,051,000$ rubles paid for imported fish, and about $7,300,000$ rubles for fish and caviar exported.

Total Imperial Russian imports in 1915 were given as $1,114,000,000$ gold rubies (par of exchange in 1914. 51.5 cents) and exports $397,000,000$ rubles; but up to 1913, exports exceeded imports, figures tor that year by the Russian Government being imports, 1,374,000,000 rubles, and exports, 1,520,000,000 rubies.

The export in 1913 of $807,183,000$ rubles of food, more than hall of all exports, indicate to what extent Imperial Russia helped to feed the world, much of the Russian export food going to Great Britain and to Germany, both of which returned in exchange largely manufactures, machinery, woolens, and coal, and raw cotton came from the United States and Egypt. A study of the forelgn trade of Imperial Russia for some years before the war proves that the balance between imports and exports, exports being always in excess, was close enough to be economically healthy.

## BOLSHEVIST CONTROL.

Cataclysmic events took place when Imperial Russia fcli on March 12, 1917, and revolutionary forces took over the Government, Czar Nicholas II. abdicating. A provisional government was set up by the Duma, Russia's national legislative body, with Prince George Lvoff as the head, Alexander Kerensky becoming Premier on Aug. 6, 1917. The All-Russian Congress of Workmen's, Soldiers' and Peasants Deputies finally seized the power in a revolutionary movement on Nov. 7, 1917, the Military Revolutionary Committee of the Soviet of Petrograd having wrested the government away from Kercnsky. Lenin and Trotzky were leaders.

The official name of the Government bccame the Russian Socialist Federai Soviet Republic, and it was offilally announced that this Communism was fashioned on the Karl Marxian social and economic theories. The basic demand was that only actual
workers. laborers, should have part in government. The dictatorship of the proletariat was set up.

Russia withdrew from her alliance with the Allied and Associatcd Governments in the World War and signed the Brest-1,itovsk Treaty of Peace with Germany. March 3. 1918.

All right of private property was abolished. The Government took over all transport, communication, industry, food, money, the productive processes of all activities. title to lands, stocks of goods, and assumed disposition of the products of industry and the produce of agriculture.

By the end of December, 1917, the theories of nationalization were in almost absolutely complete operation. confiscation haying proceeded without limitation. Private capital was no longer permissible.

## CAPITAL EXPROPRIATED.

Disregarding the comparatively small number of private estates and residences in Russia, practically all the foreign capital in that country was represented by investments in banking, industrial, and trading establishments. According to the data of the Petrograd Institute of Economic Research (published in the Soviet paper. Izvestiya, of June 24,1922 ), the aggregate capitalization of these investments in January, 1917, amounted to $2,242,-$ 974,000 gold rubles, made up of stock and share capital to the extent of $1,986,772,000$ rubles and bonds to the amount of $256,202,000$ rubles (the gold ruble equals $\$ 0.5146$ ).
These investments were distributed among the following classes of commercial enterprises:
ENTERPRISE.

Gold Rubles.
Mining industry.
834.320.100

Metallurgical industry
Urban real estate.
392,709,600 Credit institutions. 259.430,900 Textile industry... 237,200,000 Cextile industry. Trading establishments Foodstuffs manufacture 192,494,000 Paper and printing arts $80,715,200$ $80,715,200$
$37,330,500$ Transports roads and 31,404,800 26,650,000 and roling stock 25,736,500 Sawmills and woodworking industry Mineral-working industry.
Animal-products industry 18,239,300 Animal-pro

14,450,000

Total.
2,242,974,100
The foreign investments were distributed as follows:

| $\begin{aligned} & \text { NATION- } \\ & \text { ALITY. } \end{aligned}$ | Invested in all Russia. | Per cent. | Expropriated by Soviet Russia. |

The investments included in the first column and not expropriated are those in territories like Latvia, Poland, etc., now beyond the boundaries of Soviet Russia.

Various counter-revolutions broke forth against the Soviet Government, which consisted of government by group representation in the hands of the Bolshevist Party, so that the admittedly correct definition was that Russia's government was administered by the Bolshevist Party by means of the Soviet method.

The Soviets held the control, and finally removed the capital to Moscow, further from the western frontier, for greater safety.

For various reasons, the Soviets at last decided to modify materially the degree to which Communism nationalization and the prohibition of private capital was to be enforced, there being yieiding to the extent that private capital was permitted in some instances, official promulgation by the Government of the new economic policies (so-calied "Ncp.") in March, 1921, being that for the present the continuance of absolutc Communism would not be insisted on.
This change found expression in various permis-
sions for private capital to operate in industry, and for the individual citizen of the Russian Socialist

Federal Soviet Repubiic to possess eertain kinds of property.

## ALTERATION OF POLICY.

A fundamental alteration of Soviet Russian poliey, as analyzed by the United States Department of Commerce in October, 1922, was a "reversion from the land policy of striet socialization to the plan of peasant possession, peasants being ailowed to aequire actual nossesslon, though teehnically ownershlp remains with the state.'

The new status was further accentuated at various times by such concessions as were reported to have been granted in 1920 to Washington D. Vanderlip of Los Angeles, an American, in Siberia, the present status of which is indeterminate; and the reported giving back in 1922 to Leslie Urquhart; ehairman of the Russia Asiatie Corporation, Ltd.. Urquhart to have a 99 -year lease on properties, and to pay the Government 6 per eent. of the output. Validation of this transaction was later refused by the Soviet Government.
London and Berlin cablegrams to American newspapess outlined this situation at varlous times, it belng regarded as a fundamental test of alteration of Soviet poliey.

Also, the status of the Baku oll fieids was reported often to have undergone changes, by concessions by the Soviets, which were to permit private operation of the wells.

Careful correspondence from London to The New York World in Oetober, 1922, indicated that Lenin, President of the Council of the People's Commisiarles, R.S. F. S. R., in a speech on Oct. 17 , declared "that his hearers could not but remark the sudden change in the economle poilcy of the Sovietg, which now included more elements of the old economle system than had hitherto been the ease"

The United States, having withheld indorsement of American participation in Russian economic operations, finally considered sending a commission to study economic conditions in Russia, but failed to reach an acceptable agreement.

Cables to American newspapers on Sept. 21 1922, reported that the Soviets had granted a concession to the American Internationai Barnsdall Corporation to certain oil working rights; thls being foliowed two days later with cablegrams to The New York World, intimating that the conditions governing the concession were not so favorabie as had been thought at first.

Summing up all reports, the consensus appears to be that the initlal degree of nationailzation had been fundamentally altered, and that the Soviets had decided to retrace somewhat their long step toward complete Communlsm.

The British Government, in 1919 and 1920, negotiated a trade agreement with Russia, M. Krassin, Mlnister of Foreign Trade, belng the Soviet representative, who went to London for the purpose, and remained there for many weeks, going occasionally back to Moseow. The agreement, although signed de facto by the British Government, had not, at last reports, been made de jure by the Parliament at London.

The signing of a separate treaty between Russla and Germany by their delegates at the Genoa Conference is referred to elsewhere in Thir Almanac; but one of the international questions which has been raised has been whether the two mentioned natlons were in a rapprochement whieh would unite Russia's large natural resources and German organizing and sclentific skill in some ciose working agreement. Also late in 1922 the report was that China was about to reeognize the Soviet Russian Government.
The United States remalned in a non-committal attltude regarding America's part in Russian trade. Russia was understood to back the Turlss in the dispute over the Straits of the Dardanelles. Russia and Jrpan were in a deadiock over the dispositlon of the northern part of Sakhalin Island in the Pacinc, which had been occupled by Japan. Russia was belleved by many to aspire to lead ail Asiatlc people, among whom already she had a footing in her Centrai Asiatic provinces.

Since the revolution of 1917, the chief military aetivity of the Russian Socialist Federai Soviet Republic has been against the Poles, in the SovietPolish war. It found its culmination in 1920, when Marshal Pilsudski of Warsaw, with more than a million men in the Polish Army, invaded the Ukraine, reaching Kiev, its capital, and 100 kilometres beyond toward the Black Sea, and then was huried baek to ciose to Warsaw. French Gencrals Weygand and Menry, aldes to Marshal Foch, alded in reorganlzation of the Polish forccs, and the Soviets were driven out from Poland. The Treaty of Riga in 1921 ended hostilities, reparations in gold and
jewel, being pledged by the Soviets, the values paid over later forming the first gold reserve established by the Warsaw Government as the basis of the new currency.

Military service is eompulsory under Bolshevist Sovietism, actual bearing of arms having been reserved solely for the actual workmon, soldiers, sailors and peasants, others doing non-combat service. In the Soviet-Polish war, numbers of Mongolians were utllized by Russia. The army numbers $1,300,000$ with a reserve of $3,500,000$.

Trotzky, the Commissar ior War, however, in an interview on Aug. 26, 1922, told the Assoclated Press: "Our fighting forces have been reducer from $5,500,000$ to 800,000 " and he pralsed the work of the new Black Sea Navy.

Russia is not a member of the League of $\mathrm{Na}-$ tions.

The state religion of Russia is Greek Orthodox, the church being thrown somewhat into confusion by the changed attitude of the Sovlets toward religious establishment. But there are many Mohammedans in technical Russlan territory, and also in much of the area of the autonomous and semiautonomous Sovlet republics in the south. It has been claimed that the Soviet Government, during the immediately post-revolutionary action kllled a majority of the Russian intallectuals. Reliable figures are not available.
OFFICIAL STATEMENT OF THE R. S. F.S. R. AT THE HAGUE.
In 1914 Imperial Russia, as reported by the officials thereof, had in clrculation paper currency totalling $1,775,000,000$ rubles, the gold ruble being worth 51.46 American cents. It was based on a gold guarantee fund of $1,695,000,000$ rubles.

Under the Soviet reglme its financiai conditions have not been easily ascertainable. Reports vary widely. However, resorting to the ciaims of the R:S. F. S. R., put forward by its delegation at the Hague Conference in July, 1922, the following is a condensation of the fiscal facts as set forth at that time by them;
pAPER MONEY IN CIRCULATION.

## THE ECONOMIC STATUS QUO.

Apart from the foregoing official statement by the representatives of the Russian Socialist Federal Soviet Ropublic at. The Hague Conference in July, 1922, not much information may be obtained as to economic conditions at the present, other than unofficial figures and estimates by authorities outside of Russia. One comparison of products was made in thousands of poods weight-a thousand poods being equai to about 16 short tons:

Coai fell from 1,728,000 poods in 1913 to 466,499 in 1920; oil from 564,300 to 233,900 ; ores from 638,000 to 10,400 ; cast iron from 257,400 to 6,330 ; electrical machines from 678,000 to 36,700 ; brick from 2,000,000 to 43,000 ; sulphurie acid from 7,688,128 to 691,387; cotton yarn from 16,000 to 825 ; hides from 16,000 to 825 ; sugar from 82,806 to 5,542 . and so on through a long list

Other unofficial estimates were that the number of iivestock had deereased approximately 35 to 40 per cent. up to 1921 from 1913 figures, and tilied acreage about 40 to 50 per cent.

The United States Department of Commerce, late in 1922, issued a review of Russian economic activities for 1921, on the basis of comparison between 1913 and 1921 , and, while finding gradual increase of industrial and commercial movement during the year, estimated that "at pre-war prices the foreign trade for 1921 amounted to $268,700,000$ gold rubles (51.46 American cents), of which $248,500,000$ represented imports, and $20,200,000$ exports. The combined exports and imports were 9.6 per cent. of the former normal trade. By weight, the total trade amounted to $68,200,000$ poods ( 1,006 poods equal to about 16 short tons), of which $55,300,000$ poods ( 892,000 long tons), represented imports, and $12,-$ 900,000 (208,000 long tons), exports, being only 2.8 per cent. of the trade for 1913, reckoned by weight. Imports from the United States inereased somewhat during the last quarter of the year. In December, they amounted to 610,000 poods ( 9,839 long tons), of which 300,000 poods ( 4,839 long tons), consisted of goods for famine relief. From the United States, Russia obtained coal, foodstuffs, shoes and drugs.

The department also stated that exports of manufactures were only three-tenths of 1 per cent. of the total, or 2.5 per cent. of the total value in rubles; and that the chief export markets for Russia were Great Britain, Latvia and Germany.

It was accepted generally throughout the economic world that the industrial life in Russia was disorganized more seriously than in most countries.

In 1913 exports totalled $\$ 782,243,460$, and imports $\$ 707,060,400$. Later events completely overturned that healthy balance between income and outgo. This disparity is seen in the figures of United States exports to Russia of $\$ 26,000,000$ in 1913 , and of more than $\$ 315,000,000$ in 1917.

Present imports and exports into and from the United States are negligible. Trade with the United States as reported by the Department of Commerce was:

## T'HE UKRAINE

(Ukrainian Socialist Soviet Repubiic.)
AREA, 174,510 square miles.
POPULATION, 1922, estimated, 26,001,802.
CAPITAI, Kharkov, population, 1913, 258,360 chief citles, Odessa, population, 1912, 631,040; Klev, popuiation, 1913, 610,190; Ekaterinoslav, population, 1914, 180,000; Zhitomir, population, 1914, 80,000.
The Ukraine, the richest and most densely populated part of Russia, consists of the nine provinces In the southwestern part of European Russia borderling on the Biack Sea. It formeriy included Bessarabia, a strip taken from Roumania by Russia after its victory over Turkey in 1878 , but restored to that country by the Aliies in the Treaty of Peace. The Dniester River forms its boundary with Roumania on the soutinwest, and on the west it is bounded by Poland. The black soil is the richest in Russia; it is the great wheat growing district and Odessa,
its great port on the Black Sea, has large elevators
and in pre-war days was a most important grain shipping port.

There are large deposits of coal and iron ore.
The peopie belong to the Little Russian branch of the Slavs. Their independence, encouraged by Germany, was declared Nov. 21, 1917, but it was despoiled by Germany and iater overrun by the Bolshevists. Soviet Russia admitted its independence even so late as Mareh 19, 1921, in the Treaty of Riga with Poland, but the Ukraine's efforts at compiete independence have been frustrated by the R. S. F. S. R., to which its economic adherence is vitai. The two Soviet Governments of Russia and the Ukraine on Dee. 28, 1920 , signed a military and economic allialce which established Joint Peopie's Commissariats for Industry, Forelgn Trade, Transport, Finance, Labor, War, and Posts and Telegraphs.

## ARMENIA.

(Sociallstic Soviet Republic of Armenia.)
AREA, 15,240 square miles.
POPULATION, 1922, estimated, 1,214,391.
CAPITAL, Erivan, population, 90,000
Armenia, first winning recognition of independence from Turkey and Germany, joined with the Georgians and the Tartars, to form a federal republic in 1918. It was overthrown in five weeks, Georgia and Armenia declaring their independence. Armenia's independence was recognized by the Allies in 1920. On April 2, 1921, Armenia beeame a Soviet repubiic, and has therefore such relations with the R. S. F.
S. R. as classes it in a measure as Russian territory.

It lies at the southeastern frontier of TransCaucasia, and was a part of Imperial Russia, being now classed as one of the several autonomous repubilics which have sprung up in that region.

GEORGIA
(The Fraternal Soviet Republic of Georgia.) AREA, 25,760 square miles.
POPULATION, 1922, estimated, 2,372,403.
CAPITAL, Tiflis; population, 1915, 446,766
Georgia, situate in Trans-Caucasia, between the Black and Caspian Seas, is bounded on the north by the Caucasus, on the east by Azerbaijan, and on the south by Armenia.

Georgia joined the federal republic which was set up by Georgia, Armenia and Tartary in 1918, in March of the following year, Georgia becoming independent. Tumult followed, until, in 1921, Russian Soviet armies oceupied the land. The country is now governed by a revolutionary committee fashioned after Soviet Russia, which claims the dominant power in thiat area.

The people are Christians. Ninety per cent. of the population engage in agriculture, with tillage most erude. Corn, wine, fruits, silk, lioney, cattle and minerals are the chief interests. The produetion of manganese ore around Tchiaturi is important.

There are railways, and 1919 exports were $257,-$ 559,000 rubles, and imports, $366,897,167$ rubles. Batum, population, $1915,25,020$, is Its important port on the Biack Sea.

## AZERBAIJAN. <br> (Azerbaijan Socialist Soviet Republic.)

AREA, 33,970 square miles
POPULATION, 1922, estimated, 2,096,973.
CAPITAL, Baku; popuiation, 250,000.
Baku, the eapital, is the centre of the extensive oil industry and perliaps the most important of the several autonomous states in Trans-Caucasia tor that reasoll.

Azerbijan joined with Georgia and Armenia in 1917 to form a federal republic, but Azerbaijan declared its complete independence on May 28 , 1918, a Soviet government being formed, which was recognized by Great Britain in January, 1920. In April, the Bolshevists overthrew that government and declared alignment with Soviet Russia. In September, 1920, a politicai and economic treaty was signed between Azerbaijan and the R. S. F. S. R.

The people are Mohammedans. Besides oil, other interests are cotton, fisheries, cereals and cattic.

FAR EASTERN REPUBLTC.
(Far Eastern Democratic Republic.)
AREA, estimated, 652,740 square miles.
POPULATION, 1922, estimated, 1,811,725.
CAPITAL, Chita.
The "Far Eastern Democratic Republic," to give it, its fuil title, is the southern part of Siberia from Lake IBaikal east to the Sea of Okhotsk and the Japan Sea. It includes Transbalkalia, Anur, and the Maritime Province (capital and seaport Viadivostok). The יpper laall of the Isiand of Sakhaiin, now heid by the Japancse as security for claim for the Nikolaievsk aftair, norinally belongs witil it. In the south are Mongolia and Manchuria.

That part of Siberia which lies to the north is a waste. Of its $1,800,000$ inhabitants spread out over a territory as large as Texas, New Mexlco, Arizona and California, $80 \%$ are peasants. $15 \%$ are in the Government service and $5 \%$ are in private industry.

The people have suffered terribly in the three years of civil war that has devastated the land and bcggared the people. The forests are enormous and the country rich in gold and coal, but wholly undeveloped. The Trans-siberian Railroad is its artery of life.
"The Government" is a commisslon of seven elected by the National Assembly of about 400, which itself is elected by direct vote with proportlonal reprcsentation on a basis of unlversal suffrage of all men and women above 18 years of age. Liberty of speech, the press, assembly and religion are guaranteed. Education is free and compulsory. Bodily and capital punishment are abolished. There is a system of pcople's commlssars and a secret political police as under the Moscow government.

## Russian Dependencies. <br> BOKHARA.

(Bokharan People's Soviet Republic.)
AREA, 83,000 square miles.
POPULATION, 1922, estimated, 1,250,000. CAPITAL, Bokhara, population about 75,000 .

Bokhara is a vassal state in Central Asia, bounded on the north by the Russian provinces of SyrDaria and Samarkand; on the east by the province of Fcrghana, on the south by Afghanistan, and on the southwest by the Russian provinces of TransCaspia and Khiva. A treaty, political and economic, was signed with the R.S. F. S. R., by virtue of which it remains as recognized Russian territory, one feature being that none may be admitted into Bokhara without a Russian passport. The new government ls Soviet. No duty may be levied on Russian goods imported.

The religion is Mohammedan, and the products are corn, fruit, silk, tobacco, cotton, hemp, sheep, goats, horses, camels, gold, silver, alum and sulphur.
There is navigation for steamers on the Oxus River, and railway lines operate to close to the capital.

## KHIVA.

(Khorasmian People's Soviet Republic.) AREA, 24,000 square miles. POPULATION, 1922, estimated, 646,000. CAPITAL, Khiva, population about 5,000.

Khlva is a vassal state of Russia, bounded on the north by the Aral Sea; on the east by the Oxus River; on the south and west by the Russian TransCaspian province.

It has a Soviet government, and has signed a treaty, political and economlc. with the Russlan Soviets, which lists Khiva as virtual Russian territory. The people are Mohammedans, and their products are chiefly cotton and silk.

## SALVADOR REPUBLIC OF.

AREA, 7,225 square miles.
POPULATION, estimated, Jan. 1, 1922, 1,500,000. CAPITAL, San Salvador, population 80,756. Other cities: Santa Ana, 60,679: San Miguel, 30,406; Nueva San Salvador, 23,291; San Vicente, 26,881 . President, Sr. Don Jorge Melendez, 1919-23.
Premier, Dr. Arturo Romez Arias (Foreign, Public Instruction, Justice, and Charitles). Minister to the United States, Sr. Salvador Sol M. Consul General, at New York, Trinidad Roniero. Consuls, at New Orleans, Leonilo Montalvo; at St. Louis, Rafael Garcia Escobar; at San Francisco, Pio Romero Bosquc, Jr.
United States Minister, Montgomery Schuyler
United States Vice-Consul, at San Salvador, Lynn W. Franklin.
Salvador lies along the Pacific Ocean wlth Honduras as its northcast boundary, and Guatemala on the northwest. Its coast line is 160 miles long and its average breadth 60 miles. It is about the size of the State of New Jcrsey. Along the sea is a narrow low alluvial plain and the lnterior is a plateau about 2,000 feet above sea level, containing a number of volcanic concs. Earthquakes are frequent; that of June 8, 1917, destroyed much of the capital and three other towns; even greater damage was done the capital on April 28, 1919. It lias luxuriant forests and abundant mineral dcposits which are undeveloped. The leading products are coffee, of which $60,000,000$ pounds was produced in 1921, and sugar, $40,000,000$ pounds. Cacao, indigo,
cotton, tobacco, balsam, hemp, hides, rubber, and bananas are also exported. Mestizos and Indians form two-thlrds of the population.

Under the Constitution of 1824, modified last in 1886, a president for four years and a single chamber of 70 . deputles for a year are elected by universal suffragc. The President appoints a ministry of four members. The dominant religion is Roman Catholic. Education is free and compulsory. The army numbers 7,500 , with reserves of 25,000 . There are 213 miles of narrow gauge railroads. In 1920, 520 steamers, tonnage 657,396 , entered its ports. Salvador is a member of the League of Nations.
(For part in federation of Central America see Honduras.)

## SAN MARINO, REPUBLIC OF:

AREA, 38 square miles.
POPULATION, census of June, 1920, 12,027.
San Marino, situated in the Apennines near Rimini, in the heart of Italy, claims to be the oldest state in Europe and to have been founded in the fourth century. Its treaty of friendship with the Kingdom of Italy, concluded June 28, 1907, was revised in 1921. It has an extradition treaty with the United States and other countries. Agriculture and stock ralsing are practically the only industries. It is governed by a Great Council of 60 members elected by popular vote, two of whom are chosen to exercise executlve power for a term of six months. It maintains a mllitary force of 39 offlcers and 950 men. Revenue for 1920-21 was $2,000,000$ lire and expenditures $2,150,000$ lire.

## SANTO DOMINCO.

(Sec Dominican Republic.)

## SERES, CROATS AND SLOVENES, KINCDOM OF THE.

JUGO-SLAVIA.
AREA, approximately 86.878 square miles.
POPULATION, 1922, estimated, 11,600,000.
CAPITAL, Belgrade, population, 1919, 120,000
King of the Serbs, Croats and Slovenes, Alexander I., born Dec. 17, 1888, Prince Regent from June 24, 1914 to Aug. 16, 1921, when his father, King Peter I., died; married June 8, 1922 at Belgrade, Princess Elizabeth of Roumania.
Prime Minister, N, Pashitch (Radical).
Minister to the United States, Dr. Anton TresicPavicic.
Consuls General in the United States, New York, Pavle Karovitch; Chicago, Branko Lazarevitch; Consul, San Francisco, Bozidar Puritch.
United States Minister at Belgrade; H. Percival Dodge.
United States Consuls, Belgrade, Kenneth S. Patton; at Zagreb, Joseph F. McGurk.
Representation of the Klngdom of Montenegro is maintained in New York City by Luigi Criscuolo as Delegate Plenipotentiary "with particular duties refcring to Montenegrins in the United States who have not become, and have no desire to become, citizens of the Kingdom of the Serbs, Croats and Slovenes." The State Department at Washington has revoked the exequatur of the former Montenegrin Consul General.

Serbia, whlch had slnce the Battle of Kossovo in 1389 been a vassal principality of Tưrkey, was established as an independent kingdom by the treaty of Berlin, July 13, 1878. By the Balkan wars of 1913 her boundaries were enlarged by the annexation of Old Serbia. The government of Austria-Hungary laid the assassination of the Archduke Franz Ferdinand (June 28, 1914) to a Serbian plot and by lnvasion following her ultimatum brought on the World War of 1914-18. Serbia was overrun and suffered enormously, but in October, 1918 , her army again occupled Nish and on Nov. 3,1918 rcoccupied the capital, Belgrade. At the dissolution of the Austrlan-Hungarian Empire, the National Assembly of the former Hungarian provinces of Croatia and Slovania proclaimed their independence and a National Councll was established to ence and a National Councli was established to
which representatives of other Slav states of the
old empire inoluding Bosnia and Herzegovina were admitted and union with Serbia os the Kingdom of the Serbs, Croats and Slovenes (Jugo-Slavia) became effective on Dec. 29, 1918, when a ministry was formed.

On Nov. 29, 1918, the National Parliament of Montenegro, which had been recognized as an illdependent state by the Treaty of Berlin in 1870, deposed King Nicholas who was born in exile and decided to unite with Serbia. This union became a fact on the death of King Nicholas, March 1, 1921 , and Montenegro officially disappeared from the map of Europe on July 13, 1922, when the Council of Ambassadors sitting in Paris to ratily the boundaries of Jugo-Slavia and Albania recognized the fact that its union was an accomplished fact. The dispute over the allotment of Flume to Jugo-Slavia under the Treaty of Versailles rendered acute by the d'Annunzio raid of September, 1919, was composed by an agreement with Italy in 1921, in the Treaty of Rapalio, when the buffer atate of Fiume-Istria-Dalmitia was set up in which Fiume has a special status, being administered by a committee of flve members, two Italians, two JugoSlavs and one eitizen of Fiume.

Jugo-Slavia is bounded by this buffer state and the Adriatic Sea on the east, by Austria and Hungary on the north, by Bulgaria and Greece on the east, and by Albania and Greece on the south. Its arca and by Albania and Greece on the south. Its arca
and population by provinces is approximately as follows:

Aceording to nationality there are approximately 9,730,000 Slavs, 500,000 Germans, 490,000 Hungarians, 480,000 Albanians, 180,000 Roumanians, and 10,000 Italians. According to religion there are approximately $5,460,000$ Greek Orthodox (the state religion), 4,475,000 Roman Catholics, 345,000 Mohammedans and 750,000 of other religions. Under a coneordat with the Vatican a Roman Catholic Archbishop or Belgrade is to be established.

The Constitution, adopted June 28, 1921, provides for a single Legislative Chamber of $\not 19$ members elected for four years, one Jeputy to ezery 40,000 inhabitants. The present Chamber is made up as foliows: 96 Radicals, 49 Dcmocrats, 54 Communists, 49 Croatian Agrarlans, 30 Serb Agrarians, 27 Molammedans, 2.5 Catholic People's Party, and 43 scattering.

Elementary edueation is nominaily compulsory and is free. There are three universities, Belgrade with 7,668 students in 1921; Zagreb, 3,249; and Ljubliana. 769.

The army has been reorganized on a nominal peace strength of 150,000 but (in 1921) about 250,000 are with the colors. Compulsory service is in lorce.

The principal exports are grain, cattle, timber and prunes; imports, agricuitural and animal products, machinery and chemicals. Serbia is an agricultural country of small peasant holdings. Over one-third of Its area is covered with forests. Tliere are valuable coal and iron mines and some lead and copper. The State owns 5,175 of the 5,684 miles of railroads. The river navigation of the Danube and the Save is important. Access to seaports, Fiume and Salonica, is guaranteed by treaty.

The unit of currency is the dinar or crown: par of exchange, 20.3 cents, exchange, Nov. 1, 1922, . 42 cents.
Imports, 1920, dinars. . . . . . . . . . . . . . . $3,487,996,150$

SIAM, KINGDOM OF.
AREA, 198,000 square miles, of which about 45,000 is in the Malay Peninsula.
POPULATION, census of 1911-12, last avallable, 8,266,408. Official estimate, 1920, 9,022,000.
CAPITAL, Bangkok, population, 541,000.
King. Rama VI. (Chao Fa Maha Vajiravudh) ; born Jan. 1, 1881; succceded on Oct. 23, 1910, on the death of his father, King Chulalongkorn $I$.
Minister to the Untted States, Phya Prabha Karavongse.
Consuls in the United States, at New York, F. Warren Sumner: at Chicaro, Mliward Adams; at San Francisco, Henry G. W. Dinkenspiei.
Unted States Minister, Wlilam H. Ioenibrook.
United States Consul, at Bangkok, Maurice P. Dunlap.
ma (British India) on the northwest and west and French Indo-China on the northeast and east, and the Gull of Slam, which makes on the Pacifle Ocean on the south and east. It also occupies the neck of the Malay Peninsula as far as the Federated Malay States (British). It is of rolling topography, with large areas susceptible to irrigation, of which about 300,000 acres were brought under water in 1922.

There are many large foresta, teakwood being an important article of export. Labor is higher than in almost any other Oriental country. The chiet product is rice, the national lood, and heavily exported, with $6,150,000$ aeres of it under cultivation in 1920, and an average of 1,700.000 tons exported annually. There are 80 rice mills in the Bangkok district. Livestock in 1920 was 6,294 elephants, 132,675 horses and ponles, 2,620,682 bullocks, and $2,508,164$ buffaloes, all of which are used as beasts of burden. Annual exports of teak average about 70,000 tons, worth about $\$ 6,000,000$.

Mineral resources are extensive and varied, including tungsten, wolfram, eoal, iron, manganese, antimony, and quicksilver. Tin also is abundant, exports having been 6,183 tons in 1921 , and normally in previous years up to 8,800 tons.
In 1920 there were 1,376 miles of state rallways. In 1921, 571 vessels entered the port of Bangkok, of 492,812 tonnage, mostly of British registry, with some fying the flags of France, Norway. Japan and other countries.

Executive power vests ln the King, who is advised by a Cabinet. Formerly there was a Council of State, which has been succeeded by the Legislitive Councll of Ministers and others, not less than twelve, appointed by the King. Present membership is forty. It supervises the legislation of the Kingdom, being charged with the task of perlecting the statutes. Laws must be signed by the King.
Buddhism is the prevailing religion. In 1919 there were 13,616 temples, with 87,538 pricsts. Schools are controlled by the Minister of Edueation, excepting those for military, naval and legal training. and some which are under royal patronage In 1919 there were 402 Government schools, with 1,026 teachers and 35,945 pupils, 2,416 ndj-Government primary schools with 2.819 teachers and 113.793 pupils. About 11 per cent. of the people were literate in the last census.

Every able-bodied man serves in the army. The navy has 5,000 active and 20,000 rescrve men In 1920 there were over 15,000 Boy Scouts. Siam is a member of the League of Nations.
The tical is the unit of the currency, its gold par being 37.69 cents. Imports in 1921 were 230, 685,000 ticals; exports, $103,546,400$ tieals. Principal revenues are from opium, land capitation, excise, rallways, mines, forests, and customs; total 99, 811,000 ticals in 1920. The national debt was $99,509,000$ ticals in 1920.

Trade with the United States was:

## THE SOUDAN.

## (Anglo-Egyptian.)

AREA, 1,014,600 square miles
POPULATION, estimated, 1921, 4,000,000.
CAPITAL, Khartoum, includlng Khartoum North; on the Bluc Nile, population, 1921, 39,056. Below on the White Nile, Omdurman, the old Dervish capital, population, 50,429 .
Governor Gencral of Soudan, Major Gen. Sir Lee O. F. Stack, appointed 1919.

The Soudan is bounded by Egypt on the north, the line being the $22^{\circ}$ north latitude; the Red Sea and Erltrea (Italian) and Abyssinia on the east; Uganda (British). and the Belgian Congo on the south, and French Equatorial Africa on the west. Its greatest length north and south is 1,650 miles, and its greatest breadth east and west is about 1,200 miles. The northern zonc consists of the Libyan desert, on the west, and the mountainous Arabian desert, extending to the Red Sca on the east, separated by the narrow valley of the Nile; the central zone has large arcas of fertility, ipefuding the rainlands of Kassala and Tokar, the Gerira plain and the pastures and gum forests of Kordofan; and the southern equatorial belt where the soll is richest and watered by tropical rains.

The Whlte Nile flows nortll through the midale of the country, the Blue Nle rising 111 the mountains of Abyssinia, flows northwest to its junction at Khartoum with the White Nile to make the Nile that flows on in a huge $S$ curve to enter Egypt at Halia.

Two large dams for limpounding the waters, one the Makwar dam in the Blue Nile, for irrigation
of the Gerira country between the rivers, and the other at Gebel Aulia in the Whlte Nile, 24 miles south of Khartoum, to hold up double the quantity of water stored by the Aswan dam for the benefit of Egypt, are under way after being suspended by the war. The Governor-General has authorized (1922) a loan of $£ 7,000,000$ to facilitate the completlon of thesc works; it must be approved by the British Government.

The population, which was estimated at $9,000,000$ In 1884, decrcased to $2,000,000$ under Dervish misrule through war, famine and disease. The inhabitants are partly Arabs, partly Negroes and partly Nubians of mixed Arab and Negro blood; the Arabs and Nubians are all Mohammedans. The Mahdist rebellion in 1884, culminating in the fall of Khartoum and the death of Gen. Gordon Jan. 26, 1885, forced the Egyptian Government to withdraw irom the Soudan, retaining only Wadi Halfa on the Nile and Suakin on the Red Sea as frontler ports. The Dervishes were overthrown by Lord Kitchener with the Anglo-Egyptian army at Omdurman, Sept. 2, 1898. On the reconquest of the Soudan an agreement was signed Jan. 19, 1899, between Egypt and Great Britain which fixed the boundary, provided for the administration of the territory by a Governor-General appointed by Egypt wlth the consent of Great Britain (aided since 1910 by a council) who should make laws by proclamation, and providing that the British and Egyptian flags should fly together. Free trade with Egypt was provided for also and the import and export of slaves was forbidden together with the import of arms, ammunitlon and spirits. The civll and crlminal codes are based on those of Egypt and India.

The country has prospered under the AngloEgyptian rulc though suffering agriculturally during seasons of low water in the Nile, and by depression consequent on the past years of the war when the exports of grain and cattle almost entircly ceased. Cotton can be grown successfully with increased irrigation and transportation facilities. Rich forests are of great extent and the Soudan is the chief source of the world's supply of gum arabic, the exports being 12,109 tons valued at $£ \mathrm{E} 566,925$, in 1920. Of ivory, 45 tons, valued at $£ E 78,819$ were exported in 1920.

The Soudan railroad reached Khartoum in 1899. A line from Atbara across the Arabian desert to Port Soudan and Suakin on the Red Sea was opened in 1906. A bridge has been built over the Blue Nile at Khartoum and another over the White Nile near Hillet Abbas. The total length of railroads is about 1500 miles

A fleet of Government passenger and freight stoamers is maintained on the Nile and its tributaries with a schedulcd service covering over 2,500 miles.

The future control of the Soudan has not been settled. Egypt claims it as an integral part and is making possession of it a basic part of its projected new Constitution. However, Lord Allenby, when in the Soudan (1922), informed the native lcaders that Great Britain does not intend to abandon the Soudan.

The revenue of the Soudan for 1920 was $£ E 4,425,-$ 340 and the expenditures $£ E 3,564,848$. The budget estlmate for 1921 balanced at $£ \mathrm{E} 4,026,000$.

## SPAIN, KINCDOM OF

AREA, including the Balearic and the Canary Islands, 194,783 square miles; Spanish Colonies in Africa, including Spanish Morocco, 128,149; total 320,932.
POPULATION, estimated, in $1920,20,783,844$ in Spain proper; Cunary Islands, 506,414 ; Colonies, estimated, 844,339; total, 21,134,597.
CAPITAL, Madrld; population, 1918, estimated, 608,793; other cities, Barcelona, 582,240 ; Valencia, 236,477; Seville, 150,631; Malaga, 136,364; Murcia, 123,936; Zaragoza, 117,742; Cartagena, 102,542; and 28 of more than 30,000
King, Alfonso XIII.; born May 17, 1886, after the death of his father, King Alfonso XII.; succeeding on birth; married. May 31, 1906, Prlncess Victoria Eugenie, daughter of Princc Henry of Battenberg and Prlncess Beatrice, youngest daughter of Queen Victoria of Great Britaln; Heir, his eldest son, Prince Alfonso, born May 10, 1907. There are three other sons and two daughters. President of the Council, Sanchez Guerra.
Minister of Foreign Affairs, Fernandez Prlda.
Ambassador to the United States, Senor Don Juan Riano y Gayongos.
Consul General in the United States, at New York, Alexandro Berca y Rodrigo; Consuls, at Philadelphia, Emillo de Motta y Ortiz; at New Orleans, Jose Maria Sempere y Oiivares; at Galveston, Andreas Igleslas y Vclayos; at San Francisco, Jose Jimeno Aznar; at St. Louis, vacant.

United States Ambassador to Spain, Cyrus E. Woods. United States Consuls, at Barcelona, Raiph J. Totten; at Madrid, Keith Mcrrill; at Bilbao, Henry M. Wolcott; at Cadiz, Lucien N. Suliivan; at Seville, Robert Harnden; at Malaga, Gaston Smith; at Valencia, Henry C. A. Damm; at Tencriffe, Canary Islands, Frank Anderson Henry; at Corunna, Fred C. Slater; at Huelva, Horace Remillard; at Santander, Leonard G. Dawson; at Vigo, Henry T. Wilcox.
Spaln is bounded on the west by Portugal and the Atlantic Ocean, on the north by the Atlantic and by France, on the east and south by the Medlterrean Sea, the Brltish fortiffed station Gibraltar belng at the southernmost tip, guarding the entrance to the Mediterranean from the Atlantic. The Balearic Isiands in the Mediterranean (capital Palma, area 1,935 square miles, population, 331,195 ) and the Canary Islands (area 3,342 square miles, population 506,414 ) in the Atlantic (capltal Santa Cruz, area 2,807 square miles, population 520,516 ) are provinces of Spain; Ceuta, a fortified post in Africa, opposite Gibraltar, (area 5 square miles, population 23,907 ) is part of the Province of Cadiz

Spain occupies the entire.Iberian peninsula wlth the exception of Portugal. The lofty Pyrenees separate it from France. The interior is a high inclosed platcau traversed east and west by mountain ranges and dcficient in rainfall. However, 88.45 per cent. of the soil ls regarded as productive or potentially so, crops and fruit being gathered from more than one-third of the productive area, and a quarter of it is glven over to grazing. Crops in 1921 trom about $20,000,000$ acres were $8,600,000$ tons, including practically all of the farm products of the temperate and south temperate zones. Grapes in 1920 amounted to $9,576,528,864$ pounds, yielding $706,756,116$ gallons of wines, much of which was exported. Other products are olives, which yielded $1,662,384$ tons, from which 316,963 tons of oll were made, flax, hemp oranges and nuts. Sllk culture is carried on in Valencia, Murcia and other localitics. There are 73 sugar factories, 1920 production being about 237,000 short tons.

Domestic anlmals in 1921, estimated, were 722,183 horses, $1,294,912$ mules, $1,137,980$ asses, 3,718 .189 cows, $20,521,677$ sheep, $4,298,056$ goats, $5,151,988$ swine. 4,268 camels (in the Canary Islands), and $25,102,973$ poultry
pain has large mineral wealth. Iron abounds, with coal, lead, copper, asphalt, tin, wolfram, manganese, quicksilver, silver, sulphate of soda, salt, sulphur, and phosphorus. Platinum has lately been discovered. Mining industries employed in 1920 104,918 men, 2,152 women, and 17,970 boys and girls under 18 years of age. The 1920 mineral output was valued at $500,984,695$ pesetas. Coal represented $328,000,000$ pesetas, copper, 14,000,000 , and lead, $59,808,000$.
Cotton and woolen goods for domestic use are manufactured to a considerable amount, the normal employment of cotton spindles being $2,614,000$, and woolen spindles 662,000 .

Paper making and glass works are important.
Fisherles in 1918 employed 24,907 boats and 104,999 men, the catch being valued at 228,832 ,842 pesetas, the most important products being sardines, tuna fish and cod.

Railway mileage in 1919 was 9,436 , privately owned, but subsidized by. the Government, Highway mlleagé in 1917 was 45,972 .

The merchant marine in 1922 was composed of 621 steamships of 912,817 nct tons, and 581 salling vessels of 101,285 net tons. Bilbao and Barcelona are the principal ports. In 1920 vessels entering numbered 14,609 of $12,995.625$ tonnage, of Which 9,519 of $5,426,611$ were of Spanish reglatry

Spain was once overrun by the Moors, who swept across the Mediterranean and went, even into France. They were expelled from Europe In 1609, having entered Europe in 711, and for those centurles dominated that part of the European Contincnt, leaving many marks in customs and habits impresscd to this day on the Spanish people. Howcver, the language remalns in general Castilian, with variations in each separate region. Spain's coionlal period was brilliant and extended to the Amerlcas and the Philippines. She lost Mexlco and her Central and South American colonies by revolution a hundred years ago, and in 1898 Cuba securcd her Independence, and she lost the Phllippines, Guam and Porto Rico to the United States as a result of the Spanlsh-American War. Now her colonlal possessions are confined to Morocco in North Africa, Spanlsh Guinea and a few islands along the Guinean coast. In the north there arc 400,000 Basques, of a dlstinctly different racc and language; and there are 50,000 gypsles.

The Government ls that of a constitutional mon-
archy, the Constitution dating from 1876. It provldes for a soverelgn and the Cortes composed of two Houses, the Senate and the Congress, equal in authority, 360 Senators and 417 Deputies ln the Congress. Election requirements are complicated. The last twenty years has seen a very marked tendency toward democracy, numerous disturbances having occurred, with Socialists as the moving force. Spain has moved towards modernization and has made good economle progress.

The Roman Catholic is the national religion, all the people adliering excepting about 30,000 Protestants, Jews and others. The Constlitution requires state support of the church.

There is a heavy percentage of illiteracy, the 1910 census showing that only 38.59 per cent. could read and write. Although there has been a compulsory education law since 1857, it has not been rigidly enforced. There are 2;604,000 pupils in the publle schools, with about 50,000 ln secondary institutions. Spain has 11 universities, which attain high culture.

Military servlce is compulsory, the peace establishment being set at about 300,000 , with re serves in addition

The navy has nine vessels of from 2,134 to 15,700 tons, and 51 auxiliaries. A building programme for six years from 1915 called for 59 additional vesscls, but the work was delayed

Spain was neutral in the Great War, and is a member of the League of Nations.

Tlie unit of the currency is the peseta, its gold par being 19.3 cents; rate of exchange on Nov. 1 , 1922, was 15.27 .

Imports in 1921 were $1,261,390,000$ pesetas; exports, $812,440,000$

Budget, 1921-22, receipts, pesetas, 1,976,663,-
000 ; expenditures, pesetas, $2,550,794,000$. The public debt on Jan. 1, 1922, was $11,963,084,-$ 525 pesetas, of which $910,761,400$ was external.

Trade of Spain with the Unlted States was:

SPANISH, COLONIES IN AFRICA
AREA, 128,149 square miles; divided, Rio de Oro and Adrar, 109,200; Ifni, 965; Spanish Guinea, 9,470; Fernando Po and others near Guinea, 814; and Spanish Morocco, 7,700.
POPULATION, 844,339; Morocco, 600,000; others near Gulnea, 244,339.
The colonies of Spain are now relatively unlmportant, in sharp contrast with those which she held in the sixteenth, seventecnth and elghteenth centuries. The Guinean lands are undeveloped, and smali values are taken therefrom. All figures are mere estimates.

Moroceo, over a part of which spain exercises a protectorate and where she has lately had military operations, is less developed than the French Algerian and other African possessions.

Exports to Spain irom Fernando Po, in 1917, were $6,261,379$ pesctas; imports from Spain, 3,137.750.

Trade with the United Statos was:

## SWEDEP, KINGDOM OF.

AREA, 173,035 square miles.
POPULATION, census of $1920,5,903,762$.
CAPITAL, Stockholm, population, 1921, 419,429; other cities, Goteborg, 202,366; Malmo, 113,558; Norrkoping, 58,101 ; and 29 with more than 10,000 popuiation.
King, Gustaf V.; borı Junc 16, 1858; succeeded on the death of his father, Oscar II., on Dec. 8, 1907; married, Sept. 20, 1881, Princess Victoria, claughter of Friedrich, Grand Duke of Baden. Heir, Crown Prince Gustal Adolf, bor'n Nov, 11, 1882, married, June 15, 1905. Princess Margaret (dled May 1, 1920), daughter of the Duke of Connaught and grand-dnugliter of Queen Victorla; llas five sons and one daughter.
Premicr, Hjaimar Brautlng (Forelgis).
Mintster to the Untted Slates, Capt. Axel Wallenberg.
Conssul General in the Untted States, at New York,
Olaf Merman Lamm; Consuls, it Boston, Carl Wilhelm Emanuel Andre Jolianson; at Chleago, Cari Otto David von Dardel; at San Iranclsco,
Carl Edward Wallerstedt.

United States Mintster to Sweden, Ira Nelson Morlls.
United States Consul General, at Stockholm, Dominic I. Murphy; Consul, at Malmo, Gerhard H. Krogh; at Goteborg, Walter H. Sholes.
Sweden occupies the castern and largest part of the Scandinavian peninsula in northwest Europe. The Kjolen mountain range separates it from Norway in the west, and the Gulf of Bothnia and the Tornea River from Finland on the east. The Baltic Sea separates it from the Baitic States and Germany on the southeast and south and the Cattegat from Denmark on the southwest

Although of broken, mountainous topography, it contalns much productive land, well watered, on which the Swedes have attalned high efficiency in agriculture. In 1910, 45.8 per cent. of the people were engaged in agriculture, the remainder being industrial and commercial. Sweden's total area divldes 9.4 per cent. arable, 2.3 per cent. meadows, 59.4 per cent. forests which are largely susceptible of cultivation after removal of the trees and which yield large annual timber cuts.

The crops in 1921 were valued at $1,384,000,000$ kroner, and live-stock in 1919 was horses, 715,681 ; cattle, $2,550,828$; sheep. $1,563,654$; swlne, $716,783$. In 1921, cercal crops of $2,700,000$ tons were taken from about $3,000,000$ acres, and $1,804,974$ tons of potatoes from 350,000 acres

In 1920 were produced $4,519,112$ tons of iron ore, of which $3,736,329$ were exported, and 2,901 tons of silver and lead ore, 1,136 of copper ore, 47,674 of zine ore, 14,926 of manganese ore, and 107,326 of sulphur pyrites, and 439,584 of coal. Iron ore mining ls most extensive north from the Arctle Circle. The iron and steel industricsSwedlsh steel being of especial value for tool mak-ing-is mostly in the central part. Much machinery is manufactured, with considerable porcelain production. In 1919, the value of the industrial output was about $2,900,000,000$ kroner, with 291,777 men, 54,744 women, 34,611 boys and 11,779 girls under 18 years of age employed in factories.

On Jan. 1, 1922, Sweden's merchant marlneships of over 100 tons-was 1,310 vessels of $1,090,000$ tonnage. Goteborg was the most important port in 1920, with 394,771 of ship tonnage; Stockholm next with 278,216 . In 1919 there entered Swedish ports 23,300 vessels of $8,521,385$ tonnage. In 1919 149,657 ships and boats passed through the canals of Sweden.

In 1920 Swedish railways were of 9,420 miles, of which 3,459 were state-owned.

The Government is a constitutlonal monarchy, executive power belng vested in the King, advised by a Councll of State, headed by the Minister of State or Premier. The Legisiature has two Chambers, the first of 150 members and the second of 230 members. Suffrage is universal for all over 25 years of age of both sexes.
A plebiscite was taken in Sweden, Sunday, Aug. 27,1922 , on a consultative referendum on prohibition. The official result of the vote was 930,655 against prohibition, 901,053 for, a majority of 29,602 out of $1,831,708$ votes cast. Fifty-threc per cent. of the Stockholm vote was cast by women. Of this 53 per cent. 44 was against and 9 in favor of prohibition. At Gothenburg, the second city in Sweden, 23,355 women voted against prohibition and 11,904 in favor. In Malmo, the third city, 15,141 women voted against and 4,511 for.

The present system of restricted liquor traffe, devised by Dr. Ivan Bratt, was put into effect in 1914, replacing the Gothenburg system, which abolished the saloon and established certain hours when liquor could be sold.

Briefly, the Bratt system is this: All. Wine and spirits in Sweden containing over 3.6 per cent. aleohol are sold through the Wlne and Spirits Central, the only organization in Sweden havlng the right to manufacture and to sell liquor wholesale. Thls organization sells to 120 local compantes in as many local districts throughout Sweden, and these in turn supply indlviduals as well as hotels and restaurants Individual buying is controlled by the "motbok," a booklet with detachable sllps on which its owner must sign his name every time he buys strong liquor. The "motbok" entltles its owner to four litres of spirits a month, although in some parts of Sweden, such as the northern provinces, where the prohibition forces are strong, the quantity is two litres. Applying for a "motbok" is like applying for a pass. port. Usually oniy one niember of a family may have one of these books, exeeption being made In the case of sons who liave reached the age of 25.

In public places, such as hotels and eafes, the amonnt of aplrits to be sold is based on the amount of food consumed, with a certalin maximum quiritity permitted.

The Wine and Splrita Central has bouglit out all the private wine merchants in Sweden sind the
shareholders of lt and of the local companies which it serves are entitled to only 5 per cent. on their money. The balance of the profits go to the Government. Three maln ideas run tlirough the Bratt system: Reduction of the general ration of distilled and spirltuous liquors through a central control, denial of liquor to alcoholics and persons who are known to abuse drink, and elimination of all private interest in the liquor traffic. Under this law Sweden now derives a revenue of $110,000,000$ crowns from the liquor traffic.

In 1913, before the present restrictive measures went into effect, the total Swedish consumption of distilled and spirituous liquors was 38.7 millions of litres. In 1921 the total consumption was 28.4 millions of litres, a reduction of 27 per cent. But even these figures are far too modest, for in 1913 distllled liquors were sold by scores of private dealers, the figures for which are lacking. Arrests for drunkenness in Sweden have gone down 49 per cent. In 1913 there were 58,909 arrests for drunkenness in the kingdom. In 1921 there were 30,081 . The Katarina Hospltal in Stockholm, which ls the central receiving hospital for cases of the kind, reports a reduction of 61 per cent. in chronic alcohollsm. In 1913 lt had 584 cases; in $1921,228$.

The population is very homogeneous, being entirely of the Scandinavian branch of the Aryan family, except about 30,000 Flnns and 10,000 Lapps. Emigration has sent about 2,200,000 Swedes abroad, of whom $1,500,000$ are in America and 370,000 in Finland. Most of the people are Lutheran Protestant, which ls the state religion, but complete freedom of worship exists. Education is compulsory from 7 to 14 years of age, and besides the many higher institutions of learning (including two unlversities) which attain great culture, schooling is so general that army recruits in 1910 were only 0.16 per cent. illiterate.

Compulsory military service is required, with volunteering permitted, 655,000 men being on the army rolls, with 400,000 reserves. The navy has 13 vessels of from 3,600 to 7,180 tons, with 10 destroyers, 4 torpedo gunboats, 27 torpedo boats and 14 submarines. For the 1922-24 programme and 14 Submarines. For the $1922-24$ programme marines.
The unlt of the currency is the krona, its gold par being 26.8 cents. Rate of exchange, Nov. 1 , 1922 , was 26.75 .
mports ln 1921. Were $1,266,237,485$ kroner; exports, 1,097,273,992.
Budget, 1922-Receipts, kroner . . . . . . . . 795,990,900
Expenditures, kroner
$795,990,900$
Extraordinary expenditures, kroner $795,990,900$
$143,933,887$
The public debt on Jan. 1, 1922, was $1,423,464,853$ kroner, contracted mostly for productive purposes, therefore representing, not net liability but investment, the interest on state investments covered by this debt being more than the interest thereon.

## SWITZERLAND, CONFEDERATION OF.

AREA, 15,976 square miles.
POPULATION, census of $1920,3,880,320$.
CAPITAL, Berne, population, 104,626; other cities, Zurich, populatlon, 207,161; Basel, 135,976; Geneva, 135,059; St. Gall, 70,437; Lausanne, 68,583 and 19 above 10,000 populatlon.
President, for 1922. Dr. Robert Haab, born 1865; Vice-President, Charles Scheurer.
Minister to the United States, Marc Peter.
Consuls in the United States, at New York, Louls H. Junod; at Philadelphia, Charles Vuilleumier; at New Orleans, Paul U. Thalman; at Chicago, Ernest Buhler; at San Franclsco. John Freuler; at Denver, Paul Weiss; at St. Paul, Alfred Karlan; at Galveston, Rene J. Mueller.
United States Minister to Switzerland, Joseph C. Grew.
United States Consul General, at Zurich, George H. Murphy; Consuls, at Berne, Thornwell Haynes; at Geneva, Lewis W. Haskell; at Basle, Philllp Holland; at St. Gall, Gebhard Willrich.
Switzerland is bounded on the west by France, the north by Germany, the east by Austrla and Italy and the south by Italy. It $\cdot$ ls mostly mountalnous, havlng many high peaks of the Swiss Alps, wlth many fertile and productive valleys between, in which dairying flourishes, and much foodstuff is procured. The German language is spoken by a majority of the people $\ln 19$ of the 25 cantons, French ln five, and Italian in one. In 1920, there were 412,306 foreigners in the country, and ln 1910

German was spoken by $2,594,298$ persons, French by 793,264 , Italian by 302,578 ; Romansch by 40,122 ; and 23,031 other languages. There are estlmated to be about 300,000 peasant proprietors.

Of the total area, 28.4 per cent. is unproductive. Of the productlve area, 35.8 per cent. is devoted to meadows, 29 per cent. to forests; 18.7 per cent. to fruits, and 16.4 per cent. to crops and gardens. In 1921 there were 97,282 tons of wheat produced from 111,275 acres, 39,599 tons of rye from 50,000 acres, 44,063 tons of oats from 53,075 acres, with large quantitles of potatoes. Dairy products are the chief agricultural interest, vast quantities of condensed milk and of various forms of chocolate being produced. Wine and tobacco also are produced. In the last census, 1920, there were 129,269 horses, 3,581 mules, 891 donkeys, $2,112,115$ cattle, 242.553 sheep, 546,112 swine, and 333,852 goats.

The Swiss Confederation has enacted that the forest area, 3,290 square miles, or $2,105,214$ acres, shall never be reduced, the law applying to national, cantonal and private forests, re-planting being provided for. In 1920, there were planted 16,466,785 trees, chiefly coniferous.

There were, in 1920, 208 establishments for fish culture.

Switzerland has important clock and watch works, 1,859 embroidery works, and employed in manufacturing in $1918,381,170$ persons, with $526,-$ 098 horse power for motive power.

Railway mileage ln 1920 was 3,881 State owned, and 34 miles of foreign lines, the cost of construction up to 1918 having becn $2,476,247,157$ francs.

The Government is a confederation of the 25 cantons, which are joined under a, Federal Constitution (that of May 29, 1874, being now in force), with large powers of local control retalned by each canton. The natlonal authority vests in a parliament of two chambers, a "Standerat" or State Council, and a "Nationalrat" or National Council, the frst of 44 members, the second of 189 members. There is universal suffrage, and in many cantons the people meet in popular assemblies to vote directly under absolute democratic methods. Switzerland has maintained its unity since the men of the three cantons of Uri, Schwyz and Lower Unterwald formed a defensive league in 1291, and became formally independent of the Holy Roman Empire in 1648.

There is complete freedom of worship. In 1920, there were $2,218,589$ Protestants, $1,586,826$ Roman Catholics, and 20,955 Jews. Protestants are in a majority in 12 of the cantons, and Catholics in 10.

Instruction is obligatory, about 600,000 pupils being taught in the lower schools, with many technical schools and seven universities with about 7,000 students.

The national defense depends on the National Mllitia, with compulsory servlce. Fortifications defend the St. Gothard Pass on the south and the Rhone Rlver valley. The army always has been efficient and for many generations has been constantly in effective conditlon.

Switzerland was neutral in the great war and is a member of the Ieague of Natlons, of which Geneva is the seat.
The unit of the currency is the franc, its gold par being 19.3 cents. . Rate of exchange on Nov. 1, 1922, was 18.05.

Imports in 1921 were $2,298,288$ francs; exports, 2,140,135.

Swiss export trade fell off $2,000,000,000$ francs from 1920 to 1921 , owing ln large part to the high international exchange value of the Swiss franc maklng it difficult for countrles with depreclated currencies to buy Swiss goods. Budget-Receipts, 1922.
francs 422,170.000
Expenditures. . . . . . . . . . francs 528,570,000
The public debt, in 1921 , excluslve of the rallway debt, was 1,605,859,100 francs, with about $250,000,000$ francs of floating debt.

SYRIA.
(French Mandate.)
AREA, estimated, 60,000 square miles.
POPULATION, estlmated, $3,000,000$.
ADMINISTRATIVE CAPITAL, Beirut, population 160,000. Chief clties, Damascus, population, estlmated, 300,$000 ;$ Aleppo, 250,000; Homs, 70,000; Hama, 60,000; Adana, 45,000; Marash, 50,000; Alexandretta, chief port, 10,000.
French High Commissioner, Gen. Henrl Gouraud.
United States Consuls, at Aleppo, Jesse B. Jackson; at Beirut, Paul Knabenshue; at Damascus, Charles F. Allen.

Syria is a former province of Turkey lying south of Anatolia witn Mesopotamia on the east, the

Arablan desert and Palestinc on the south and the Medlterranean on the west. It is about the size of the State of Georgia. It was made an lndependent state by the Treaty of Sevres, Aug. 10, 1920, and the mandate given to France by the Supreme Council of the Allied Powers. Palcstine, which formed a vilayet of the old provinee, was given separate independence and placed under a British mandate (see Palestine). The boundary line on the north has been readjusted by a treaty between France and the Nationalist Government of Turkey, and the Palestlne boundary by Franeo-Brltish agreement, Dec. 23, 1920.

The French develooment of Syria provides for a federative state of four provinees, Aleppo (the district around Latakia), Alaouite, Damascus and Great Lebanon. The latter was proclaimed a state Sept 1, 1920, with Beirut as its cepital and given a flag, the French tricolor with a cedar on the white ground. The greater part of the population is of the orthodox Mohammedan faith.

The eastern part of the eountry is dry, being eut off from the sea moisture-laden winds by mountains. Irrigation is essential to eultivation. Tolacco. wheat, fruit, wine and silk are the chief products. Mineral wealth is unimportant. Great Lebanon; which extends along the Mediterranean for 120 miles, with an average width of 30 miles, produees olives, wheat, grapes, oranges and mulberry trees, and also supports much llvestock.

Importint railroad lines are Beirut to Damaseus, with connections at Royak to Horns, Homa and Aleppo and from Tripoll, a promising seaport, to Aleppo, where connection is made with the Bagdad railroad., Damaseus, wlth "the Street called Straight," famous ln the time of the Apostles, is one of the oldest eities in the world, and 35 miles northwest of it are the magnificent ruins of Heliopolis. Beirut ls the seat 01 the Syrian Protestant College founded by the Rev. Dr. Danlel Bllss in 1864, whlch shares with Robert College in Constantinople American edueational honors in the Levant.

Trade of Syrla and Palestine with the United States in 1921-22 was;
Imports.
. $\$ 3,167,822$

## TURKEY.

(The Ottoman Emplre.)
AREA, approximately 247,650 square miles, but boundarles are indetermlnate.
POPULATION, approxlmately, 13,302,300.
CAPITALS, Constantinople, population approximateiy 1,000,000; Natlonalist capital in Anatolla, Angora.
Commander-in-Chtef, Mustapha Kemal Pasha.
Grand National Assembly at Angora asserts its eomplete control of the Ottoman Empire and has sent Rafet Pasha to take charge of Constantinople. The Assembly on Nov. 2,1922 , deelared that $1 t$ is invested with sovereign rights, that the Sultanate is abolished, that. the present. Sultan is deposed as Caliph (spiritual head of Islam); and that a suitable member of the house of Osman will be appolnted to that place. Tre Sultan on Nov. 17 boarded the Britlsh battlest.p Malaya and was taken to Malta. On the 18 th the National Assembly eleeted to the Caliphate the heir to the Sultanate. Abdul Medid Effendi, (born May 25, 1868), the cousin of Sultan Mohammed VI. (See Chronology for developments.)
Diplomatic and Consular InterGsts of Turkey ln the United States are eared for by Spain (which see). Untted States High Commissioner, at Constantinople, Rear Admiral Mark L. Bristol. U. S. N.
Up to the beginning of the Worid war, Turkey, or the Ottoman Empire, included European Turkey, Anatolia, Arabia. Syria, Palestine, Mesopotamia, Armenia and Kurdiatan, aiso groups of isiands in the Acgean Sea.

So late as 1916, the areas of the Turkish Fimpire totalled about 710,224 square miles, with about 21,273,900 of population. Cyprus and Egypt had passed to. Brltish domination-Cyprus annexed, and Egypt under a protectorate. There remained, therefore, in the Turkish Empire, 10,882 square miles of area with $1,891,000$ of population In and around Constantinople and Adrianople on the worth of the Straits; In Asia Minor, Incliding Ismind Kastamuni Angora, Konia, Adana, Sivas and Kastamuni, Angora, Konia, Adana, sivas and of population; Armenia and Kurdlistan, 71,900 square miles, with $2,000,000$ of popuiation; MOSOpotimia, 143,250 square miles, with $2,000,000$ of popuiation; Syria, 114,530 square miles, with 3,675.-

Arabia, 170,300 square miles, wlth $1,050,000$ of population; a total of 710,224 square mlies, with $21,273,900$ of population.

In Asia, Armenia has in part adopted a Soviet government and is at least in harmonious ag eement With Soviet Russia. Syria has passed under the mandate oi France, Mesopotamia has been created the dependent kingdom of the Iraq (which see), under the mandate of Great Britain; and Arabla (whieh see) has assertcd lts independence as the Kingdom of the Hejaz, the Imamate of Yemen and other dlvisions.

There remained to the Turkish Emplre under the treaty then Constantinople and Its hinterland, about 800 square miles, with about $1,000,000$ population, and Anatolia with about 236,852 square miles, and about $11,632,300$ population. If to these figures is added Thrace, transferred from Greece to Turkey by agreement of the powers following the suecessful campaign of Mustapha Kemal Pasha, the Nationalist learter (of which later), wlth its 10,000 square miles and 670,000 population, the total wili be approximately 247,652 square mlies and $13,302,300$ population. This total included Smyrna, population 350,000 , the most important city and port in Anatolia, and its hinterland, which, while retaining Turkish sovereignty, had been turned over by the treaty to Greece for administration with military control, and with the promise that a plebiscite might be granted in 1925 to decide under which rule it should continue. Turkey now, therefore, ls not quite as large as Texas, but has three tlmes its population.

## CONTROL OF THE STRAITS.

European Turkey before the war, included Constantlnople and Thrace on the northwest side of the waters which connect the Medlterranean Sea with the Black Sea-so that Turkey controlled the Straits of the Dardanelles-historie vantage polnt, poiitically, economically and diplomatleally, of events touehing the Near East, with deep signifieance also regarding far Easteln interests.

The Ottoman Empire was at that time under German domination, wlth German offcers training the Turklsh army, and Berlin more or less influencing the poliey of the Sultan at Constantlnople. Turkey was a unit of the Central Power's' military and geographieal resources in the World War, and, defeated, was dismembered by the conquerors.

The Balkan wars of 1913 had reduced the European area dominated by Turkey, leavlng her only that part of Thraee from Adrianople east to the Blaek Sea, and south to Enos on the Aegean; but it left her completely the mistress of the Straits of the Dardanclles.
The Treaty of Sevres (Paris), following the World War, further diminlshed Turkish territory, giving all Thrace to Greece exeept a triangle 30 mlles by 40 , eontaining a neutral zone, along the immediate border of the Dardanelles, the Sea of Marmora and the Bosporus on both the European and the Aslatic sides, to seeure equal passage rights to all nations. All fortifications were to be demolished. The Straits were to remain open in peace and $\ln$ war for all eraft and to be neutral ln time of war. They were not to be subjeet to blockade or other hostile aets.
A Commission of the Straits was named, to have complete control of the navigation of the Straits, on whieh sit representatives of Great Britain, France, Italy, Japan, Turkey, Greeee, and, if and when joining the League of Natlons, of Russia and Bulgaria. The United States was offered a seat. After final peace settlements had been effected, Constantinople was to return to Turkish administration.
The Allied occupation of Constantinople became complete on March 16, 1920, with the Allied High Commission controliing affairs the power of the Sultan and his Minlsters is nullifed and almost entireiy nominal.
The real power in the Turkish. Fmpire (Nov. 1, 1922) rests in the National Assembly and responsible Ministry set up by the Nationailsts at Angora in Anatolia which was the most genulnely Turkish section of the oid Ottoman Emplre. This rests on universal suffrage without religious or race distinction, recognizes the right of minorities to free dom and proteetion, and has a programme of social reform lald out. This Assembly has offered the dictatorship to Mustapha Kemal Pasha, the soldier and able dlplomatist who brought it about. He had served well in Gailipoli under Gen. Liman von Sanders and found the nucieus of the Nationallst movement in his own troops after the war. The movement was spurred on by the Treaty of Sevres which dismembered the Turkish Empire but has not been ratified.

## RISE OF KEMAL PASHA.

Nominally regarded by the Sultan as in rebellion, Kemai cstabllshed a goverument at Angora, entered into alliance, with Soviet Russia regarding the
division of the Caucasus and control of the Black Sea, arranged the Syrian boundaries with France, the mandatory power, saw that Pan-Islamism was preached, organized hls army, drove the Greeks back from the Bagdad rallroad in 1921 and $\ln$ September, 1922, hurled a well organized, well disciplined force upon them and drove them back to the Aegean Sea, capturing Smyrna, which was devastated by fire. Followlng that victory he pushed on to the Dardanelles, refusing to recognlze the neutral zone set up. The French and Italian. Governments withdrew their troops, but the British rcinforced and strengthened their garrison at Chanak, on the Asiatic side, backing it up with warships. As the two forces faced each other, the situation yielded to diplomatic treatment. Kemal's demand that Greece give up Thrace to Turkey, as well as yielding its claims to Smyrna and the Aidin district, was assented to by military representatives of Great Britain, France, Italy, Turkey and Greece, at a conference in Mudania in October. An agreement was reached for a later peace conference to attempt permanently to settle all questions, the Allies meanwhile to continue as arranged in control of the waterways and land neutral areas, under existing general terms.

On Sept. 26 Secretary Hughes indorsed the Allies peace note and declared that the United States was in accord regarding the effective freedom of the Straits and the protection of racial and religious minoritics. Soviet Russia, which had not been invited to the conference, in a note to the powers on the same date, protested against the exclusion from the conference of countries directly interested in the freedom of the Dardanelles and declared Russia would refuse to recognize any decision unless she were a party to the agreement.

The conference of the Allied Powers with Turkey was called to mect in Lausanne in November; the peace conference proper to be participated in by France, Great Britain, Italy, Japan, Jugo-Slavia, Roumania, Turkey and Greece; and at the second conference dealing with the Straits representatives of Russia, the Ukraine, Georgia and Bulgarla were to have seats. The fourteen main points brought forward by the Turks were:

1. The Dardanelles and the Bosporus.
2. Constantinople.
3. The abolition of the capitulations.
4. Exchange of minority populations between Greece and Turkey.
5. Kurdish territories of Iraq.
6. The complete independence of Arab States.
7. The Bagdad Railroad.
8. An autonomy for Macedonia, with a free port for Serbia and autonomy or annexation of Western Thrace, with Dedeaghatch a Bulgarian free port.
9. The question of Demotika and Dedeaghatch as part of Eastern Thrace.

10 . The islands off the coast of Anatolia, including the Dodecanese.
11. Control of the public debt.
12. Reparations.
13. The Caliphate.
14. The return of the three Turkish dreadnoughts which were acquired by England before Turkey entered the war.
(Developments in the Near East sltuation will be found in the Chronology of the Year elsewhere in this Almanac.)

Mohammedans form the vast majority of the people of Anatolia, and about half the population of Constantinople. Mohammedism is the state religion. The Sultan, as Caliph, is the supreme head. The laws of the empire rest on the Koran. The chief ecclesiastical dignitary is the Sheik ul Islam. Whose functions are chiefly judicial and legal, and who is a member of the Cabinet. Turkey denounced the capitulations providing for ex-territorial privileges for foreigners of certain powers in 1914 befor? entering the war. This, however, was not assented to by any of the powers, and the treaty rlghts were reasserted for all nations in the Treaty of Sevres, but with provision for readjustment.

Agrlculture is the chief industry of the Turks, products belng tobacco, whlch goes to almost all worid marts, cereals, cotton, figs, nuts, fruits of almost all varieties, oplum, and gums, Asiatic Turkey was estlmated to have about $16,567,000$ acres under cultivation, of which about $13,689,000$ was in cereals, 473,000 in fruit and vegetables, 779,000 in cotton and flax, and $1,213,000$ in vineyards. The approximate productlon of cotton in 1912 was 200,000 bales, or about $10 \mathrm{C}, 000,000$ pounds.
Turkey has large mineral resources, not yet developed, chrome ore, zinc, manganese, antimony, copper, borax, emcry, asphalt, meerschaum, some coal and lignite, salt, some gold and silver, and petroleum on lands bordering the Marmora Sea.

Turkish fisherles are regarded as important, but manufactures are small and methods crude.
Imports were reported as about $\$ 195,000,000$ in

1912, and exports about $\$ 105,000,000$. In 1921 imports were reported as about $\$ 365,000,000$ and exports about $\$ 95,000,000$

The external debt of Turkey on Aug. 31, 1921, was placed at 171,527,034 pounds Turkish (the pound Turkish at par of exchange \$4.35).

Trade with the United States as reported by the Unlted States Department of Commerce was:

## THE UKRAINE.

(See under Russia.)

## URUCUAY, REPUBLIC OF.

AREA, 72,153 square miles.
POPULATION, 1921, 1,494,953.
CAPITAL, Montevideo; population; 1920, 361,950.
There are three cities between 20,000 and 30,000 . President, Dr. Baltasar Brum, 1919-23, inaugurated March 1, 1919.
President of the Administrative Council, Jose Batlle y Ordonez.
Premier, Dr. Gabriel Terra (Interior).
Minister to the United States, Dr. Jacobo Varela.
Consul General, at New York, Jose Richling; Consuls, at Chicago, Rodolfo Carlos Lebret; at Boston, Willam H. Mossman; at Baltimore, A. F. Pablo du Pont; at Philadelphla, Rodman Wanamaker; at San Francisco, O. W. Goldaracena; at Savannah, Ramon Estreve; at New Orleans, Henry L. Lange; at Portland, Me., James E. Marret; at St. Louis, F. Ernest Cramer.

United States Minister, Hoffman Philip.
United States Consul, at Montevideo, David J. D. Myers.
Uruguay, the smallest republic in South America, is bounded on the north and east by Brazil, on the south by the South Atlantic Ocean and the River Plate, and on the west by Argentlna, the boundary line being the River Uruguay, which is navigable from the Plate to Salto, 200 miles north. In area it is slightly larger than the combined States or New York, Vermont, Massachusetts and Connectlcut. Lving between latitudes $30^{\circ}$ and $35^{\circ}$ south and consisting of rolling grassy plalns, it enjoys an extraordinary healthy climate with a uniform temperature. It is agricultural and pastoral. Large herds of cattle and sheep are raised. The chief exports are wool and hides. In 1920 there were entered in its ports 5,731 steamers, tonnage $8,355,932$, and 3.996 sailing vessels, tonnage 513,986 .

Uruguay declared her independence of Spain Aug. 25, 1825. The present Constitution, as amended, came into force March 1, 1919. It provldes for universal franchise for males over 18 and for proportional representation. The President is elected for four years by direct vote. He shares executive power, with the National Administrative Council, which consists of nlne members, six of the majority party and three of the largest minorlty-three retiring every two years-all elected by direct popular vote. The President appolnts the Ministers of Foreign Affairs, War and the Interior and has supreme control of these departments. The Council appoints the Ministers of Finance, Public Congress has two Houses-the Senate of 19 members, chosen for six years by an electoral college, onethird retiring every two years; and a House of Representatives of 90 members, chosen for three years by direct vote. There are 19 departments whlch have ample home rule.

Church and State are separated and there is complete rellgious toleratlon. The majority of the people are Roman Catholic. Primary education is compulsory and free. The educational system is highly progressive. The university at Montevideo had 4,165 students in 1920 . Schools and hospltals are plentiful, and the prison at Montevideo is a model penal instltution. The death penalty was abolished in 1907.

Uruguay has (June 30,1921 ) 1,625 mlles of rallroads, mostly Britlsh owned, of which 1,060 miles are under state guarantee. The Bank of the Republic has a paid-up capital of $\$ 20,335,955$. Its
president and directors are appointed by the Government. It has the exclusive right to issue notes. The Government in 1912 created a National Insurance Bank and gave it a monopoly of issuing insurance. The standing army, in which service is voluntary, numbers 18,500 , with a reserve of 157 ,439 In the National Guard service, which is compulsory.

Uruguay has made great advances in social welfare legislation and administration during the last 12 years. The republic is a member of the League of Nations.

## VENEZUELA, REPUBLIC OF.

AREA, яpproximately, 363,728 square miles. POPULATION, census of $1920,2,411,952$. CAPITAL, Caraeas: population, 1920, 92,212. Chief cities, Maracaibo, population, 46,706; Valencia, 29,466 ; Barquisimeto, 23,943 ; chlef port, La Guaira.
President, Gen. Juan Vicente Gomez, 1922-29.
Premier, Dr. F. Baptista Gallndo (Interior).
Minister to the United Strates, Dr. Fedro Manuel Arcaya.
Consuls General, at New York, Pedro Rafarl Rincones; at New Orleans, Alfredo Olavarria. Consuls, at Boston, Ernesto Hurtado; at St. Louis, Alivio Parra Marquez.
United States Minister, Willis C. Cook
United States Consuls, at Caracas, Thomas W. Voetter at Maracaibo, John O. Sanders; at Puerto Cabelio, Wm. P. Garrety; at La Guaira, vacant. Venezuela is the northernmost state of South Amerlca and ls bounded on the north by the Caribbean Sea, on the east by British Guiana, on the south by Brazil and Colombia and on the west by Colombia. It stretches from $12^{\circ} 26^{\prime}$ north to within two degrees of the Equator. The climate is troplcal, hot and unhealthy in the coastal and river regions. In area it is as large as the States of Texas, Louisiana and Arkansas combined. The spurs of the Fastern Andes and the foothills re covered with dense forest, and the hlgli plateaus provide excellent grazing. The River Orinoco (over 1,500 miles in length) flows through many stretches of level prairies (ilanos) and is navigable for 700 miles for largo steamers and for 200 miles further for smaller vessels. A natural river or canal, the Casiqulare, unites its upper reaches wlth the Rio Negro, a tributary of the Amazon. The island of Margarita (area of 400 square miles), noted for its pearl fishing, with Tortuga and some 70 other islands, belongs to Venezuela, but Trinidad, at the mouth of the Orinoco, ls Brltish and Curacao and others off the coast are Dutch.

Agriculture and cattle raising are the chief industries and the chief exports are coffec, cacao, balata, hides, gold, rubber and asphalt, Imports are chlefly textiles, machinery and hardware. The country is rich in metais, but is mostiy undeveloped, and petroleum is found in the Lake Maracaibo district.

The production of petroleum for the year 1921 was 215,000 metric tons; for $1920,19,000$; for 1919, 45.000. The law concerning hydrocarbons, promulgated June 30,1920 , states clearly the rights and privileges of foreigners in the development of nil lands. Both British and American oil interests have secured possessions in the Maracaibo district.

There are (1921) 644 miles of railroads, Caracas (altitude 4,017 feet), the capital, being connected with its seaport, La Guaira, by a railroad 22 miles long which is famous for its magnificent views. The roade of the country have been greatiy improved of late years.

In $1920,1,120$ vessels of 1124261 tonnage entered Venezuelan ports.

Venezucla was the first of the Spanish colonies in South America to formally deciare her independence (July 5, 1811), following the disturbing eondltions in Spain caused by Napoleon. After severe fighting, the Republic of Colombia, of which the present states of Colombia, Venezuela and Eeuador formed the three departments, was established Dec. 17, 1819, under the presidency of the liberator, Gen. Simon Bolivar. In May, 1830, a convention recreated the Republic of Venezuela and adopted a constitution. Separation from Colombia was amicable, but the boundary separating the two republics has never been determined. Both agreed in 1881 to submit the question to the arbitration of the King of Spain. His award, made in 1891, did not satisfy and on one occasion the two countries were on the verge of war. The dispute was submitted to the arbitration of Switzerland in 1915 and Swiss engineers will lay out the line. The territory in dispute is an almost uninhabited tract of the head waters of the Orinoco.

For 60 years the Brazil boundary line was in dispute, but that was settled in 1905. In the dispute with Great Britain over the boundary of Brltish Guiana, Venezuela, on the refusal of her request for arbitratlon, broke off diplomatie relations and appealed to the United States for aid. This President Cleveland gave in 1895, taking a strong, even belligerent, attitude, based on the Monroe Doctrine. Following diplomatlc negotiations, a board awardcd the major portion of the territory to Great Britain and gave Venezuela title to valuable territory at the mouth of the Orinoco.

Venezuela has had many revolutions and many revisions of its Constitution sinee the first was adopted in 1819. That now in force was adopted June 13, 1914. It provides for a Fresident elected by Congress for seven years, a Senate of 40 members elected for three years, and a House of Deputles of about 77 members elected for three years. There are twenty autonomous states, a federai district and two territories. The Roman Catholic is the state religion, but religious liberty is guaranteed. Primary educatlon is free and nominaily compulsory. Higher education has been much improved under recent administrations. By a law promuigated in June, 1919, military service was made compulsory. A standlng army of $8,000 \mathrm{ls}$ maintalned, with 87,000 in the reserve. Venezuela is a member of the League of Natlons

Access'n
Waizeru Zauditu (1876), Empress, daughter of Menelek.
Amanullah Khan (1892), Amir, son of Habibullah.
Provisional government, under the Allies.
Marcelo T. de Alvear, President, term, six years.
Lord Forster, Governor General.
Dr. Michael Hainisch, President National Assembly
Albert (1875), King, nephew of Leopold II.
Sir Ugyen Wangchuck, Maharajah.
Dr. Bautista Saavedra, Provisional President; term, four years
Arturo Bernades, President; term, four years.
Boris III. (1894), Czar, son of Ferdinand.
Sisowath, King (French protectorate)
Gen. Lord Byng, Governor General; Mackenzit King, Premier
Arturo Alessandri, President; term, five years.
Hsu Shi Chang (1853), President.
Gen. Pedro Nel Ospina, Presideni; term, four years
Julio Acosta Garcia, President; term, four years.
Dr. Alfredo Zayas, President; term, four years.
Thomas G. Masaryk (1850), President.
Gen. Sir Richard Haking, High Commissioner
Christian X. (1870), King, son of Frederik VIII.
Juan Bautista y Burgos, Provisional President.
Dr. Jose Tamayo, President; term, four years.
Fuad I. (1868), King (formerly Sultan)
Konstantin Pats. State Head.
Dr. K. J. Stahiberg (1865), President; term, six years.
Prof. Riccardo Zanelia, President.
Alexandre Millerand (1859), President; term, seven years
Friedrich Ebert (1870), President; term expires June 30, 1925.

## George II., King.

Gen. Jose M. Orellana, President; term, six years.
Louis Borno, President (under American quasi protectorate)
Husein Ibn Ali, King
Gen. R. L. Gutierrez, President; term, four years
Admiral Nicholas von Horthy, Regent.
Christian X . (1870).
The Earl of Reading, Vicerouy
William T. Cosgrave, Presideni of Dail Eireann.
Victor Emmanuel III. (1869), King, son of Humbert I
Yoshihito (1879), Emperor; Crown Prince Hirohito, Regent
(See Serbs, Croats and Slovenes, Kingdom of)
Jan Chakste, President.
Charles D. B. King, President; term, four years
John II. (1840), Prince.
Charlotte (1896), Grand Duchess.
Feisal I., King
Gen. Alvaro Ohregon, President; term, iour years.
Louis (1870), Prince, son of Albert
Mulai Yusef, Sultan, son of Mulai Hässan
Tribhubana Bir Bikram (1906), Shah
Wilhelmina (1880), Quєen, daughter of William III.
Sir C. A. Harris, Governor; M. P. Cashin. Prime Minister
Viscount Jellicoe, Governor General; W. F. Massey, Premier
Gen. Emiliano Chamorra, President: term, four years
Haakon VII. (1872), King, son of Frederik VIII. of Denmark.
Seyvid Talmur, Sulian. son of Seyvid Feysil.
Sir Herbert L. Samuel, British High Commissioner
Dr. Belisario Porras, President; term, four years
Dr. Eusebio Ayala, President; term, four years.
Ahmed Mirza (1898), Shah, son of Mohammed Ali
Augusto B. Leguia, President; term, four years
Joseph Pilsudski (1867), President.
Dr. Antonio J. d'Almeida (1865), President; term, four years.
Herr Otto Braun, Premier.
Pius XI. (1857)
Ferdinand I. (1865), King, nephew of late King Carol
Governed by Soviet Commissaries headed by Lenin.
Jorge Melendez, President: term, four years.
Alexander, King, son of King Peter
Chao Fa Maha Vajiravudh (1881), King, son of Chulalongkorn I
Prince Arthur of Connaught, Governor General; J. C. Smuts, Premier
Alfonso XIII. (1886), King, son of Alfonso XII
Gustaf V. (1858), King, son of Oscar II.
The republic chooses a President each year.
Gen. Henri Gouraud, High Commissioner.
Sidi Mohammed ed Habib, Bey
Mustapha Kemal Pasha, President of Grand National A Assembly
Abdul Medjid Bey (1868), Caliph
 Warren G. Harding, President; term, four years.
Dr. Baltasar Brum, President term, four years.
Gen. Juan Vicente Gomez, President term, four years.

## RULERS OF PRUSSIA.

| A. D. | Name. | A. D. | Name. | A. D. | Name. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1134 | Albert I (1st Elector of | 1688 | Frederick. | 1797 | Frederick William III. |
|  | Brandenburg). | 1701 | Frederick crowned King of | 1840 | Frederick William IV. |
| 1616 | John, Sigismund (Elector, Duke of Prussia). | 1713 | Prussia. <br> Frederlck William I. | 1860 1871 | William I. William I (made Ger. Emp) |
| 1619 | George William. | 1740 | Frederick II ('the Great'). | 1888 | Frederick. |
| 1640 | Frederick William ("The Great Elector'). | 1786 | Frederick William II. | 1888 | William II. |

Note to Germany and Prussia-The German Empire was restored on Jan. 1, 1871, and King William I. of Prussia was proclaimed German Emperor, at Versailles, Jan. 18, 1871. On his death he was succeeded by King Frederick of Prussia, and the latter in turn by William II.

William II. (Kaiser Wilhelm) abdicated as King of Prussia and German Einperor, as of Nov. 9, 1918, all the rest of the sovereigns of the German states quit too, one by one, and the German Empire became a Republic, under the Presidency of Frederick Ebert. The Constitution was adopted July 31, 1919.

## THE MONROE DOCTRINE.

The Monroe Doctrinc dates from a declaration of December 2, 1823, by James Monroe, President of the United States, in uls seventh annual message to Congress. Brazil had deciared its independence of Portugal the year before. Troubles in the latter country had caused a modification of the Constitution. In Spain a revolution had occurred, and the dominion of Peru was lost. The Holy Alliance, formed in 1815 by Russia, Austria and Prussia, was threatening, so it was alleged, to help Spain recover its controi in South America. Russia and the United States were in controversy orer their Pacific Coast boundaries. Mr. Monroe in his message took up the Russian matter first, saying:

In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been judged proper for asserting, as a principle in whicly the rights and interesis of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be consldered as subjects for future colonlzation by any European powers.'

The President then spoke of Spain and Portugal in this wise:
'Of events in that quarter oi the globe with which we have so much intercourse and from which we derive our origin we have always been anxious and interested spectators. The citizens of the United States cherish sentiments the most friendly in favor of the liberty and happlness of their fcllowinen on that side of the A tlantic. In the wars of the European powers, in inatters relating to themselves, we have never taken any part, nor does it comport with our policy so to do. It ls only when our rights arc invaded or seriously menaced that we resent injuries or make preparation for our defence. Witll the movements in this hemisphere we are of necessity more immediately connected, and by causes which must be obvious to all enlightened and impartial observers. The political system of the allied powers is essentially dlfferent in this respect from that of America. This difference proceeds from that which exists in their respectlve Governments. Ancl to the defence of our own, which has been achicved by the loss of so much blood and treasure, and matured by tile wlsdom of their most enlightened citizens, and under which we have enjoyed unexampled felicity, this whole nation is devoted. We owe it, therefore, to candor and to the anicable relations exlsting between the United States and those powers to declare that we should considier any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety.
"With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the Governments who lave deciared their ndependence and malntained it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing thein, or controlling, in any other manner, their destiny, by any European power, in any other light than as the manifestation of an unfrlendly light than as tion toward the Unlted States."

## CLEVELAND'S DECLARATION IN 1895.

When President Grover Cleveland, in 1895, urged Great Britaln to arbitrate her dispute over the boundary between Venezuela and British Guiana, he said (December 17) in a message to Congress:
"The doctrine "(Monroe) "upon whlch we stand is strong and sound because its enforcement is important to our peace and safety as a nation, and Is essential to the integrity of our free institutlons and the tranquil maintenance of our distinctive form of government. It was intended to apply to every stage of our national life, and cannot become obsolete while our Republic endures. If the balance of power Is justly a cause for jeaious anxiety anong the Governments of the Old World and a subject for our absolute non-interference, none the less is an observance of the Monroe Doctrinc of vital concern to our people and their Government. * * * If a European power, by an extension of its boundaries, takes possession of the territory of one of our nelehboring republies agulnst its will and in derogalion of its rights, it is diflenlt to see why to that extent such European bower does not thereby attempt to extendi its system of governmed.t to that
portion of this continent which is thus taken. This is the precise action which President Monroe declared to be 'dangerous to our peace and safety' and it can make no difference whether the European system is extended by an advance of frontier or otherwise. * * * The Monroe Doctrine finds its recognition in those prlnciples of lnternational law which are based upon the theory that every nation shall have its rights protected and its just claims enforced."

## PRESIDENT WILSON'S WORDS IN 1915.

President Wilson said of the Monroe Doctrine (December 7,1915 ) in an address to a joint session of Congress: "There was a time in the early days of our own great nation and of the republics fighting their way to independence in Centrai and South America when the Government of the United States looked upon itself as in some sort the guardian of the republics to the south of her as agalnst any encroachments or efforts at political control from the other side of the water; felt it lts duty to play the part even without invitation from them; and $I$ think that we can claim that the task was undertaken with a true and disintercsted enthusiasin for the freedom of the Americas and the unmolested selfgovernment of her independent peoples. But it was arways difficult to maintaln such a rôle without offence to the prlde of the peoples whose freedom of action we sought to protect and without provoking serious mlsconceptions of our motives, and every thoughtful man of affairs must welcome the altered circumstances of the new day in whose light we now stand, when there is no claim of guardianship or thought of wards but, lnstead, a full and honorable association as of partners between ourselves and our neighbors, in the interest of all America, north and south.
"Our concern for the independence and prosperity of the states of Central and South America is not altered. We retain unabated the spirit that has inspired us throughout the whole life of our Government and which was so frankly put into words by President Monroe. We still mean always to make a common cause of national independence and of politicai liberty in America. But that purpose ls now better understood so far as it concerns oursclves. It is known not to be a selfish purpose. It is known to have in it no thought of taking advantage of any Government in this hemisphere or playing lts politlcal fortunes for our own beneít. All the Governments of America stand, so far as we are concerned, upon a footing of genulne equality and unquestioned independence."

## PRESIDENT HARDING'S WORDS IN 1921.

President Harding, April 19, 1921, at the unveiling of the Bolivar Statue, New York City, said:

Having sacrificed in arms to establish the human inheritance belonging to free men, the American republics may well touch elbows to prove their unselfishness and show to mankind that righteous achievement does not mean anybody's destruction, indlvidually or mationally, but that real victory lies in that human progress wherein every contender, individual or national, may share as it is sought to merit it
"The doctrine proclaimed under Monroe, which ever since has been jealously guarded as a fundamentai of our own Republic, maintained that these contlients should not again be regarded as fields for tie colonial enterprises of Old-World powers. There have been times when the meaning of Monrocism was misunderstood by some, perverted by others, and made the subject of distorting propaganda by those who saw in it an obstacle to the realization of their own ambitions. Some have sought to make our adhesion to this doctorine a justification for prejudice against the United States. They have falsely charged that we sought to hold tine nations of the Old World at arm's length, in order that we might monopolize the privilege of exploitation for ourselves.. Others have protested that the doctrine would never be enforced if to enforce it should involve us in actual hostilltics
"The history of the generations since that doctrine was proclaimed inas proved that wo never intended it selfsinly; that we had no dream of exploitation. On tho other side, the history of the last decade cortainly must have conviliced ail the world that we stand willing to fight, if hecessary, to protect these continents, these sturdy, young democracies, from oppression and tyranny:

## geclaxation of furapentence.

## (UNANIMOUSLY ADOPTED IN CONGRESS, JULY 4, 1776, AT PHILADELPHIA.)

When, in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them wlth another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving thelr just powers from the consent of the governed, That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dlctate that Governments long established should not be changed for light and translent causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evlls aresufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absoute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security. Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in lirect object the establishment of an absolute ryranny over these States. To prove this, let l'acts be submitted to a candid world.

He has refused his Assent to Laws, the most whole some and necessary for the public good.

He has forbidden his Governors to pass Laws of inmediate and pressing importance, unless suspended in their operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He hasrefused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Represcntation in the Legislature, a right inestimable to them and formidable to tyrants only.

He has called together leglslative bodies at places unusual, uncomfortable, and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved Represcntative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislatlve powers, incapable of Annihilation, have returned to the People at large for thelr exerclse; the State remaining in the meantime exposed to all the dangers of invaslon from without, and convulslons within.

He has endeavoured to prevent the population of these States; for that purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migration hither, and raising the conditlons of new Appropriations of Lands.

He lias obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judlciary powers.

He lias made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salarics.

He has erected a multitude of New Omces, and
sent hither swarms of Officers to harass our peopl and eat out their substance.

He has kept among us, in times of peace, Standir Armies, without the Consent of our legiglature.

He has affected to render the Military independer of and superior to the Civil power.

He has combined wlth others to subject us to jurisrliction foreign to our constitution and una knowledged by our laws; giving his Assent to the Acts of pretended Legislation: For quarterir large bodies of armed troops among us: For pr tecting them by a mock Trial from punishment f any Murders which. they should commit on tr Inhabitants of these States: For cutting off ol Trade with all parts of the world: For imposlr Taxes on us without our Consent: For deprivin us in many cases of the benefits of Trlal by. Jur! For transporting us beyond Seas to be tried fe pretended offences: For abolishing the free Syste of English Laws in a neighbouring Province, estal lishing therein an Arbitrary government, and el larging lts Boundarles so as to render it at once a example and fit instrument for introducing th same absolute rule into these Colonies: For takin away our Charters, abolishing our most valuab Laws and altering fundamentally the Forms of ou Governments: For suspending our own Legisl tures, and declaring themselves invested with powt to legislate for us in all cases whatsoever.

He has abdicated Government here by declarin us out of his Protection and waging War against ul He has plundered our seas, ravaged our Coast burnt our towns, and destroyed the lives of ou people.

He is at this time transporting large Armies foreign Mercenaries to complete the works of deatl desolation and tyranny, already begun with circur stances of Cruelty \& perfidy scarcely paralleled i the most barbarous ages, and totally unworthy th Head of a civilized nation.

He has constrained our fellow Citizens takè Captive on the high Seas to bear Arms against the Country, to become the executioners of their friend and Brethren, or to fall themselves by their Hands

He has excited domestic insurrections amongst us and has endeavoured to bring on the inhabitants our frontiers, the merciless. Indian Savages, whos known rule of warfare is an undistlnguished destruc tion of all ages, sexes and conditions. In ever stage of these Oppressions We have Petitioned fo Redress in the most humble terms. Our repeate Petitions have been answered by repeated injury A Prince, whose character is thus marked by over act which may define a Tyrant, is unfit to be th ruler of a free people. Nor have We been wantin in attentions to our British brethren. We hav warned them from time to time of attempts by the legislature to extend an unwarrantable jurisdictio over us. We have reminded them of the circum stances of our emlgration and settlement here.
have appealed to their natlve justlce and magna nimity, and we have conjured them by the ties of ou common kindred to disavow these usurpations which would inevitably lnterrupt our connection and correspondence. They too have been deaf $t$ the voice of justice and of consanguinlty. We must therefore, acquiesce in the necessity, which de nounces our Separation, and hold them, as we hol the rest of mankind, Enemies in War, in Peac Friends.

WE THEREFORE, the REPRESENTATIVES 0 the UNITED STATES OF America, in GENERA CONGRESS, Assembled, appealing to the Suprem Judge of the world for the rectltude of our intentions do, in the Name, and by authority of the goo People of these Colonies, solemnly PUBLISE ant dechare, That these United Colonies are, and o Right ought to be FREE AND INDEPENDENT STATES that they are Absolved from all Allegiance to thi British Crown, and that all political connectiol between them and the State of Great Britain and ought to be totally dissolved; and that as FRE1 AND INDEPENDENT STATES, they have full Powe to levy War, conclude Peace, contract Alllances establish Commerce, and io do all other Acts anc Things which INDEPENDENA STATES May of rlgh do. And for the support of thls Declaration, witl a firm reliance on the protcction of Divine Providence we mutually pledge to each other our Lives, ou Fortunes, and our sacred Honor,

## BRIEF BIOGRAPHIES OF UNITED STATES PRESIDENTS.

(For explanation of reference marks see third page following. Some authorities say Taylor was born Sept 24, and Fillmore, Feb. 7. The controversy as to which side of the North Carolina-South Carolina line Jackson was born on still goes on, in and out of Congress.)

## NOTES TO THE TABLES OF THE PRESIDENTS ON FOREGOING PAGES

*Monroe abandoned the profession of law when a
young man, and was afterward, and untll his elceyoung man, and was afterward, and untll his elcchimself a South Carolinian, and his biographer, Kendall, recorded his birthplace in Lancaster Co., S. C.; Jas. Parton has published evidence in a contention that Jackson was born in Union Co., N. C., less than a quarter mile from the South Carolina linc. $\ddagger$ Or oí departure from college.
§Widows. Their maiden names, are in parentheses. II She was the divorced wife of Captain Robards. (a) The Democratic Party of to-day clalms lineal descent from the first Republican Party, and President Jefferson as its founder. (b) Political parties werc disorganized at the time of the election of John Quincy Adams. He claimed to be a Republican, but his doctrines were decidedly Federalistic. The opposltion to his Administration took the name of Democrats, and elected Jackson President.
(c) Randall, the biographer of Jefferson, declares that he was a believer in Christlanity, although not a sectarian. (d) While President Johnson was not a church member, he was a Christian belicver. His wife was a Methodist.

Washington's first inauguration was in New York, and his second In Philadelphia. Adanas was inaugurated in Philadelphia, and Jefferson and the Presidents following elected by the people, in the city of Washington. Arthur took the Presidentlal oath of office first in New York City. John Adams and Jcfferson died on the same day, the Fourth of July, 1826, and Monroe died on the Fourth of July five years later. John Quincy Adams was a Representative and Andrew Johnson a Senator in Congress after the expiration of their Presidential terms, and both died while holding these ompes. Tyler was a Representative in the Confederate Congress from Virginia, and died in office.

Tincoln, Garfleld and McKinley, were assassinated while in office. Lincoln at Ford's Theatre, Washington, D. C., April 14, 1865 , from a plstol shot fired by John Wilkes Booth, who was kllled near Fredericksburg, Va., April 26, 1865, by Sergeant Boston Corbett. Garfield was shot in the Pennsylvania Railroad Depot, Washington, D. C., July 2, 1881, and died at Elberon, Long Branch, N.. J., September 19, 1881. The assassin was Charles Jules Guiteau, who was hanged at Washlngton, D. C., June 30, 1882. McKinley was shot twice September 6, 1901, whlle in the Temple of Music of the Pan-American Exposition, Buffalo, N. Y., and dled from his wounds at the home of John G. Milburn, Buffalo, September 14, 1901. The assassin was Louis Czolgosz, who was electrocuted at Auburn State Prison, New York, October 29, 1901

Jackson was shot at in the Capitol at Washington, D. C., January 29, 1835, by a house painter named Richard Lawrence, escaping because the pistol of the assassin missed fire. Ex-President Roosevelt was shot and wounded by John Schrank, an insane man, at Milwaukee, Wis., October 14, 1912.

Cleveland, aiter taking the oath as President, klssed the open Bible, his lips touching Psalm cxii., verses $5-10$, inclusive. Garneld's first act after taklng the oath was to kiss his mother

The sixth President was the son of the second President, and the twenty-third President was the grandson of the ninth President. William Henry Harrison was the eighth and Benjamin Harrison the tenth in descent from Pocahontas and John Rolfe Lincoln was the first President wearing a full beard Grant the first wearing a mustache. Buchanan and Cleveland were bachelors when they entered the White House as Presidents, but Cleveland surrendered during his first term. Washington, Monroe, Pierce and Hayes were born on Friday, J. Q. Adams, Plerce and Garneld were inatigurated on Friday. Tyler, Polk and Pierce died on Friday. Lincoln was assassinated on Friday

There were remarkable coincidences in the lives of Abraham Lincoln and Jefferson Davis. Both were born in Kentucky; Lincoln in 1809, Davls in 1808. Both removed from their native State in chlldhood, Lincoln to the Northwest, Davis to the Southwest. Lincoln was a Captain of Volunteers and Davls a Second Lieutenant of Regulars in the Black Hawk war of 1832. They began thelr political careers the same year, 1844, Lincoln being a Presidential Elector for Clay, and Davis for Polk. They were elected to Congress about the same time, 1845 and 1846. They were called to preside over their respective governments the same year and within a few days; Davis, February 8, 1861; Lincoln, March 4, 1861

Washington, Monroe, and Jackson were soldiers in the Revolutionary war; Jackson, W. H. Harrison, Tyler, Taylor, and Buchanan in the war of 1812-15; Lincoln in the Black Hawk war; Taylor, Plerce, and Grant in the Mexican war; Grant, Hayes, Garfield, Arthur, B. Harrison, and McKinley in the Civil War, and Roosevelt was in the war with Spain. Adams and Jefferson were signers of the Declaration of Independence, and Washington and Madison of the Constitution.

Grant was christened Hiram Ulysses and Cleveland Stephen Grover. W. H. Harrlson was the oldest man elected to the Presidency, and Roosevelt the youngest, Grant being the next youngest by six months. Cleveland was the only President married in the White House, and hls second daughter the only President's child born therein. Monroe's daughter (Mrs. Gouverneur), Tyler's daughter (Mrs. Waller), Grant's daughter (Mrs. Sartoris), Roosevelt's daughter (Mrs. Longworth) and Wlison's daughters, Jessle (Mrs. Sayre) and Eleanor (Mrs. McAdoo) were the only chlldren of Presidents married therein. Wives of Tyler, Benjamin Harrison, and Wilson died in the White House. John Tyler was father of the largest family, eight sons and six daughters. Eight Presidents: Washington, Jefferson, Madison, Monroe, W. H. Harrison, Tyler, Taylor, and Wilson, were Virginians by birth. Six Presidents: Grant, Hayes, Garfield, B. Harrison, McKinley, and Taft, were Ohloans by birth.

The Postmaster General was not considered a Cabinet offcer until 1829.

## SECRETARIES OF THE NAVY.

## SECRETARIES OF THE INTERIOR.

SECRETARIES OF ACRICULTURE.

## SECRETARIES OF COMMERCE AND LABOR.

Above department divided in 1913 into Department of Commerce and Department of Labor as follows:

## TREASURERS OF THE UNITED STATES.

The germ of the Treasury Department was pianted when, on July 29, 1775, the Continentai Congress appointed two Treasurers. The appointments were Michael Hillegas and George Clymer. Tine latter soon resigned to accept his seat as delegate to the Congress. Mr. Hillegas dlscharged the duties of Treasurer until September 11, 1789. The Treasury Departzant was organized under the act of September 2,1789 . Strictly speaking, it was reorganized,
for the department under various names hád been in existence since 1775. The Constitution went into effect March 4, 1789. Washington was inaugurated as the first President of the Unlted States April 30, 1789. It whil thus be seen that Mr. Hillegas was Treasurer for ncarly flve months after the lnauguration of Washington, and for nine days after the Treasury Department was organlzed under the Constitutlon.

Note-The selection of the Superintendent of the Milltary Academy was conifned to the Corps of Englneers from the establishment of the Institution, March 16, 1902, till the passage of the law of July 13. 1866, which opened it to the entre Army. By the Act of June 12, 1868, the local rank of Colonel was conferred upon the Superlntendent.

Major Williams resigned June 20,1803 , on a point of command, and pendlng lts settlement untli April 19, 1805, when he agaln returned to service as Chlef Englneer, no permanent Superintendent of
the Military Academy was appointed, the command devolving upon the senlor officer of the Corps of Engineers present for duty.

But Major P. G. T. Beauregard, Corps of Englneers, by order of John B. Floyd, Secretary of War, reileved Col. Delafield, Jan. 23,.1851, from the superintendency of the Military Academy, but was hlmself displaced flve days iater, Jan. 28, 1861, by directlon of the succeeding Secretary of War, Joseph Holt, the command again devolving upon Col. Delafleld.

## IS THIS A RECORD PASSACE?

The following 1 g of a voyage of the steamship Santa Catalina, from New York to San Francisco, in 1914, by way of the Strait of Magellan, ls compiled from the records of the owners of the ship, W. R. Grace \& Co., of New York. The $\log$ of a trip in the same year over the same route by the steamship Santa Cruz, owned by the same firm, is also here presented. These two records are to be compared with others which will be found on page 723.

Steamship Santa Catalina-Sailed from New York April 13th, 1914 , at 7 A. M., arriving at San Pedro, May 27 th, 9.40 P. M., with a total steaming time of 44 days, 14 hrs. and 40 min., and covering a total mlleage of 12,649 miles, thus giving an average of 11.8 nautical milies per hour. She left San Pedro 1.8 nauth mies per hour. she left san Pedro
clsco May 30th, at 7.35 P . M., steaming time being 1 day, 7 hrs. and 10 min . The total tlme from New York to San Francisco, via San Pedro, being 45 days, 21 hrs. and 50 mln ., covering a total distance of 12,929 miles or an average of 11.8 miles per hour
Steamship Santa Cruz-Sailed from New York January 28th, 1914, 4.55 P . M., arrived at San Pedro March 16 th, $8.50 \mathrm{P}, \mathrm{M}$. Total sailing time 47 days, 3 hrs. and 55 min . The $\log$ books indicate a distance of 12,819 miles, thus giving this vessel an average of 11.3 nautical miles per hour. She sailed from San Pedro March 17th, 5 P. M. and arrived in San Francisco March 19 th at 12.50 A . M., this beine the steaming time of 1 day, 19 h s . and 50 min . Thus the entire voyare from New York to San Francieco, via San Pedro, was 48 days, 23 hrs and 45 min, covering a total distance of 13,042 miles or an average of 11.1 miles per hour.

## FORM OF ADDRESS FOR PERSONS OF RANK.

An Emperor is to be addressed, in a letter, as "Sire," or "Your Imperial Majesty."

A King or Queen is to be addressed, in a letter, as "Sire" (or "Madam"), or "Your Majesty." The envelope is to be ardressed, "The King's (or Queen's) Most Excellent Majesty."

Princes and Princesses, and other persons of royal blood, are addressed as "His (or Her) Royal Highness." Here, as in the cases above, a letter may begin "May it, please," following with the words "Your Majesty" or "Tour Royal Highness." "May it please" goes well at the start of any letter.

A Duke or Marquis is "My Lord Duke", (or "Marquis"), a Duke is "His, (or Your) Grace." A Marquis is also "My Lord," or "Your Lordship.'

An Earl or a Baron is "My Lord," or "Your Lordship," as "the Right Honorable."
A $V$ iscount is "the Right Honorable."
A Baronet or a Knight is "Sir.'
Wives of any peer may be addressed as "Madam," with the further alternative of "Your Ladyship," or "Your Grace,", if she is of high rank. Women of peers, may be addressed also as "the Right Honorable," or "the Honorable," according to the rank. The wife of an Earl is a Countess.
A Cardinal is "Your (or His) Eminence." An Archbishop is "My Lord" or "His Grace." A Bishop is "My Lord." An Archdedcon is "Venerable sir."
An Ambassador is "Your Excellency." A Minister Plenipotentiary is "Sir."

## WHEAT, LAND AND POPULATION.

(By the Únitcd States Department of Agriculture.)

That wheat consumption was overtaking wheat production, both per capita, after 1875-1894, is indicated by the last column of the accompanying table down to the World War period, during a portion of which period wheat production was specially stimulated. It may be suspected that the high percentage of the wheat crop going into consumption in 1866-1875 is due to underestimation of the production at a time when it was impossible for estimation to keep up with the expanding production on new land.

The crux of the problem of the production of wheat in relation to population is found in the per capita production per acre. Although it is known
that wheat yield per acre has been increasing in the United States for many years. it is not so well known that population has been gaining at a faster ratc and that this fact has had to be counterbalanced, more or less, by taking more acreage into the national Wheat field. This rcmedy cannot be continued inderinitely. Diminished immigration and a dimiriishing birth rate, with some help from increasing yield per acre, are apparently the only factors of the problem that may prevent a partial dependence in this country on imported wheat at some future time.

The total wheat production on which the per capita production of the accompanylng table is based is partly the result of adjusting the department's estimates of wheat acreage for each year.

PRODUCTION AND CONSUMPTION OF WHEAT IN THE UNITED STATES.

## CIANT STAR BETELCEUSE NOT AS BIG AS IT LOOKS?

The bigness of Betelgeuse does not le in ths body but in the immense extent of the luminous atmosphere which surrounds it, according to the theory advanced by $M$. Verronet, the ástronomer of the Strasburg Observafory, July 25, 1922, at the Coñgress for the Advancement of Science at Montpelier, France.
M. Verronet stated that no star as big as Betelgeuse could exist in a solid mass. According to the measurements of Professor Michelson at Mt. Wilson Observatory, it is 300 times greater in dlameter than the sun, with a circumference greater than the whole orbit of the earth. whercas sirius, the most brilliant normal star in the sky, is only twice as big as the sun.
M. Verronet cited measurements of other giant stars, such as Antares, which lias forty times the diameter of the sun, in support of his theory. The established laws, he said, did not admit an cxplanation of the physical equilibrium of these giant
stars, and he quoted determined laws of correlation; mass and temperature to show that in no case could one of these giant stars exceed in actual masis two or three times the size of the sun.

What gave them their gigantic appearance, he said, was that their mass was surrounded by an immense luminous envelope forming a photosphere. Something analogous to this envelope, but much less brilliant, was to be found in the sun's corona. If an effulgent photosphere stretched beyond the sun's atmosphere at the level of the corona, something like a giant stal of the Betelgeuse kind would be produced. But to produce this effect the sun's superficial heat would liave to be raised to 300,000 degrees. An outside stable envelope with diameter equal to 300 times that of the sun would then be formed.

Ultimately, says M. Verronet, these giant stars become normal as their envelopes contract with the decline of heat, turning successively yellow and blue.

## 

In pursuance of a resolution of Congress (passed by the Senate, May 26, 1921, and by the House, June 29) calling for an International Conference on Armament Limitation. President Harding, after informally sounding the big powers and finding them agreeable, sent forth, on Aug. 11, 1921, the formal call for the Conference, on the part of the United States to the British Empire, Belgium, China, Francc, Italy, Japan, Netherlands, and Portugal. The opening was set for Nov. 11, 1921 (Armistice Day), at Washington, but, owing to the burial of America's unknown soldier on that day at Arlington, Va., National Cemetery, just outside the Capital, the formal sessions did not begin until Nov. 12. For further details including the speeches, etc., see the 1922 WORLD ALMANAC.
The agenda or official U. S. programme for the Conference, was as follows:

AGENDA.

1. Limitation of naval armament; basis of limita-
tion; extent of limitation; fulfilment of conditions.
2. Rules for control of new agencies of warfare.
3. Limitation of land armament.

Pacific and Far Eastern questions:

1. Questions relating to China; principles to be applied
2. Application to subjects
A. Territorial integrity.
B. Administrative integrity
C. Open door; equality of administrative and industrial opportunity.
D. Concessions, monopolies and other economic privileges.
E. Development of rallways.
F. Preferential railroad rates.
G. Status of existing commitments.

Questions relating to Siberia; similar to questions relating to China
3. Mandated islands.

Japan at first raised some objection to the consideration of her interests in the Far East, but later agreed to tne agenda.
DELEGATES PLENIPOTENTIARY TO THE CONFERENCE

United States.
Secretary of State Charles E. Hughes, Chairman of the Conference; U. S. Senator Henry Cabot Lodge of Mass., ex-Secretary of State Elihu Root, of N. Y. U. S. Senator Oscar W. Underwood, of Ala. Belgium.
Ambassador to the U.S., Baron de Cartier British Empire.
Great Britain-Premier David Lloyd George (unable to attend), Lord President of the Council Right Hon. A. J. Balfour; Right Hon. Lord Lee o Fareham; Ambassador to the U. S., Sir Auckiand Geddes

Canada-Right Hon. Sir Robert Borden
Australia-Minister for Defense, Hon.
Pearce.
New Zealand-Judge Sir John Salmond.
India-Right Hon. Srinivasa Sastri.
China.
Minister to the U. S., Mr. Sao-Ke Alfred Sze; Minister to Great Britain, Mr. V. K. Wellington Koo; Chief Justice Chung-Hui Wang; Mr. ChaoCnu Wu.

France.
Premier Aristide Briand; ex-Premier Rene Viviani; Minister of Colonies, M. Albert Sarraut; Ambassador to the U.S., M. Juies Jusserand.

Italy.
Senator Carlo Schanzer; Ambassador to the U. S., Vittorio Rolandj-Ricci; Senator Luigi Albertini; Representative Filippo Meda

Minister of the Navy, Baron Tomosaburo Kato; Ambassador to the U. S., Baron Kijuro Shidehara; Pres. of the House of Peers, Prince Iyesato Tokugawa; Vice Minister for Foreign Affairs, Mr. Masanao Hanihara.

## Netherlands

Foreign Minister Jonkheer H. A. van Karnebeek; Jonkheer F. Beelaerts van Biokland; Dr. E. Moresco. Alternate delegates-Minister to the U. S., Dr. J. C. A. Everwijn; Jonklieer W. H. de Beaufort. Portugal.
Minister 'to the U. S., Viscount d'Alte; Capt. L. de Vasconcelios.

Secretariat General of the Conference-John W. Ciarrett.

The Advisory Committee of the U.S. delegates was composed of: Chairman, George Sutherland; Charies S. Barrett, Mrs. Charles Sumner Bird, Mrs. Katherlne Phillips Edson, Mrs. Eieanor Franklin Hgan, Under Sec. of State I Heury P' Fietcher, Samuel Combors, Sce. of Commeree Herbert C. Hoover,

John L. Lewis, Gov. John M. Parker of La., Gen. John J. Pershing, Congressman Stephen G. Porter, Rear Admiral W. L. Rodgers, Asst. Sec. of the Navy Theodore Roosevelt, Willard Saulsbury, Harold M. Sewall, Walter George Smith, Carmi A. Thompson, William Bovce Thompson, Asst. Sec. of War J'. Mayhew Wainwright, and Mrs. Thomas G. Winter.

The Conference ended on Feb. 6, 1922, and on Feb. 10, President Harding submitted to the Senate these treaties negotiated at the Conference:

The covenant of limitation to naval armament between the United States, the British Empire, France, Italy, and Japan.

The treaty between the same powers in relation to the use of submarines and noxious gases in warfare.

The treaty between the Unjted States, the British Empire, France, and Japan relating to their insular possessions and their insular dominions in the Pacific.

A declaration accompanying the four-power treaty reserving American rights in mandated territory.

An atgreement supplementary to the four-power treaty defining the application of the term "insular possessions and insular dominions" as relating to Japan.

A treaty between the nine powers in the conference relating to principles and policies to be followed in matters concerning China.

A treaty between the nine powers relating to Chinese customs tariff.

France declined to consider land armament reduction, and that part of the Agenda fell through.

NO ALLIAN CE IN THE TREATIES, SAYS HARDING
In submitting the treaties to the Senate President Harding said: 'I can bring you every assurance that nothing in any of these treaties commits the United States, or any other power, to any kind of an alliance, entanglement, or involvement. It does not require us or any power to surrender a worthwhile tradition. It has been said, if this be true, these are mere meaningless treaties, and therefore valueless. Let us accept no such doctrine of despair as that. If nations may not establish by mutual understanding the rules and princioles which are to govern their relationship; if a sovereign and solemn plight of faith by leading nations of the earth is valueless; if nations may not trust one another, then indeed, there is little on which to hang our faith in advancing civilization or the furtherance of peace Either we must live and aspire and achieve under a free and common understanding among peoples, with mutual trust, respect, andforbearance, and exercising full sovereignty, or else brutal, armed force will dominate, and the sorrows and burdens of war in this decade will be turned to the chas and hopelessness of the next."

As to the Pacific trcaty he said: "We crave peace there as we do on the continent, and we should be remiss in performing a national duty if we did not covenant the relations which tend to guarantee it. For more than a half century we have had a part in influencing the affairs of the Pacific, and our present proposed commitments are not materially different in character, nor materially greater in extent, though fraught with vastly less danger, than our undertakings in the past.
'We have convinced the on-looking and interested powers that we covet the possessions of no other power in the Far East, and we know for ourselves that we crave no further or greater governmentai or terr torial responsibilities there. Contemplating what is admittedly ours, and mindiul of a long-time and reciprocal friendship with China, we do wish the opportunity to continue the development of our trade peacefuily, and on equality with other nations, to strengthen our ties of friendship, and to make sure the righteous and just relationships of peace. Holding the possessions we do, entertaining these views, and confessing these ambitions, why should we not make reciprocal engagements to respect the territory of others and contract their respect of ours, and thus quiet apprehension and put an end to suspicion? "There has been concern. There has been apprehension of territoriai greed, a most fruitful cause of war. The conference has dissipated both, and your ratification of the covenants made will stabilize a peace for the breaking of wlilich there is not a shadow of reason or real excuse. We shall not have less than before. No one of us shail have less than before. There is no narrowed liberty, no hampered independence, no shattered soverelgnty, no added obligation. We will have new assurances, new frecdom from anxiety, and new manifestations of the sincerlty of our own intentions; a new demonstration of that honesty which prociaims a righteous and powerful repubitc. I am ready to assume the sincerity and the dependiablity of tic assurances of our neighbors of the Oid World that they will respect our rights, just as I know we mean to respect theirs."

## TREATY ON LIMITATION OF NAVAL ARMAMEMT.

Following is the text of the Limltation of Naval Armament Treaty, between the United States. the British Empire, France, Italy, and Japan, ratified by the United States Senate ( 74 to 1 - France of Maryland) on March 29,1922 ; ratined on the part of Japan by the Prince Regent, on Aug. 5, 1922 ; ratined by Britain, by the King's assent, on Aug. 19, 1922. Previously, on August 9, ratifications were agreed to by Canada, India, and the Union of South Africa.

Up to Dec. 1, 1922, neither France nor Italy had ratified the treaties providing for the reduction of naval armament. Unoficial announcement, however, had been :made by both Premier Poincare, of France, and Premier Mussolini, of Italy, that the treaty would surely be ratified. Premier Wang Chung Hui announced in Pekin on November' 6 that the nine Washington Conference treaties affecting China had been sent to the Chinese Parliament and were certain to be ratined shortly.

## CHAPTER I

General provisions relating to the limitation of raval armament.
Anticle I.-The contracting powers agree to limit their respective naval armament as provided in the present treaty.

ARTICLE II.-Tne contracting powers may retaln, respectively, the capital ships whlch are specified in Cliapter II., part 1. On the coming into force of the present treaty, but subject to the following provisions of this article. all other capital ships, built or building, of the United States, the British in Cinapter II., part 2.

In addition to the capital ships specificd in Chapter II., part 1, the United States may complete and retain two ships of the West Virginia class now under construction. On the completion of these two ships the Noith Dakota and Delaware sliall be disposed of as prescribed in Chapter II., part 2.

The British Empire may, in accordance with the replacement table in Chapter II., part 3, construct two new capital ships not exceeding 35,000 tons ( 35,560 metric tons) standard displacement each. On the completion of the sald two ships, the Thunderer, King George V., Ajax, and Centurion shall be disposed of as prescribed in Chapter II., part 2.

Article III.-Subject to the provisions of Article II., the contracting powers shall abandon their respectlve capital ship building programmes, and no new capital ships shall be constructed or acquired by any of the contracting powers except replacement tontage which may be constructed or acquired as specified in Chapter II., partt 3 .

Ships which are replaced in accordance with Cnapter II., part 3, shall be disposed of as prescribed in part 2 of that chapter.

ARTICLE IV.-The total capital ship replacement tonnage of each of the contracting powers shall not excecd in standard displacement, for the United States, 525,000 tions ( 533,400 metric tons) ; for the British Empire, 525,000 tons ( 533,400 metric tons) ; for France, $17-000$ tons ( 177,800 metric tons) ; for Italy, 175,000 tons ( 177,800 metric tons) ; for Japan, 315,000 tons ( 320,040 metric tons).

ARTICLE V.-No capital ship exceeding 35,000 tons ( 35,560 metric tons) standard djsplacement shall be acquired by, or constructed by, for, or within the jurisdiction of, any of the contracting powers.

ARTICLE VI.-No capltal shlp of any of the contracting powers shall carry a gun witl a caliber in excess of 16 inches ( 406 millimeters).

ARTICLE VII. -The total tonnage for aireraft carricrs of each of the contracting powers shall not exceed in standard displacement, for the United States 135,000 tons ( 137,160 metric tons) ; for the British Empire 135,000 tons ( 137,160 metric tons) ; for France 60,000 tons ( 60,960 metric tons); for Italy 60,000 tolls ( 60,960 metric tons); for Japan 81,000 tons ( 82,296 metric tons).

ARTICLE VIII.-The replacement of aircraft carriers shall be effected only as prescribed in Chapter II., part 3, provided, however, that all arrcraft carricr tonnage in existence or building on Nov. 12, 1921, shall be considered experimental, and may be repiaced, within the total tonnage limit prescribed in Article VII., without regard to its age.

ARTICLE IX.-No aircraft carlier exceeding 27,000 tons ( 27,432 metric tons) standard displacement shall be acquired by, or constructed by, for, or within the jurisdiction of, any of the contracting powers.

However, any of the contracting powers may, provided that its total tonnage allowance of aircraft carriers is not thereby exceeded, build not more than two aircr.uft carriers, each of a tonnage of not more than 33,000 tons ( 33,528 metric tons) standard displacement, and in older to effect economy any of the contracting powers may use for this purpose any two of their ships, Whether constructed or in course of construction, which would otherwise be scrappod under the provisions of Article II. The armament oi any tircraft carriers excceding 27,000 tons (27,432 metric tons) standard displacement shall be in accordance with the lequirements of Article $X$., except. that the total number of guns to be carried in case any of such guns be of a caliber exceeding 6 inches ( 152 mililmeters), except anti-aircraft guns and guns not exceedjng 5 inclies ( 127 millimetcrs), shall not cxceed eight.

Artices X.-No aircraft carrier of any of the contracting powers shall carry a gun with a calliber in excess of 8 inches ( 203 millimeters). Without prejudjce to the provisions of Article IX., if the armament carried includes guns exceeding 6 inches (152 millimeters) in caliber the total number of guns carried, except anti-aircraft guns and guns not exceeding 5 inches ( 127 mjllimeters ), shall not exceed 10. If alternatjvely the armament contajns no guns exceeding 6 inches ( 152 millimeters) in caliber. the number of guns is not limited. In either case the number of anti-aircraft guns and of guns not exceeding 5 inches ( 127 millimeters) is not limited.

ARTICLE XI.-No vessel of war exceeding 10,000 tons (10,160 metric tons) standard displacement, other than a capital ship or ajrcraft carrier. Shall be acquired by, or constructed by, for, or within the jurisdiction of, any of the contracting powers. Vessels not specifically bujlt, as fighting ships nor taken in time of peace under government control for fighting purposes, which are employed on fleet duties or ds troop transports or in some other way for the purpose of assisting ln the prosecution of hostilities otherwise than as fighting ships, shall not be within the limitations of this article.

ARTICLE XII. - No vessel of war of any of the contracting powers hereafter lald down, other than a capital ship, shall carry a gun with a caliber in excess of 8 inches ( 203 millimeters)

ARTICLE XIII.-Hxcept as provided in Article IX., no ship.designated in the present, treaty to be scrapped may be reconverted into a vessel of war.

ARTICLE XIV. - No preparations shall be made in merchant ships in tlme of peace for the installation of warlike armaments for the purpose of converting such ships into vessels of war, other than the necessar'y stiffening of decks for the mounting of guns not exceeding 6 inch ( 152 millimeters) caliber.

ARTICLE XV:-No vessel of war constructed within the jurisdiction of any of the contracting powers for a non-contracting power shall excced the imitations as to displacement and armament prescribed by the present treaty for vesisels of a similar type whlch may be constructed by or for any oi the contracting powers: Provided, however, that the displacement for aircraft carriers constructed for a non-contracting power shall in no casc exceed 27,000 tons ( 27,432 metric tons) standard displacement.

ARTICLE XVI.--If the construction of any vessel of war for a non-contracting power is undertaken withun the jurisdjction of any of the contracting powers, sueh power shall promptly inform the other contracting powers of the date of the signing of the contract and the date on wnlch the keel of the ship is laid; and shall also communicate to them the particulars relating to tne ship prescribed in Chapter II., part 3, section 1 (b), (4) and (5).

ARTICLE XVII.-In the event of a contracting power boing engaged in war, sucn power shall not use as a vessel of war any vessel of war which may be under construction witnin its jurisdiction for any otner power, or wnich may have been constructed witnin its jurisdiction for another power and not delivered.

ARTICLE XVIII.-Each of the contracting powers undertakes not to dispose by gift, sale or any mode of transfer of any vessel of war in such a manner that such vessel may become a vessel of war in the ur vy of any foreign power.

ARTICLE XIX. - The United States, the British Empire, and Japan agree that the status quo at the to fortifications and naval bases, shall be maintained in their respective territories and possessions specifted nereunder:
(1) The insular possessions which the United States now holds or may hereafter acquire in the Pacific Ocean, except (a) those adjacent to the coast of the United States, Alaska, and the Panama Canal Zone, not including the Aleutian Isiands, and (b) the Hawallan islands.
(2) Hongkong and the insular possessions wnicia the British Empire now holds or may lereafter acquire in the Pacific Ocean, east of the meridian of $110^{\circ}$ east longitude, except (a) those adjacent to the coast of Canada, (b) the Commonweaith of Austraija and jts territories, and (c) New Zcaland.
(3) The following insular territories and possessions of Japan in the Pacific Ocean, to wit, the Kurjle Islands, the Bonin Islands, Amamj-Oshima, tlio

Loochoo Islands, Formosa, and the Pescadores, and any insular territories or possessions in the Pacific Ocean whlch Japan may nereafter acquire.

The maintenance of the status quo under the foregoing provisions implies that no new fortifications or naval bases shall be established in the territories and possessions specified; that no measures shall be taken to increasc the existing naval facifities for the repalr and maintenance of naval forces, and that no increase shall be made in the coast defenses of the territories and possessions above specified. This restriction, nowever, does not preclude suen repair and replacement of worn-out weapons and equipment as is customary in naval and military establishments in time of peace.

ARTICLE XX. The rules for determining tonnage displacemer: prescribed in Chapter II., part 4, shall avply to the ships of eacn of tne contracting powers.

PART3 3-Replacement-The replacement of capital ships and aircraft carriers shali take place according to the rules in section 1 and the tables in section 2 of thls part.

SECTION I.-Rules for Replacement- ( $\Omega$ ) Capital ships and aircraft carriers 20 years after the date of their completion may, except as otincrwise provided in Article VIII, and in the tiabie in section II. of this part, be replaced by new construction, but withlu the inmits preseribed in Article IV. and Article VII. T'ine kecls of such new construction may, except as otherwise provided lu Article VIII. and in the tables In section II. of this part, be laid down not earlier than 17 years from the date of completlon of the tonnage to be replaced. brovided. however. that no
capital ship tonnage, with the exceptlon of the ships referred to in the third paragrapil of Article II., and. the replacement tonnage specifically mentioned in scetion II. of this part, shall be laid down untll 10 years from Nov. 12, 1921.
(b) Each of the contracting powers shall communicate promptiy to each of the other contracting powers the foilowing information:
(1) The names of the canital ships and aircraft carricrs to be replaced by new construction.
(2) The date of governmental authorization of repiacement tonnage.
(3) The date of laying the keels of replacement tonnage.
(4) The standard displacement in tons and metric tons of each new ship to be laid down, and the principal dimensions, namely, length at waterline, extreme beam at or beiow waterline, mean draft at standard dispiacement.
(5) The date of compietion of each new sirip and its standard disulacement in tons and metric tons, and the principai dimensions, nameiy, iength at waterline, extreme beam at or beiow waterline, mean draft at standard displacement, at time of completion.
(c) In case of loss or accidental destruction of
capital ships or aircraft carriers, they may immediately be replaced by new construction subject to the tonnage limits prescribed in Articles IV. and VII. and in conformity with the other provisions of the present treaty, the reguiar replacement programme bcing deemed to be advanced to that extent
(d) No retained capital ships or aircraft carriers shall be reconstructed except for the purpose of providing means of defense against air and submarine attack, and subject to the following ruies: 'The contracting powers may, for that purpose, equip existing tonnage with bulge or blister or anti-air attack deck protection, providing the increase of displacement thus effected does not exceed 3,000 tons ( 3,048 metric tons) displacement for each ship. No aiterations in side armor, in caliber, number or general type of mounting of main armament shall be permitted except:
(1) In the case of France and Italy, which countries within the iimits allowed for bulge may increase their armor protection and the caiiber of the guns now carried on their existing capital ships so as not to exceed 16 inches ( 406 miilimeters) and
(2) The Brltish Empire shall be permitted to compiete, in the case of the Renown, aiterations to armor already commenced but temporarily suspended.

* The Britlsh Empire may retain the Colossus and Coliingwood for noncombatant purposes, after complying with the provisions of part 2, III. (b). $\dagger$ Two 35,000 -ton siips, standard dispiacement. NOTE-A, B, C, D, etc., represent individual capital ships of 35,000 tons standard displacement, laid down and completed in the years specified.

* Within tonnage limitations; number not fixed.

Note-Italy expressly reserves the right of employing the capital ship tonnage allotment as she inay consider advisabie, subject solely to the iimitations that the displacement of individual sillps shouid not surpass 35,000 tons, and the total capital ship tonnage should keep within the limits imposed by the present treaty.

## Standard Displacement.

The standard displacement of a ship is the dispiacement of the siip complete, fuily manned, engined, and equjpped ready for sea, lleluding aht armament and anmunition, equipment, outnt, provisions and fresli water for crew, misceilaneous stores and implements of every description that are Intended to be carried in war, but without fuel or reserve feed water on board.

Tile word "ton" in the present treaty, except in the expression "metric tons," silall be understood to mean the ton of 2,240 pounds ( $1,016 \mathrm{kilos}$ ).

Vessels now completed shail retaln tioir jiresent ratings of displacement tonnage in accordance with their national system of measurement. HIowever, a power expressing dispiacement in metric tons shali be consldered for the appilcation of the present treaty as owning only the equivalent displacement: in tolls of 2,240 pounds.

A vessei completed hereafter shall be rated at its displacement tommage when in the standard condition defined herein.

* Japan may retain the Shikishima and Asahi for noncombatant purposes, aîter complying witli the provisions of Part 2, III. (b)

NOTE-A, B, C, D, etc., represent individual capital ships of 35,000 tons standard displacement, laid down and completed in the years specified.

## CHAPTER III

Miscellaneous Provisions.
Article XXI.-If during the term of the present treaty the requircments of the national security of any contracting power in respect of naval defense are, in the opinion of that power, materlahiy affected by any change of circumstances, the contracting powers will, at the request of such power, meet In conference with a view to the reconsideration of the provisions of the treaty and its amendment by mutual agreement.

In view of possible technical and scientific developments the United. States, after consultation with the other contracting powers, shail arrange for a collference of all the contracting powers whicn sink convene as soon as posslbie after the expiration of eight years from the coming into force of the present treaty to consider what changes, if any, in the treaty may be nccessary to meet such deveiopments.

ARTICLE XXII.-Whenever any contracting power shail become engaged in a war which In its opinjon affects the navai defense of its national security, such power may after notice to the otiner contracting powers suspend for the period of hostilities its obligatlons under the present treaty other than tiose under Articies XIII. and XVII., provided that such power shall notify the other contracting powers that tilc emergency is of such a cnaracter as to require such suspension.
The remalning contracting powers shall in such case consult together with a view to agreement as to what temporary notificatlons, if any, should be made in the treaty as between themseives. Should sucin consultation not produce agreement, duly made In accordance with tife constitutional metiods of the respective powers, any one of said contracting jowers may, by giving notice to the other contracting powers, suspend for the period of inostlitites its obligations under the present treaty, other thau those under Articles XIII. and XVII.

On the cessation of hostiities the contracting powers wili meet in conference to consider what modifications, if any, should be made in the provislons of the present treaty

ARTMCLE XXIII.-The present treaty shall remain in force until Dec. 31, 1936, and in case none of the contracting powers siall have given notice two years before that clate of its intention to terminate the treaty it sliail continue in force until
the expiration of two years from the date on which notice of termination shail be given by one of the contracting powers, whereupon the treaty shall terminate as regards all the contracting powers. Such notice shall be communicated in writing to the Government of the Unitcd States, which shall immediatciy transmit a certified copy of the notification to the other powers and inform them of the datc on which it was received. The notice shall be deemed to have been given and shail take effect on that date. In the event of notice of termination being given by the Government of the United States, such notice shall be given to the diplomatic representatives at Washington of the other contracting powers, and the notice shall be deemed to have been given and shall take effect on the date of the communication made to the said diplomatic representatives.

Within one year of the date on which a notice of termination by any power has taken effect, all the contracting powers shail meet in conference.

ARTICLE XXIV.-The present treaty shall be ratified by the contracting powers in accordance with their respective constitutlonal methods and shall taire effect on the date of the deposit of al the ratifications, which shall take place at Washington as soon as possible. The Government of the United States wili transmit to the other contracting powers a certified copy of the proces verbai of the deposit of ratifications

The present treaty, of which the French and Englisn texts are both authentlc, shall remain deposited in the archives of the Government of the United States, and duly certified copies thereof shall be transmitted by that Government to the other contracting powers

In faitin whereof the above-named plenipotentiaries have signed the present treaty

The above treaty was agreed to by the delegates from the countrles concerned, at the Conference on Limitation of Armament, at Washington, on Feb. 6, 1922.

TREATY LIMITENG SUBMARINES AND NOXIOUS CASES.
(Signed by the Arms Conference delegates from the U, S., British Empire, France, Italy, and Japan, on Feb. 6, 192\%.) Ratified by the U. S. Senatc, Maren 29. 192\%.

ARTICLE 1.-The signatory powers declare that among the ruies adopted by clvilized nations for the protection of the lives of neutrals and noncombatants at sea in tlme of war, the following are to be decmed an cstablished part of international law:
(1) A merchant vessel must be ordered to submit to visit and search to determine lts character before

A merchant vessel must not be attacked unless it refuse to submit to visit and search after warning, or to proceed as directed after seizure.

A merchant vessel must not be destroyed unless the crew and passengers have been first placed in saiety
(2) Belitgerent submarines are not under any cir-
stated; and if a submarine can not capture a merchant vessel in conformity with these rules the existing law of nations requires it to desist from attack and from seizure and to permit the merchant vessel to proceed unmolested.
Article II. - The signatory powers invlte all other civiiized powers to express their assent to the foregoing statement of established law so that there may be a ciear public understanding throughout the world of the standards of conduct by whlch the public oplnlon of the world is to pass judgment upon future belligerents.
Article III. - The signatory powers, desirlng to insure the enforcement of the humane rules of existing law declared by"them with respect to attacks upon and the seizure and destructlon of merchant ships, further declare that any person in the service of any power who shall vlolate any of those rules, whether or not such person is under orders of a governmental superior, shall be deemed to have violated the laws of war and shall be liable to trlal and punishment as if for an act of piracy and may be brought to trial before the civil or military authorltics of any power within the jurlsdiction of which he may be found.

ARTICLE IV. -The signatory powers recognize the practical impossibility of using submarines as commerce destroyers wlthout violating, as they were violated in the recent war of 1914-1918, the require ments universally accepted by civilized natlons for the protection of the lives of neutrals and noncombatants, and to the end that the prohibition of the use of submarines as commerce destroyers shall be universally accepted as a part of the law of nations they now accept that prohibition as henceforth binding as between themselves and they invlte all other nations to adhere thereto
Article V.-The use in war of asphyxiating,
poisonous, or other gases, and all analogous liquids materials, or devices, having been justiy condemned by the general opinion of the civilized world and a prohibition of such use having been declared in treaties to which a majority of the eivillzed powers are partles.

The signatory powers, to the end that this prohibition shali be universally accepted as a part of internatlonal law binding alike the conscience and practice of nations, declare their assent to such prohlbition, agree to be bound thereby as between themselves and invite all other civillzed nations to adhere thereto

ARTICLE VI.-The present treaty shall be ratified as soon as possible in accordance with the constitutional methods of the signatory powers and shall take effect on the deposit of all the ratifications, which shali take place at Washington.

The Government of the United States will trans mit to all the signatory powers a certified copy of the proces-verbal of the deposit of ratifications.

The present treaty, of which the French and English texts are both authentlc, shail remain de posited in the archives of the Government of the United States, and duly certified copies thereof will be transmitted by that Government to each of the signatory powers.

Article VII.-The Government of the Unlted States will further transmit to each of the nonsignatory powers a duiy certified copy of the present treaty and invite lts adherence thereto.

Any nonsignatory power may adhere to the present treaty by communicating an instrument of adherence to the Government of the United States which will thereupon transmit to each of the signa tory $\cdot$ nd adnering powers a certified copy of each instrument of adherence.

## FOUR-POWER PACIFIC TREATY.

The United States Senate, on March 24-27, 1922, ratifled, by a vote of 67 to 27, the Four-Power Pacific Treaty between the United States, the British Empire, France, Italy, and Japan. The Senate aiso adopted reservations to the treaty. Following are the full text of the treaty and the reservations, the former being in practically the identical language of the agreement signed Dec. 13, 1921, at Washington, by the FourPower delegates to the Conference on Limitation of Armament.

## Forr-Power Treaty.

The United States of America, the Britlsh Empire, France and Japan, with a view to the preservation of the general peace and the maintenance of thelr rights $\ln$ relation to their insular possessions and insular dominions in the regions of the Pacific Ocean have determined to conclude a treaty to this effect and have appointed as their plenipotentiaries:
The President of the Unlted States; His Ma jesty the Klig of the United Kingdom of Great Britain and Ireland, etc., and for the Dominion of Canada, for the Commonwealth of Australia, for the Dominion of New Zealand, for India; The President of the French Repubilc; His Majesty the Emperor of Japani;

Who having communicated their full powers, found in good and due form, have agreed as follows:

ARTICLE I. - The high contracting parties agree as between themselves to respect their rights in relation to their insuiar possessions and insular dominlons in the region of the Pacific Ocean.

If there should develop between any of the high contracting parties a controversy arising out of any Pacific question and involving thelr sald rlghts which is not satisfactorlly settled by dlplomacy and is likeiy to affect the harmonious accord now happily subsisting between them, they shail invite the other high contracting parties to a joint conference to which the whole subject wlll be referred for consideration and adjustment.

Article II. - If the said rights are threatened by the aggressive action of any other power the high contracting parties shail communicate with one notner fuily and frankly in order to arrlve at an understanding as to the most efficient measures to be taken, jointiy or separately, to meet the exigencles of the particular sltuation.

ARTICLE III. -This treaty shall remain in force for ten years from the tlme it shall take effect, and after the expiration of said period it shall continue to bc in force subject to the right of any of the high contracting parties to terminate lt upon twelve months notice.

ARTICLE IV.-Thls treaty shali be ratified as soon as possible in accordance with the constitutional methods of the high contracting parties and shal take effect on the deposlt of ratifications, which shail take place at Washington, and thereupon the agreement between Great Brltain and Japan, which was concluded at London on July 13, 1911, shall terminate.
(For the full text of the Anglo-Japanese treaty see the 1922 Almanac.)

Reservations to Four-Power Pacific Treaty.
(Included in the Senate's ratification, March 24-27, 1924.)

No. 1-(Signed Feb. 6, 1922, by the four-power delegates to the Arms Conference.)

The term 'insular possesslons and insular dominions" used in the aforesaid treaty shall, in its appilcation to Japan, lnclude only Karafuto (or the Southern portion of the isiand of Sakhalin), Formosa and the Pescadores, and the islands under the mandate of Japan. The present agreement shall have the same force and effect as the said treaty to which it ls supplementary

No. 尺-(Origlnated and passed by the U.S. Scnate, March 27, 1922.)

The United States understands that under the statement in the preamble or under the terms of thls treaty there is no. commitment to armed force, no alliance, no obligation to join in any defense

## CHINESE POLICIES AND CUSTOMS TARIFF TREATIES.

The United States Senate, on March 30, 1922, ratlfied (66 to 0) a Treaty Concerning Chinese Principles and Policics, and also ratlfed ( 58 to 1 -King of Utan) the Chinese Customs Tariff Treaty.

The first named treaty, between the United States, Belgium, the British Empire, China, France, Italy Japan, the Netherlands, and Portugai, agreed on by the delegates, at Washington, on Feb. 6, 1922, is as follows:

TREATY ON CHINESE POLICIES.

ARTICLE I.-The contracting powers, other than China, agree:
(1) To respect the sovereignty, the independence, and the territorial and administrative integrity of China;
(2) To provide the fullest and most unembarrassed opportunity to China to develop and maintalil for herself an cffective and stable Goverument;
(3) To use thelr influcnce for the purpose of effectuaily estabishing and maintaining the principle of cqual opportunity for the commerce and
industry of all nations throughout the territiory of China,
(4) To refrain from taking advantage of conditions in China in order to scek special rights on prlvileges whlch would abridge the lights of subjects or citizens of frienclly States, and from countenancing action inimleal to tile security of suci states

ARTICLE II.-The contracting powers agree not to enter into any treaty, agreement, arrangement or understanding, cither with one another, or, i11divldualiy or coliectively, wltin any power or powers,
which would infringe or impair the principles stated in Article I.

ARTICLE III. -With a view to applying more effectually the principles of the open door or equality of opportunity in China for the trade and industry of all nations, the contracting powers, other than China, agree that thcy will not seek, nor support their respective nationals in seeking-
(a) Any arrangement which might purport to establish in favor of their interests any general superiority of rights with respect to commercial or economic development in any deslgnated region of China
(b) Any such monopoly or preference as would deprive the nationals of any other power of the right of undertalring any logitimate trade or industry in China, or of participating with the Chinese Government, or witl any local authority, in any category of public cnterprise, or which by reason of its scope, duratlon, or geographical extent is calculated to frustrate the practical application of the princlple of equal opportunity.

It is understood that the foregoing stipulations of this article are not to be so construed as to prohibit the acquisition of such properties or rights as may be necessary to the conduct of a particular commercial, industrial, or financial undertaking or to the encouragement of invention and research.

China undertakes to be guided by the principles stated in the foregoing stipulations of this article in dealing with applications for economic rights and privileges from Governments and nationals of all foreign countries, whether parties to the present treaty or not.

ARTICLE IV.-The contracting powers agree not to support any agreements by their respective nationals with each other designed to create spheres of influence or to provlde for the enjoyment of mutually exclusive opportunities in designated parts of Chinese territory

ARTICLE V.-China agrees that, throughout the whole of the railways in China she will not exercise or permit unfair discrimination of any kind. In particular there shall be no discrimination whatever, direct or indlrect, in respect of charges or of facilities on the ground of tne nationality of passengers or the countries from which or to which they are proceeding, or the origin or owncrship of goods or the country from which or to which they are consigned,
or the nationality or ownership of the ship or other means of conveying such passengers or goods before or after their transport on the Chinese railways.

The contracting powers, other than China, assume a corresponding obligation in respect of any of the aforesaid railways over which they or their nationals are in a position to exercise any control in virtue of any conoession, special agreement or otherwisc.

ARTICLE VI.-The contracting powers, other than China, agree fully to respect China's rights as a neutral in time of war to which China is not a party; and China declares that when she is a ncutral she will observe the obligations of neutrality.

ARTICLE VII.-The contracting powers agree that whenever a situation arises which in the opinion of any one of them involves the application of the stipulations of the present treaty, and renders clesirable discussion of such application, there shall be full and frank communication between the contracting powers concerned.

ARTICLE VIII.-Powers not signatory to the present treaty, which have governments recognized by the signatory powers and which have treaty relations with China, shall be invited to adhere to the present treaty. To this end the Government of the United States will make the necessary communications to non-signatory powers and will inform the contracting powers of the replies received. Adherence by any power shall become effective on receipt of notlce thereof by the Government of the United States.

ARTICLE IX, -The present treaty shall be ratified by the contracting powers in accordance with their respective constitutional methods, and shall take effect on the date of the deposit of all the ratifications, which shall take place at Washington as soon as possible. The Government of the United States will transmit to the other contracting powers a certified copy of the process-verbal of the deposit of ratifications.
The present treaty, of which the French and English texts are both authentic, shall remain deposited in the archives of the Government of the United States, and duly certified copies thereof shall be transmitted by that Government to the other contracting powers

In faith whereof the above-named plenipotentiaries have signcd the present treaty.

## CHINESE CUSTOMS

The text of the Chinese Customs Tariff Treaty is as follows:
ARTICLE I.-The representatives of the contracting powers having adopted on the 4th day of February, 1922, in the city of Washington, a resolution, which is appended as an annex to this article, with respect to the revlslon of Chinese customs duties, for the purpose of making such duties equivalent to an effective 5 per cent. ad valorem, in accordance with existing treaties concluded by China with other nations, the contracting powers hereby confirm the said resolution and undertake to accept the tariff rates fixed as a result of such revision. The said tariff rates shall become effective as soon as possible, but not earlier than two months after publication thereof.

## Annex.

With a view to providing additional revenue to meet the needs of the Chinese Government, the powers represented at this conference, namely, the United States of America, Belgium, the British Empire, China, France, Italy, Japan, the Netherlands, and Portugal, agree:

That the customs schedule of duties on imports into China adopted by the Tariff Revision Commission at Shanghai on Dec. 19, 1918, shall forthwith be revised so that the rates of duty shall be equivalent to 5 per cent. effective, as provided for in the scveral commercial treaties to which China is a party.
A revision commission shall meet at Shangiai, at the carliest practicable date, to cffect this revision forthwith and on the general lines of the last revision.

This commission shall be composed of representatives of the powers above named and of representatives of any additional powers laving Governments at present recognlzed by the powers represented at this conference, and who have treaties witl Chlna providing for a tariff on imports and exports not to exceed 5 per cent. ad valorem and who desire to participate therein.

The revision shall proceed as rapidly as posslble wlth a view to its completion within four months from the date of the adoption of this resolution by the Conference on the Limitation of Armament and Pacific and Far Eastern Questions.
The revised tariff shall become effective as soon as possible but not carlier than two montlis after its publication by the revision commission.

The Government of the Unitcd States, as convener of the present conference, is requested forthwith to communicate tive terms of this resolution to the Governments of jowers not represented at this con-
ference but who participated in the revision of 1918 , aforesaid.

ARTICLE II.-Immcdiate steps shall be taken, through a special conference, to prepare the way for the speedy abolition of likin and for the fulfilment of the other conditions laid down in Article VIII. of the treaty of Sept. 5, 1902, between Great Brltain and China; in Articles IV, and V. of the treaty of Oct. 8, 1903 , between the United States and China; and in Article I. of the "supplementary treaty of Oct. 8, 1903, between Japan and China, with a view to levying the surtaxes provided for $\ln$ those articles.

The special conference shall be composed of representatives of the signatory powers, and of such other powers as may desire to participate and may adhere to the present treaty, in accordance with the provisons of Article VIII., in sufficient time to allow their representatives to take part. It shall meet in China within three months after the coming into force of the present treaty, on a day and at a place to be designated by the Chinese Government.
ARTICLE III. The speclal conference provided for in Article II. shall consider the interim provisions to be applied prior to the abolition of likin and the fulfilment of the other conditions lald down in the articles of the treaties mentioned in Article II.: and it shall authorize the levying of a surtax on dutiable imports as from such date, for such purposes, and subject to such conditions as it may determine.

The surtax shall be at a uniform rate of $21 / 2$ per cent. ad valorem, provided, that in case of certain articles of luxury which, in the opinlon of the special confercnce, can bear a greater increase without unduly impeding trade, the total surtax may be ncreased but may not exceed 5 per cent. ad valorem:
ARTICLE: IV.-Following the immedlate revlsion of the customs schedule of duties on lmports into China, mentloned in Article I., there shall be a further revision thereof to take effect at the expiration of four years following the completion of the aforesaid lmmediate revision, in order to insure that the customs duties shall correspond to the ad valorem rates fixed by the speclal conference provided for in Article II.

Following this further revlsion there shall be for the same purpose, periodical revision of the customs schedule of duties on imports into China evcry seven years, in lieu of the decennial revision autiorized by existing treaties with China.

In order to prevent clelay, any revision made in
pursuance of this articie shali be effected in accordance with ruies to be prescribed by the special confrence provided for in Article II

ARTICLE V.-In all matters relating to customs duties there shall be effective equaiity of treatment and of opportunity for ali the contracting powers.

ARTICLE VI.-The principie of uniformity in the rates of customs dutles, levied at ali the land and maritime fronticrs of China is hereby recognlzed. The special conference provided for in Articie II. shail make arrangements to give practical effect to this principie; and it is authorized to make equitabie adjustments in those cases in which a customs priviiege to be abolished was granted in return ior some iocai economlc advantage.

In the mean time, any increase in the rates of customs duties resulting from tariff revision, or any surtax hereafter imposed in pursuance of the present treaty, shaii be levled at a uniform rate ad valorem at ali land and maritime frontiers of China

AR'TICLE VII.-TThe charge for transit passes shall be at the rate of $21 / 2$ per cent. ad valorem untii the arrangements provided for by Articie II. come into force.

Article VIII.-Powers not signatory to the present treaty whose Governments are at present recognized by the signatory powers, and whose present treatles with China provide for a tariff on imports and exports not to exceed 5 per cent. ad valorem, shail be invited to adhere to the present treaty.

THE RESULTS OF THE
The delay in securing the assent of France and Itaiy to the navai disarmament treaty has occasioned postponement by the three other nations of their project of reducing their navies. The United States, Great Britain and Japan have, however, provided in their naval budgets for the scrapping of the capital ships and the reduction of forces as called for by the treaty. An official of the Japanese Foreign Office in a statement in Tokio on November 18 said that before the framing of Japan's naval budget, which shows a decrease of yen $117,000,000$ (about $\$ 58,500,000$ ), as compared wlth that of the current year, the Foreign Offlee had received assurances from the American Government that the United States naval budget would be drawn up in the spirit of the Washington Conference. Japan gave similar aesurances
It will cost the United States a minimum of $\$ 70,000,000$ to scrup its navy, and probably much more, it was indicated by Secretary of the Navy Denby when he on May 2 made publle the report of the board appointed to formulate instructions to carry out the rules of the conference.

The completed capital ships to be scrapped by the United States as recommended by the board consist of the following: The Vlrginia, New Jersey, Rhode Island, Georgia, Nebraska, Connecticut, Louisiana, Vermont, Minnesota, Kansas, New Hampshire, Mlchigan, South Caroiina and the Deiaware or the North Dakota.

The Kentuciry, Ohio, and the former Iowa, now $\mathrm{CB}-4$, are not listed under the terms of the treaty, but are understood to be among the completcd capital ships to be scrapped. The Mainc and the Missouri already have been disposed of by sale.

The board recommended that the two most advanced battle cruisers, the Lexlngton and the Saratoga, be selected for converslon into alrplane carrlers. The board recommended that the battleship Washington, bullding by contract and launched, bc sold for scrapplng.

In Great Brltain the Admiraity on August 31 announced that the battle crulscrs, Llon and Princess Royai, and the battleships, Orion, Monarch, Conqueror and Erin, ail fanous in the Britlsh Navy, had bcen ordered scrapped; and on September 27 it further announced that ail the thlrteen ships whlch are to be dlsposed of under tise treaty arc in iome waters and have been taken out of commisslon and dismantled. Great Britaln has also placed a score or more of crulsers and other auxiilary vessels score or commission, as weil as many destroyers and submarines.

Of an officers' strength of about 9,400 , a totai of 1,835 will be retired from active service.

The ioss of the French battleship France brought, down its navai strength more nearly to the strength of Itaiy, as it reduced the country's first naval line by one-scventh of lts fighting strength. It would cost about 200,000,000 francs to replnce the battlesilip at this time. It was announced on October 12 that France was preparing a naval program to bo spread over a perlod of twenty ycars and to be arranged in accordance wlth the terms of the naval treaty

Tine Navai Inteliggence Burean lin Washlngton on Junc 27 announced, accordling to a despateli in the New York Times, tiat Japan has, buliding and pro-

The Government of the Unlted States undertakes to make the necessary communlcations for this purpose and to inform the Governments of the contracting powers of the replles received. Adherence by any power shail become effective on receipt of notice thereof by the Government of the United States.

ARTICLE IX.-The provisions of the present treaty shall override ali stipuiaticns of treatles between China and the respectlve contracting powers whicli are inconsistent therewith, otier than stipuiations according most favored nation treatment.

ARTICLE X.-The present treaty shail be ratified by the contracting powers in accordance with their respective constitutionai methods and shaii take effect on the date of the deposit of ali the ratifications, which shall take piace at Washington as soon as posslble. The Government of the Unlted States wii transmit to the other contracting, powers ib certifled copy of the procès-verbal of the deposit of ratifications.

The present treaty, of which the French and English texts are botli authentic, shall remain deposited in the archives of the Government. of the United States, and duly certified copies thereof shall be transmitted by that Government to the other contractling powers.

The above treaties relating to China were agreed to by the delegates from the nations concerned, at the Confercnce on Limitation of Armaments, at Washington, on Feb. 6, 1922.
jected, more ships than any other power in those particular types upon which no restrictions were imposed by the conference. The despatch says:
"These types are light crulsers, destroyer leaders, destroyers, submarines and fleet submarines. Japan has, building and projected, 140 units with an aggregate tonnage of more than 160,794 among such types, as against 8 units of 11,275 tons being built by Great Britain, 52 units of 116,581 tons being built by the United States, 33 units of 68,400 tons by France, and 24 units of 42,550 tons by Italy.
"Japan is building 52 submarines, whose exact tonnage is unknown. Their aggregate tonnage wili be around 50,000 , so that Japan's present building program of light cruisers, destroyers and submarines is nearer 210,000 tons than 164,796 .
"American naval offcers feel that Japan will profit by the failure to adopt a submarine and destroyer ratio, unless the United States Government shal exercise care and maintain its submarine and destroyer, as well as light crulser strength, in the proportion of $5-3$ as between this country and Japan.
"The United States is well off at present in the matter of destroyers on account of the large number built durlng the war, but the Japanese building program respecting llght cruisers and submarines in a few years will place the Japancse Navy in a better relative posltlon.

UNRESTRICTED SHIPS NOW BUILDING.
"Official naval intelligence data covering the whole navai situation up to June 26,1922 , show that in ships building and projected among types on which no restrictions were placed by the naval treaty the position of the powers is as follows*

## GREAT BRITAIN.

First-line cruiscrs, none
Destroyer icaders, 1 of 1,750 tons.
First-line destroyers, 3 of 3,725 tons.
First-line subinarines, 4 of 5,800 tons.
Fiect submarines, none
UNITED STATES
First-iine iight crulsers, 10 of 75,000 tons.
First-llne cruisers, 10 of 75,000 tons.
Destroyer leaders, nonc.
First-linc destroyers, 3 of 3,645 tons.
First-line submarines, 36 of 31.561 tons.
Flcet submarines, 3 of 6,375 tons.
JAPAN
First-line light cruisers, 15 of 81,900 tons.
Destroyer leaders, none
First-line destroyers, 50 of 58,500 tons.
First-1lne submarines, 23 of 30,394 tons and 52 of
tonnage uniznown to Amerlcan Naval Intellgence officers.
Flect submarincs, none.

## FRANCE

Flrst-iine light cruisers, 3 of 24,000 tolls.
Destroyer leaders, 6 of 14,400 tons.
Flist-iline destroyers, 12 of 16,800 tons.
Flrst-llne submarines, 12 of 13,200 tons.
rlect submarines, nonc.
ITALY
Flist-line iight crulsers, 2 of 10,000 tons.
Destroyer leaders, 6 of 12,270 Lons.
Flrst-line destroyers, 12 of 11,680 tons.
Flrst-llne submarines, 4 of 2,600 tons.
Flect submarines, none.

#### Abstract

"Study of these figures in comparison with other figures showing the ships retained on June 1, 1922, by each of the five powers, and excluding those to be scrapped under the naval treaty, has convinced navai officers studying the matter that Japan is gaining an advantage over the United States with respect to iight cruisers and submarines. "The United States is building ten light cruisers, and on June 12 was retaining twelve iight cruisers which are not to be scrapped. Japan is building fifteen iight cruisers, in addition to the eighteen which she is retaining as of June 1 . On this slowing, Japan wiil have 33 to 22 for the United States a ratio of three to two in favor of Japan. If light cruisers were built on the basis of the $5-3$ ratio, the United States would be entitied to 55 light cruisers for the 33 which Japan wiil have when her building and projected iight cruisers are commissioned.

## OUTLOOK FOR SUBMARINE STRENGTH.

"Japan has, building and projected, for inımediate laying down a total of 75 submarines, as against 36 building and about to be laid down for the United States: In commission and built, Japan already has 23 first-iine and 10 second-iine submarines, which will give Japan a totai of 108 submarines. The United States, on the other hand, on June 1, possessel 57 first-iine and 28 second-iine submarines and 3 fleet submarines. When the 36 classified as building are compieted and added to the present strength of 88 , tise American submarine strength wiii be 124 submarines. On the basis of a $5-3$ ratio, the United States would be entitled to 180 submarines when Japan has her 108 in commission.
"On the basis of present submarine strength of the American and Japanese Navies, the United States will have to build a great many more submarines than it has so far proposed. Tie existing strength ratio is 8 to 3 , and on that basis the United States would be entitled to 288 submarines when the best the American Navy can now see is 124 . In other words, the United States would have to build 164 additional submarines.'

## SHANTUNG TRANSFERRED TO CHINA.

The matter of Shantung being ieft by the Washington Conference on Disarmament to direct negotiations between Japan and China was arranged in Washington on Feb. 4, 1921, when Japan and China signed the Kiaochow Treaty, transferring the Kiaochow ieased territory and the shantung Raiiway to China.

On Oct. 10, 1922, the Japanese members of the Shantung Commission who were arranging the detalls of the restoration announced in Tsingtao Shantung that the leasehoid would be restored, on Dec. 2, when the Japanese troops would withdraw and ivii and military authority be handed over to China, and the Chinese fiag hoisted for the

## first time since Germany acquired the territory

 in 1898.The amounts which China must pay for Japanese investments in the district have beel virtuaily decided upon. Katsuji Debuchi, member of the Shantung commission and. formeriy Counselior of the Japanese delegation at Washington. said Japan wiii exact only what Japan paid to Germany for private German investments and what Japan actually invested sinze 1914 . It is expected that Japan will accept Chinese treasury notes, as China is without casli.

China will receive free ali public properties which Japan acquired trom the German Government.

The commission decided China must pay 20,000,000 yen for Japanese investments in pubiic improvements, $8,000,000$ yen for improvements macie in the sait industry of Kiaochow and $55,000,000$ yen for the Shantung Raiiroad, a grand totai of $\$ 3,000,000$ yen.

The coal mines which are vaiued at $10,000,000$ yen, are to be operated jointiy by the Japanese and Chinese by a corporation to be organized.

The United States on Oct. 30, 1922, delivered through Minister J. G. Schurman to the Chinese Government, a note advising them that in concert with Great Britain, France, Italy and Japan, the with Great Britain, France, Italy and Japan, the the Chinese Eastern Raiiway in accordance with the terms of the resoiutions adopted at the Conference for the Limitation of Armament heid in Washington. The taking over of the railroad was incident to the despatch of Aiiied and American troops to Siberia in the summer and autumn of 1918. An agreement conciuded in February, 1919, between Japan and the United States, and iater concurred in by the other nations, resuited in the operation of the Chinese Eastern and Chinese-Siberian Railways in the zone of operation of the Aliied military forces being placed under the supervision of a speciai Aliied committee, this agreement to end with the withdrawal of the foreign miiitary forces from Siberia.
ARMAMENT CONFERENCE COST $\$ 252,000$.
The Armament Limitation Conference cost the American Government $\$ 252,002$, minus an estimated unexpended baiance of $\$ 350.92$, according to a statement of expenses transmitted by President Harding to the Senate on May 25.

Salaries of $\$ 68,689$ were the largest item of expense, whiie the expenses for buiidings were $\$ 44,219$; for reporting proceedings, $\$ 29,358$; printing, $\$ 20,844$; translations, $\$ 29,726$.
For rent of War Department automobiles used by delegates and attaches, the report showed $\$ 18,752$ was spent and $\$ 3,227$ for other transportation

The item for "entertainment" was $\$ 9,356$, while supplies rost about $\$ 12,000$, and telcphone and other wire faciities $\$ 4.453$.

## ELIHU ROOT ON THE VALUE OF THE CONFERENCE.

Elihu Root, former Secretary of State, one of the United States deiegates, in his Presidentiai address before the sixteentil annual meeting of the American Society of International Law, in Washington, Aprii 27, 1922, summed up the work of the conference in part as foilows:

The conference was calied to deal with the limitation of armament. The special occasion for it was the apparent race of competition in the buiiding of battie ships and battie cruisers on the part of Janan and the United States, a race in which Great Britain was about to enter under the imperative necessity of maintaining her ocean-borne food supply and protecting her Far Eastern colonies and dominions. . . . At the outset of the conference the United States made a very drastic proposai not oniy to stop competition, but to destroy about 40 per cent. of the existing strength of capitai ships of the principai naval nowers, in such a way as to leave the relative proportions of navai strength unchanged, and that proposal was uitimately accepted and embodied in the principai treaty resulting from the conference.
'Such proposals, however, do not carry themselves. Competition in armament resuits from nationai states of mind, distrust, apprehension of attack, a widesprearl beifef that war is imminent, so that the peoples of the respective countries think in terms of war, prepare for war, and reach a condition of thought and feeling in which it is naturai for war to come. That state of mind must be disposcd of if competition is to be realiy stopped. The nations concerned must cease to think in terms of war and must come to think in terms of peace. The object of having a conference is to effect such a change by friendly negotiation, explanation, doing away vith misunderstanding, creating conviction of iriendiy intiention and good faith, with the aid on appropriate occasions of fricndily advice of third parties. The silccoss of such a process in the Wasinington Conference was registered in witat is calied the lour-

Power Treaty between Great Britain, France, Japan, and the United States.
"I doubt if any fol mai treaty ever accomplished so much by doing so iittie. It provided that we shouid all respect rights, which we were bound to do already, and tinat if controversy arose about the Pacific isiands (it was quite immateriai what isiands) the parties shouid get together and taik it over, which was the very thing they were then doing in Washington. The consent of the Senate was not necessary to such an agreement. It mereiy arranged for foiiowing an ordinary form of diplomatic intercourse. The President had clone the same thing at Algeciras and at The Hague and at the Conference of London without asking the consent of the Senate, and the Senate had ratified the conciusions reached at those conferences. It was important, however, that the Senate shouid give its approvai in tilis case because the instrument was formai certlficate to all the peopie of Japan and aii the peopie of the United States and ail the civilized powers that the partics to the treaty liad abancioned their mutuai distrust and had ceased to think about war with each otlier and had resumed relations of genuine friendsinip. That certificate and the truth that it represents incidentaily made possibie the abandonment of the Anglo-Japanese Alliance and made possibie the treaty for the limitation of navai armainent and clispeiied one war cloud upon the horizon of a troubied worid.

## PROBLEM OF CHINA.

"The Four-Power Treaty was not enough, however, standing by itself, to make the new condition stable without some treatment of the causes of irritation which had arisen and which might be apprehended upon the continent of Asia. For the discussion of this subject four other powers laving interests in the Far East-Belgium, China, the Netheriands and Portugai-aiso took part.

Under the conventional arrangements with

China there had developed a vast extent of beneficiai trade and industry upon which multitudes of people In and out of China were dependent. It was evident that to attempt then to wipe out all the arrangements which I have described and put China immediately upon the footing of a full member of the society of nations, unhampered in her trade, her administration, and her maintenance of order, except by the rules of internatlonal law, would be futlle and disastrous, for there was no government in China competent to maintaln trade, to administor justice to foreigners, or to protect foreign life and property. It was evident too that China must work out her own salvation, that no exercise of foreign power could accomplish the result. Four hundred and thirty million people are too great a mass to be reformed from the outside. If Chlna ls to possess her own territory, with independence and control of her own destlnies, she must learn to govern herself and to assert and maintain her own rlghts as a nation.

Accordingly, the members of the conference addressed themselves to the task of helplng Chlna so far as it was posslble in her struggle to achieve self-government.

Ally one examining the treaties and resolutions will find that they uniformly sought a double object, first, to relleve the llmitatlons and inconveniences flowing from the old conventional relations as far as was then practicable under the existing governmental conditlons in China, and, second, to afford to all sectlons and partios of the Chinese peopie a helpful incentive to unite in the establishment of an effeptive and stable government by making specific provisions under which such a government, competent to perform its national duties, wlll be the means of bringing Chlna into the full possession of the rights and liberties assured by international law to the members of the family of nations, just as Japan has been brought into that familly.
"Personally I am a believer in the coming of that event. It wiil be a long, difficult process, for lt requires the new education of more than four hundred miliion people, but I look to the future of that industrious, kindly, peaceful people, with their inveterate respect for individual and family rights, not as a yellow peril but as a great reinforcement to the power of ordered liberty upon the domination of which the future of our clvlllzation depends.

## APPEAL TO PUBLIC OPINION.

"The conference treaty relating to submarines, which is $\ln$ the way of belng described as the Declaration of Washington, was also an incident to the naval armament negotiation.
"It will be percelved that up to thls point the treaty does not undertake to make or provide for

## SECRETARY HUGHES ON THE

Charles E. Hughes, Secretary of State, and head of the United States delegation in a letter to Senator Underwood, also a delegate, on March 11, 1922, wrote in part:

The treaty itself is very short and simple, and is perfectly clear. It requires no commentary. Its engagements are easily understood and no ingenuity 111 argument or hostile criticism can add to them or make them other or greater than lts unequivocal language sets forth. There are no secret notes or understandings.

In vlew of this, the question of authorship is unimportant. It was slgned by four powers, whose delegates respectively adopted it, all having made varlous suggestions
'I may say however, with respect to the genera? course of negotlatlons that after assent had been glven by Great Britaln and Japan that France should be a party to the agreement, I prepared a draft of the treaty based upon the varlous suggestions which had been exchanged between the delegates.

## making now universal or general international law.

 It does four things: It furnishes the high authority of the flve great naval powers of the world as to what the existing law is, at the same time invltlng all other powers to add to that authority by their assent."It binds all of these five great powers themselves to obey this law.

It establishes jurisdiction for the trial and punishment of all future violations of this law.
'It classifies vlolations of this law with piracy.
Perhaps this provision, agreed upon by so great authority in the world, may be the beglnning of a system under which in general those rules of international law which express the moral sonse of mankind may receive a new sanction through responsibility to law and liability to punishment of the agents through whom the rules may be violated.

The troaty is not merely a declaration of existing law. It is not merely an agreement between governments resulting from diplomatic negotiations. It is all these, but above all it is an appeal to the public opinion of mankind to establish and maintain a fundamental rule of morals applled to international conduct in the form of a rule of internatlonal law.

The real sanction of international law comes from the punishing power of public opinion, a power which has been growing with great rapidity in recent years and bids fair to grow stili more rapidly wlth the increased public participation in the conduct of foreign affairs and the constantly increasing interdependence of nations. The ordinary mode of its exercise is in control of the operations of government. exercise is in control of the operations of government. by the effectiveness of the Chinese boycott, whlch avails itself of no governmental action whatever. This tremendous and increasing power is not very effective as yet in support of mere governmental agreements as such, and it is not very effective in matters which are complicated and confused, wilch rest upon conflicting evidence and agreement; but where a rule of internatlonal law ls simple, easily understood, and applies the moral sense of decent people the world over to human conduct, pubilc opinion is competent to enforco that rule with tremendous effect.

This treaty takes one further step and that is to simpilfy still further the whole subject by proposing a new rule of absolute prohibition against the use of submarlnes as commerce destroyers, and all five of the great powers uniting in the treaty voluntarlly subject themselves to the operatlon of that rule, and at the same time ask other powers to joln them in that new rule by adhering to the treaty. This, of course, is the first step in making a new rule of international law. Slmiliar conslderations apply to the provision of the treaty under conslderation prohiblting the use of poisonous gases."

## AUTHORSHIP OF THE TREATY.

"After the approval of the American delegates who were here, the draft was submitted to the representatives of other powers and became the subject of discussion between the heads of the delegations concerned, and with a few changes, which were approved by the American delegates and which did not a ffect the spirit or substance of the proposed treaty, an agreement was reached.

The treaty as thus drawn and notifled was deemed to embrace the maln isiands of Japan. Later, in view of the sentiment both in this country and Japan, it was deemed to be preferable to exclude these main islands, and a supplementary treaty was prepared to thi's effect which designated the islands of Japan which it was to include.
"There ls not the sllghtest mystery about the treaty or basis for suspicion regarding it. It is a straightforward document which attalns one of the most important objects the American Government has had In view and ls of the hlghest importance to the malntenance of friendly relations in the Far East upon a sound basls."

The Colorado was launched at Camden, N. J., March 22, 1921.

All of the battleships have submerged torpedo tubes, mostly two each. They have a crew of 60 to 65 offlcers, and 800 to 1,600 enlisted men.

Battleships are divlded into three classes-predreadnoughts, dreadnoughts, and super-dread-noughts-according to their displacement and guns. The first named class usually are not over 16,000 tons; the second, 18,000 tons or so; the third, 25,000 tons or more. The dreadnoughts have a main battery of all big guns ( 11 inches or more). The super-dreadnoughts have more than 10 big guns
in the maln battery, or a very large displacement, and a speed of 21 to 25 knots an hour

Of the battleships in the above list the following are officially classed as second line ("obsolete"). Connecticut, Kansas, Michigan, Minnesota, Ohio, South Carolina.

Other second-line battleships on the navy list in July, 1921, but not in commission, were the Georgia (14,948), Louisiana (16,000), Nebraska $(14,948)$, New Hampshire (16,000), New Jersey ( 14,948 ), Rhode Island ( 14,948 ), Vermont ( 16,000 ), and Virginia (14,948). All but the Illinois and Kentucky carry four $12-\mathrm{in}$. guns, the two named having four $13-$ in. guns. Their contract speed ranged from 16.9 knots to 19.26 knots an hour.

NAVAL EDUCATION SYSTEM OF THE UNITED STATES.

The Bureau of Navigetion of the Department is charged whth the tralning and education of the line officers of the navy, and cach staff bureau with the training of the staft officers. Midshipmen, when appointed, are given four years instruction on general and technical subjects at the Navai Academy. Upon graduation these midshipmen are commissioncd as line officers and are ordered to sea duty None is sent to any speclai schools until he inas had at least one year at sea. Offcers who have shown special qualifications and interest in the subjects mentioned below are selected for special instruction. In recent years 40 per cent. to 80 per cent. of each Naval Acadicmy class have received special instruction in some one of these subjects. The following courses are maintained by the Bureau of Navigation:

War College-Newport, R. I., one year; for officers of cominand or flag ranis. This course includes theoretical instruction in the art of naval warfare, and war games played on game boards.

Post-Graduate Work-Navai Academy, Annapolis, Md., and various educational institutions; two ycars The first year of this course is at the Naval Academy
and consists of the preparation and technicai groundworl. This work merges lnto the specialization course continued at the institution, offering the best available facilites in the given work, viz.: ordnance, marine, gas, electrical and radio engineering. Columbla University, Massachusetts Institutc of Teehnology, George Washington and Harvard are among the institutions at which special instruction is givell. As a part of this course practicai work during the summer is glven to student offlcers at such places as navy yards, haval gun factory, Bureau of Mines, Burreau of Standards and large industrial plants.

Naval Construction-Naval Academy and Massachusetts Ingtitute of Technology; two to threc years. First year at post-graduate work at Navai Academy and the remainder at Massachusetts Institute of Technology, studying design and construction of ships. These officers are transferced from the lline to the construction corps.

Submarines-New London, Conn.; three months. This course is practical training ln handling submarines and flring torpedoes from them

Torpedoes-Naval Torpedo Station, Newport, R. I.: five inonths. 'I'heoretical and practicai justruc-
tion in the assembly, firing, care and maintenance of various types of torpedoes

Aviation-Pensacola, Fla.; nine months. Training in both heavier than air and lighter than air craft. Lavo-Judge-Advocate-General's offce and Gcorge Washington University; three years. Certain officers while on duty in the Judge-Advocate's office take the law course at George Washington University, giving special attention to military law and procedurc.
Optical Instruments and Gyroscopic InstrumentsNaval gun factory, Ford instrument works and other industrial plants. From time to time officers are ent to places where such instruments are manufactured, to learn the details and principles of manuacturing, while others are given shorter courses in the care, operation and maintenance of these instruments.

## EDUCATION AND TRAINING OF ENLISTED MEN IN THE NAVY.

There are shore training stations at Newport, $\mathbf{R}$ I.; Hampton Roads, Va.; Great Lakes, IIl., and San Francisco. At the Hampton Roads and San Francisco training stations therc are special schools for enlisted men who desire to enter the Naval Academy. Trade schools are maintained at the stations and at several of the navy yards and naval air stations. The course of tralning for apprentice seamen and firemen, third class, at training stations, is eight weeks. Upon the completion of the course of tralning at training stations, apprentice seamen will be rated seamen, second class, or firemen, third class. Every endeavor is made to qualify those who are unable to swim 50 yards. This is particularly desirable in the case of line petty officers, and no man shall be made a coxswain or a member of a power boat who has not so qualified.
Men need not be continuous service men to be eligible for entrance to a trade school, but, except in the case of recruits who wlil enter immediately after enlistment, no men will be detailed who will not have at least two years to serve on their current enlistment after they have completed their course. A recruit must have enlisted for at least three years
to be eligibie for cntrance to any trade school having a course of six months or more. Men who complete a course of instruction in any service trade school are not qualiffed for furlough without pay or discharge by purchase or by special order during the remalnder of the enlistment in which the course was completed. A man who applies for instruction in any service trade school shall be so informed and required to sign a statement that he has no intention of requesting furlough without pay or discharge by purchase or special order during his current enllstment, and that no reason exists or can be anticipated to necessitate such discharge. Men who have completed one course of instruction in any trade schooi whose course is six months or longer will not be considered eligible for entrance to another trade school, except that men entering the apprentice courses in the aviation mechanics' school may be advanced through the higher trade schools of his specialty if his aptitude and progress warrant. Men qualifying for a rating prior to the completlon of a course are to be rated and transferred to receiving ships for general detail

The training given men at regular training stations is supplemented and continued through navy education study courses, supplied through the Bureau of Navigation for men on active duty in naval vessels and at naval shore stations. These courses are designcd primarily for increasing the technical knowledge and efficiency of enlisted personnel in regular naval trades. They cover a wide range of technical courses closely related to naval duties, as well as the fundamental subjects needed by men whose general education is not adequate for a proper study of the technical courses related to these duties.

The naval education study courses are largely developed within the navy. They combine the self-instruction type of material used in other educational extension work with the instructlon of regular ship officers and the practical knowledge gained through regu ar duties. Diplomas are granted for completed courses and a permanent record of all completed educational work is entered in the service record which carries the complete official statement of each man's qualifications and service.

## UNITED STATES NAVAL

The students of t̄e Naval Academy are styled midshipmen. Five midshipmen are allowed for each Senator, Representative and Delegate in Congress, five for the Resident Commissioner from Porto Rico, five for the District of Columbia, and ifteen appointed each year from the United States at large. The appointments from the District of Columbia and fifteen each year at large are made by the President. It is the custom of Presidents to give the appointments of midshipmen at large to the sons of officers of the army and navy, for the reason that officers, owing to the nature of their dutles, are usually not in a position to establish permanent residences.

The selectlon of candidates, by competitive examination or otherwise. for nomination for vacancies in the quota of Senators, Representatives and Delegates in Congress is entirely in the hands of each Senator, Representative and Delegate in Congress having a vacancy; and all appllcations for appointment or inquiries relative to competitive examinations should be addressed accordingly. Two examinations for admlssion are held each year, the first on the third Wednesday in February, he second on the third Wednesday In April.
The law authorizes the appointment of one hundred enlisted men each year to be selected as a result of a competitive examlnation of enlisted men of the Regular Navy and Marine Corps, and members of the Naval Reserve Force on active duty, who must not be more than twenty years of age on April 1 of the year they enter, and who will have been in the service at least one year by August 15 of that year. The mental and physical requirements, as well as the amount of money to be deposited upon admlssion, are the same for these candidates as for other candidates for midshipmen

The competitive examination of these enlisted men is hold on the third Wednesday in April of each year. Candidates may also be accepted on certificate. For detalls write Bureau of Navigation, Navy Department, Washlngton, D. C

All candidates, except 4 Filipinos, are required to be citizens of the U.S. and must not be less than 16 or more than 20 years of age on April 1 of the calendar year in which they entcr the Naval Academy.

The course for midshipmen is four years. Examinations on the ground covered are held at the end of each academic term. During the summer, midshipmen of the first, sccond and third classes go to sea for about thrce months. Midshipmen after graduation are commlssioned as Ensigns in the navy, and occasionaily to fill vacancies in the

CADEMY AT ANNAPOLIS.
Marine Corps and in certain of the staff corps of the navy. The act of June 29, 1906, prescribes that the Secretary of the Navy shall notify in writing each Senator, Representative and Delegate in Congress of any vacancy that will exist at the Naval Academy and which he shall be entltled to fill by nomination of a candidate and one or more alternates therefor. The nomination of a candidate and alternate or alternates to fill said vacancy shall be made upon the recommendation of the Senator, Representative or Delegate, if said recommendation ls made by the fourth day of March of the year following that in which said notice in writing is given, but if it is not made by that time the Secretary of the Navy shall fill the vacancy by appointment of an actual resldent of the State, Congressional district or Terrltory, as the case may be, in which the vacancy wlll exist, who shall have been for at least two years immediately preceding the date of his appolntment an actual and bona fide resident of the State, Congressional district or Territory

The height of candidates for admission shall not be less than five feet two inches, between the ages of sixteen and eightcen years and not less than five feet four inches, between the ages of eighteen and twenty years; and the minimum weight at sixteen years shall be one hundred and eleven pounds, with an increase of not less than three pounds for each additional year, or fraction of a year, over one-half. Any marked deviation ln the date wlll add materially to the consideration for rejection. Candidates must be unmarried, and any midshipman who shall marry, or who shall be found to be marrled before hls final graduation, shall be dismissed from the service. Each candidate who has passed the required examinations must, before being admitted as a midshipman, deposit the sum of $\$ 350$ to cover the cost of his initial outfitclothing, uniforms, text books and equipment.

Each candidate before admission will be required to sign articles by which he binds himself to serve in the United States Navy during the pleasure of the President of the Unitied States (including his time of probation at the Naval Academy) unless sooner discharged. The pay of a midshipman is $\$ 780$ a year.
ORIGIN OF THE UNITED STATES NAVAL ACADEMY.
The United States Naval Academy was founded at Annapolis, Md., in 1845, by George Bancroft, Who then was Secretary of the Navv. Owing to the
Civil War it was removed to Newport, R. I., ln May, 1861, but was re-established at Annapolis in Sentember. 1865.

## THE ARMY OF THE UNITED STATES.

The army of the Unlted States consists of the Regular Army, the National Guard white in the service of the United States, and the Organized Reserves, including the Offcers' Reserve Corps and the Enlisted Reserve Corps.

The Regular Army consists of the Infantry the Cavalry, the Field Artllery, the Coast Artillery Corps, the Air Service, the Corps of Engineers, the Signal Corps, whleh are designated the combatant arms or the line of the army: the General Staff Corps, the Adjutant General's Department, the Inspector General's Department, the Judge Advocate General's Department, the Quartermaster Corps, the Finance Department, the Medical Department, the Ordnance Department, the Chemical Warfare Service, the officers of the Bureau of Insular Affairs, the officers and enisted men under the jurisdiction of the Militia Bureau, the chaplains, the professors and cadets of the United States Military Academy, the present military storekeeper, detached offlcers, de tached enllsted men, unasslgned recruits, the Indian scouts, the offeers and enlisted men of the retired list, and such other officers and enlisted men as are now or may hereafter be provided for. Except in time of war or similar emergency when the public safety demands it, the number of enlisted men of
the Regular Army shail not exeeed 280,000, including the Philippine Scouts: however, the Army Appropriatlon Act, approved June 30, 1922, for the fiscal year of 1923 provides for 125,000 enlisted men and 7,148 Philippine Scouts.

The Nationai Guard consists of the regularly enlisted mllitia between the ages of 18 and 45 years and of commissioned offeers between the ages of 21 and 64 years, of the several states. Territories and the District of Columbia. The organization thereof in general is the same as that prescribed fot the Regular Army. The National Guard may be called as such into the service of the United States and when so ealled is subject to the laws and regulations governing the Regular Army as far as applicable. When Congress has authorized the use of troops in excess of those of the Regular Army. the members of the National Guard may be drafted Into the military service to serve therein for the period of the war or emergency, unless sooner discharged.
The Organized Reserves constitute a war force in order to meet any major emergeney requiring the use of troops in excess of those of the Regular Army and the Natlonal Guard. They are liable to military service only in the event of a serious hational emergency especially proclaimed by Congress.

Effective Sept. 1, 1920, the six military departments within the continental llmits of the United States were discontinued and the contlnental arca divlded into hine corps areas. The military departments and corps areas include the coast artillery dlstricts, coast defenses, forts and camps within their limits. In October, 1920, there was attanhed to the First. Corps Area such part of the State of New York as lies east of rest iongltude $72^{\circ} 30^{\prime}$; Sept. 1, 1920, the island of Porto Rico, with the

ACADEMY AT WEST POINT.
Guard, the total number not to exceed one liundred and elgity at any one tlme.

Appointments are usuaily miade one jear in advance of date of admlssion, by tise Secretary of War, upon the nomination of the Senator or Representative. These nominations may elther be made after competitive examination or glven direct, at the option of the Representative. The Representative may nomlnate two legally qualifled seconci candidates to be deslgnated first and second alternates. The alternates wlil irceelve from the wiar Department a letter of appointment. and will he
examined with the regular appointee, and the better qualified $w . l l$ be admitted to the acadeny in the event of the failure of the principal to pass the prescribed preliminary examinations. Appointees to the Military Academy must be between seventeen and twenty-two years of age; enlisted men of the Regular Ariny and of the National Guard must be between the ages of nineteen and twenty-two years, and have served as enlisted men not less than one year. Provided, that whenever any member of the graduating class shall fail to complete the course with his class by reason of sickness, or deficiency in his studles, or other cause, such failure shall not operate to delay the admission of his successor.

Appointees must be free from any infirm ty which may render them unfit for military service, and able to pass, unless a satisfactory certificate is submitted, a careful examination in English grammar, English composition, English literature, algebra through quadratic equations, plane geometry, United States history, and the outlines of general history. The Secretary of War is authorized to permit not exceeding four Fiiipinos to be designated, one for each class, by the Governor-General of the Philippine Islands, to receive instruction at the United States Military Academy at West Point: Provided, that the Filipinos yndergoing instruction shall receive the same pay, allowances and emoluments as are authorized by law for cadets at the Military Academy appointed from the United States, to be paid out of the same appropriations; And provided further, that said Filipinos undergoing instruction, on graduation, shall be eligible only to commissions in the Phiiippine Scouts; serve for eight years, unless sooner discharged.

Th course of instruction, which is quite thorough, requires four years; Provided, that any person heretofore nominated in accordance with regulations, for
appointment to fill a vacancy which would have resulted from the graduation of a cadct during the present year, may be so appointed notwithstanding the retention of such cadet at the academy; Provided further, that any cadet now at the academy may at his option, exercised prior to June 11, 1920, continue at the academy one additional year and postpone thereby his prospective graduation, and cadets not electing so to prolong their course shall be graduated in the years assigned to their respective classes prior to the passage of this act.

The course is largely mathematical and professional. The principal subjects taught are mathematics, English, French, drawing, drill regulations of all arms of the service, natural and experimental philosophy, chemistry, chemical physics, mineralogy, geology, electricity, history, international, constitutional and military law, Spanish, civil and military engineering, art and science of war, economic and government, and ordnance and gunnery.

From about the middle of June to the end of August cadets live in camp, engaged only in military duties and receiving practical military instruction. Cadets are allowed but one leave of absence during the four years' course, and this is granted at the expiration of the first two years. The pay of a cadet is $\$ 1,174.20$ per year and with proper economy is sufflcient for his support.

Upon graduating, cadets are commissioned as Second Lieutenants in the United States Army. The whole number of cadets graduated from 1802 to 1922 , inclusive, has been 6,959 . It is virtually absolutely necessary for a person seeking an appointment to apply to his Senator or Member of Congress. The Superintendent is Brig.-Gen. Fred W. Siaden, U. S. A., and the military and academic staff consists of fifteen persons. Number of cad $s$ June 1, 1922, was 1,154 .

161 AMERICAN GIRLS CAVE
The Women's Overseas Service League on Armistice Day, Nov. 11, 1922, published a list of the 161 "gold star" American girls who gave their lives in the World War. Most of them rest in French soil though some are buried in Siberia, China, Manila and Armenia and some in England. Plans are being forwarded for a permanent memorial for them. Miss Irene Givenwilson, Curator of the Red Cross Museum, Washington, has the matter in charge. Of those on the list Marion Crondell, Y. M. C. A. canteener was killed by a German shell at Chalons-sur-Marne, March 26, 1917; Winona C. Martin was killed in a Paris hospital by a bomb from a German air raider; and Ruth Landon was killed when the German shell from Big Bertha struck and demolished the roof of the Church of St. Gervais in Paris at Good Friday service, 1918.

(Treasury Building. The active life of the Corporation, exeept for the liquidation of its business, ceases July 1, 1923.)

Chairmian-Andrew W. Mellon (Secretary of the Treasury), Henry C. Wallace (Sccretary of Agriculture).

Managing Director-Eugene Meyer, Jr. (term expires May 17, 1924); Assistant to the Managing Director-Floyd R. Harrison.

Directors-George R. Cookscy (term expires May

17, 1924) ; Dwight F. Davis (term expires May 17; 1926) ; Fred Starek (term expires May 17, 1926).

Assistants to the Directors-William Ontjes, Snelson Chesney, Ralph P. Merritt.

General Counsel-G. A. Marr.
Consulting Counsel-Gerard C. Henderson.
Secretary-George P. Lynde.
Treasurer-R. Reyburn Burklin.

## INTERNATIONAL SANITARY BUREAU.

Honorary Director-Dr. Pablo Garcia Medina, Guatemala, Washington, D. C.; Executive ClertBogota, Colombia; Director-Surgeon Gen. Hugh S. Cumming, United States Public Health Service, Washington, D. C.; Assistant to the DirectorAssistant Surgeon General J. D. Long, United States Public Health Service, Washington, D. C.; Vice Director-Assistant Surgeon General J. H. White, Unitcd States Public Health Service, Washington, D. C.; Secretary-Dr. Julio Bianchi, Minister of W. P. Montgomery, Pan-American Bullding, WashW. P. Montgomery, Pan-American Bullding, Wash-
ington, D. C.; Board of Directors-Dr. J. Llambias, Director General Public Health, Buenos Ayres, Argentina; Dr. Carlos Chagas, Dlrector General Public Health Rio de Janeiro Brazil: Dr Juan Guiteras, Director General Public Health, Habana, Cuba; Dr. Luis Razetti, Secretary Academy of Medicine, Caracas, Venezuela.

## IMPEACHMENTS IN UNITED STATES HISTORY.

The Constitution of the United States, Article II., Section IV., provides that civil officers of the United States may be removed from office on impeachment and conviction of trcason, bribery or other high crimes and misdemeanors; that the House of Representatives has the sole power of impeachment, and the senate the sole power to try impeachments; that the Vice President shall preside at impeachments except when the President is tricd, when the Chief Justice of the Supreme Court shall preside; and that two-thirds of the members present must vote for conviction before a person impeached shall be deemed guilty, Only eight persons have been impeached and tried before the Senate. and only two of them have been conricted. The record is as follows:

Wiliiam Blount, Senator from Tennessec, impeached Julv 7, 1797, for conspiring to wage war With Spain In lavor of Great Britain, to excite the Cherokee Indians against Spain, and to create disaffection among the Indians toward the United States; trial Dec. 17, 1798, to Jan. 14, 1799; vote, 11 gulity, 14 not guijty; verdict, acquittal

John Pickering, Judge of the District Court of the United States for the District of New Fampshire; impeached 1803 for drunkenness and disregard of the terms of the statutes; trial March 3 to March 12, 1803; vcte, 19 guilty, 7 not guilty; verdict, guilty; punishment, removal from office

Samuel Chasc, Associate Justice of the Supreme Court of the United States; impeached 1804 for misconduct at trials of persons charged with breach of the Sedition Law; trial Nov. 30. 1804, to March 1, 1805; vote, 9 gnilty, 30 not guilty, and 15 guilty, 19 not guilty, on different counts; verdict acquittal.

Jarnes Peck, Judge of the District Court of the United States for the District of Missouri; impached for tyrannous treatment of counscl, 1830 ; peached 10 trial May 11 to May 30, 1830, and from Dce. 13,

1830, to Jan. 31, 1831; vote, 22 guilty, 21 not guilty verdict acquittal

West H. Humphreys, Judge of the District Court of the United States for the District of Tennessee, impeached 1862 for supporting the secession movement and unlawfully acting as Judge of the Conlederate District Court; trial May 22 to June 26 , 1862; vote, 32 guilty, 4 not guilty; verdict, guilty punisliment, removal from office.

Andrew Johnson, President of the United States, impeached for usurpation of the law, corrupt use of the veto power, interference at elections and high crimes and misdemeanors; trial, March 30 to May 26, 1868; vote, guilty, 35, uot guilty, 19 verdict, acquittal.

William W. Belknap, Secretary of War of the United Statcs, impeached for accepting bribes; trial April 5 to Aug. 1, 1876; vote, guilty, 5, not guilty, 25; verdict, acquittal.

Charles Swayne, Judge of the District Court of the United States for the District of Florida impeached 1905 for misconduct in offce; trial Feb. 6 to Feb. 27, 1905; vote, 55 guilty, 37 not guilty; verdict, acquittal

Robert W. Archibald, Associate Judge of United States Commerce Court, was impeached July 11, 1912, on thirteen articles cllarging him with corrupt collusion with coal mine owners and railroad officials while in office. The Scnate began his trial Dec. 3, 1912, and enderl Jan. 13, 1913. Verdict, guilty; removal from office.
On June 12, 1914, District Judge Alston G Dayton was impeached. Proccedings droppoi March 3, 1915

In the House, near the close of the 66th Congress, a member ashed for the impeacliment of Federal District Judge Kencsaw Mountain Landis for having accepted, at a salary, the post of Commissioner of Bascbali. The deniand was not acted upon by the Housc.

## STORY OF THE RAILROAD DOLLAR.

(From a Nov., 1922, bulletln of the National City Bank of N. Y.)

For the last six years the percentage of the annual Income of the railroad companies directly disbursed to thelr own employes has been as follows:
In 1916............. $\$ 1,365,776,046$ or 38 per cent. In 1917. 1,617,718,932 or 40.3 per cent. In 1918............. $2,430,846,416$ or 49.8 per cent. In 1919.............. $2,644,109,442$ or 51.4 per cent. In 1920. . . . . . . . . . . . $3,424,075,109$ or 55.4 per cent. In $1921 \ldots . . . . . . . . . .2,585,329,497$ or 46.9 per cent. For the year 1921 the average dollar of railroad incomes for all the raiiroads of the country was disbursed as follows:

For labor (saiarles and wages) Cents.
and miscilaneous...... 46.9 For fuel. 20.6 For fuel. 9.5

For loss and damage, injuries to persons and insurance.
For depreciation and retirements
For hire of equipment and joint facility rents.
Total expenses.
Net operating income (available for interest on
bonds or notes or dividends on stock). $\qquad$
The Iliinois Central Railroad Company has 100.0 out an analysis of its receipts and expendltures for the year 1921, showing the sharc of each dollar of revenue contributed by each source of income, and how each dollar of revenue was expended. The table ls as foliows:

## WHERE THE 1921 DOLLAR CAME FROM.

 Cents.Transportation of freight $(44,637,466$ tons; average distance per ton, 270.46 miles; average revenue per ton per mile, 1.015 cents).
Transportation of passengers ( $37,027,889$ passengers; average distance per passenger, 25.25 miles; average revenue per passenger per mile, 3.104 cents).
71.71

Transportation of mail...
Sources related to freight service, ................... murrage and storage, and special service... Switchlng servlce.
Sources related to passenger service, such as operation of parior cars, excess baggage, etc.
Hotel, restaurant, dinlng room and buffet service.
Statlon and train privileges, and misceilaneous

Rents of equlpment, road, buildings and other property, joint facilltles, and misceilaneous income.
Income from corporate investments
2.50

## OFFICIALS FROM WHOM CAMING AND FISHINC LAWS MAY BE OBTAINED.

Alabama-The Commissioner of Conservation, Montgomery.
Alaska-The Governor, Juneau; Secretary of Commerce, Washington, D. C.
Arizona-State Game Warden, Phoenix.
Arkansas-Secretary, Game and Fish Commission, Little Rock.
California-Executlve Officer, Fish and Game Commission, New Cali Building, San Francisco.
Colorado-State Game and Fish Commissioner, Denver.
Connecticut-Socretary, Commission of Fisherles and Game, Hartford
Secretary, Shell Fish Commission, New Haven.
Delaware-Secrctary, Game and Fish Commisslon, Laurel.
District of Columbia-Superintendent Metropolitan Poilce, Washlngton.
Fiorida-Sheii Fish Commissioner, Taliahassee.
Georgia-Game and Fish Commissioner, Atianta.
Idaho-Fish Commlssioner, Pocateiio.
Illinois-Chiof Game and Fish Warden, Springfield.
Indiana-Dlrector, Department of Conservation, Indianapolis.
Iowa-State Fish and Game Warden, Des Moines.
Kansas-State Fish and Game Wardell, Pratt.
Kentucky-Executive Agent, Game and Fish Commlssion, Frankfort.
Louisiana-Commlssioner of Conservation, New Court Buiiding, New Orieans.
Maine-Commissioncr of Iniand Fisherles and Game, Augusta.
Maryland-Conservation Commission, 512 Munsey Building, Baltimore.
Massachusetts-Chairman, Commissioners of Fisheries and Game, State House, Boston.
Michigan-Dlrector, Conservation Commission, Lansing.
Minnesota-Game and Fish Commissioncr, St. Paui.
Mississippi-Department of Game and Fish, Jackson.
Missouri-Game and Fish Commissioner, St. Louis.
Montana-Gamc and Flsh Commission, Helena.

Nebraska-Chief Deputy, Game and Fish Commission, Lincoln.
Nevada-State Fish Commissioner, Reno
New Hampshire-Fish and Game Commissioner, Concord.
New Jersey-Fisll and Game Commissioner, East Orange.
New Mexico-Game and Fish Warden, Sante Fe.
New York-Secrctary of Conservation Commission, Albany.
North Carolina-Cliairman, Fisheries Commission Board, Morehead Clty.
North Dakota-Pres., Game and Fish Board Beach.
Ohio-Chief Game Warden, Board of Agricuiture, Columbus.
Oklahoma-Secretary, Game and Fisll Commission, Oklahoma City.
Oregon-Fish and Game Commissions, Portland.
Pennsylvania-Fish and Game Depts., Harrisburg.
Rhode Island-Iniand Fisheries Commission, Providence.
South Carolina-Chief Game and Fish Warden, Coiumbla.
South Dakota-State Game and Fish Warden, Pierre.
Tennessee-State Game and Fish Warden, Nashvilie.
Texas-Game, Fish and Oyster Commissioner, Austin.
Utah-Fish and Game Commissioner, Salt Lake City.
Vermont-Fish and Game Commissioner, Montpelier.
Virginia-Commissioner of Game and Iniand Fisheries, Richmond.
Washington-Chicf Game Warden and State Fish Commlssioner, Olympia; Chief Deputy Game Warden, Spokane.
West Virginia-Game and lish Commission, Charieston.
Wisconsin-Conservation Commission, Madison.
Wyoming-Game and Fish Dept., Cheyennc.

## WORLD ACRICULTURE SOCIETY.

(Headquarters, Amherst, Mass.)

The purpose of the World Agriculture Soclety is to promote increased food productlon.

President-Dr. Kenyon L. Butterfield, (President Massachusetts Agricultural College, Amherst; Executive Secretary-Laurence $H$. Parker, Amherst; Treasurer-Harry W. Kidder, (Treasurer Amberst College); Clerk of the Corporation-Arthur H. Dakin, Amherst; Field Secretary-Lincoln W. Barnes, Amherst; Auditor-Wlnthrop S. Welles, Amherst; Erecutive Committee-Ray Stannard Baker, Lineoln W. Barnes, Charles R. Green, Robert J. MCFall, Laurence H. Parker, Winthrop S. Welles.

Advisory Council-Belgium, M. Pail DeVuyst, Director General. Belgium Department of Agriculture; British Isles, J. Nugent Harris, 42 Dalebury Road, Wandworth Common, London, S. W. 17; Mrs. May Elliot Hobbs, Kelmscott, Lechlade, Gloucestershlre; Canada, Col. H. M. Tory, President, University of Alberta; Licut.-Col. F. C. St. B. Harrison, Princlpal, Macdonald College, St. Anne de Bellevue, Quebec; Cblna, Dr. Wen Pin Wei, Chinese Legation, London, England; France, M. Henri Girard, membre du Conscil Superieur de l'Agriculture, Plailly, Oise; Unlted States, Dr. H. P. Douglas, Upper Montclair, N. J.; Dr. Butterfield.
Branches of World Agriculture Society-Amherst, Mass., Guy A. Thelin, Secretary; Berea, Ky., Secretary-Treasurer, Harlan Franklin; Connecticut Agrlcultural College, Storrs, Conn., Samuel Kostolefsky, Secretary; Hampton Institute, Hampton, Va., Proi. W. K. Blodgett, Secretary; North Carolina State College Agricultural Club, A. H. Veasey, President, Raleigh, N. C.; Tuskegee, Ala., S. B. Simmons, Secretary; Wellesley College, Margaret W. Conant, Secretary; Ontario Agricultural College, M. Leslie Hancock, Secretary

Instltut National d'Agronomie, members, MM. Angot Gerard, Samsoen. Tran Van Trin, 16 rue Claude Bernard. Paris, France; Hokkaido Impcrial University, Prof. K. Morimoto, organizer, Nanking, China; Philippines University, Prof. Jose J. Mirasol, Los Banos, P. I.; A. E. F. Farmers' Club, Lleut. Adolph C. Stangel, 2001 Washington St., Manitowoc, Wis.; International Institute of Agriculture, Signor Dragoni, Rome, Italy.
International Association of Agricultural Missions, Dr. Warren Ir. Wilson, New York City, Presi-
dent: Vice Presidents, Prof. Sam Higginbotlism India; Prof. B. C. Case, Burma; Prof. B. H. Hunnicut, Brazil; Prof. H. A. Longworth, Africa; Prof F. L. Crouse, Chile: Dcan J. H. Rcisncr, East China: Prof. G. W. Groff, South China; Prof. L. H. Parker, Amberst, Mass., for the United States; American Country Life Association, Dr. K. L. Butterfield, Amherst, Mass., President; A. R. Mann, Ithaca, N. Y., Mrs. Chas. F. Shuttler, Farmington, Mo., Vice Presldents; $\dot{E}$. C. Lindeman, Greenboro, ${ }^{\text {N }}$. C., Executlve Secretary; C. F. Jenkins, Philadelphia, Pa., Treasurer; Field Secretary, N. T. Frame, Morgantown, W.Va.

World Alliance for International Friendship through Churches, Dr. H. A. Atkinson, 70 Flfth Ave., New York City, director; Rural Life Bureau of National Catholic Wellare Councll, the Rev. E. V. O'Hara, Eugene, Ore., director: 'Societe des Ingenieurs Agricoles de Louvain, M. le Vicomte Vilain XIII, President, Louvaln, Belgium; Commission Nationale pour l'Embellissement de la Vie Rural, M. Max Pastur, Jodoigne, President.
Assoclation des Ingenieurs Agricoles de Gembloux, H. Kufferath, Gembloux, Belgium, Presidént; Federazione pro Montibus, Dr. Guido A. R. Borghesani, Rome, Italy, director; Hungarian Agrarian League, Address, Ullvet, Hungary; Bureau of Applied Botany of Russian Scientlfic Agricultural Committee, Prof. N. I. Vabilov, Morskaja, 44 Petrograd, Russia, Chairman; director of New York office, D. N. Borodin, 110 W. 40 th St., N. Y. Clty; Union of Siberian Creamery and Other Co-operatlve Associations, Joseph K. Okulltch, 113 Lincoln St., Boston, Mass.

La Soclete des Agriculteurs de France, M. le Marquis de Vogue, Paris, President; American Committee for Devastated France, President, Miss Anne Morgan, Chairman Executive Committee, 16 E. 39th St., N. Y. City; M. Andre Tardleu, Paris, Honorary President; Myron T. Herrick, President; Village Clubs Association of England and Wales, Sir Henry Rew, K. C. B., 80 Pall Mall, London, S. W. I., Chairman.

Junta Agro-Pecuaria Internaciónal (Llvestock Breeders), Robert Scoville, New York City, Chairman: Woman's National Farm and Garden Assoclation, 1828 Stevens Bldg, Chlcago, Mrs. Francis King, Alma, Mich., President.

## THE INTERNATIONAL JOINT COMMISSION.

(Washington, D. C.)

United States - Chairman - Obadiah Gardner; Clarence D. Clark, Marcus A. Smith; Secretarywilliam H. Smith.

Canada-Chairman-Charles A. Magrath; Henry A. Powell, K. C., Slr William Hearst, K. C. M. G.; Secretary-Lawrence J. Burpee.

## INTERNATIONAL BOUNDARY COMMISSION:

## (U. S. Coast and Geodetic Survey, Washington.)

For defining and marklng boundary between Unlted States and Canada, except on Great Lakes and St. Lawrence Rlver; for marklng and surveying boundary between Alaska and Canada.
U. S. Section-Commissioner-E. Lester Jones: Engineer to the Comm.-J. H. Van Wagenen; Chief Clerk and Disbursing Opicer-Robert B. Martin.

Canadian Section-Commissioner-J.J. MeArthur.

## ROSENWALD RURAL SCHOOLS.

Julius Rosenwald of Chicago, during the last cight years, has given $\$ 1,107,000$ toward the construction of 1,633 rural schoolhouses for Negroes in 14 southern States. This aid has been furnished on condition that the Negroes themselves, through their own contributions, from white friends or from public funds, raise an amount equal to or larger than that furnished by the Julius Rosenwald Fund.

On this co-operative plan, up to Nov. 20, 1922, 1,63.3 schoolhouses, utilizing the services of 3,807 teachers and providing for 171,000 pupils. were louilt at a total cost of approximately $\$ 5,700,000$. Of this amount the Negroes gave about $\$ 1,510,000$, the whites $\$ 345,000$, the public funds $\$ 2,738,000$, and Mr. Rosenwald $\$ 1,107,000$. Classified by

> ROSENWALD AID TO NEGRO

Julius Rosenwald in 1910 offered through the Chicago Y. M. C. A. to give $\$ 25,000$ toward the cost of a Negro Y. M. C. A. building for men and boys in any city of the United States which by opular subscrintion would raise $\$ 75,000$ additlonail, popular subscription would raise $\$ 7,000$ additional, thus assuring 8 . Duilding to cost complete a minimum
of $\$ 100,000$. Under this offer bulldings were erected at a cost of $\$ 2,150,000$ in thirteen cities, having a total Negro population of $1,000,000$.

In 1920 Mr . Rosenwald made a second offer to contribute $\$ 25,000$ to any city raising not less than $\$ 125,000$, being influenced by interest awakened In Akron, O.; Dayton, O.; Detrolt; Jersey Clty; Aususta, Gia.: Montclair, 'N. J.; Atlantic Clty:
types the buildlngs include 443 one-teacher schools, 618 two-teacher schools, 262 three-teacher schools, 153 four-teacher schools, 51 five-teacher schools, 47 six-teacher schools, 22 schools above six teacher, and 37 teachers' homes.

By States the number of school buildlngs erected and the amounts contributed from the Jullus Rosenwald Fund follow:

Alabama, 260, \$121,400; Arkansas, 77, \$55,100; Florida, 7, $\$ 7,900$; Georgia, 77, $\$ 52,750$; Kentucky, 66, $\$ 42,300$; Louisiana, 167, $\$ 113,000$ : Maryland, 27, $\$ 19,500$; Mississippi, 193, $\$ 165,400$; North Carolina, 267, \$179.165; Oklahoma, 25 , $\$ 21,930$; South Carolina, 104, $\$ 92,000$; Tennessee. 136, $\$ 91,000$; Texas, $96, \$ 72,133$; Virginia, 131, $\$ 73,900$; total, $1,633, \$ 1,107,478$.
Y. M. C. A. AND Y. W. C. A.

Orange, N. J.; Los Angeles; Nashville and Chicago for a second bulldlng. Owing to excessive cost and adverse conditions no city had qualified up to Nov. 15, 1922, but the Chicaro Y. M. C. A. reported that Atiantic City, which had bought a site for $\$ 50,000$, intended inaugurating a campaign for building funds in the epring of 1923 ; also that Detroit, Jersey Clty and Dayton might soon qualify. Mr. Rosenwald gave $\$ 25,000$ toward tlie costi of $A$ Y. W. C. A. building erected in New York and he promised $\$ 25,000$ to a Y. W. C. A. building now under construction in Phlladelphia. There is 110 general offer to aid Y. W. C. A.'s, New York and Philadelphia presenting excentional situations.

## THE CUEF STREAM.

Discussions about the effects of the Gulf Stream upon climate and mariners' reports of its excessive heat recall that the first detalled study of what he called "the grandest and most mighty terrestrial phenomenon," was made by the late Rear Admiral John Elliott Pillsbury, U. S. N., a former President of the National Geographie Society, and summarized by him in a communication to the National Geograplic Magazine.
'In all oceans there are movements of the water (other than that caused.by the tides) which may be sald to be due primarily to the prevalent wind," Admiral Pillsbury wrote
'In the two great oceans, the Atlantic and the Pacific, there is to be found both north and south of the Equator, and also in the Indian Ocean, a similar circulation, that is, a general westerly movement in the tropics, a flow toward the poles along the eastern shores of the continents, an easterly set in the temperate zones, and a eurrent toward the Equator along the western shores. It thus becomes a grand circular movement, some parts being quite slow, and other parts very switt; sometimes there may be a temporary interruption in the slower portions, or perhaps even a reversal, but taken as a whole the movement is continuous.

In the North Atlantic Ocean the currents are probably more pronounced than in either the Pacific or the Indian Oceans.

The equatorial current is usually described as being a broad band of water moving across the Atlantic in the tropies. The portion of this current situated soutl of the Equator is divided into two parts upon meeting the eastern salipnt of South America, Cape St. Roque. One branch turns south toward the Antarctic, while the otlier is forced to the westward along the shores of Northern Brazil and the Guianas, and is called the Guiana coast eurrent. The equatorial current north of the Equator has an almost uninterrupted progress untll it reaches the Windward Islands, but a portion of it also impinges against the Guiana coast and thus augments the volume of that current.

HOW GULF STREAM IS FORMED.
'At tlic Windward Islands both are united, and a portion of the flow enters the Caribbean through the various passages, crosses it to the Yucatall and Honduras coasts, and thence into the Gulf of Mexico, from which it issues through the Straits of Florida as the Gulf Stream. Passing onward toward Europe it is augmented in volume by a part of the north equatorial current that sweeps along outside the West Indian Islands and the Baliamas, and whille this current is slow in movement in comparison to the Gulf Stream itself, it doubtless carries a much greater number of heat units to help warm up Northern Europe.

The Gulf Stream, or rather the combined flow mentioned above, divides as it meets the resistance of the Eastern Continent, one branch flowing south along the African coast, while the other procecds northward into the Arctie toward Spitzbergen and Franz Josef Land.
"It is diffleult for the mind to grasp the immensity of this great ocean river. The straits of

Florida at its narrowest point is about 40 miles wide and observations here numbered between three and four thousand, surface and subsurface. A calculation of the average volume of water passing in one hour gives the enormous sum of 90 billon tons. If this one single hour's flow of water could be evaporated, the remaining salts would require many times more than all the ships in the world to carry it

MAGNITUDE OF OCEAN RIVER.
"When one is on board a vessel, floating upon its waters, one is not as much impressed at the power and grandeur of this wonder of nature as he is when he stands before a towering mountain, an immense iceberg, or a fall of water. such as Niagaia, but when one remembers that the mighty torrent, speeding on hour by hour and day by day in a volume equal to all the largest rivers in the world combilled, carrying its beneficent heat to temper the climate of continents, one begins to realize that of all the forces of the physical world none can equal this one liver of the ocean

It is interesting to note in the history of the Gulf Stream how great its influence has been on the fortunes of the New World. Before the discovery of America, strange woods and fruits were frequently found on the shores of Europe and offlying islands. Some of these were seen and examined by Columbus, and to his thoughtful mind they were eonvincing evidence of the fact that strange lands were somewhere to the westward. These woods were carried by the Gulf Stream and by the prevailing winds from the American continent, so that in part, the stream is responsible for the discovery of the New World
INFLUENCE IN COLONIZING AMERICA.
"The influence of the Gulf Stream in the colonization of America was very great. The division of the English colonies into New England and Virginia was probably in part due to the routes by which they were reached. Vessels bound from England to New England crossed the North Atlantic outside the limit of the Gulf Stream, or in a feeble adverse current. They had the advantage, too, of crossing the Newfolindland Banks and of being able to surely replenish their provisions by fishing.
'This voyage, however, much as the advantages might be either by the shorter distance or the gaining of food, was not thought to be practicable with a vessel bound to the Southern Colonies. They sailed south to the trade-wind region, through the Carribbean and around Cuba, thence following the Gulf Stream to their port.
"The Dutch adopted this passage to the Hudson, so that really Nantucket Island became the dividing line between the two voyages; a difference of 100 or ? 300 miles in destination caused a difference in the length of the passage of about 3,000 miles.
"The name of 'Gulf Stream' was first suggested by Benjamin Franklin because it issues from the Gulf of Mexiso. While it is only a part of the grand scheme of ocean circulation, and the Gulf of Mexico is in reality ouly a stopping place, as it were, for its waters, this name is generally applied to the current now as it was given by Franklinthat is, the current coming from the Gulf of Mexico and spreading abroad over the North Atlantic

## SOME FAMOUS OLD PEOPLE OF 1922.

## At what age is one to be classed as "old"?

Five centuries ago a man was called old at fifty. In the nineteenth century few under sixty would admit that they were old. With so many hale and hearty men well on in years to-day, it seems well to keep the llmit sot by the Psalmist of threeseore years and ten in offering this list, by no means exhaustive, of famous old people of 1922. The age at the last birthday is given and the list is made up as of October 1. 1922 :
100-John A. Stewart, banker. New York; Cornelius Cole, former U. S. Senator, California
9 -The Earl of Halsbury, former Lord Chancellor of Great Brltaln.

## INTERNATIONAL TRADE COURT OF ARBITRATION.

A. C. Bedford, of New York, Chairman of the American Section of the International Chamber of Commerce, in which 28 countries are associated with the Unlted States, announced on Nov. 6, 1922, that the chamber has perfected plans for the establishment of a court of arbitration for the settlement and adjustment of international commercial disputes. The court is the result of two years of careful study and is to be independent of ali agencies established by Governments.

Owen D. Young, Chairman of the board of the General Electric Company, has been selected as Chairman of the American group on the court. His assoclates will be:

Newton D. Baker, President of Chamber of Commerce of Cleveland and formerly Secretary of War.

Irving $T_{\text {, Bush, President of Bush Terminal }}$ Company, New York.
R. Goodwin Rhett, President of Peopie's National Bank, Charleston, S. C.

Henry M. Roblnson, President of First National Bank, Los Angeles.
M. J. Sanders, Manager of International Mercantile Marine, New Orleans

Frederick 5 . Snyder, President of Chamber of Commerce of Boston.
Thomas E. Wilson, President of Wiison \& Co., Chicago.

Edgar Carolan of International General Eiectric Company, Paris, France.

Administration of the court will be directed from the headquarters of the Internatlonai Chamber, 32 Rue Jean Goujon, Paris.
M. Philip von Hemert, President of the Dutch Chamber of Commerce in Paris and Chairman of the special committee that clrafted the rules of procedure for the court, will serve as President of its Executive Committee.
Mr. Carolan of the American group will serve as one of the Vice Presidents of its Executive Committee.

## THESE COUNTRIES INTERESTED.

Simiiar groups of representative business men have been named by the following 28 countries represented in the International Chamber of Commerce: Argentina, Austrla, Belgium, Bulgaria, Costa Rica, Czechoslovakia, Denmark, Esthonia, France, Great Britain, Greece, Guatemala, Haiti, Indo-China, Italy, Japan, Luxemburg, Netherlands, Norway, Poland, Portugal, Spain, Soudan, Sweden, Switzerland, Union of South Africa, and JugoSlavia.

The purpose of the court is economical adjustment of commercial disputes wlthout the necessity of tong delays and expenses involved in great distress, limitation of means of communication, differences in language and the usual legal agencles.
The proposed procedure has three, phasesconcliation, arbltration where legal sanction for the enforcement of awards exists, and arbitration where there is no enforcing law.

Conclliatlon will be invoked where, for instance, there is disagreement over a contract which looks as if it could be handled without the more formal proccdure of arbitration. It is expected that such cases can be handled satisfactorily by the administratlve commisslon, consisting of one resident commissloner from each country represented.

Two forms of arbitratlon are provided, as already indicated, to cover, on the one hand, the case where the laws of both countrles involved provide for the enforcement of arbitral awards, and on the other hand, the case where there is no such provision. In the latter case enforcement will have to depend on morai suaslon, and such influence as, for instance, the United States Chamber of Commerce might have in this country.

Some of the provisions in the code now formulated for use in the case of countries where there is no legal sanction for the execution of arbitration awards follow:

AN INTERNATIONAL COURT.
"The Council of the International Chamber of Commerce shall name a committee on arbitration, for the purpose of facilitating arbitration of disputes arising between business men of different countries. This committee shall be known as the 'Court of Arbitration of the International Chamber of Commerce.'
"Any party who desires to have recourse to arbitration under the new pian shall address a request to his national committee or, if no national committee exists, through an organization member of the international chamber, glving a statement of the transaction in question and the claims to be arbitrated. If the question is found suitable for arbitration the court shall forward a copy of the request to the other party and invite him to furnish a statement of his case.
"The court will appoint one arbltrator to try each case submitted to it, unless the parties desire the appointment of two arbitrators and one umpire or of three arbitrators.

The Conrt of Arbitration will request the various national committees to furnish the names of technlcally qualified arbitrators for appointment to hear the cases submitted to it. The arbitration shall take place in the country and town as may be determined by the court.
"Normally the arbitrators shall render their award within sixty days. The arbltrators will have the right, where the law permits, to take evidence in countries other than that in which the arbitration takes place.
"The award of the arbltrators, in addition to the decision on the merits, shall determine which of the two parties is responsible for the costs, or in what proportion such costs shall be divided between them. The arbitrators shall be entitled to relmbursement of expenses, but shall serve gratuitously except, within the discretion of the court, in such countries and industries where fees are customarily allowed for arbitrators.

## IN HONOR BOUND.

"Whenever the partles have agreed to arbitration by the Internatlonal Chamber of Commerce, the jurisdiction of the Court of Arbitration is obligatory upon the contracting parties, and upon the refusal or failure of one of the parties to present his case before the arbitrators an award by default may be made.
"The parties are in honor bound to carry out the award of the arbitrators."

In the event of the failure of the party against whom the award has been rendered, it is provided that the successful party may notlify the national committee or the organization member of the International Chamber of Commerce, whereupon the court shall report the default to the Chamber of Commerce of the country concerned, with the request that the proper disciplinary measures be applied.

Settlement of a dispute by conciliation may be effected by business men bringing the controversy to the attention of the Internatlonal Chamber through the national committees. Such requests for the good offices of the chamber will be referred to the administrative commission, which is composed of the representatives of the member countries resident in Paris to co-opcrate with international headquarters.

After examining all documents submitted by both parties to the controversy and collecting ail possible information, the adminlstrative committee, through its Chairman, will communicate with the parties, through the national committees, proposing a basis of mutual agreement.

EXPECTATION OF LIFE IN THE UNITED STATES, 1910-1920, (Original registration States.)

| Year. | At Age 0. | At Age 32. | At Age 62. | XEAR.' | At Age 0. | At Age 32. | At Age 62. |

The above table shows that the avcrage span of life has iengthened 3.75 years for white males since 1910, with gains also, for white temaics and for Negroes of both sexes,

## WHO IS THE RICHEST MAN?

(From the Wall Street Journal, Scpt. 20, 1922.)

Henry Ford has in the Ford Motor Co. the largest income and, if capitalized, the largest fortune in the world.

Profits, before taxes for 1922 , will exceed $\$ 125$.000,000 . After taxes they will be $\$ 110,000,000$, about $\$ 100$ a car. With these earnings the Ford Motor Co. could be capitalized at $\$ 2,000,000,000$ and pay 5 per cent. on that capital.

Ford condemns bankers, but with $\$ 180,000,000$ cash he himself is the largest individual banker in this country, if not in the world. Michigan sugar beet growers and automobile manufacturers have little need for such a stupendous sum and only a few mlllions are banked in Detroit. Wall Street-the financial centre of the country-absorbs the other millions, and Ford accumulated .profits cxpand and multiply with Wall Street assistance.
In his newsipaper interviews Ford says that Wall Street and the gold standard have outlived their usefulness, but his millions flow through to Wall Street at 4 per cent. to bring his company a possible $\$ 7,200$,000 gold standard money annually in interest. This is more than $\$ 6$ profit for evcry car he produces.

Even a Republican Congress unites to add to the Ford wealth. The company paid more than $\$ 50$,000,000 in Federal taxes in 1921. Because of the abolitlon of the excess profits levy, it will pay only $\$ 16,000,000$ in 1922. The Fords are $\$ 34,000,000$ richer, though if they were to draw the rlches out they would pay more than 50 per cent. additional in personal income taxes.
So Ford continues to pile up in his business the millions which find their way into Wall Street. His replacement parts busincss is so proiltable that he could chop off his manufacturing profit of probably $\$ 80$ a car and make more than $\$ 15,000,000$ annually, or \$14 on each car produced from the sale of parts necessary to keep the millions of Fords now on the roads in running condition.

He could distribute this $\$ 14$ as a bonus to his workmen and still make the $\$ 6$ a car profit from interest.

But he is not selling at cost. He is holding on to profits from interest, parts and cars: $\$ 58,000,000$ in the record ten months ended last February, despite the heavy taxes; $\$ 110,000,000$ in all probability after taxes in 1922.

## CHIEF POLITICAL ASSASSINATIONS SINCE 1865.

Abraham Lincoln, President of the United States, April 14, 1865; died April 15, 1865.
Michael, Prince of Serbia. June 10, 1868.
Prim, Marshal of Spain, December 28, 1870.
Richard, Earl of Mayo, Governor-General of India, February 8, 1872.
Abdul Aziz, Sultan of Turkey, June 4, 1876.
Alexander II. of Russia, March 13, 1881.
James A. Garfield, President of the United States, July 2, 1881; died September 19, 1881; Guiteau, hanged, Junc 30, 1882.
Carter H, Harrison, Sr., Mayor of Chicago, October 28, 1893.
Marie Francois Sadi-Carnot, President of France, June 24, 1894

Ex-Governor Jrank Steunenberg, Idaho, December 30,1905.
Sergius, Grand Duke of Russia, Fcbruary 17, 1905.
Gen. Count Alexis Ignatieff, Russia, August 26, 1906.
Gen. Pavlov, St. Petersburg, January 9, 1907.
Premler Mirza Ali Hzam, Persia, August 31, 1907.
Carlos, King of Portugal, Februar'y 1, 1908.
Louis Philippc, Crown Prlnce of Portugal, February 1, 1908
Prince I'to, of Japan, Octobel 26, 1909.
Premier Pasha Ghali, Egypt, February 21, 1910.
Peter Arcadowitch Stolypin, Premier of Russia September 14, 1911.
Ramon Caceres, President of the Dominican Republic, November 19, 1911.
José Canalejas, Prime Minister of Spain, November 12, 1912.
Nazim Pasha, Turkish Minister of War, January 23, 1913.
Manuel E. Arujo, Premier of Salvador, February 4, 1913.
I'rancisco I. Madero, President of Mcxico, February $23,1913$.
Josć Pino Suarez, Vice-President of Mexico, February 23, 1913 .
Gcorge, King of Greecc, March 18, 1913.
Archduke Francis Ferdinand of Austria-Hungary and his wife, Countess Sophie Chotek, Duchess of Hohenberg, June 28, 1914.

1914
Guillaume Sam, Presldent of Hayti, July $28,1915$.
Gencral Chen Chi-Nei, of Chinese revolutlonary party, May 19, 1916.
General Count von Mirbach. German Ambassador to Russia, at Moscow, July 5, 1918.
Czar of Russia and family, July, 1918.
German Field Marshal von Eichhorn, in the Ukraine, July 31, 1918.
Count Karl Sturgkh, Austrian Premier, at Vienna, October 21, 1918.
Count Stephen Tisza, ex-Pres. Hung. Privy Council, at Budapest, November, 1918.
Sidonio Paés, Presldent of Portugal, December 14, 1918.

Habibullah Khan, Ameer of Afghanistan, at Laghman, February 20, 1919.
"Red Czar," Yankel Sverdlov, at Moscow, early in 1919.
Kurt Eisner, Bavarian Premier, at Munich, Fcbruary 21, 1919.
War Minister Neuring, at Dresden, Saxony, April 12, 1919.
Hugo Haase, Pres. Ger. Soc. Party, at Berlin, October, 8, 1919.
Gen. Venustiano Carranza, President of Mexico, at Tlaxcaltenango, May 20, 1920.
Essad Pasha, Albanian leader, at Paris, June 13, 1920.
Droubi Pasha, Syrian Premier, near Haifa, August $20,1920$.
Inspector O'Sullivan, of British Army, at Dublin Castle, December 17, 1920.
Dr. Z. Joncs, Governor of San Juan Province, Argentlna; Buenos Aires, November 20, 1921.
Senor Dato, Premier of Spain; at Madrid, March 8, 1921.
Talaat Pasha, Ex Grand Vizicr of Turkey; at Berlin, March 15, 1921.
M. Dras Kovics, Jugo-Slav Minister of Interior, at Delniee, Croatia, July 21. 1921.
Mathias Erzberger, Ex-German Vice Chancellor. by two youths, near Offenburg, Baden, August 26. 1921.

Portuguese Premler, Antonio Granjo, Ex-Pres. Machado dos Santos, and two other hlgh officials. Lisbon, October 19, 1921.
Ta Kashi Hara, Japancse Premier, at Tolkio, by Korean youth, November 4, 1921.
Bulgarian Minister of War, M. Demitroff, at Kostendil, October 22, 1921.
Heikki Ritavowi, Finnish Minister of the Interior, at Helsingfors, by a merchant, Feb. 14, 1922.
Jemal Azmyk Bey, Ex-Gov. of Trebizond, and B. E. Chakir, of the Turlkish Committee of Union and Progress, by an Armenian, at Berlin, April 7, 1922.

——Dirigible baiioon, Roma, exploded descending at Hampton, Va.; 34 died of injuries; Feb 21.

## HIGHEST LATITUDES REACHED IN POLAR EXPLORATIONS.

(Prepared by the National Geographic Society, Washington, D. C., Giibert Grosvenor, President.)
The following is a record of the highest iatitudes attained in Aretic and Antaretic exploration during the past three hundred years in the Eastern and Western Hemispheres, both by land and by sea: * Represents new records.

ARCTIC EXPLORATION-WESTERN HEMISPHERE.

| Commander. | Date. | No. Lat. | Locality. |
| :---: | :---: | :---: | :---: |
| *John Davis | 1588 | $72^{\circ} 12^{\prime}$ | Sanderson's Hope, in West Greenland Waterways. |
| Wiiliam Baffin | 1616 | $77^{\circ} 45^{\prime}$ | Ellesmere I_and. |
| Wiliam Morton, Elisha Kent Kane Exp | 1854 | $82^{\circ} 27^{\prime}$ | Cape Constitution. |
| Slr Edward Augustus Inglefieid | 1859 | $78^{7} 8^{\circ} 28^{\prime}$ | Smich Sound. |
| Dr. Isaae I. Hayes ${ }_{\text {Capt }}$ Charles Frederick Hal | 1861 | $8^{81} 1^{\circ} 35^{\prime}{ }^{\prime}$ | Cape Licber, Grinnell Land. |
| Capt. Charles Frederick Hall . H. Markham, Nares Expedition. . . . . . . . . . . . . . . . . . . . . . . . . . | 1871 | 82 $8^{82^{\circ}} 2^{\prime} 2^{\prime}$ | Near Thank God Harbor. Northeast Grinnell Land. |
| *James B. Loekwood and Gen. David $\mathfrak{L}$. Brainard, Gen. <br> A. W. Greely Expedition. | 1875 | ${ }^{83^{\circ}} 20^{\prime}$. | Northeast Grinnell Lan |
| *Robert E. Peary. . . . . . . . | 1892 | $83^{\circ} 27^{\prime}$ | Greeniand Coast. |
| Robert E. Peary | 1902 | $84^{\circ} 17^{\prime}$ | Grinneli Land. |
| *Robert E. Peary. . . . . . . . . . . . . . . . . . . . . . . . . . (Apr. 21 ) | 1906 | $87^{\circ} 6^{\prime}$ | North of Greenland. |
| *Robert E. Peary. . . . . . . . . . . . . . . . . . . . . . . (Apr. 6) | 1909 | $90^{\circ}$ | The North Pole. |

ARCTIC EXPLORATION-EASTERN HEMISPHERE.

## ANTARCTIC EXPLORATION

Captain Cagni, on his journey in 1899 , reached $86^{\circ} 34^{\prime} \mathrm{N} ., 64^{\circ}$ E.-at that time the mast northerly point attained by man-within 206 miles of the North Pole. Sir Ernest Shackieton in 1908 personally led the party whicil pushed to latitude $88^{\circ} 20^{\prime} \mathrm{S} .162^{\circ} \mathrm{E}$. longitude, surpassing his predecessors by 366 geographicai miles and reaching within 97 miles of the South Pole.
the time and place from which Admiral Wilkes first saw the Antarctic Continent.
Note by the Editor.-Dr. Fredcrick A. Cook claims to have dlscovered the North Poie on April 21, 1908.

## PRINCIPAL RIVERS OFITHE U. S

Total number of navlgable streams ln Unlted States, 295 , tributary as follows, the total navlgable length $\ln$ mlles belng in parentheses-A tlantic, 148 $(5,365)$ : Gulf, not including the Misslssippl, . 5.3 (5,212) ; Mlssissippi and branches, $54(13,912)$; Canada, 2 (315): Pacific, 38 (1,606). Total navigable length, 26,410 miles.

The Hudson was. one of the earllest rivers of the country to be lmproved by the Government. Work began even before 1822 by the State of New York at which tlme the Erle Canal was opened, and ln 1823 the Erle and Champlain both emptied into the pool created by the State dam at Troy, fnlshed about that year. Work by the United States began in 1834.

HEIGHT OF YOSEMITE WATERFALLS ABOVE SEA LEVEL.
The height in feet above sea.level of the waterfalis in Yosemite Vailey is as follows-Upper Yosemite, 6,525; Lower Yosemite, 4,420; Nevada, 5,907; Vernai, 5,044; IHliouette, 5,816; Brldaiveli, 4,787; Ribbon, 7.008: Widows Tears, 6.466.

## THE PANAMA CANAL.

(Opened for Navigation August 15, 1914. Gov., Col. Jay J. Moriow, U. S. Army. Balboa Heights.)

The Panama Canal was built between latitudes 8 and 9 N. across the Isthmus of Panama at its narrowest part but one. The sadale through which it crosses the continental divide was originally about 335 feet above sea level. Gold Hlll, the highest point immediately alongside the channel of the Caual, rises 540 feet above sea level. The Canal has a length of 43.8 nautical mlles from deep water in the Atlantic to deep water in the Pacific. The Canal extends at sea level from its starting point in Limon Bay to Gatun, 5.77 miles. At Gatun the sea level section ends in a flight of three pairs of locks, forming the steps to Gatun Lake, with its normal elevation 85 feet above the sea.

Gatun Lake was formed by damming the Chagres Valley, and excess water, wasted through the spillway, finds its way to sea through the old course of the Lowcr Chagres. The Canal proceeds up the valley of the Chagres 20.55 miles to Gamboa, and in this sectlon relatively little: excavation was required. At Gamboa begins the real drive through the divide, the famous Culebra Cut. It is 6.97 nautical miles long, 300 feet wide at bottom, and extends to Pedro Miguel lock and dam, on the Pacific slope of the divide. Here one lock lowers the ship to Miraflores Lake, a small body about a mile long,
with its surface 55 fect above the sea. At the south end of this lake are Miraflores locks, which, in two steps, lower the ship to the Pacific. A sea level channel 7 miles long carried past Balboa and out into the Paclific

The minimum depth of the channel is 41 feet, and in parts of Gatun Lake it is about 80 feet deep The lock chambers have a clear width of 110 feet and length of 1,000 feet, givlng ample handling room for the largest ships yet built. Gatun dam, by which Gatun Lake was formed, is a big, gently sloping mound, built by pumping sand and clay into the space between two ridges of rock and earth. It is $11 / 2$ miles long and $1 / 2$ mile wide at lts base. Its crest is 105 feet above sea level and the width of the dam at the top is 100 feet.

The Panama Rallroad extends between Colon and Panama on the eastern side of the Canal.

The Canal Zone is the strip of land extending flve miles on either side of the axis of the Canal, but not including the cities of Panama and Colon, which remain wlthin the Republic of Panama. It has an area of $4411 / 2$-square miles, including land and water. It was granted to the United States by the treaty made with Panama, February 26,1904 . The United States pald $\$ 10,000,000$ for the Zone, and makes an annual payment in addition of $\$ 250,000$.

COMMERCIAL TRAFFIC, PANAMA CANAL.

Canal was closed to traffic from September 18,1915 , to April 15, 1916. Canal was opened to commercial traffic August 15, 1914.

ORIGIN AND DESTINATION OF CARGO.

The tonnage of cargo passing through the Panama Canal during the fiscal year $1922(10,884,910)$ was equivalent to 93.8 per cent. of the tonnage of the prevlous year $(11,599,172)$.

The greatest shrinkage was in the trade with the west coast of South America. Exports. from the Atlantic and Gulf ports of the United States to that region fell from 933,261 to 244,514 tons. European exports to South Amerlca declined only from 297,166 to 283,804 tons. Exports from South Amerlca through the Canal to the Unlted States were 548,609 tons, as compared with 975,597 in 1921 , ana to Europe 663,127, as compared with 922,499 .' ComDining imports and exports and Europe and the

United States, this South American trade was less by $1: 388,469$ tons, and to this may be added a alfference of 398,097 tons in crude oll shipments from Mexico to South Amerlca, or a total of,1,786,566

The traje with Australasla has also fallen off. Exports. from the United States to Australasla declined from 620,428 to 288.090 , and exports from Europe from 391,848 to 359,895 . Imports from Australasia to the Unlted States fell from 147,877 to 45,957 , and to Europe from 579,745 to 381,538 . The total loss of cargo ln the Australaslan trace amounted to 664,418 .

Exports from the United States to the Far East increased from 1,213,906 to $1,728,172$ tons. "Imports from the Far East fell from 428.044 to 303.315.

Welland Ship Canal is under construetion, and is not yet open for traffle.
The Queenstown-Chippawa Power Canal of the Ontarlo Hydroeleetrie Commisslon, total cost about $\$ 80,000,000$ (of which $\$ 15,000,000$ is yet to be spent), was opened Dee. 23, 1921, at Niagara Falls, Ont. Construetion was begun in 1917. About 275,000 horse-power ls generated, which ls to be increased uitlmately to 550,000 . The canal is $123 / 4$ miles long.

SOME FOREIGN CANALS.

SUEZ CANAL STEAM VESSEL TRAFFIC:

Other than stearm vessels using Suez Canal in 1921 numbered 3,257, of 155.820 net (metric) tons." The total receipts in 1921 were $149,251,000$ francs. Southbound eargoes were ehietly metals and maehlnery, coal, railroad material, petroleum, salt; textiles and ecment.. Northbound cargoes were ehiefly wheat, benzlne and mazout, rich manganese, eopra, sugar, oilseed, gunnies, wool, and jute. of the 1921 net tonnage, 11,397,019 was British; 2,031,625, Dutch, 1,042,266, Japanese; 967,746, French; 934,146, Italian; 696,226, Scandlnavian: 671,840, American: and 170.520. German.

## CATSKILL AND CROTON AQUEDUCTS.

Particulars of the Catskill and Croton Aqueducts, $\mid$ are contained in the articie on the water supply oi which supply the City of New York with water, that municipallty, elsewhere in the Almanac.

## FAST OCEAN AND AIR PASSACES.

Sailtng Shtps-Columbus, in 1492, sailed from Spain (Palos) to the Guif of Mexico in thirty-seven days.

The American-built clipper, the Iightning, of the Biack Bail (British) Australian Line, on March 1, 1854, sailed 436 nautical milies, on way from Boston to Liverpool, on her malden voyage. A gale was biowing and the shlp's iog showed a speed as high as $181 / 2$ miles an hour. The same vessei, on March 19. 1857, salied 430 nautical miles, on way from Liverpool to Melbourne, Australia. The clipper Donald McKay, Black Ball Line, on Feb. 27, 1855 , salled 421 nautical miles on maiden voyage from Boston to Liverpool.

The fastest day's record on a salling ship on any sea- 437 miles-was made by the Soverelgn of the Seas, on a passage from New York to San Francisco. The Flying Cloud made $4331 / 2$ miles in one day, New York to San Francisco.

The quickest passage of a clipper ship across the Atiantie was made it is asserted in maritime circles, by the Dreadnaught, which cleared from New York on June 15, 1859, and arrived off Cape Clear, Ireland, on June 27-12 days. The clipper Red Jacket, built at Rockland, Me., salied from Sandy Hook, N. Y., to Llverpool in 13 days 1 hour 25 minutes. The Dreadnaught once went from New York to Llverpooi In 13 days 8 hours. She was bullt in 1853 at Ncwburyport, Mass. Sine was 217 feet long, 40 feet wide, 26 feet deen, 1,443 gross tons. She was lost. Juiy 4 , 1869, on Cape Penas, northeast of Tcrra del Fucgo, South America, on the way from Llverpooi to San Francisco
The sailing ship Northern Light went from San Franclsco to Boston, vla Cape Horn, in 76 days and 8 hours. The Andrew Jackson salied from New York to San Franciseo in 80 days and 4 hours. The Dreadnaught went from Honolulu to New Bedford, Mass., 13.470 miles, in 82 days. The Sovcrelgn of the Seas sailed from Honolulu to New York in 88 days. The Natchez sailed from Canton, China, to New York in 76 days. The Trade Wlnd, In 1853, sailed from San Franclsco to New York in 75 days. The Llghtning, in 1854, salled from Australia to Liverpool in 64 days. The bark Dawn of New York sailed from Buenos Ayres to New York in 36 days. The Nabob, of Boston, went trom Ncw York to Rangoon (3urmah), India, In 75 days. The Flying Dutchman in 1852-3 madc a round trip, New York to San Francisco and return ( 27,220 milles), in 201 days. On the way home she sailed from San Francisco to Cape Horn In 35 days.

The cllpper ships often beat the time of the steamshlps between New York and Ireland.

Steamshtps-The first stcamship to cross the Atlantle was the Savannah, 350 tons, built at New York City, which left Savannah, Ga., on May 24, 1819, and reached Liverpool in 26 days, during clghteen of which shc used her sldc-paddles. The Great Western, on her malden voyage, from Bristol,

Engiand, to New York, covered the distance, in April, 1838, in 15 days. The Sirlus, in April, 1838. went from Engiand to New York in $181 / 2$ days. The Britannia, first Cunard ilner, in July, 1840, came from Liverpool to New York in 14 days 8 hours The Great Western's best record across the ocean was 10 days 10 hours 15 minutes. In May, 1851 , the Pacifie reduced the Atlantlc record to 9 days 19 hours 25 mlnutes. The Persia, in 1856, did it in 9 days 1 hour 45 minutes; the Scotia, in 1866 in 8 days 2 hours 48 minutes; the Clty of Brussels, in 1869, in 7 days 22 hours 3 minutes: the Baitic. in 1873, in 7 days 20 hours 9 minutes; the City of Beriin, in 1875, in 7 days 15 hours 48 minutes; the Arizona, in 1880 , in 7 days 7 hours 23 minutes; the Aiaska, in 1882, in 6 days 18 hours 37 minutes; the Etruria, in 1888, in 6 days 1 hour 55 minutes; the Majestic, in 1891, in 5 days 18 hours 8 minutes the Lucania, in 1894, in 5 days 7 hours 23 minutes; the Lusitanla, in 1908, in 4 days 15 hours; the the Lusitana, in 1908 , in 4 days 15 hours; the The foregoing records, since and inciuding 1856, are between New York and Queenstown.

The best run from New York to Havre was made by the France, of the French Line, in 5 days 17 hours.

The qulckest run from New York to San Francisco, vla Straits of Magellan, was made by the Santa Cruz, an oil burner, in 1914, in 47 days 5 hours.
The day's-run record- 676 knots-was made by the Mauretanla, in January, 1911.
The U. S. destroyer Cole made 43.75 milies an hour on her trial sea trlp. The motor boat Miss Amerlca, in 1920, on Lake George, N. Y., went at the rate of 77.85 mlles an hour; the motor boat Mapie Leat VII. (August, 1921) made 80 miles an hour on the Solent, England.

ACROSS THE ATLANTIC BY AIR.
The U. S. navai seapiane NC-4 (Read), in 1919 (May 16-27), flew from Trepassy, British North Amcrica, via the Azorcs, to Lisbon, Portugal, 2,150 miles, in 26 hours 45 minutes, actual flying time. A Brittsh blplane (Alcock-Brown), in 1919 (June 14-15), flew from. St. John's, N. F., to Clifden, Ireland, 1,960 miles. in 16 hours 12 minutes.
The British diriglble balloon R-34 (Scott), in 1919 (July), flcw from East Fortunc. Scotland, to M1neoia, N. Y., 3,130 miles, in 108 hours 12 minutes, and returned from Mlneoia to Pulham, England, 3,200 miles, in 74 hours 56 minutcs.
A hydroplane ficw in 1922 from Portugal to Brazil.
FASTEST TRIPS AROUND THE WORLD.
1889 by Nelle Bly, 72 days 6 hours 11 minutes; 1903, by Henry Frederick, 54 days 7 hours 20 minutes; 1911, by Andre Jaeger-Schmldt, 39 days 42 minutes 38 scconds; 1913 , by John H. Mears, 35 days 21 hours, 36 minutes.

## DISTANCES FROM NEW YORK, NEW ORLEANS, SAN FRANCISCO AND PORT TOWNSEND TO PRINCIPAL PORTS. AND CITIES.

(Water routes in nautical miles: land routes in statute miles. Seattle is 38 miles from Port Townsend.)

## RAILROAD TRAIN SPEED.

THE modern locomotive can run 112 miles an hour on a heavy-rail, straight track, provided it is ballasted by a train behind it to keep it from jumping off. On account of curves and switches, the
big coal consumption at high speed, and the frictional wear on the equipment 60 miles an hour is not often exceeded.

NOTABLE FAST RUNS OF PASSENGER TRAINS FOR LONG DISTANCES.

The fastest time on record for a distance of over 440 miies was made by the Lake Shore \& Michigan Southern R.R. from Buffalo to Chicago, in June, 1905, noted above. The fastest long distance run less than 440 miles was on'the New York Central R. R., September 11, 1895, from New York to Buffalo, $4361 / 2$ miles, in 407 minutes actual time. Average spced, $641 / 3$ miles an hour, with two stops and 28 slow-ups, and on January 1, 1903, from Albany to Buffalo, 302 miles, in 295 minites.

On August 15, 1898, on P. \& R. and C. R. R. of N. J., "Royal Blue Line," between Elizabeth, N. J. and Jcnkintown, a distance of 69 miles, in 61 minutes, including 2 siow-ups, some of the miles being traversed in 38 scconds.

On October 7, 1913, a special train on the Baltimore \& Ohio, occupied by a party of baseball writers en routc to report the World's Serles, ran from

Pittsburgh to Cumberland, Md., 147 , miles, in 3 hours and 37 minutes, without stops, and from Cumberland to Baltimore, 190 miles, Without' stops, in 3 hours and 55 minutes, an average of 48.7 miles per hour. Both of these runs were made without taking water.

The Jarrett and Palmer special theatrical train, Jersey City to Oakiand (San Francisco), 3,311 miles, June, 1876, 83 hours, 45 minutes;. average speed, 39.53 miles per hour.

In May, 1906, the "Harriman Special" made the run from Oakland, Cal., to New York City in 71 hours, 27 minutes

A speclal train of an engine and two cars, which was run in January, 19.11, to carry J. P. Morgan from Washington to New York over the Pennsyivania Railroad, made the trip of 226.8 miles in 3 hours, 55 minutes and 30 seconds, or at the rate of 57.8 miles an hour.

## IMPORTANT TUNNELS OF THE WORLD.

Alberg-Under the Alps at the Arl Mountains, and extends from Langen to St. Anton, $63 / 4$ miles: opened 1884.
Andes Mountains-See "Trans-Andine."
Big Bend-Drains the Feather River in California, 2 miles; opened 1886
Bitter Root Mountains (Montana and Idaho)10,100 feet long.
Blackwell-Under River Thames, England, 11/2 miles; opened 1897.
Busk-Ivanhoe Tunnel on the Colorado Midland R. R., 9,600 feet long, single traek, under the Continental Divide, in Lake and Pitkin Countles.
Cascade Mountain-Through the Cascade Mountains in Washington, 3 miles.
Catskill Aqueduet- 92 miles to N . Y. City, and 35 mlles of distributing tunnels deep down under the city itself; partly opened in 1915, completely in 1917.

Connaught-Tnrough Selkirk Mountains, under Rogers Pass, Canada; on Canadidn Paelfic Railway, double track, about five miles long; completed 1916.
Continental Divide, for the Denver and Salt Lake R. R., 6.4 miles long (under survey)

Croton Aqueduct- $331 / 8$ miles to N. Y. City; opened 1888.

Cumberland-Under Cumberiand . Mountains, Tennessee, 8.000 feet long.
Detroit (Mich. Central Ry.).-Under Detroit River.
Gunnison-Southwestern Colorado, 6 miles; opened 1909.

Hoosac-Through Hoosac Mountains, Mass., $43 / 4$ miles; opened 1873.
Khojak Pass-Indla, Quetta to Kandahar, 2 miles Loetsehberg-Through the Alps, in Oberland, Switzerland, $91 / 4$ miles; opened June 20, 1913, costing nearly $\$ 10,000,000$.
Mont Cenis-Italy to France, under the Col de Frejus, 8 miles; opened 1871
Mont dor-Between France and Switzerland,
was bored through October 2, 1913. The tunnel
pierces the Jura Mountains from Fresne to Vallorbe, and is $33 / 4$ miles long.
Mt. Roberts-From the shore of Gastineau Channel at Juneau, Alaska, Into Sllver Bow Basin, 1 1-3 miles.
Otira-In New Zealand, $5 \quad 1-3$ miles
Rove-Northwest from l'Estaque, France, part of eanal connecting Marseilles with Rlione River; $41 / 2$ miles, 72 feet wide, 47 feet hign; opened 1916 . Rothsehönberg-Drains the Felberg mines, Saxony, $311 / 2$ miles; opened 1877
St. Clair-Under St. Clair River from Sarnia, Ont., to Port Huron, Mlch., 2 miles; opened 1891.
St. Gothard-Through the Alps, connects Goselenen with Airolo, in Switzerland, 9 1-3 mlles; opened 1881.

Severn-From Monmouthsnire to Gloucestershire England, 41/2 miles; opened 1886
Simplon-Through the Alps, $121 / 2$ miles; opened - 1905.

Spiral-The tunnels on the Canadian Pacific Railway, between Hector and Fields, B. C.. consists of two spiral tubes, the westerly, 3,255 feet long, under Cathedral Mountain; and the easterly, 2,921 feet long, under Mt. Ogden, with the Kleklng Horse River between. This line was built to reduee grades through the Kicking Horse Pass, and cut the gradient on the line from $4.5 \%$ to $2.2 \%$ and cost approximately $\$ 1,500,000$.
Strawberry-Through tne Wasatch Mountains.
Sutro-Drains the Comstock Lode in Nevada, $41 / 2$ miles; opened 1879.
Totley-England, $33 / 4$ miles.
Trans-Andine Ry. Tunnel-5 miles long, 10,486 feet above sea level and affords direet communication between Valparaiso and Buenos Ayres; opened April 5, 1910.
Wasserfluh-In the Alps; between Bunnadern and Lichtenstcig, Switz., 2 miles, opened 1909.
Woodhead-Liverpool to Birkenhead, Eng., under the River Mersey, 3 milies.

## Cdefights any fecasures.

## U. S. WEIGHTS AND MEASURES.

Apothecaries' Weight: 20 grains $=1$ scruple; 3 quart; 4 quarts = 1 galion; $311 / 2$ gallons $=1$ barrel; scrupies $=1$ dram; 8 drams $=1$ ounce; 12 ounces $=$ 1 pound.

Avoirdupois. Weight (short ton): 27 11-32 grains $=1$ dram; 16 drams $=1$ ounce; 16 ounces $=$ 1 pound; 25 pounds $=1$ quarter; 4 quarters $=1 \mathrm{cwt}$.; $20 \mathrm{cwt}=$.1 ton.

Avoirdupois Weight (iong ton): 27 11-32 grains = 1 dram; 16 drams $=1$ ounce; 16 ounces $=1$ pound; 112 pounds $=1 \mathrm{cwt}$.; 20 cwt . $=1$ ton.

Troy Weight: 24 grains=1 pennyweight; 20 pennyweights $=1$ ounce; 12 ounces $=1$ pound.

Circular Measure: 60 seconds =1 minute; 60 minutes $=1$ degree; 30 degrees $=1$ sign; 12 signs $=$ 1 circle or clrcumference.

Cubic Measure: 1,728 cubic inches $=1$ cubic foot; 27 cubic feet $=1$ cubic yard.

Dry Measure: 2 pints = 1 quart; 8 quarts $=1$ peck; 4 pecks $=1$ bushel.
Liquid Measure: 4 gilis=1 pint: 2 pints $=1$

2 barreis = 1 hogshead
Long Measure: 12 inches $=1$ foot; 3 feet $=1$ yard: $51 / 2$ yards $=1$ rod or pole; 40 rods $=1$ furlong; 8 furiongs $=1$ statute mile ( 1,760 yards or 5,280 feet); 3 miles = 1 league.
Mariners' Measure: 6 feet $=1$ fathom; 120 fathoms $=1$ cable length; $7 \frac{1}{2}$ cabie lengths $=1$ mile; 5,280 feet $=1$ statute mile; 6,085 feet $=1$ nautical mile.

Paper Measure: 24 sheets $=1$ quire; 20 quires $=$ 1 ream ( 480 sheets); 2 reams = 1 bundle; 5 bundles = 1 bale.
Square Measure: 144 square inches $=1$ square foot; 9 square feet $=1$ square yard; $30^{1 / 4}$ square yards $=1$ square rod or perch; 40 square rods $=1$ rood: 4 roods $=1$ acre; 640 acres $=1$ square mle: 36 square miles ( 6 miles square) $=1$ township.
Time Measure: 60 seconds $=1$ minute; 60 minutes $=1$ hour; 24 hours = 1 day; 7 days = 1 week; 365 days $=1$ year: 366 days $=1$ leap year.

## VALUE AND WEICHT OF GOLD.

(By the United States Assay Office, New York.)

THE unit in weighing goid is the troy ounce. A "fine" ounce means an ounce of pure goid. The mint value of goid does not fluctuate but remains constant at $\$ 20.67183462$ per fine ounce. Troy measure is used in weighing gold. The grain is the same in both troy and avoirdupois measure but the ounce and the pound are not the same.

The troy ounce contains 480 grains and the troy pound 5,760 grains, there being 12 ounces to the pound. The troy pound is never used in weighlng gold, even when the weights of large quantities are to be computed. The avoirdupois ounce contalns $4371 / 2$ gralns and the avoirdupols pound contains 7,000 grains, there being 16 ounces to the pound.

## FOREICN COINS VALUED IN UNITED STATES MONEY.

(Proclaimed by the Secretary of the Treasury as of Juiy 1, 1922.)

Argentine Republic, G., Peso (\$0.9648). Currency: Paper, normally convertible at 44 per cent. of face value; now inconvertible.

Austria, G., Krone (\$0.2026).
Beigium, $\underset{G}{ }$. and S., Franc ( $\$ 0.1930$ ). Member Latin Union; goid is actual standard.

Bolivia, G., Boliviana (\$0.3893). $121 / 2$ bolivianos cquai 1 pound steriing.

Brazil, G., Miireis (\$0.5462). Currency: Government paper normaify convcrtible at 16 pence (- $\$ 0.3244$ ) per mllreis.
British Colonies in Australasia and Africa, G., Pound sterling ( $\$ 4.8665$ ).

British Honduras, G., Doliar ( $\$ 1.0000$ )
Bulgaria, G., Lev (\$0.1930).
Canada, G., Doliar (\$1.0000)
Chili, G.: Peso ( $\$ 0.3650$ ). Currency: Inconvertible paper.

China, S., Taei, Haikwan (customs) (\$0.8463). The tael is a unit of weight, not a coin. The customs unit is the Haikwan tael. The vaiues of other taeis are based on their relation to the vaiue of the Haikwan tael. The Yuan silver doliar of 100 cents is the monetary unit of the Chinese Republic; it is equivaient to $.644+$ of the Haikwan tael. Doliar, Yuan ( $\$ 0.5390$ ). Mexican silver pesos issued under Mexican decree of Nov. 13, 1918, are of sllver content approximately $41 \%$ fess than the doliar here quoted; and those issued under decree of Oct. 27 1919 , contain about $51 \%$ less silver

Coiombia, G., Peso ( $\$ 0.9733$ ). Currency: Government paper and gold.

Costa Rica, G., Colon (\$0.4653).
Cuba, G., Peso ( $\$ 1.0000$ )
Denmark, G., Krone (\$0.2680).
Ecuador, G. Sucre (\$0.4867).
Fgypt, $\dot{\text { G. }}$, Pound' ( 100 piasters) (\$4.9431). The actual standard is the British pound stering, which is legal tender for $971 / 2$ plasters.

Finiand, G.; Markka (\$0.1930)
France, G. and S., Franc (\$0.1930). Member Latln Union: goid is actual standard.

Gcrmany, G., Mark (\$0.2382).
Great ${ }^{\text {Britain, G., Pound stcriing (\$4.8665) }}$
Greece, G. and S., Drachma ( 30.1930 ). Member Latin. Union: goid is actual standard.

Guatemaia, S., Peso ( $\$ 0.5074$ ). Currency: Inconvcrtible paper.

Hayti, G., Gourde ( $\$ 0.2000$ ). Currency: Inconvertible paper

Honduras, S., Peso: (\$0.507.4). Currency, bank notes.
India (British), G., Mohurand Sovereign (\$4.8665); S. Rupee ( $\$ 0.2411$ ). The British sovereign and haif sovereign are legal tender in India at 10 rupees per sovereign.

Indo-China, S., Piaster (\$0.5480)
Italy, G., Lira (\$0.1930). Member Latin Union; gold is actuai standard

Japan, G., Yen (\$0.4985).
Liberia, G., Dollar (\$1.0000). Currency: Depreclated silver token coins. Customs duties are eoliected in goid.

Mexico, Gr, Peso $1 \$ 0.4985$ )
Netheriands, G., Guifder (florin), ( $\$ 0.4020$ ).
Newfoundland, G., Doliar ( $\$ 1.0000$ ).
Nicaragua, G., Cordoba (\$1.0000).
Norway, G., Krone ( $\$ 0.2680$ ).
Panama, G., Balboa ( $\$ 1.0000$ ).
Paraguay, G., Peso (Argentine), (\$0.9648). Currency: Depreclated Paraguayan paper currency.

Persia, S., Kran (\$0.0934). Currency: Silver circuiating above its metallio value. Gold coin is a commodity oniy, normally worth doubie the silver.

Peru, G., Libra (\$4.8665).
Phiiipplne Islands, G., Peso (\$0.5000)
Portugal, G., Escudo (\$1.0805). Currency: Inconvertible paper

Roumania, G. Leu (\$0.1930).
Russia, G., Ruble (\$0.5146).
Salvador, G., Coion ( $\$ 0.5000$ )
Santo Domingo, G., Dollar (\$1.0000)
Serbia, G., Dinar (\$0.1930).
Siam, G., Ticai (\$0.3709).
Spain, G. and S., Peseta (\$0.1930). Vaiuation is for goid peseta; currency is notes of the Bank of Spain.

Straits Settlements, G., Dollar (\$0.5678).
Sweden. $\mathrm{G}_{\mathrm{i}}$, Krona ( $\$ 0.2680$ ).
Switzeriand, G., Franc (\$0.1930). Member Latin Union: goid is actuai, standard

Turkey G., Piaster (\$0.0440). (100 piasters equal to the Turkish ${ }^{£}$ Uruguay, G., Peso (\$1.0342). Currency: Inconvcrtlbie paper

Venezueia, G., Boiivar (\$0.1930).

G, means gold standard country; $S$, siiver. Value in $U$. S. moncy is stated in parentheses.

## FOREIGN MONEY UNITS OF VALUE.

English Money: 4 farthings- 1 penny ( $d$ ); 12 pence -1 shiliing ( $s$ ); 20 shillings- 1 pound (£); 21 shillings-one guinea; 5 shillings-one crown. French Money: 100 centimes- franc. German Money: 100 pfennig-1 mark. Russian Money: 100 copecks-1 rubie. Austro-Hungarian Money: 100 heller-1 krone (crown).

EXAMPLE: To find the number of days from April 10 to October 10 (including one of the given days): By the calendar April 10 .to October 10 gives 183 days, the number required.

## ANCIENT CREEK AND ROMAN WEIGHTS AND MEASURES.

WITH AMERICAN EQUIVALENTS.
werghts.
The Roman llbra or pound $=10$ oz. 18 pwt. $135-7 \mathrm{gr} .$, Troy
The Attica mina or pound $=11 \mathrm{oz} .7$ pwt. $162-7 . \mathrm{gr} .$, Troy.
The Attica talent ( 60 minae $)=56,1 \mathrm{bs} .11 \mathrm{oz} .0$ pwt. $171-7 \mathrm{gr} .$, Troy.

## DRY MEASURE.

The Roman modus $=1 \mathrm{pk} .2-9$ pint.
The Attle choenix = nearly $11 / 2$ plnts.
The Attic medimnus $=4 \mathrm{pk} .6$ 1-10 pints.

> LIQUID MEASURE.

The cotyle $=$ a little over $1 / 2$ pint.
The cyathus $=$ a little over $11 / 2$ pints.
The chus $=a$ little over $62 / 3$ plnts. LONG MEASURE.
The Roman foot $=113-5$ inches.
The Roman cublt $=1 \mathrm{ft} .52 / 3$ inches.
The Roman pace $=4 \mathrm{ft}$. 10 inches.
The Roman furlong $=604 \mathrm{ft} .10$ inches.
The Roman mile $=4,835$ lect.
The Grecian cubit $=1 \mathrm{ft} .61 / 8$ Inches.

The Grecian furlong $=504 \mathrm{ft} .41-5$ Inches.
The Grecian mile $=4,030$ feet.
MONEY.

The quadrans $=1 \quad 1-10 \mathrm{mllhs}$.
The as $=13-10$ mills.
The sestertius $=3.58+$ cents.
The sestertium $(1,000$ sestertil) $=\$ 35.80$.
The denarius $=14.35+$ cents.
The Attic obolus $=2.39+$ cents.
The drachma $=14.35+$ cents:
The mina ( 100 drachmac) $=\$ 14.35+$.
The talent ( 60 minae $)=\$ 861.00$.
The Greek stater was worth $\$ 4$; the Persian, $\$ 5.35$. Each coin was of sllver, composed of 20 drachmas, each drachma equal in value to $191 / 2$ cents, American money.

The modern drachma equals 19.3 cents. The Greek stater welghed 134.75 grains avoirdupols. The Roman aureus was worth $\$ 4.50$.

## BIBLICAL WEICHTS REDUCED TO TROY WEICHT.

ThF Gerah, one-twentleth of a Shekel, 12 grains; 10 pennyweight; the Maneh, 60 Shekels, 2 lbs. 6 oz.; the Bekah, half a Shekel, 5 pennyweight;' the Shekel, 1 the Talent, 50 Mallelis, or 3,000 Shekels, 125 lus.

## MEDICAL SICNS AND ABBREVIATIONS.

R (Lat. Recipe), take; $\pi \sqrt{\text {, }}$, of each; th, pound; 3 , ounce; $3:$ drachm; $D$, scruple; $\boldsymbol{m}$, mlnim, or drop; O or o, pint; 17 , fiuld ounce; $\mathfrak{r}_{3}$, fluid drachm; as, $\xi$ ss, half an ounce; $\xi 1$, one ounce; $\xi$ iss, one ounce and a half; $\xi .1 j$, two ounces; gr., graln; Q. S., as much as suflicient; Fit. Mist., let a mixture be made; Ft.

Inaust., let a draught be made; Ad., add to; Ad lib.: at pleasure; Aq. water; M., mix; Mac., macerate; Pulv., powder; Pil., pili; Solv., dissolve; St., let it stand; Sum., to be taken; D., dose; Dil., dllute; Flit., fleter: Lot., a wash; Garg., a gargle; IIor. Decub., at bed tline; Inject., lojection; Gtt., drops; SS, one-half; Ess., essence.

## STANDARD NEWSPAPER MEASURES.

TYPE is measured by the number of "points" in the height of the face thereof. A "point" ls approximately one-seventy-second of an inch (actuaily 01383 inch). There are 996 "points" in 35 centimeters. Nonpareil type, the slze generally used by newspapers, is a 6-polnt type, and therefore sets 12 llnes to an inch, measuring up and down the column. Twenty-four iines of nonpareil type make what is eommonly ealled a "stlck." There are usually ten "stlcks" of type in a newspaper column. The smaliest type in ordinary use is ruby, which is $31 / 2$ points in helght. Dlamond type is 4 or $41 / 2$ polnts; peari, 5 points; agate, $51 / 2$ points; nonpareil, 6 points; minion, 7 points; brevier, 8 points; bourgeois, 9 points; long prlmer, 10 points; small pica, 11
points; pica, 12 points; English, 14 noints; great primer, 18 points. The news columns in The World are almost 2 and three-slxteenths inches wide, equal to $121 / 2$ "picas" or pica M-quads. Each size of type has lts own M-quad, which is the square of the face of the capital $\mathbf{M}$ of that size of type. A quadrat, or quad, is the type without a letter on lt and is used ${ }^{\text {n }}$ spacing between words and in flling out blank lines. The quad is usualiy of four sizes-$N$-quad, M-quad, 2 M -quad, and 3 M -quad. In the old days of setting type by hand, a good printer could average 40 lines of nonpareil an hour, equal to $1,000 \mathrm{Ms}$ of that type. A good operator, setting by machlne, say on the linotype, can average 180 llnes of nonparell an hour.

ROMAN AND ARABIC NUMERALS.
 Note-A dash line over a numeral, multiplies the value by $1,000:$ thus, $\overline{\mathbf{X}}=10,000 ; \overline{\mathbf{L}}=50,000 ; \overline{\mathbf{C}}=$ 100,$000 ; \overline{\mathbf{D}}=500,000 ; \overline{\mathbf{M}}=1,000,000 ; \overline{\mathbf{C L I X}}=159,000 ; \overline{\mathrm{DLCX}}=550,140$.

Other general rules in Roman numerals are as follows: (1), repeating a letter repeats lts vaiue$\mathrm{XX}=20$; $\mathrm{CCC}=300$ : (2), a letter placed after one of greater value adds thereto- $\mathrm{VI}=6 ; . \mathrm{DC}=600$; (3), a letter piaeed before one of greater vaiue subtracts therefrom- $I V=4 ; \quad \mathrm{IX}=9 ; \quad \mathrm{XC}=90$; (4), a
letter between two of greater value glves to the three, taken together, a value equal to that caused by subtraeting the middie letter from the sum of the others-XIV=14; LIX=59

Arabic numerals are those now eommonly in use$0,1,2,3,4,5,6,7,8,9$, etc

## KNOTS AND MILES.

The U.. S. and British Statute Mile ls 5,280 feet. The British Admiralty Knot or Nautical Mile is 6,080 feet. The Statute Knot is 6,082.66 feet, and is generaily considered the standard. The number of feet in a statute knot ls arrived at thus: The circumfercnee of the earth is divided into 360
degrees, eaeh degree containing 60 knots or ( $360 \times 60$ ) 21,600 knots to the circumference. 21,600 divided into. 131,385,456-the number of teet In the earth's circumference-gives 6,082.66 feet-the length of a standard mile

A Knot $=1.151$ statute mlles; a Fathom $=6$ feet a Cable $=6.00$ feet.

THE ENCLISH OR AMERICAN MILE VS. OTHERS, IN PERCENTACE VALUES.

|  |  |  |  | శ్ర ష్ర 0 0 0 |  | $\begin{aligned} & \text { H. } \\ & \text { 受 } \\ & 3 \\ & 4 \\ & \hline \end{aligned}$ |  | $$ |  |  |  |

Tensile Strength is resistanee to separation. The flbres of wood are strongest near the centre of the trunk or llmb.

## SPECIFIC GRAVITY OF VARIOUS SUBSTANCES.

(Compared with water, which is rated at 100 .)

The weight of a cubic foot of distilled water at a temperature of 60 F.. is 1,000 ounces avoirdupois, very nearly, therefore the weight (in ounces, avoirdupois) of a cubic foot of any of the substances in the above table is found by muitiplying the specific gravities by 10 , thus:-one cubic foot of oak weighs 1,170 ounces; one cubic foot of marble 2,700 ounces, and so on

SPECIFIC GRAVITY OF GASES.

## A CORD OF WOOD OR STONE.

A cord of wood or stone contains 128 cubic feet. The standard size of a piled cord of wood is 8 feet long, by 4 feet wide, by 4 feet high.

HOW LONQ IT TAKES TREES TO GROW.

| Species | $\left\|\begin{array}{l} \text { Fence } \\ \text { Posts } \\ \text { (6-inh } \\ \text { trees) } \end{array}\right\|$ | $\left\lvert\, \begin{gathered} \text { Pulp- } \\ \text { wood, } \\ \text { Fuel } \\ \text { (8-ln. } \\ \text { trees) } \end{gathered}\right.$ | $\begin{aligned} & \text { Ties } \\ & \text { (11-in } \\ & \text { trees } \end{aligned}$ | Poles \& Piling trees | $\begin{aligned} & \text { Saw- } \\ & \text { logs } \\ & \text { (i8-in } \\ & \text { trees) } \end{aligned}$ | Specties | Fence Posts (6-in. trees) | $\begin{array}{\|l\|} \hline \text { Pulp } \\ \text { wood, } \\ \text { Fuel } \\ \text { (8-in. } \\ \text { trees) } \end{array}$ | $\begin{gathered} \text { Ties } \\ (11-\mathrm{in} \\ \text { trees } \end{gathered}$ | Poles \& Pling trees) | $\begin{aligned} & \text { Saw- } \\ & \text { logs } \\ & (18-\mathrm{in} \\ & \text { trees) } \end{aligned}$ |

Ohe northern hardwood tree of any variety, $21 \mid 23$ inches in diameter will yield a cord. It takes 35 inches in diameter 5 feet above the ground, will northern and 25 southern hardwood trees 5 inches in yield one cord of wood. A southern softwood tree diameter 5 feet above the ground, to yield one cord.

Wind reduces the veloclty of sound much more than fog or rain does. Explosions cannot be distinguished separately when but $1-16$ second apart. Sound in water travels 4,708 feet a second; in wood it goes at least 10,000 feet a second; in metais, at least 4,000 feet a second.

## SPEED OF A FALLINC BODY,

## (By Prof. George B. Pegram of Columbia.)

In the first second of its descent a body falls 16 feet: second second, $16+32=48$ feet; third second, $16+64=80$ feet; fourth second, $16+96=112$ feet; fifth second, $16+128=144$ feet; nth second, $16+32$ ( $\mathrm{n}-1$ ) leet.

The total distance fallen by a body at the end of the nth second is 16 n 2 feet, thus at the end of the first second it has fallen 16 feet, at the end of the second 64 feet, at the end of the fifth 400 feet. The agures given above are only approximate ones
and in them no account is taken of air resistance. As the air resistance encountered by a faliing body depends on the shape and size of the body no general rule can be given for taking account of it, excent to say that the air resistance increases with the velocity. The force of gravlty on a body one mile above the surface of the earth is less than if the body were at the surface of the earth by about one-twentieth of one per cent., a difference which it wouid be difflcult to measure in the rate of fall of the body.

## AREAS OF CIRCLES.

To find the circumference of a circle muitiply the diameter by 3.14159265 (commoniy expressed as 3.1416). To find the area of a circle muitiply the square of the dlameter by .785398 (usuaily expressed as .7854). To find the cubic contents of a cylinder

Thus, a pipe 1 foot in diameter and 1 foot in length, contains .7854 cubic feet. To find how many gallons are contained $\ln$ a pipe or cylinder, divido the cubic contents by 231 , which is the number of cubic inches in a United States gallon.

CIRCLE AREAS IN EIGHTHS OF A UNIT.

## MELTING POINTS OF CHEMICAL ELEMENTS, ETC.

(By the Bureau of Standards, U. S. Dept. of Commeree.)
THE values of the melting points used by the except the most accurate investigations, the thermbBureau of Standards as standard temperatures for the ealibration of thermometers and pyrometers are indicated in eapitals. The other talues have been asslgned after a careful survey of all the available data. As nearly as may be, all values, in particular the standard points, have been reduced to a common dynamic scale is forijical with any of the gas scile. At high temperatures sume of the vaiues are quite uneertain; thus, while the melting point of platilium may be considered aceurately known to $10^{\circ} \mathrm{C}$., that of tungsten is possibly uncertain by $50^{\circ} \mathrm{C}$. of more. Temperatures centigrade are rounded oll and the exact Fanrenheit equivalents are usually scale, the thermodynamic scale. For all purposes ${ }^{\text {given. }}$

Every human death may be attributed to one of three causes: (1) Interference with resplratlon (asphyxia or apnea); (2) Interference with the heart's action (syncope), and (3) Interference with the nervous system (coma or shock). The number of distinct dlseases produclng death is limited.

The length of the humerus multipiled by 5.06 , lutions and much iess in both relative and absolute or the length of the femur muitiplled by 3.66 , equals the height of the man. Thus the helght of prehistoric peoples can be worked out.
In helght man may vary from 1 m .25 ( 4 feet 1 inch) to 1 m .99 ( 6 feet $63 / 4$ lnches). Below 1 m .25 man is abnormai or pathological (dwarism); above 2 meters man is aiso abnormal (glantlsm). Both these extremes are sterile. The extreme averages of dlfferent populations run from 1 m . 38 ( 4 feet 6 inches) to 1 m .79 ( 5 feet 10.5 lnches); the Scots of Gailoway or Scots or the North are 1 m .78. The stature of man is not more than 2 . or 3 centlmeters higher than his skeleton.
The length of the trunk in man is more than onethild and less than two-fifths of the height. The arm reach in American soidiers, compared to thelr height, is as 1,043 to 1,000 . The brains of the higher apes are much less complex in their convoweight. The gorlla's brain barely exceeds twenty ounces in weight, whlle man's brain hardly weighs less than thirty-two.
From 11,000 brains weighed, Topinard tinds an average weight of 1,361 grains for man and 1,290 grains for woman.

The gray substance represents 37 to 38 per cent. of the total welght of the braln. The differences in the form and the dimensions of the skull ln correidtion with those of the braln serve to distingulsh races and species. Thus the Inka bone (one of the wormian bones), between the parietal and occipital bones, is frequent in Peruvlan cranla- 20 times in 100; in negroes 6 tlmes; in Europeans it is stili more rare; among Indlans of Arlzona this bone is more frequent than among Peruvians. The suture of the aiar bone is pecullar to Japanese crania- 25 to 40 per cent., and only 9 per cent. in European races,

## LONGEVITY OF ANIMALS.

(Figures represent years.)

Ass; from 25 to 50; bee, 4 ; beaver, 50; beetle, 1 to 4; blrds, 3 to 30; camel, 50 to 60; carp, 100 to 150; cat, 18; cow, 20; crocodile, 100; crow, 100; deer, 20 ; dog, 23 to 30 ; eagle, 100; elephant, 150 to 200; fox, 15.

Fowl, 10; goose, 50; hare, 7 to 8; heron, 60; hog, 16 to 18 ; ox, 19 ; parrot, 100 ; peacock, 24 ; pellcan. 40 to 50 ; pigeon, 20 ; plke, 100 ; rabbit, 8 or 9 .

Raven, 100 ; rhinoceros, 20 ; salmon, 10 : sheep, 10 ; sparrow-hawk, 40; spider, 1; squlrrel, 7 ; stag, under 50 ; swan, 100; tlger and leopard, 25; toad, 20 to 30 tortoise, over 100 ; viper. 6 or 7; wolf, 20; wren. 2 or 3.

## Cu) 』fxtrif System.

## (Prepared for the U.S. Government by the Bureau of Standards Department of Commerce.) UNITS OF WEIGHT AND MEASURE.

THE fundamental unit of the metrlc system is the meter, the unit, of length. From this the units of capaclty (liter) and of weight (gram) were derived. All other unlts are the deeimal subdivisions or multiples of these. These three units are simply
related, e. g., for all practical purposes 1 cubic decimeter equals 1 liter and 1 liter of water veighs 1 kilogram. The metric tables are formed by combining the words "meter," "gram," and "liter" with the six numerical prefixes, as in the following wables.

| Prefixes. Meanlng. |  | Units. |
| :---: | :---: | :---: |
| milli- = one-thousandth | 001 |  |
| centi-=one-hundredth | 01 | "meter" for length |
| deci- = one-tent? | 1 | "gram"' for welght |

| Prefixes. Meaning. |  | Units. |
| :---: | :---: | :---: |
| deka- = ten | 10 |  |
|  | 100 1000 | "liter" for capacity. |

All lengths, areas, and eubic measures in the following tables are derived from the international meter, the legal equivalent being 1 meter $=39.37$ inches (law of July 28, 1866). In 1893 the United States Office of Standard Weights and Measures was authorized to derive the yard from the meter, using for the purpose the relation legalized in 1866, 1 yard $=3600-3937$ meter. The customary weights are likewise referred to the kilogram (Executive order approved April 5, 1893). This action fixed the values, inasmuch as the reference standards are as perfect and unalterable as it is posslble for human skill to make them at this time. All capacities are based on the equivalent 1 liter equals 1.000027 eubic decimeters. The decimeter is equal to 3.937 inches

## STANDARDS FOR

Units of measurement. should be distinguished from" standards for measurement, particularly in the case of length and capacity, Units of length are fixed distances, inderendent of any other, consideratlon, while length standards are affected by the expansion and contraction with changes of tempẹcature of the material of which the standard may be composed. It is therefore necessary to fix upon some temperature at which the distance between the defining lines or end surfaces of the standards shall be equal to the unit. The same is true of standards of capacity, which at some deflnite temperature contain a given number of units of volume. The temperature at which metric length standards are eustomarily made correct is $0^{\circ}$. C. although $20^{\circ}$ C is also used for steel tapes and some other standards intended for use at rcom or average outdonr temperatures. The temperature at which standards of length of the customary systom are made correct $18.62^{\circ} \mathrm{F}$.

- For measurements of high precision it is also necessary :to specify the manner of support of the standards; whether at certain points oniy or throughout their entire length, and in the case of tapes it is also necessary to give the tension applied to the tape when in use In the United States the capaclty standards, both metric and customary, are made to hold the specified volumes at $4^{\circ} \mathrm{C}$. Standards of capacity are usually made of brass so the capacity at any other temperature may be computed by the use of the coeffcient of cubical expansion, usually
in accordance with the legal equivalent of the meter given above. The gallon referred to in the tables is the United States gallon of 231 cubic inches. The bushel is the United States bushel of $2,150.42$ cubic inches. These units must not be confused with the British units of the same name, which differ from those used in the United States. The British gallon is approximately 20 per cent. larger and the British bushel 3 per cent, larger than the and the British bushel 3 per cent. larger that the customary weights derived from the international kilogram are based on the value 1 avoirdupois pound $=453.5924277$ grams. The value of the troy pound is based upon the relation just mentioned and also the equivalent 5760-7000 avoirdupois pounds equals 1 troy pound.
MEASUREMENT.
assumed to be 0.000054 per degree Centigrade. In the purehase and sale of liquids a more important consideration than the temperature of the measures is the temperature of the llquid when measured, for the reason that the large coefficient of expansion of many liquids makes the actual mass of a given volume delivered vary considerably with temperature. For this reason, the custom of buying and selling liquids by weight instead of by measure is recommended. It is further recommended that when liquids are sold by volume, $68^{\circ} \mathrm{F}$ or $20^{\circ} \mathrm{C}$ be adopted as the standard temperature of the liquid.

While the temperature of a weight does not affect its mass, it is nevertheless important that when two weights are compared in alr they both be at the same temperature as the air, If there is a difference between the temperature of the air and the weights, convection currents will be set up and the readings of the balance will be thereby affected. Also, since weights are buoyed up by the surrolinding air by amounts dependent upon thelr volumes, it is desirable that the weights of any set be of the same material. If two weights of the same density balance in air of a certain density they will balance in vacuo or in alr of a different density. Brass is the material most widely used for standard weights, although platinum is quite commonly used for welghts of 1 gram or less. In the absence of any knowledge as to the actual density of weights, those made of brass are assumed to have a density of 8.4 at $0^{\circ} \mathrm{C}$, while those of platinum are assumed to have a denslty of 21.5 at $0^{\circ} \mathrm{C}$.
SPELLING AND ABBREVIATION OF .UNITS
Following the names of each unit in the llst beloं $\dot{w}$ is glven the abbreviation which the Bureau has adopted. Attention is called to the following principles: 1. The period is omitted after the abbreviatlons of the metric units, while it is used after those of the customary system. 2. The expoments, " 2 ", and " 3 ," are used to signlyy area and volume, respectively, in the case of the metric units instead of the longer prefixes "sq." or "cu.:" In
conformlty with this princlple the aboreviation for cubic centimeter is "cm3," instend of "c. c." or "c. cm." The term "cubic centimeter" as used in chemical work is, in fact, a misnomer, since the uni actually used is the "mllliliter,'" which has a sliglitly inrger volune. 3. The use of the same abbreviation for both singular and plural is recommended. This practlce is already established in expressing metric units and is in accordance with the spirit and chie purpose of abbrevlations

## DEFINITIONS OF UNITS.

## LENGTH.

Fundamental Units - A meter ( $m$ ) is a unlt of length equivalent to the dlstance between the defining lines of the internationai protatype metier at the Internatlonal Bureau of Weights and Measures when this standard, is at the temperature of melting lee ( $0^{\circ} \mathrm{C}$ ).

A yard (yd.) Is a unit of length equivalent to $3600-3937$ of a meter.

## Multiples and submulttples.

1 kilometer $=1000$ meters.
1 hectometer $=100$ meters.
1 dekameter $=10$ meters.
1 decimeter $=0.1$ meter.
1 centlineter $=0.01$ meter
1 milimeter $=0.001$ meter $=0.1$ centimeter
1 inlcron $=0.000001$ meter $=0.001$ mililmeter
1 millimicron $=0.000000001$ meter $=0.001$ micron.
1 foot $=1-3$ yard $=1200-3937$ meter.
1 Inch $=1-36$ yard $=1-12$ foot $=100-3937$ meter.
1 link $=0.22$ yard $=7.92$ inches.
$1 \mathrm{rod}=51 / 2$ yards $=161 / 2$ feet.
1 chaln $=22$ yards $=100$ llnks $=66$ feet $=4$ rods
1 furlong $=220$ yards $=40$ rods $=10$ ohains.
1 statute mile $=1760$ yards $=5280$ feet $=320$ rods
1 hand = 4 inches.
1 hand $=4$ incies.
1 mil $=0.001$ inch:
1 inthom $=6$ feet.
1 span $=9$ incles $=1-8$ fathom.
1 nautlcal mile (Unlted States $=6080.20$ feet 1 sea mlle $\quad\left\{\begin{array}{r}1.151553 \text { statute mlles }\end{array}\right.$ 1 geographical mile $=1853.249$ meters.

Fundamental Units:
A square meter is a unit of area equivalent to the area of a square the sides of which are 1 meter.
A square yard is a unit of area eq ivalent to the area $0_{i}{ }^{-}$a square the sldes of which are 1 yard. Multiples and Submultiples:

1 square kilometer $=1,000,000$ square meters.
1 hectare or square hectometer $=10,000$ square meters.
1 are or square dekameter $=100$ square meters. centare $=1$ square meter.
1 square decimeter $=0.01$ square meter.
1 square centimeter $=0.0001$ square meter.

1 square millmeter $=0000001$ square metcr $=$ 0.01 square centlmeter.
$1^{1}$ square foot $=1-9$ square yard.
1 square inch $=1-1296$ square yard $=1-144$ square foot.
1 square link $=0.0484$ square yard $=62.7264$ square inches.
1 square rod $=30.25$ square yards $=272.25$ square feet $=625$ square links.
1 square chain $=484$ square yards $=16$ square rods $=100,000$ square links
1 acre $=4840$ square yards $=160$ square rods $=10$ square chains.
1 square mile $=3,097,600$ square yards $=640$ acres.

## VOLUME

Fundamental Units:
A cublc meter ls a unit of volume equivalent to a cube the edges of which are 1 meter.
A cubic yard is a unit of volume equivalent to a cube the edges of which are 1 yard.
Multiples and Submultiples:
1 cuble kilometer $=1,000,000,000$ cubic meters.
1 cubic hectometer $=1,000,000$ cubic meters.
1 cubic dekameter $=1,000$ cubic meters.
1 stere $=1$ cubic meter.

1 cubic decimeter $=0.001$ cubic meter.
1 cubic centimeter $=0.000001$ cubic meter $=0.001$ cubic decimeter.
1 cubic millimeter $=0000000001$ cubic meter $=$ 0.001 cublc centimeter.

1 cubic foot $=1-27$ cubic vard.
1 cubic lnch $=1-46656$ cubic yard $=1-1728$ cubic foot.
1 board foot $=144$ cubic inches $=1-12$ cubic foot.
1 cord $=128$ cuble feet.

## CAPACITY.

Fundamental Units:
A liter is a unit of capacity equivalent to the volume occupled by the mass of 1 kilogram of pure water at lts maximum density (at a temperature of $4^{\circ} \mathrm{C}$, practicaliy) and under the standard atmospheric pressure (of 760 mm ). It is equivalent in volume to 1.000027 cubic decimeters.
A gailon is a unit of capacity equlvalent to the volume of 231 cubic inches. It ls used for the measurement of liquid commodities only.
A bushel is a unit of capacity equivalent to the volume of 2150.42 cubic inches. It ls used in the measurement of dry commodities only.
The above bushel is the so-called strlcken or struck bushel. Many dry commodities are sold by heaped bushei, which is generaily specified in the State laws to be the usual stricken bushel measure "duly heaped in the form of a cone as high as the article wlll admit" or "heaped as high as may be without special effort or design." The heaped bushel was originally intended to be 25 per cent. greater than the strlcken bushel.
Multiples and Submultiples:
1 hectoliter $=100$ llters.

1 dekaliter $=10$ liters.
1 deciliter $=0.1$ liter.
1 centiliter $=0.01$ liter
1 miliiliter $=0.001$ liter $=1.000027$ cubic centimeters
1 llquld quart $=1-4$ galion $=57.75$ cubic inches.
1 liquid pint $=1-8$ gallon $=1-2$ liquid quart $=$ 28.875 cubic inches.

1 glil $=1-32$ gallon $=1-4$ liquid pint $=7.21875$ cubic inches.

1. fluid ounce $=1-128$ gallon $=1-16$ liquid pint.

1 fluid dram =1-8 fluid ounce $=1-128$ liquid pint
1 minim =1-60 fluid dram=1-480 fluid ounce.
1 firkin $=9$ gallons
1 peck $=1-4$ bushel $=537.605$ cubic inches.
1 dry quart $=1-32$ bushel $=1-8$ peck $=67.200625$ cubic lnches.
1 dry pint $=1-64$ bushel $=1-2$ dry quart $=33.600$ 3125 cubic lnches.
1 barrel (for fruit, vegetables and other dry commodities) $=7056$ cubic inches $=105$ dry quarts.
The barrel capacity was fixed by United States statute, approved March 4, 1915.

MASS.

Fundamental Units:
A kilogram is a unit of mass equivalent to the mass of the international prototype kilogram at the Intcrnational Bureau of Weights and Measures.
An avoirdupois pound is a unit of mass equivalent to 0.4535924277 kilogram.
A gram ls a unit of mass equivalent to one-thousandth of the mass of the lnternational prototype kilogram at the International Bureau of Weights and Measures.
A troy pound is a unit of mass equivalent to $5760-7000$ of that of the avoirdupois pound.
Multiples and Submultiples.
1 nietrlc ton $=1000$ kilograms.
1 hectogram $=100$ grams $=0.1$ kilogram.
1 dekagram=10 grams $=0.01$ kilogram.
1 decigram=0.1 gram.
1 centigram=0.01 gram.
1 milligram =0.001 gram.

1 avoirdupois ounce $=1-16$ avoirdupois pound
1 avoirdupols dram $=1-256$ avoirdupois pound $=$ 1-16 avoirdupois ounce.
1 grain $=1-7000$ avoirdupois $\quad$ pound $=10-4375$ avolrdupois ounce $=1-5760$ troy pound:
1 apothecaries cound $=1$ troy pound $=5760-7000$ a voirdupois pound.
1 apothecaries or troy ounce $=1-12$ troy pound $=$ $480-7000$ a voirdupois pound $=480$ grains.
1 apothecaries dram =1-96 apothecarles' pound = 1-8 apothecaries' ounce $=60$ gralns.
1 pennyweight $=1-20$ troy ounce $=24$ grains
1 apothecarles' scruple $=1-3$ apothecaries' dram = 20 grains.
1 metric carat $=200$ milligrams $=0.2$ gram .
1 short hundredweight $=100$ avoirdupois pounds.
1 long hundredweight $=112$ avoirdupois pounds.
1 short ton $=2000$. avoirdupois pounds.
1 long ton $=2240$ avoirdupois pounds.

FEET, YARDS, MILES, WITH METRIC EQUIVALENTS.
(By S. W. Stratton, Director of the United States Bureau of Standards, Department of Commerce.)

## ENERGY RESOURCES OF THE WORLD.

The United States is literally the most powerful country in the world, according to a statement made by Dr. Thomas T. Read of the Federal Bureau of Mines, before the Sehool of Foreign Service of Georgetown University. "The real basis of power of a nation is its energy resourees rather than lts man-power strength," said Dr. Read. "The modern way to use the energy of a man is to employ it ln a way simllar to the little detonator of the bjg expiosive shell-the littie eharge sets off the big one and does an amount of work far in excess of its own capacity. The energy output of an average workman is about a tenth of a horsepower. The energy expended by a coal miner in an elght-hour day thus amounts to about that avallable from two pounds of coal. A Japanese miner who gets out 1,400 pounds of coal a day, thus multiplies his energy by 700 .

| COUNTRY. | Coal (Mililons of Hp. Years). | Petr'le'm (Millions of Hp. Years). | Water- power Millions of Hp. Years). | COUNTRY. | Coal (Millions of Hp. Years). | Petr'le'm (Miliions of Hp. Years). | Water- power Milions of Hp. Years). |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| United States | 500.000 | 400 | 37 | Australasia | 19,000 | (7) | 4 |
| Clina. | 200,000 | 60 | 20 | Russia. | 17,000 | 280 | 16 |

[^11]It is somewhat like planting one grain of wheat and havlng 700 grow from it.
"The Amerlean miner gets out 8,800 pounds of coal in a day and so multiplies his energy by 4,400 . There are $41,000,000$ wage earners $\ln$ the United States and their energy output is a little over 4,000,000 horsepower, or only nine times the potential energy output. In the form of coal of 100 miners. The power minerals, coal, petroleum, and waterpower, are, therefore, the real sourees of strength in an industrial clvillzation. Just where the United States stands on this basis ls best brought out by some comparative figures which may be stated in millions of horsepower years, so that the figures will be easler to handle. Taking the estimates of probable and possible available coal, petroleum, and waterpower in the princlpal countries of the world, and reekoning them in terms of milions of horsepower years, they line up solnething like this:

## CLASSIFICATION OF ROCKS AND DIVISIONS OF GEOLOCIC TIME.

## (Prepared by the U.S. Geological Survey.)

THE rocks composing the carth's crust are grouped by geologists into three great classes-igneous, sedimentary, and metamorphic. The igneous rocks have solidified from a molten state. Those that have solidified beneath the surface are known as intrusive rocks. Those that have flowed out over the surface are known as effusive rocks, extrusive rocks, or lavas. The term volcanic rock includes not only lavas but bombs, pumice, tuff, volcanic ash and other fragmental materials thrown out from volcanoes. Sedimentary rocks arc formed by the accumulation of sediment in watcr (aqueous deposits or eolian deposits). The sediment may consist of rock frag-

| Era. | Period. | Epoch. | Characteristic Life. |

ments or particles of various sizes (conglomerate, sandstone, shale); of the remains or products of anlmals or plants (certain limestoncs and coal); of the product of chemical action or of evaporation (salt, gypsum, \&c.) ; or of inixtures of these materials A characteristic feature of sedimentary deposits is a layered structure known as bedding or stratification. Metamorphic rocks are derivatives of igneous or sedimentary rocks produced through mechanical or chemical activities in the earth's crust: The unal tered sedimentary rocks are commonly stratified, and it is from their order of succession and that of their contained fossils that the fundamental data of historical geology have been deduced

## LAND AND WATER AREAS.

The superficial arca of the carth is $196,940,000$ square miles- $140,295,000$ square miles of water and $56,255,000$ square miles of land. The threc great oceans comprise the Atlantic, 41,321,000 square miles; Pacific, 68,634,000 square miles, and Indian, $29,430,000$ square miles. There are about $1,000,000$ square miles of lake and river surface on the land, and $1,910,000$ square miles of islands in the seas. The diameter of the earth at the equator is 7,926 miles, and through the poles $7,899.6$ miles. The avcrage clevation of the land above sea level is 2,300 feet. The average depth of the ocean below sea level is 12,600 feet. The deepest place in the ocean yet found is off Mindanao, Philippine Islands, 32,088 feet. The highest mountain is Mount Everest, in the Himalayas, 29,002 feet. This gives a range of 61,090 feet or more than $111 / 2$ milles between the bottom of the oceans and the top of the land. The greatest depth In the Atlantic Ocean is near Porto Rico, 31,366 feet; in the Indian Occan, 22,968; in the Arctic, 13,200; in the Malay, 21,342; in the Caribbenn, 20,568; in the Mediterranean, 12,276; in the Bcring, 13,422.

The best estimates of the earth's area place the fertile regions at $29,000,000$ square miles; steppes at $14,000,000$ square miles; deserts at $4,861,000$ square miles.

Areas in square miles of scas: Okhotsk, 580,000 ; Yellow, 480,000; Japan, 405,000. Andaman, 300,000 : North, 220,$000 ;$ Red, 178,000 ; Baltic, 160,000 ; Hudson Bay, 472,000.

The population of the earth at the death of Emperor Augustus, estimated by Bodio, was 54,000,000 . The population of Europe hardly exceeded $50,000,000$ before the fifteenth century. Mulhall. The population of the earth at its present ratio of gain will be about $4,000,000,000$ in 2014 .

Abbe Theodore Moreaux, director of the observatory of Bourges, in an article in La Revue du Ciel, declares the world to be $500,000,000$ years old. Life, Abbe Moreaux says, has existed on the earth for at least $240,000,000$ to $260,000,000$ years, although it has not been human life. He says the moon was not once part of the earth, but was a sun, since extinct, but it formerly aided in warming the earth.

## UPPER AIR WINDS AND CONDITIONS.

Numerous observations ' with kites and balloons give the following information relative to upper alr winds:

1. In general. winds a short distance above the ground blow from points slightly to the right of those at the surface; at greater heignts this clockwise turning inorcases in the case of soutinerly winds, I. e., ESE to WSW. but northerly winds, especlallv those from NNW to ENE, turn counter-clockwise with altitude. For example, above SE winds at the surface there are found SSW to WSW winds as a rule: above NE winds, it is usual to find. NNW to WNW winds.
2. On the average, wind speeds increase sharply, about $100 \%$, within 1,500 foet above the surface. This rule applies to all directions. At greater helghts the Increase is more gradnal, and in many cases, especially with easterly winds in summer. there is an actual decrense. The largest increases are found above surface SW to NW winds.
3. Winds in the upper alr are prevallingly from a westerly direction, 1. e., 'Ssiv'to NNW. AL helghts of two or three iniles and thence to six or Reven miles this preponderance amounts to about $90 \%$. When easterly winds are found at these helghts they are
usually of low velocity. Westerly winds, on the other hand, continue to increase In speed, reaching a maximum at altitudes of about slx or seven miles. At still greater heights a decrease in speed is found.
4. The characteristics indicated in 1, 2, and 3 are more pronounced in winter than in summer and in the northern than in the southern part of the country.
5. Although westerly winds are usually found they are not to be placed in the category of "trade winds," since large variations, botll in specd and dircction, are found from place to place, from season to season, and even from day to day.

The Weather Bureau, Washington, D. C.. issues twice dally "flying weather" forecasts which are sent to all avlation flelds in the country and in addition are broadcast from Arlington, so tlat any olle having a radlo receiving set can easily obtain information as to the probable upper air conditions of wind, etc. A similar message is brondeast from San Francisco for the benell of Pacific Coast llyers. In addition to this service, the Weather Bureau is in possession of much detalled inforination as to upper air conditions, means, extremes, etc., and careful attention is always given to specifle requests by letter, or otherwlse, for such information.

## TELESCOPES.

THE magnirying power of telescopes is generally expressed in diameters, the practical limit of power being 100 diameters per inch of dlameter of the telescope. Thus the 36 -inch telescope at the Lick Observatory may give a magnifying power of 3.600 diameters. But such high power can only be used in a very tranquil atmosphere; consequently most astronomical observations are made at 1,000 diameters or less.

The largest refracting telescopes in the world are In the United States. The one at Yerkes Observatory, Geneva Lake, Wis., has an object lens 40 lnches in diameter, with a focal length of 64 feet. The movable part of the instrument turning on the polar axis weighs about 12 tons, and the clock $11 / 2$ tons. Other large telescopes are the 36 -inch at Lick Observatory, Mt. Hamilton, Cal., where many important astronomical dlscoveries have been made the 26 -inch at the U. S. Observatory, Washington, D. C., and the 24 -inch (photographle objective) belonging to Harvard University, now at the Arequipa, Peru, station of the Harvard Observatory. There is a 30 -inch refracting telescope at the Allegheny Observatory, Riverview Park, Pa.
Abroad is the 30 -inch at the Imperlal Observatory Pulkova (near Petrograd), Russia. This telescope has a platform at the lower end of the polar axis from whlch observers can readily operate the instrument. The Meudon Observatory (near Paris,

France), has a 32 -inch; the Potsdam. Prussia a 31-inch; and the Royal Observatory, at Greenwich, England, a 28 -inch.
Two of the most perfect reflecting telescope instruments ever built are at Mt. Wilson Observatory, Pasadena. Cal. One mirror is silver on glass, 60 Inches in diameter, and weighs nearly a ton. The telescope is moved by electric motors in right ascension and declination. An important feature in this instrument is the different focal lengths that can be obtained. The 60 -inch mirror has a 25 -foot focus, but by a suitable arrangement of mirrors it is possible to get focal lengths of 80,100 and 150 feet. At the same observatory ls a 100 -inch reflector, the tube with the mirror at the bottom ls 43 feet long, and with the mountings weighs nearly 20 tons. There is a 36 -inch reflector at Lick Observatory, Harvard University has a 28 -inch and a 60 -inch. Harvard University has a 28 -inch and a 60-inch, notable reflectors are the Lord Rosse, at Birr Castle, Ireland, which has a mirror 72 inches in diameter of speculum metal and a focal length of 54 feet; a 48 -inch at Melbourne, Austral a; a 60 -inch at Ealing, England; a 48 -inch at Paris. France, and a 39 -inch at Meudon. France. A 61-inch reflecting telescope at the National Astronomic Observatory, Cordoba, Argentina, is under construction. The Dominion Astronomical Observatory, Victoria; B. C., Canada, has a 72 -inch reflector.

POETS-LAUREATE OF ENCLAND.

There is no authentic record of the origin of the office of Poet-Laureate of England. According to Warton, there was a Versificator Regts, or King's Poet, in the reign of Henry III. (1216-1272), and he was paid 100 shillings a year. Geoffrey Chaucer (1328-1400) assumed the title of Poet-Laureate, and in 1389 got a royal grant of a yearly allowance of wine. In the reign of Edward IV. (1461-1483) John Kay held the post. Under Henry VII. (14851509) Andrew Bernard was the Poet-Laureate, and was succeeded under Henry VIII. (1509-1547) by John Skelton. Next came Edmund Spenser, who dled in 1599; then Samuel Danlel, who died in

1619; and after him, Ben Johnson (1574-1637), Slr William Davenant (1637-1668), John Dryden (1631-1700), who was deposed at the time of the Revolution. - The others, with the date of appointment, when known, have been: Thomas Shadwell, 1689: Nahum Tate, 1692; Nicholas Rowe, 1715: the Rev. Laurence Eusden, 1718: Colly Cibber, 1730: William Whitebead, 1758 on the refusal of Gray; Rev. Thomas Warton, 1785 , on the refusal of Mason: Henry J. Pye, 1790; Robert Southey, 1813, on the refusal of Sir Walter Scott; William Wordsworth, 1843; Alfred Tennyson,. 1850; Alired Austin, 1896; Robert Bridges, 1913.

## HISTORY OF WIRELESS TELEGRAPHY AND TELEPHONY.

(Prepared for The World Almanac by the Amcrican Telephone and Telegraph Co.)

Efforts to develop one form or another of wire less telegraphy go back nearly a century. Early experiments involved elther volume distribution of eleetrie eurrent throughout a large area of moist earth or water, the propagation of energy from one circuit to another by electro-magnetic induction, or sueh propagatlon by means of electrostatic induetion. These carly systems, although experimentally tried, failed to become practicable, and the electric wave wireless telegraphy of the present day differs fundamentally in principle from any of them.

Wireless telegraphy may be said to trace its descent dlrectly from the theoretical work of J. C. Maxwell who in 1865, as a result of his researches in mathematical physics, was led to make the prediction 'that vislble light eonsists of electric waves in the ether.' For years the importance of Maxwell's prediction was unrecognlzed because it lay undissociated from the eomplicated mathematical reasoning by whlch he had arrived at it. It was not untll 1887 that lnterest was really aroused in the subject when Heinrich Hertz gave an experlmental proof of the truth of Maxwell's prediction. Hertz showed that the ether of space would transmit electric waves and he showed how these waves might be produced and detected.

Following the work of Hertz, which received widespread attention, the suggestion was frequently made that the newly discovered waves mlght open the way to successful wireless telegraphy. However, the apparatus devised by Hertz for producing and detecting electric waves was in no way suitable to practicable adaptation.

## INVENTION OF THE COHERER

In 1890 the remarkable fact was noted by Branly that metal filings when loosely packed in a smail glass tube normally formed a very poor conductor of electriclty but that they bccame a good conductor under the influence of a nearby electric spark, the action of the spark apparently being to weld the metal grains lightly together. Branly's device recelved the name coherer and it was found to be a much more scnsitive means of detccting elcctric waves than the devlce which Hertz had used

Between the years 1894 and 1896 Marconi initiated his experlments which were destined to become famous, first devoting himself to improvements in the coherer. He adopted an idea origlnating with Popoff of using an electro-magnetic buzzer to deeohere the cohcrer between signals and also found that the coherer when placed between an eartb. connection and a wire running to a large metal screen supported in the air became a very sensitive detector of electrie waves. At about the same time Marconl modified the orig nal oscillator of Hertz by connecting one terminal of the spark gap to the earth and the other to a large acria conduetor. By thls means, which constitutes the first use of what is now known as antenna, he was able to greatly increase the efficiency and amount of energy radiated from the oscillator

Marconl tried out his developments in the field of space telegraphy in England in 1896 and by 1898 had succeeded in telegraphing a distance of $141 / 2$ mlles. During the same year his apparatus was applied to a lightship and communication successfully: established over a short stretch of water. By 1901 he had telegraphed from CornWall to the Isle of Wight, a distance of 200 miles. At about this time he developed an oscillation transformer by means of which the coherer was inductively coupled to the recciving antenna.

## INDUCTIVE COUPLING.

In the use of inductive coupling, Marconi was anticipated by sir Oliver Lodge who devlsed a wireless telegrapli system in which such coupling was used and in which the natural period of the antenna circuit was made equal to the period of the oscillating circuit. Lodge's antenna was not eartl connected like Marconi's but consisted of an upper and lower conducting surface, an arrangement which is eoming into quite general use in recent years and is known as an antenna with eounterpoise. Patents on inductive coupling and tuning were also taken out by Marconi, Arco and Slaby, Braun, Stone, and others. By the use of an auxiliary oscillating circuit, the capacity of which could be made much larger than the capacity of the antenna, means were provided for greatly inereasing the amount of energy radiated as weli as sharpening the frequency of radiation. In 1900 both Arco and Slaby and Marconi slowed that two messages could be sinnultaneously received on different wave lengths by one antenna.

The next important development in spark sets came in 1908 witin the invention by Wiel of the quenched spark. Tlie use of the quenched spark
narrowed materially the band of wave lengths radiated from a transmitting station and llade sharper tuning possible.

In 1902 Castelli, an officer in the Italian Navy, invented the first self-restoring coherer. This permitted the use of the ordinary telephone receiver as a recelving instrument and thereby very greatly improved the sensitiveness of the receiving set Shortly afterward the magnetie and electrolytic detectors were developed, but while they were self-restoring they were never generally used because the crystal detectors, introduced in 1906 as a result of the work of Dunwoody and Picard in America, proved far more sátisfactory in practically every respect.

## DEVELOPMENT OF THE ARC.

In 1903, Poulsen, of Denmark, developed a form of arc which was characterized by a hydrogen atmcsphere surrounding the electrodes and a transversc magnetic electric field between the eiectrodes the field being formed by solenoids through which the current feeding the arc flows. The Poulsen arc proved a very satisfactory gencrator of oscillating culrents up to frequencies of 20,000 to 30,000 and as subsequently developed is used in many of the largest radio telegraph stations throughout the world. Arcs have recently been built, as for the Lafayette Station in France, which are capable of delivering $1,000 \mathrm{k}$. W. to an antenna

The development of the arc, because it supplied a source of continuous waves, held eertain promise of making radio telephony practicable but unti the advent of the vacuum tube no satisfactory means was found of effecting the necessary modulation with speech frequencies
Another form of continuous wave generator which has received much attentlon is the high frequency alternator. The names best known in this field are those of Goldschmidt and Alexander son. In recent years the Alexanderson type of alternator has been the object of important developments by the General Electrie Company and is being used extensively by the Radio Corporation of America in lts large telegraph stations.

Briefly, the importance of contlnuous wave radio telegraph lies in the fact that it makes possible the use of larger amounts of power than the spark and lt permits the generation of narrower bands of waves, thus tending to reduce interference be tween simultaneous messages. It also led to the introductlon of heterodyne reception, by Fessenden about 1905.

## THE VACUUM TUBE.

Within the past few years the vacuum tube or thermionic amplifier has become one of the most important types of generator for continuous waves It was introduced in 1906 by De Forest as a detcetor and amplifier of electrie waves and although it proved under favorable conditions, to be extremely sensitive in these capacities it was not entirely reilable. The vacuum tube or "audion,' as made by De Forest, contained an appreciable amount of residual gas within the evacuated bulb which proved to be largely responsible for its uncertain behavior. Because it gave promise of containing the germ of a sensltive electric amplifier, the Bell Telephone System became intercsted in developing it, beginning 1912, as a means of attalning transcontinental telephony. The telephone engineers undertook a thorough study of its electrical characteristics and applied means for thoroughly exhausting the gas. The resulting tubes acted so satisfactorily as telephone repeaters that the development of much larger power tubes was immediately undertaken with the object of a!pplying them to radio telephony.
These developments produced vacuum tubes which were used successfuily as continuous wave generators and speech modulators and led, in the year 1915, to a successful trial of transoceanic radio-telephony. The development of a vacuum tube in very large sizes is still in its infancy and there ls evcry reason to believe that in the near future it will take lts place beside the arc and alternator for the handling of very large amounts of energy, botli for radio telegraphy and telephony

The use of the vacuum tube detector and am plificr for recciveng purposes, by making possible the detection of very faint signals, ls at present giving rise to extensive use of the loop antenna for directive reception, alld this in turn is leading to the ercction of many radio compass stations and radio beacons for the suppiying of ships' bearings to navigators at sea.

The vacuum tubc has also been generally responsible for the rapid developinent during the past few years of radio-telephony for ship-to-sliore
communication, for military purposes especially for guiding aircraft-and for radio broadcasting.

Following are a few of the more important dates relating to the application of the radio telegraph and teiephone to commerclal and other uses, notably military and broadcasting:

## WIRELESS CHRONOLOGY.

1901-Marconi first succeeded in telegraphing certain signals across the Atlantic and in 1903 a completc message was sent.

1904-A regular telegraph service to handle press news and private messages was begun from Poldhu and Cape Breton to Atlantic liners. This led to the pubiication of smali daily newspapers on board many of the transatlantic steamships.

1906 -The use of radio-telegraphy by steamships had so demonstrated its value as a means of increasing the safety of travel at sea that an International Radio Convention was called in Berlin to consider the desirabliity of establishing certain uniform international practices. The articies of this conventlon, which dealt largely with the international use of the radio telegraph, particularly as concerned its use by shlps at sea, were subscribed to by practlcaily all nations.

1907 -Press despatches were bcing handled by radio-telegraphy across the Atlantic.

1909 -Collislon between the steamships Republic and Fiorida occurred, and by summoning aid the radio-telegraph was instrumental in saving the lives of all on board. The first wireless shipping report was published at Lloyd's in 1910.

1912-The second International Radio-Telegraph Convention was signed at London; like the first one signed at Berlin it had to do especially with safety at sea.

1915-Experimental transoceanic telephony was first achieved, spcech being transmitted by the Bell Teicphone Systcm engineers from Washington, D. C., to Paris and to Honolulu, the latter dis-
tance being ncarly 5,000 miles. During the demonstration a telephone message was sent by wire from New York to Washington and then radiated from Washington to San Francisco, thus establishing the radio-teiephone as a suppiement to the wire system. It is this possibllity which must ile
at the heart of all successful ship-to-shore and transoceanic telephone systems.

1914-19-During the Worid War the value of the radiu telegraph and telephone for many military and naval purposes was thoroughly established. The wireiess teiephone proved particularly useful as a means of directing aircraft.

1920-Following the close of the war, the development of the radio art in the United States was in danger of being seriousiy retarded because of the diversified ownership of essentiai patents. At the suggestion of the United States Government, the leading hoiders of these patents, namely the American Teiephone \& Telegraph Company, the General Electric Company, the Radio Corporation of America and the Westinghouse Electric and Manufacturing Company entered into a crosslicensing agreement permitting each company to avail itself of the patents of the others in its particular fields. By means of this agreement the greatest research and development staffs in the world have been freed to develop the public service feature of radio without fear of patent infringements.
1921-22-Many radio-telephone stations, located at New York, Newark, Pittsburgh, Schencctady, Chicago, and certaln other cities, adopted the programme of broadcasting music and other entertainment regularly for the purpose of focusing popular interest upon radio. By October 6 the number of broadcasting stations was 546 . California led with 66 , Ohio second with 35 , and New York third with 30 . Fuily 2,000,000 were "listening in" nightiy and, as the average cost of a radio set is $\$ 75$, the amount invested is $\$ 150,000,000$.

# WHAT IT WAS THAT ALEXANDER GRAHAM EELL DISCOVERED. 

(A. C. Curacy in the N. Y. Evening Post).

L'llustration, Paris, August 26, 1854, contained an article by Charles Boursel, in which the eiectricai transmission of speech was predicted in the foilowing words: "Suppose that a man speaks near a movable disk sufficientiy flexible to lose none of the vibrations of the voice; that this disk alternately makes and breaks the connection from a battery; you may have at a distance another disk which wiil simultaneously execute the same vibrations."

Six years later, 1860, Phllipp Reis built a device that he called a "telephone" upon the principie ladd down by Boursei. The tenth and finai form of the "transmitter" is known as the "square box pattern." It consists essentially of a square box, with a membrane in the cover and a mouthpiece in the side. At the centre of the membrane is a ioose contact that makes and breaks the circuit when a sound directed into the box through the mouthpiece causes the membrane to vibrate, The best known form of "receiver" is the "knitting needie receiver." It consists essentially of a knittlng needle wrapped with silk-insulated copper wire and mounted on a box which serves as a sounding board.

The Reis "receiver", operates on a principie that was discovered by C. G. Page, of Salem, Mass., in July, 1837 -namely, that when a riece of iron is suddenly magnetized or demagnetized it wili emit a foeble click. This sound is due, of course, to the adjusting and readjusting of the molecules of the piece of iron.
Specimens of Reis's apparatus are to be found in the Smithsonian Institution in Washington, D. C., and in semi-private museums in the United States. Why do not these inventions transmit speech satisfactorily?

## CHARACTERISTICS OF SOUND.

A sound possesses three characteristics: Pitch, which depends upon the frequency of the vibrations, louduess, which depends upon the ampiltude of the vibrations, and timbre, which depends upon the source of the sound. The tones of a piano and of a vioin may be the same as to pltch and loudncss, yet the tones are radically different. That difference is what I mean by timbre.

Reis's telephone will transmit pitcli and loudness, but it cannot transmit timbre, because it operates on the make and break principle.

In the summer of 1874, Aiexander Graham Bell conceived an apparatus that possessed the power of transmitting speech sounds by means of a selfgenerated unbroken undulating current, and on Junc 2,1875 , satisfactorily tested this apparatus. The device consisted essentially of a diaphragm of golibeater's skin, which, when vibrated by the voice. set into similar vibration a steel armature mounted in association with an electromagnet. This motion of the armature generated an unbroken undulating current in the telephone circuit, in accordance with a principle discovered by the Russian scientist, E. Lenz, in 1834, and a principle discovered by the German scientist, F. E. Newmann, in 1845 . These principles may be comblned in a single sentence, as foliows: Any change in the magnetic field, with respect to a conductor, induces a current in the conductor whose direction is such as to oppose the change which produced it, and the induced electromotive force is proportional to the rate of change of the field.

Bcil's. first receiver was an electromagnet with a vibrating steel reed armature. The attraction excrted by the electromagnet upon its armature varied exactly the same as the unbroken undulating current gencrated by the transmitting apparatuis varied. Bell's apparatus transmitted and received timbre as weil as pitch and loudness. For this reason Bell succeeded in transmitting intelligibie speecli while Rels failed.

## BELL'S FIRST PATENT.

Bell's first telephone patcnt, No. 174465, covered the use of an unbroken undulating current for the transmission of speech. It included the use of the alternating undulating current, which is produced by the device that I have just discussed, and the use of a uni-directionai unduiating current, which is producce by incorporating in the circult a battery In association with a transmitter, the resistance of which is varled by the voice of the speaker. A second patent covered the use of a permanent magnet instead of an electromagnet.

Until March 7, 1893, and January 30, 1894 respectiveiy, these patents controlled the manufacture of transmitters and recelvers. No one challenged Bell's claim that he was the inventor of the telerhone until the first patent was about eighteen months old. During thic succeeding twenty years some fifty of the most eminent lawyers in the country tried to demolish Bell's claim and failed.

The world's production of raw cotton in 1920-21 is estimated at $19,595,000$ bales of 500 lbs . gross, or 478 lbs. net, by the U. S. Dept. of Agriculture. United States, 13,366,000; India, 2,976,000; Egypt,

Brazil, 100,000; Mexico, 165,000; Peru, 157,000; and all other countries, 400,000 bales. A normal world crop is about $22,000,000$ bales.

There are about $152,000,000$ cotton spinning 1,251,000; China, 1,000,000; Russia, 180,000; spindles in the world, of which $130,000,000$ are spindles in the world, of
actively at work, as a rule

## WORLD'S WOOL PRODUCTION-MILLS IN UNITED STATES.

The world's production of wool averages about $2,600,000,000$ pounds, of which $800,000,000$ pounds comes from Australasia, $460,000,000$ from South America, $200,000,000$ from Russia, $225,000,000$ from the $U$. $S$.

The number of woolen mills in the United States
exceeds 1,000 , and there are about 80,000 looms, over 8,000 of which are used in making carpets and rugs. The number of active spinning spindles exceeds $4,000,000$, pretty evenly divided between woolens and worsteds. There are usually from 250,000 to 500,000 idle spindles.

WORLD'S RAW SILK PRODUCTION.
The world's raw silk production in the 1921-1922 Asia, 35,138,500 (China: Shanghai, 6,518,500; season is estimated at $59,437,000$ lbs., of which Asia exported 48,740,000 lbs.

Raw silk production in the 1920-1921 scason (pounds): Europe, 8,025,000 (Italy, 7,330,000; France, 551,000; Spain, 144,000); Levant, 1,654,000.

Asia, 35,138,500 (China: Shanghai, 6,518,500;
Canton, $4,210,000$ ); Japan, $24,300,000 ;$ India, Canton, $4,210,000) ; ~ J a p a n, ~ 24,300,000 ; ~ I n d i a, ~$
110,000 . Total for world, 44,817,500. Tussah silk, 1,650,000. Figures for Asia cover exports only. Actual production there last year was estimated as follows: China, 22,506,300 lbs.; Japan, 37,385,000 lbs.

## WORLD'S TOBACCO PRODUCTION.

Yearly average production (pounds)-Algeria, 23,000,000; Argentina, 35,000,000; Austria-Hungary, $170,000,000$; Brazil, 100,000,000; Belgium. 20,000,000; Bulgaria, 30,000,000; Canada, 13,000,000; Ceylon, 25,000,000; Cuba, 75,000,000; China, 500,000,000 ; Chili, $9,000,000$; Colombia, $20,000,000$; Dutch E. Indies, $200,000,000$; France, $50,000,000$; Germany, 60,000,000; Greece, 22,000,000; India,

1,000,000,000; Italy, 20,000,000; Japan, 120,000,000; Korea, 35,000,000; Mexico, 35,000,000; Persia, 20,000,000; Philippines, 100,000,000; Porto Rico, 10,000,000; Paraguay, 18,000,000; Roumania, 20,000,000; Russia, 255,000,000; Santo Domingo, $23,000,000$; Serbia, 7,500,000; Turkey, $90,000,000$; Union of So. Africa, $15,000,000$; United States, 1,400,000; Venezuela, 8,000,000. Total, 4,500,000,000 pounds.

Productive area includes arable land; natural meadows and pastures, nurseries and orchards; woods and forests, and marsh, heath and uncultivated productive land.

Arable land includes land used for cereals, grass and other fodder crops, foud crops, industrial crops,
crops for seeding purposes, bare fallow, fertilizer crops and fields under natural grass, and other and unspccificd classification.

Changed boundaries in Austria, Bulgaria, Germany mod Roumania partly account for differences in figures.

## WHEAT HARVEST SEASONS OF THE WORLD.

Jianuary - Australia, New Zealand and Chili.
February and March-East India, Upper Egypt.
April-Lower Egypt, Syria, Cyprus, Persia, Asia Minor, India, Mexico and Cuba.
May-Algeria, Central Asia, China, Japan, Morocco, 'Texas and Florida.
June-Turkey, Greece, Italy, Spain, Portugal, South of France, California, Louisiana, Mississippi, Alabama, Georgia, Carolinas, Tennessee, Virginia, Kentuçy, Kansas, Arkansas, Utah, Missouri.
Julx-Roumania, Bulgaria, Austria-Hungary, South of Russia, Germany, Switzerland, France, South of England, Oregon, Nebraska, Minnesota, Wisconsin, Colorado, Washington, Iowa, Illinois,

Indiann, Michigan, Ohio, New York, New England and Upper Canada.
August-Belgium, Holland, Great Brítain, Denmark;
Poland, Lower Canada, Columbia, Manitoba,
North and South Dakota.
Scptember and Octor er-Scotland, Sweden, Norway, and North of Russia.
November-Peru, South Africa and Argentina.
December-Burmah and Argentina.

## CORN HARVEST TIME.

January-New South Walcs.
March and April-Argentina.
September and October-All European countries.
October-The crop of the United States is harvested principally in this month.

## FISHERIES OF THE WORLD.

(Compiled by tne U.S. Bureau of Fisheries, Washington, D. C.)

## THE FIVE GREAT FOOD GROUPS.

(Prepared by the U.S. Department of Agriculture.)

Every food may be put into one of five groups. Each of these groups serves a special purpose in nourishing the body. Some food from each group is needed regularly by the body.

1. Vegetables and fruits.
2. Meat, fish, eggs, milk, cheese, soy beans, and peanuts.
3. Cereal gralns and their products.

4 Sweets-Sugar syrups, honey, candles.
jelly, and ats and fat foods-Butter, cooking fats, and table oils; suet, salt pork and bacon; nuts.

1. Vegetables and fruits furnish some of the material from whlch the body is made and keep its many parts working smoothly. They help to prevent constlpation.
2. Meat, fish, eggs, milk, cheese, soy beans, and peanuts help to build up the growing body and renew used-up parts. That is their main business, though
they also serve as fuel. Milk is important for children.
3. Cereals, and the flours, meals, breads, cakes, breakfast foods, and other dishes made from them act as fuel for the work of tne body, much as the gasoline burning In an automobile engine makes the car go. This is their chief business. Moreover they give the body some building material.
4. Sweets, too, are fuel. They also give flavor to other foods. Tney are valuable food, but many persons eat more of them than they need, and one could get along better without this group than without any of tne otners. Sweet iruits, especially dried ones like dates and raisins, contain much sugar and are better for the children than candy. 5. Fats. These furnish body-fuel in a concentrated form. Some are nceded especially by hardworking people. Expensive fats are no better fuel than cheap ones. Dripplngs from bacon and other left-over fats can well be used. Children need some butter fat.

HUNDRED-CALORIE PORTIONS IN COMMON FOOD MATERIALS.
The fuel value of food is measured in calories just | in meal planning, the hundred-calorie portion is as length is measured in inches. For convenience sometimes used. as is done in the following table:

Group I. Veqetables and Fruits.

| Materials. | No. of HundredCalorie Portions. | Materials. | No. of HundredCalorie Portions. | Materials. | No. of HundredCalorie Portions. |

WEEKLY NEEDS OF A FAMILY.
The number of hundred-calorie portions needed the other hard muscular work, an active boy 16 by any family can be estimated by reference to the table given below. For illustration, if a family consists of one man who does llttle muscular work; two women, one of whom does little muscular work,
years of age, and three children, 11,8 , and 4 years of age, they would require, respectively, about 200 , $150,200,280,140,120$, and 100 hundred-calorie portions a week, whlch make a total of about 1,200 hundred-calorje portions per week.

## ENERGY NEEDS OF DIFFERENT INDIVIDUALS.

(Hundred-Calorie Portlons.)

| INDIVIDUAL. | Per Day | Per | INDIVIDUAL. | $\left\lvert\, \begin{aligned} & \text { Per } \\ & \text { Day } \end{aligned}\right.$ | $\begin{aligned} & \mathrm{Per} \\ & \mathrm{Wr} . \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| A man or boy using much muscular energy in work or play up to | 40 | 280 | A boy or girl between 10 and 12 years of | 20 | 140 |
| A man or boy using little or no muscular energy in work or play | 27 |  | A boy or glrl between 6 and 9 years of | 17 | 120 |
| A woman or girl using much muscular energy in work or play | 27 | 200 | A boy or girl between 2 and 5 years of age, at least. | 14 | 100 |
| A woman or girl using little or no muscular energy in work or play. . . . . . . . . . | 22 | 150 |  |  |  |

The diet wlll usually prove adcquate and appetizing if the necessary calories of energy are supplied somewhat as follows:

About one-fifth by fruits and vegetables.

About one-fitth by meat, milk, and similar foods. About three-tenths by cereal foods.
About one-tenth by sugar and other sweets.
About one-fiftn by fats and fat foods.

## COAL RESERVES OF THE WORLD UNMINED.

UNifen States and Alaska. 3,538,506,328,300 tons, of which $16,153,000,000$ tons is anthracite. $2.155,000,000,000$ tons is bituminous, and $2,054,-$ $000,000,000$ tons ls sub-bltumlnous and lignite; Canada, $1,361,000,000,000$ tons, of which 2,000,000.000 is anthraeite and $313,000,000,000$ is bituminousi China, 1,097,000,000,000 tons, of which $427.000,005,000$ in anthraeite; Germany, 467,000,-000,000 tons, of which $452,000,000,000$ tons is bituminous and the rest sub-bituminous; Great Britain, $209.000,000,000$ tons, of which 12,000,000,000 is anthraeite; Slberia, $192,000,000,000$ tons, no anthracite; Australia, 183,000,000,000 tons, all bituminous or sub-bituminous; India, 87,000,000,000 tons, no anthracite: Russia in Europe, 66,000,000.000 tons, of which $41,000,000$ is anthracite; Union of South Africa, $62,000,000,000$ tons, of which $13,000,000,000$ is anthracite; Austria, $59,000,000,000$ tons, ne anthracite; Colombia, $30,000,000,000$ tons, no anthracite: Indo-Clina, $22,000,000,000$ tons, all anthracitc; France, $19,000,000,000$ tons, of which 4,000,000,000 is anthracite: Belgıum, 12,$000,000,000$ tons, no antliracite; Spain, 10,000,000,000 tons, of which $2,000,000,000$ is anthracite; Spitzbergen, $9,000,000,000$ tons, no anthracitc; Japan, $9,000,000,000$ tons, no anthracite; Holland, $5.000,000,000$ tons, no anthracite; other eountries, $24.009,000,000$ tons, of which $3,000,000,000$ is anthracite.

Total coal reserves, $7,460,506,000,000$ tons, of which $542,103,000,000$ is anthracite.

Coal unmined in Pennsylvania is estimated at $16,000,000,000$ tons anthracite and $108,474,000,000$ tons bituminous; in West Virginia, 150,363,600,000 tons, bituminous.

## COAL OUTPUT OF THE WORLD.

The yearly coal production of the world is estimated at slightly under $1,500,000,000$ short tons, of whlch from $550,000,000$ to $650,000,000$ tons is mined In the United States; 325,000,000 in Great Britaln; $300,000,000$ in old Germany; $66,000,000$ in old Austria-Hungary; 50,000,000 in old France; $40,000,000$ in old Russia; 25,000,000 in Belgium; $30.000,000$ in Japan; 20,000,000 in Chlna; 20,000,000 in India; 15,000,00¢ in Canada; 12,000,000 in New South Wales; 7,00U,000 in Spain; 10,000,000 in Union of South Africa; 2,500,000 in New Zealand; and smaller amounts in Holland, Chlle, Mexlco, Turkey, Italy, Sweden, Serbia, Bulgaria, Peru and other countries.

## COAL MINERS-THEIR AVERAGE NUMBER

The number of men employed in the Pennsylvania antlracite mines ranged as high as 180,000 in 1914 , and as low as 154,000 in 1917 . They average 200 (1908) to 293 (1918) davs' work a year, and they dig 2.02 (1913) to 2.39 (1908) tons per man per day.
In the bituminous mines the number of employees ranged up to 615,305 in 1918 . with 24.3 (lays' work per year, and an average digging of 3.91 (1915) tous per man per clay.

WORLD'S IRON AND STEEL PRODUCTION.
(Long or metric tons of $2,240 \mathrm{lbs}$.)

Plg iron (1913) 65,566,000; (1919) 46,690,000; (1920) 54,976,000; (1921) 29,281,000.

Steel (1913) 63, 356,000 (1919) 51,774,000; (1920) 63,117,000; (1921) 35,342,000.

The "minette" ore field. which extends over a portion of Alsace-Lorraine, Luxemburg, and Belgium,
is the most important as regards quantity in Europe. This field in 1912 produced $44,000,000$ tons, or 28 per cent. of the world's output. The oregeologically a bedded oolitic ironstone of Jurassic age-is a carbonate partly oxidized to brown ore,

IRON ORE RESOURCES OF THE WORLD.
The unmined iron ores of the world are offcially estimated as follows, in metric or long tons:

| Countries. | Iron Ore. | Iron. | Countries. | Iron Ore. | Iron. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Europe: | Metric tons. | Metric tons. | Europe-Continued. | Metric tons. | Metric tons |
| Germany | 1,270,000,000 | 600,000,000 | Greece. | 100,000,000 | 45,000,00 |
| France. | $5,630,000$ $1,300,000,000$ | $\begin{array}{r}3,000,000,000 \\ 455,000,000 \\ \hline\end{array}$ | Other European countries.... |  |  |
| Sweden. | 1,158,000,000 | 740,000,000 | oun | 77,000,000 | 30,0 |
| Russia | 865,000,000 | 387,000,000 | Total Europ | 12,000,000,000 | 6,528,000,00 |
| Spain | 711,000,000 | 349,000,000 | America | 9,855,000,000 | 5,154,000,000 |
| Norway | 367,000,000 | 124,000,000 | Africa | 125,000,000 | 75,000,000 |
| Austria-Hungar | $284,000,000$ $270,000,000$ | $103,000,000$ $90,000,000$ | Asia. | $260,000,000$ $136,000,000$ | 156,000,000 |

The French figures for ore include $150,000,000$ tons in Algeria and Tunis.
WORLD'S PRODUCTION OF TIN (METRIC TONS).

Nearly 76 per cent. of planted acreage plantation rubber is owned by British capitai, and 5.6 per cent. by American capitai, according to beet avallable authorities.
The 55,000 acres planted and controiled by

American capital comprise the catate of the General Rubber Co., in Sumatra. American 'ntercsts have aiso acquired 40,000 acres of undeveloped land in Sumatra. A very ilmited area is also planted to rubber in Mindanao Philippincs.

METALS AND THEIR DISCOVERERS.

## DEATHS, BIRTHS, AND RATES, IN GREAT CITIES.

Note-The general death and birth rates, and death rate under 1 year, are per 1,000 population; all other rates are per 100,000 .

The death rates for typhoid, measles, scarlet fever, whooping cough and diphtheria are, generally speaking, higher $\ln$ forelgn than In American cities.

## VITAL STATISTICS FOR ENGLAND AND WALES, 1920.

The important facts in the record of vital statlstics for England and Wales for the year 1920, as presented $\ln$ the Eighty-third Annual Report of the Registrar for England and Wales for that year, are stated to be the followlng: The highest marriage rate recorded to that date- 20.2 per 1,000 of the populatlon, a rate, 4.8 above the average of the last 10 -year period unaffected by the war ( $1905-1914$ ); the highest birth rate ( 25.5 per 1,000
population) since 1909 ; and the lowest death rave recorded, namely 12.4 per $1,0 \mathrm{c} 0$ population, being 1.3 below the rate for 1919 . The number of deaths was 466,130 -the smallest number recorded in any year slnce 1862, when the population was little more than half that of 1920 .

The proportion of males to females born in 1920 was 1,052 per 1,000 , contlnulng much above pre-war experience. The loss of births attributable to the war was estimated at about 600,000 .

## MARRIAGE, BIRTH AND DEATH RATES IN GERMANY

The Statistische Reichsamt has recently published the marriage, birth and death rates in Germany for 1921, and comparisons are made with the figures for the years 1904-1920. The following table gives
the data for the years 1904 to 1921, inclusive, and the difference between the birth rates and death rates for each year:

Marriage, birth, and death rates per 1,000 population in Germany, 1904 to 1921, inclustve.

| Year. | $\begin{gathered} \text { Marriage } \\ \text { Rate. } \end{gathered}$ | Birth Rate. | Death Rate. | Differonce. | YEAR. | $\begin{gathered} \text { Marriage } \\ \text { Rate. } \end{gathered}$ | Birth Rate. | Death Rate. | Dlfierence. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1904 | 8.0 | 35.1 | 20.6 | $+14.5$ | 1913 | 7.7 | 28.3 | 15.3 | $+12.5$ |
| 1905. | 8.1 | 34.0 | 20.8 | +13.2 | 1914 | 6.8 | 27.6 | 19.9 | +12.7 +7.7 |
| 1906 | 8.2 | 34.1 | 19.2 | +14.9 | 1915 | 4.1 | 21.0 | 22.0 | - 1.0 |
| 1907. | 8.1 | 33.2 | 19.0 | +14.2 | 1916. | 4.1 | 15.7 | 19.7 | - 4.0 |
| 1908 | 8.0 | 33.0 | 19.0 | $+14.0$ | 1917 | 4.7 | 14.4 | 20.8 | - 6.4 |
| 1909 | 7.8 | 32.0 | 18.1 | +13.9 | 1918 | 5.4 | 14.7 | 18.8 | $-4.1$ |
| 1910 | 7.7 | 30.7 | 17.1 | + 13.6 | 1919 | 13.4 | 20.6 | 16.1 | + 4.5 |
| 1911 | 7.8 | 29.5 | 18.2 | +11.3 | 1920 | 14.8 | 27.1 | 16.3 | +10.8 +11. |
| 1912 | 7.9 | 29.1 | 16.4 | +12.7 | 1921 | 11.9 | 26.1 | 14.8 | +11.3 |

Positive figures indicate excess of births over deaths; minus figures excess of deaths over births.
The figures in the following table represent the compared with 1913 , the figures for 1913 being marriages, births, and deaths in 1920 and 1921 as taken as a base and represented as 100:

Marriages, births, and deaths in Germany in 1920 and 1921 as compared wtth 1913.
(The figures for 1920 and 1921 are in percentages of those for 1913 , which are represented by 100.)
$\overline{\text { Marriages. . }}\left|\frac{1013 .}{100}\right| \frac{1920 .}{190}\left|\frac{1921 .}{155}\right| \| \frac{}{\text { Births..... }}\left|\frac{1913 .}{100}\right| \frac{1920 .}{94}\left|\frac{1921 .}{91.6}\right||\overline{\text { Deaths..... }}| \frac{1913 .}{100}\left|\frac{1920 .}{101.3}\right| \frac{1921 .}{93.7}$

## POISONS AND THEIR ANTIDOTES.

NOTE-When the poison is unknown, glve st mulants and soothing liquids.
The data below is from an American National Red Cross textbook on first aid.

> Table I-Poisons for which an emetic is alway sgiven first.

The treatment is in addition to an emetic.
ALCOHOL-In any form-rum, gin, whiskey, proof spirits, etc., also methyl alcohol.

Symptoms-Giddiness, swaying of body, inablity to stand. Face flushed, eyes red, skin clammy, weak puise, may be convulsions and unconsclousness.
Treatment-Hot coffee or aromatic spirits of ammonia. Try to arouse, but if weak do not exhaust by making walk. Dash cold water on face and eliest. When somewhat recovered wrap warmly and put to bed.
ARSENIC-Found in rat poisons, vermin killer, Paris green, Fowler's solution. "Sometimes in tinned frults and beer.

Symptoms-Severe pain in stomach; purging; severe cramps in legs, vomlting, dryness of throat, cold sweats, profound shock.

Treatment-Much lukewarm water. Magnesia in large quantity or dlalyzed iron in $1 / 2-$ ounce doses, repeated. Beaten-up eggs or castor oil and stlmulants. Warmth and rubbing. If rat poison has been taken, treat as for poisoning by arsenic.
CARBON MONOXIDE-It is in blast and coke furnaces and foundries; in leaky furnaces or ehimneys; about gas stoves without flue connections, such as tenements. tailor shops or boarding houses. The exhaust gases of gasoline automobiles contain from 4 to 12 per cent. of carbon monoxide, and in closed garages men are not infrequently found dead beside a running motor. A similar danger may anise from gasoline englnes in launches. The gas is formed also in stoke-rooms, $\ln$ gun turrets on battleships, in petroleum refineries, and in the Leblanc soda process in cement and brick plants. In underground work it may appear as the result of shot firing, mine explosions, or mine fires, or in tunnels from automobile exhausts or from coai or oil burning locomotives.
Symptoms-Carbon monoxide exerts its extremely dangerous action on the body by displacing oxygen from its combination with hemoglobin, the coloring matter of the blood which normaliy absorbs oxvgen from the air in the lungs and dellvers it to the dlfferent tlssues of the body.
Treatment-1. Administer oxygen -as quickly as possible and in as pure form as is obtainable, preferably from a cylinder of oxygen through an inhaler mask. 2. Remove patient from atmos-

Table LI.-Poisons for which an
MERCURY-Corrosive sublimate, antiseptic tablets. Other salts of mercury much less commonly used.

Symptoms-Corrosive sublimate is very irritating, so when taken turns mouth, lips and tongue white. Mouth is swollen and tongue is shrivelled; always metallic taste in mouth. Pain in abdomen. Nausea and vomiting mucus and blood, bloody purging, cold, clammy skin, great prostration, and convulsions.

Table III.-Poisons for whith
STRONG CORROSIVE ACIDS-1. Acetic; 2, Hydrochioric (spirits of sait); 3, Nitric (aqua fortis) ; 4, Sulphuric (vitriol.)
Symptoms-Very severe burning pain in mouth, throat, and stomach. Wherever acid touches skin or mucous membrane they are destroyed. Frequently vomiting and purging. More or less suffocation from sweliing of throat, great prostration and shock.
Treatment-An alkali to neutrailize acid. Best, magnesia or chaik in water, given frequentiy and freely. Llme, whiting, baking soda, plaster, tooth powder, or cven wood ashes may ali be used for alkali, or ammonla, a tablespoonful to 2 cups of water, but those mentioned above are better as they are lefs irritating. Afterward, soothlng liqulds, milk, mllk and egg, ollve oil. Stlmulants are practically aiways required. If acid inas entered alr passage, may inhale fumes of ammonia. OXALIC ACID (salts of lemon or sorrel)

Symptoms-Much llke corrosive acids just named, but not so much burnlug of lips, etc

Treatment.-Maguesla, chaik, and water or llme water to neutrallze acid. Then one ounce of castor oil and stimulants frecly.
CARBOLIC ACID (Phenol)-(Vंery commonly used in attempts at suicide.)
Symptoms-It is also a powerful corrosive poison, which causes great pain and vomiting.
phere containing carbon monoxide. 3. If breatliing is feeble, at once start artificial respiration by the prone posture method. 4. Keep the victim flat. quiet, and warm. 5. Afterward, give plenty of rest.
LEAD-Sugar of lead, lead paint, white lead
Symptoms-Throat dry; metallic taste with much thirst, colic ln abdomen, cramps in legs, cold sweat; sometlmes paralysis of legs and convulsions.

Treatment-1/2-ounce Epsom saits in tumbler of water. Stimulants and soothing liquids.
OPIUM-Laudanum, morphine, paregoric, some soothing syrups and cough mixtures.

Symptoms-Drowsiness, finally unconsciousness; pulse full at first, then weak; breathing full and slow at first, gradually slower and shallow; pinhead pupils; face flushed, then purple.

Treatment-May have difficulty in getting emetic to work; plenty of strong coffee. Try to arouse by speaklng loudly and threatening, but do not exhaust by compelling to walk, etc. Stlmulants and artificial respiration.
PHOSPHORUS-In matches, phosphorous paste in many rat polsons and vermin killers, often with arsenic.

Symptoms-Severe pain in stomach, vomiting. Skin is dark and may have odor of phosphorus. Bleeding from nose, bloody purging. Convulsions.

Treatment-Epsom salts, $1 / 2$-ounce in tumbler of water, or magnesia. Stimulants. Soothing liquid best. Milk. Avold fats and oils.
PTOMAINE-Poisoning by decayed meat, fish, milk. or ice cream

Symptoms-Nausea, vomiting, purging. Slin cold and clammy. Pulse weak. Severe pain in abdomen, cramps, great prostration and weakness. Often eruption on skin.

Treatment-Purgative, castor oil or Epsom salts. Teaspoonful of powdered charcoal, and repeat
STRYCFININE-NUX VOMICA-Strychnine is frequently used on meat to poison animals, and in some vermin killers.

Symptoms-Convulsions, very severe, alternating with cramps, affecting all muscles of body. Back ls bowed up by spasms of muscles. Jaws are locked. Spasm of muscles is so great that it prevents breathing, so face becomes dusky.

Treatment-Powdered charcoal, if possible, in large quantity. Follow with another emetic. Absolute quiet so as not to bring on convulsions. emetic should not be given first.

Treatment-First, give white of egg or whole egg beaten up; flour and water, but not so good. Emetics, soothing liquids, and stimulants.
NITRATE OF SIIVER-Lunar caustic.
Symptoms-Pain in mouth and stomach; mouth first colored white, then black; vomit first whlte, then turns black.
Treatment-Common salt dissolved in water, or milk very frequently. Then emetic. Afterward soothing liquids and stlmulants.
an emetic should never be given.
Severe case: Unconsciousness very soon and early death. Usually easy to tell by odor of acid and burn, which with pure acid is white and with impure, biack.

Treatment-Rinse mouth with pure alcohoi. If grown person, should swallow three or four tablespoonfuls of alcohol mixed with an equal quantlty of water. Follow this in five minutes wlth two tablespoonfuls of Epsom salts dissolved in a llttle water. Though not so good, limewater may be used to rinse mouth, several glasses of it being swallowed; three or four raw eggs may be given or castor or sweet oil. Stimulants aiways, and keep warnı
STRONG CAUSTIC ALKALIES: 1, Ammonia: Strong ammonla, ammonla liniment, camphor liniment; 2, Lime: Qulckllme; 3, Potash: Caustic potash; 4, Soda: Caustlc soda.

Symptoms-Much like corroslve aclds. Immediate severe burning, paln in mouth, throat, and stomach. Vomiting and purglng. Alkali destroys tissues of mouth it has touched. Severe shock and suffocation from swelling.

Treatment-An acld to neutrallze alkall. Vinegar, iemon or orange julce. Tartaric or citric acid in plenty of water. Soothing liquids. stlinulants. If cannot swallow, may inhale acetic acid or vinegar from a pocket handkerchlef.
CAUTION. In giving any antidote do not wait for it to dissolve but stir it up in any fluid which can be obtaincd.except oil. and give it at once.

## HELP IN CASE OF ACCIDENTS.

Drowning. There are several methods of artificial respiration, but the Schaefer prone-pressure one-man method is considered the best, being widely uscd throughout the United States as well as in many foreign countries. By the plan many human lives are saved each year by members of the U. S. Vol. Life Sav. Corps, who use it to the exclusion of all others. The dlrectlons are as follows;

Send some one lmmediately for a doctor. DO NOT AWAIT HIS ARRIVAL, but proceed as follows: After the patient has been taken from the water locate an even flat surface, laying the patient face downward. Loosen all clothing, collars, belts. garters, etc. Clear the mouth of all mucus and foreign matter, pull the tongue out and see that it remains out; then straddle the patient, placing your hands under his stomach, clasping them together. In this manner gradually lift the patient a few inches, squeezing as you do so, dropping him suddenly. Sometimes a sharp slap between the shoulders is helpful. Lifting the patient as above mentioned should only be done once or twice, taking a few seconds, as it is merely to start anything that might be blocking the air passages.

Remind some one in the crowd about the doctor keep the patient lying face downward on an even flat surface, arms extended, the forehead restling on the leeward forearm, tongue out, facing the wind, the windward arm to be crooked, acting as a protector to the face. Straddle the patient as before, facing his head place your hands, open spread, upon the patient's lower or short ribs, commencing with a downward and inward pressure to the count of three, relaxing to the same count. This motion is continuous, first down, then up, swinging the body to and fro to the count of three. After the downward pressure to the count of three the hands are relaxed from the ribs to the same count each time, and should be maintained until signs of life shownamely, when the patient breathes unaided.

For warmth and circulation, rub the arms and legs upward (toward the heart), no back strokes. Circulation should not be started until after breathing has been fully restored. During the period of operation the subject should be kept warm by the application of hot water bottles, heated bricks, etc. applied to the pit of the stomach, the armpits, between the thighs or to the soles of the feet. Should you not be able to resort to these suggestions as to warmth, a fire built on the lee side of the patient at a distance not to set fire to him would help serve the purpose, Stimulants should not be given by the mouth until after the patient is able to swallowthat is, when the patient is fully conscious, then give
plain black coffee, or half teaspoonful of aromatic spirits of ammonia in half a glass of water.

The patient should be kept in bed as quiet as possible in a well ventilated room. To be feared Pneumonia or possible collapse of the heart.

This treatment should be continued at least an hour. As a general rule signs of life begin to show after 8 or 10 minutes' work. One should not be discouraged if it takes longer, as llfe has been restored after working as long as 30 minutes, although this ls not common.

We read of persons having been revived after being under water as long as 15 minutos. This is very rare. If the person has been under water 3 or 4 minutes there is everything $\ln$ his favor, but should the submersion be much longer the odds are apt to be against it. In any case never give up, but commence work at once.

Signs of death are: Breathing and the heart's action entirely cease, eyelids generally are half closed, the pupils dilated, the tongue approaches the under edges of the lips, and these, as well as the nostrils, are covered with a frothy mucus. Coldness and pallor of surface increase.

Remember that mechanical devices are dangerous in the hands of the inexperionced.

Do not await the arrival of the doctor before starting the artificial respiration. Start immediately.

Do not lay the patient on the back when applying artificial respiration. Always face downward.

Do not hold the body up by the feet.
Do not dash water in the patient's face.
Do not place the body in a bath unless ordered to do so by the doctor.

Do not tie strings on the tongue or run pins or nails through it.

Do not roll the patient over barrels, boxes, or a fence.

- Burns and Scalds. Cover with cooking soda and lay wet cloths over it. Whites of eggs and olive oil. Olive oil or linseed oil, plain or mixed with chalk or whiting. Sweet or olive oil and lime water.

Lightning. Dash cold water over a person struck.

Sunstroke. Loosen clothing. Get patient into shade and apply ice-cold water to head. Keep head in elevated position

Mad Dog or Snake Bite. Tie cord tight above wound. Suck the wound and cauterize with caustic or white-hot iron at once, or cut out adjoining parts with a sharp knife. Give stimulants, as whiskey, brandy, etc.

Stings of Venomous Insects, etc. Apply weak ammonia, oil, salt water, or iodine

Fainting. Place flat on back; allow fresh air and sprinkle with water. Place head lower than rest of body.

## COMMON STAINS AND HOW TO REMOVE THEM.

## (By the U. S. Department of Agriculture.)

Blood and meat juice. Use cold water; soap and cold water; or starch pastc.

Bluing. Use boillng water.
Chocolate and cocoa. Use borax and cold water; bleach if necessary.

Coffee and tea. (Clear.) Use boiling water; bleach if necessary. (With cream.) Use cold water, then boil ng water, bleach if necessary.

Coffee and tea. (Clear.) Use boiling water; bleach if necessary. (With cream.) Use cold water, then boiling water; bleach if necessary.

Cream and milk. Use cold water, then soap and cold water.

Egg. Use cold water.
Fefilt and fruit juices. Use boiling water; bleach If necessary.

Grass.r Use cold water; soap and cold water; alcohol; or a bleaching agent.

Grease and oils. Use French chalk, blotting paper or other absorbent; or warm water and soap; or gasoline, benzine, or carbon tetrachloride.

Iodlne. Use warm water and soap; alcohol; or ammonia.

Ink. Try cold water; then use an acid or bleach if negessary.

Iron. Use oxalic acld; hydrochloric acid; salts of lemon; or lemon juice and salt.

Kerosene. Use warm water and soap.
Lampblack and soot. Use kerosene, benzine,
chloroform, ether, gasoline, or carbon tetritchloride. Medicine. Use alcohol.
Mildew. If fresh, use cold water; otherwise try to bleach with Javelle water or potassium permallganate.

Paint and varnish. Use alcohol, carbon tetrachloride, chloroform, or turpentine.

Perspration. Use soap and warm water; bleach in the sun or with Javelle water or potasslum permanganate

Pitch, tar, and whecl grease, Rub with fat then use soap and warm water; or benzine, gasoline, or carbon tetrachlorlde.

Scorch. Bleach in the sunshine or with Javelle water.

Shoe polish. (Black.) Use soap and water; or turpentine. (Tan.) Use alcohol.

Syrup. Use water.
Stove polish. Use cold water and soap; or kerosene, benzlne, or gasoline

Vaseline. Use kerosene or turpentine.
Water. Steam or sponge the entire surface of water-spotted materlals.

Wax. Sorape off as mucli as possible. Use French chalk, blotting paper or otner absorbent with a warm iron; or use benzine or gasoline. If color remains, use alcohol or bleach.

## Sporting Cuents and Recoris.

## Amateur and professional sports throughout the

 United States continued to grow ln interest both from the spectator's and competitor's basis during the season of 1922. Reports from every section of the country showed a steady development and spread in all forms of games and sport and attendant enthusiasm therein. New gate receipt records were made in the World's Baseball Series and major and minor leagues reported unusually large gate receipts during the pennant seasons.Nationai golf and tennis tournaments drew record-breaking galieries, and footbali games ln all portions of the country, espcclaily those with intersectional intercst, filled huge stadiums to overflowing. Classic races of the turf season brought thousands of racing enthusiasts to the scene of
various derbies and stake events. Boxing bouts of titular calibre proved remarkabiy profitable to both contestants and promoters.

Competition was both brilliant and sensational in almost every branch of sport. A host of new records was made by American swimmers, male and female. A number of lnternational track and fleld records were broken by coliege and club athletes.

While the Davis Cup, emblematic of the world's team tennis championship, was the only famous international trophy in competition, there was no lack of international competltion. American golfers took part' in Great Britain's championshlps and the Brltlsh players competed in the United States title play later in the year. British yachtsmen entered a team in the international slx-rnetre races on Long Island Sound and English, Irish and Argentine polo fours piayed in the national pelo tourlament.

## BASEBALL

BaLl playing was popular in Egypt 4,000 years ago, and a leather ball has been used ever since ln almost every country, lncluding China, but batting the bali is a modern innovation. According to the commission, appointed at A. G. Spalding's suggestion in 1907, baseball originated in the United States, and the first scheme for playing it was deviscd by Major Gen. Abner Doubleday, in 1839, at Cooperstown, N. Y. The game was developed from Town Ball into a diamond-shaped fieid, and a code of piaying rules was adopted by the Knickerbocker Base Bali Club of New York, in 1845. In 1858 the National Association of Base Bail Players was formed, and the first game with an admission fee was piayed July 20, at the Fashion Race Course, near Jamaica, L. I., between the New York and Brooklyn clubs. The first tour of an organized club was made through New York State, in 1860, by the Excelsiors of Brooklyn. The first Eastern ciub to tour the West was the Nationai, of Washington, D. C. The first professional baseball club (1869) was the Clncinnati (Red Stockings), formed in 1866 as an amateur organlzation. The National Association of Professional Base Ball Players was formed in 1871 (with 10 clubs); the National League of Professional Base Ball Clubs, in 1876; the American Association, in 1882; the American League, ln 1902.

The World's Series of 1922 was played betwcen the New York National Leaguc and the New York American League Clubs, respectlve pennant winners in their icagues. Ali games were played at the Polo Grounds, New York City, the National League Club (Giants) won in four games to none, with the second contest ending in a $3-3$ tle due to darkness. Prominent betting Commissioners rulcd that where
a wager was made that one team would win four straight games, those who bet on Giants won, the tie game not counting agalnst the sequence of victorles. The record by games:

## HOME RUN RECORDS.

Although "Babe" Ruth, of the New York Amerieans did not approach his 1921 record of 59 home runs, due in part to suspensions and other causes, the 1922 season was notable for the number of home
runs made in the major leagues. The records of some of the leading hitters in this department of the game follow:

AMERICAN LEAGUE.

## ROWINC.

## YALE VS. HARVARD-VARSITY EIGHTS.

Yale and Harvard varsity eight-oared races began in 1852 on Lake Winncpesaukee, at two miles, when Harvard won. In 1855 the course was changed to Springfield and lengthened to three miles. Lake Quinsigamond was the scene
for nine years, and Lake Saltonsall for 1869. After an interval of seven years the crews in 1876-77
went to Springfleld, Mass., when the four-mile course was inaugurated. In 1878 the crews changed again to New London, Conn. The official records follow:

| Date. | Won By. | TIME. |  | Date. | Won By: | Time. |  |

Winner-Vagrant.
INTERNATIONAL FISHING SCHOONER CHAMPIONSHIP.

Held off Gloucester, Mass., Oct. 21-26. Course 40 miles; resulta:

|  | Elapsed Time. |  |  |
| :---: | :---: | :---: | :---: |
|  | 1st Race. | 2d Race | 3d Race. |
| Blue Nose (Can.) | $\begin{aligned} & \text { H. M. S. } \\ & 5.42 .10 \end{aligned}$ | $\begin{aligned} & \text { п. M. S. } \\ & 5.57 .41 \end{aligned}$ | H. M. S. 4.48 .38 |
| Henry Ford (U. S.) | 5.29 .25 | 6.05 .04 | 4.56 .27 |

The internatlonal trophy was awarded to Captain Angus Walters, of Lunenberg, together with a purse of $\$ 3,000$. Capt. Clayton Morrissey, of the Henry Ford received $\$ 2,000$. The first race of the serles was declared no-race when the schooners crossed the starting line and continued disregarding the race committee's recall signals. The Henry Ford defeated the Blue Nose in this unofficial contest which had no bearing on the final result.

## RACQUETS, COURT TENNIS, SQUASH.

## COURT TENNIS.

World's Professional Championsiiip, won by $G$. F. Covey, England, defeating W. A. Kinsella, 7 sets to 3.

National Championships. Singles-won by Jay Gould, defeating Hewitt Morgan, 6-2, 6-6, 6-0. Doubles-won by Jay Gould and J. W. Wear, defeating G. Fearlng and D. P. Rhodes, $6-5,6-0,6-1$.

Enolish Championship-won by E. M. Baerlein, defeating $W$. Renshaw, $6-5,5-6,6-1,6-0$.

## RACQUETS.

National Singlcs Championship-von by C. C

15-4. Doubles-C. C. Pell and S. G. Mortimer defeated Jay could and J. W. Wear, $12-15,17-15$, $15-7,7-15,15-3$.

Gold Racquet Championship-won by C. C. Pell, defeating Hewitt Morgan, 15-5, 5-15, 15-11, $13-15,15-12$.

English Championshtp-won by C. N. Bruce, defcating E. M. Baerlein, $15-2,15-10,15-9$.

## SQUASH—RACQUETS.

National Singles-won by S. W. Pcarson, defeating Morton Newhall, 15-5, 17-14, 15-11. Class $B$ Championship-won by G. E. Abbot, defcating
W. Rand, Jr., 15-7, 5-15, 15-9. 15-8.

## MOTOR BOAT RACINC.

Until 1921 the Gold Cup Trophy was for boats under 40 feet in length, with unlimited power. Very costly racing machines were' developed under those ruies. Under the new rules the boats must be under 26 feet in length and the cublc capacity of the engine is limlted to 625 cubic inches. Such engines average 100 horse power, and the average speed of a
boat is not much over 40 miles an hour, as against 70 miles an hour under the old rules.

There were no races for the Harmsworth Trophy, emblematic of the world's speed champlonship, in 1922. The National Gold Cup Trophy race, heid at Detroit, Sept: 1-4, was the leading event of the season. Result:

THREE HEATS OF THIRTY MILES EACH (GOLD CUP TROPHY).

Heid at Buffalo, sept. $14,15,16$. Three heats of 20 miles each. Result:

## PUGILISTIC CHANPIONS.

All attempts to designate and classify the pugilistic champions and title holders are more or less arbitrary because of the fact that fev such champions won and defended the championships at the same weight. Among the lighter weight boxers it is not at ali unusual for a pugilist to be forced from one class into the next higher by growth and increased welght. The following list, dating from 1890. Is generally accepted by critics and boxers as being the correct classification, although holders cid not always win title from previous champions:

HEAVYWEIGHTS (over 158 lbs.)-1890-1892, John L. Sullivan; 1892-1897, James J. Corbett; 1897-1899, Robert Fitzsimmons; 1899-1906, James J. Jeffries; 1906-1908, Tommy Burns; 1908-1915, Jack Johnson; 1915-1918, Jess Willard; 1919-1922, Jack Dempsey.

MIDDLEWEIGHTS (158 lbs.) -1890-1897, Robert Fitzsimmons: 1897-1907, Tommy Ryan; 1907-1908, Stanley Ketchel; 1908, Bill Papke and Stanley Ketchcl; 1908-1910, Stanley Ketchel; 1911-1913, claimed by Frank Klaus, Mike Gibbons, Ed McGoorty and Geo. Chip; 1914-1917, Ai' McCoy; 1917-1920, Mike O'Dowd; 1921-1922, Johnny Wilson.

WELTERWEIGHTS ( 145 lbs.) - 1890-1893, no recognized champion; 1894-1896, Tommy Ryan;

1896-1897, Kid McCoy; 1898-1900, Billy Smitin; 1900, Rube Ferns: 1901, Matty Matthews and Rube Ferns; 1901-1904, Joe Walcott: 1904-1908, Dixie Kld; 1914-1916, Kid Graves; 1916, Jack Britton; 1917-1918, Ted (Kid) Lewls; 1919-1922, Jack Britton, Mickey Walkcr.

LIGHTWEICHTS (133 1bs.)-1890-1893, Jack McAuliffe; 1893-1899, Kid Lavigne; 1899-1902, Frank Erne; 1902-1908, Joe Gans; 1908-1910, Battiing Nelson; 1910-1912, Ad Wolgast; 19121914, Willie Ritchie: 1914-1917, Freddie Weish; 1917-1922, Benny Leonard.

FEATHERWEIGHTS (122 lbs.)-1890-1892, no rccognized champlon; 1892-1897, George Dixon; 1897, Solly Smith; 1898, Solly Smith and Dave Sullivan; 1898-1900, George Dlxon; 1900-1901. Terry McGovern; 1901-1904, Young Corbett; 19041908, Tommy Sullivan; 1908-1911 Abe Attell; 1911-1922. Johnny Kilbane.

BANTAMWEIGHTS ( 116 ibs.)-1890-1892, George Dixon; 1892-1894, no recognized charnplon: 1894-1898, Jimmy Barry; 1898-1901, no recognlzed champion; 1901-1903, Harry Forbes; 1903-1905, Frankie Nell; 1905-1907, no rccognized champion; 1907-1913, Johnny Coulon; 1914-1915. Kid Williams 1916-1920, Pete Herman; 1920-1921, Joe Lynch: 1921, Pete Herman, Johnny Buff; 1922, Johnny Buff, Joe Lynch.

Norman Seagram's Canadian tour in England, won 0, lost 4, drawn 7.

Frankford Cricket Club won the Halliax Cup, New Yorlk being represented by Statcn Island, thls being the first time the Staten Isiand Club tock part in the competition. J. L. Evans of the Merion Club won the batting average and R. Waad of the Frankford Club the bowling average.

Yorkshire won the English county ehampionship in 1922

The highest individual scores of the season were hit by J. L. Evans, 135 not out, in the United States and $P$. P. Barnett, 184 not out, in Canada.
H. Livingston of the Pittsburgh Field Club established a record for the United States by scoring three consecutive centuries in one week in a tournament held in Chicago in August, 1907; a simila. teat was performed by H. N. R. Coblet in Canada in a tournament held in Vancouver, British Columbia, in August, 1906 . H. V. Hordern of the University of Pennsylvania established a record for the United States and Canada by securing 213 wickets during 1907. J. B. King, F. F. Kelly and H. Rushton are the only three bowlers who have taken over 2,000 wickets. A. C. MacLaren scored 424 for Lancashire vs. Somerset at Taunton, England, July, 1895-the record in a first-class match. A. F. J. Collins, playing at Clifton, June, 1899, for Clarke's House against North Town, scored 628, not outthe record in any match. Melbourne University scored 1,094 runs against Essenden at Melbourne (Australia), 1898 - the highest authenticated record. In a match between A. E. Stoddart's English team and New South Wales, 1,739 runs were scored-a record in first-class cricket. The longest partnership on record was 623 runs by Capt. Oakes and Private Fitzgerald, First Royal Munster Fusiliers vs. Army Service. Corps, at Curragh, 1895. In a small match in Australia F. R. Spofforth bowled down all 10 wickets of his opponents in each inning-a feat without parallel. F. R. Spofforth on the Australian. tour in 1878 took 764 wickets-a world's reeord. Dr. W. G. Grace, the world's greatest ericketer, died Oct. 23, 1915. He hit up 217 eenturies during his career, which will not likely ever be equalled.

Best records in the United States and Canada are by G. S. Patterson eleven playing against A. M. Woods eleven at Philadelphia, seoring 689 runs, in 1894. Australians against Vaneouver scored 633 for 8 wickets in 1913 . J. B. King scored 344 runs for Belmont against Merion B. in 1906. W. Robertson, 206, not out, and A. G. Sheath, 118 , not out, scored 340 runs in partnership, without the loss of a wicket, at San Francisco in 1894. Smallest score, Americas 0 against Roseville at Guttenberg, N. J., in 1897. The smallest score in international match in United States, West Indians 13 against Australians, 1913. Smallest score in Canada, Winnipeg 6 against Australians, 1913. Largest score in the Metropolitan District Cricket Leagle Championship, New Jersey Athletic Club 385 runs for 5 wickets against Manhattan, at Bayonne, N. J., 1897.

Seven centuries in a season, P. J. Higgins of Los Angeles in 1912, 159, 100, 100, 121, 182, 110 , 240.
G. S. Patterson of the Germantown C. C. scored 1,748 runs in season of 1892 - a record tor the United States. Rev. I. W. Terry of Toronto C. C. scored 1.509 runs in season of 1892 -a record tor Canada.

## TRAPSHOOTANG.

The Twenty-third Grand American Tournament, at which the National Trapshooting Championship titles are contested for, was held at Atlantle City, N. J., September 11-16, 1922. A record was established for the number of targets thrown during the tournament-413,000 being thrown from 16 traps. There were 588 individual entrles in the Grand American Handicap event. and this was won by J. S. Frink of Worthlngton, Minn., with a score of 96 from the 22 yard mark, after a shoot-off with I. G. Sefing ( 16 Yds.), E. T. Hall ( 21 Yds.), and H. B. Simpkins, ( 18 Yds.) Frink broke 25 stralght in the tie, the scores of the others being 23,22 and 20 respectively.

The winners of the several national championship titles competed for at this tournament were as follows

National Singles, 16 yards, (Amateur)-Dave Fauskee, Warthington. Minn. Score $197 \times 200$. (Won from F. M. Troeh, Vancouver, Wash., in shootoff 25 to 24.)

He defeated Thomas Hueston, former champion, at New York, 450 to 133, lncluding a new world's record run of 100 balls in the final night's play. On May 6 he defeated Walter Franklin at New York 450 to 216. Bennie Allen also lost to the champion at Philadelphia on Oct. 28 , by a score of 257 to 450 .

John Layton, three-cushion champion, defended his title successfully, defeating Alfredo Dc Oro 180 to 135 at Milwaukee, March 1, and Charles McCourt 180 to 139 at Sedallà, Mo., May 3.

## BEST RECORD AVERAGES.

Professional-200 at 18.2, Jacob Schaefer 2d, Chlcago, Nov. 19, 1921; 40 at 18.1, Jacob Schaefer, Chicago, 1898; 10 at straight cushlon caroms, J. Schaefer, New York, 1883; 37.97 at champion's game, G. F. Slosson, Paris, 1882; 52 at 14.1, George Sutton, Baltimore, Md., Oct. 28, 1914.

Amateur- 57.14 at 14.2, Calvin Demarest, Chicago, 1908; 33.33 at 18.2, Lucien Rerolle, Paris, 1903.

## BEST RECORD RUNS

Professional-436 at 18.2, Jacob Schaefer 2d, New York, March 5,1921 ; 155 at 18.1, Wlllla Hoppe, Phlladelphia, Pa., Nov. 29, 1910; 246 at 18.2, Maurice Vignaux, Chicago, 1883, when record balkline was first played; 303 at 14.1, Wille Hoppe, New York, Aprll 23, 1914; 85 at straight cushion caroms, F. C. Ives, Boston, 1906; 398, champion's game, Paris, 1882 ; 2,196 at Engllsh billiards, by George Gray, Australla, at London, March 18, 1911.

Amateur-175 at 18.2, L. Rerolle, Parls, 1908; 202 at 14.2, Calvin Demarest, Chicago, 1908.

Three-cushion-Best run, 18, Pierre Maupome, St. Louis, Mo., Sept. 18, 1914, in exhibition; 18, Charles Morin, St. Louis, Mo., May 20, in competltion.

## POOL.

Best run under new rule, one ball always on table -Amateur-74, Morton Priilips, Chicago, Feb. 13. 1913; in amateur clty champlonship, Professional -100-Ralph Grecnleaf, at New York, Feb. 24, 1922, in match against Thomas Hueston.

## COLLEGE ATHLETICS.

Intercollegiate Association of Amateur Athletes of Ameriea. Forty-sixtl annual ehampionship games held at Cambridge, Mass., May 26 and 27 . Seore by events:

## Results by events:

Results by events:-100-Yard Dash-Won by J. A. Le Coney, Lafayette; F. Kovejoy, Cornell, second; E. R. MeKlin, Princeton, third; E' Sudden, Stanford, fourth; E. J'. Rusnack, Yale, fifth. Tlme --9 7-10s. (nev intereolleglate and eollegiate record). Former intereollegiate mark, $94-5 \mathrm{~s}$, held jointly by Le Coney, Wefers, Cralg and Patterson; colicglate reeord was held jolntly by Wefers, Sehick and Patterson. 220-Yard Dash-Won by J. A. Le Coney, Lafayette; E. Sudden, Stanford, second; F. K. Lovejoy, Cornell, third; M. M. Kirksey, Stanford. Rourth; S. Feldman, Yale, fifth. Time 21 3-10s. 440 Yard Dash-Won by J. W. Driseoll, Boston College; W. E. Stevenson, Princcton, seeond; O. O. Hendrixson, California, thlrd; A. S. Monle, Syraeuse, fourth; C. F. John, Cornell, fith. Time-491/2s. HalfMile Run-Won by L. A. Brown, Pennsylvanla; Penn State, third; C. C. Carter, Cornell, fourth; A. B. Helrreh, Penn State, fifth. 'Tlme-1m. $551-5 \mathrm{~s}$. One-Mile Run-Won by M. L. Shields, Penn State; M. Douglas, Yale, second; E. B. Kirby, Corneli, third; J. W. Burke, Harvard, fourth; E. B. Strickler, Cornell, fifth Time 4 m . 18-5-5s. Two-Mile RunWon by W. Higgins, Columbia; R. B Buker, Bates, seeond; R. Moore, Columbla, third; C. M. Dorr, Californla, fourth; N. P. Brown, Cornell, fifth. Time- 9 m .28 1-5s. 220-Yard Hurdles-Won by J. C. Taylor, Prineeton; H. H. Meyer, Rutgers, second: C. Haynes, Stanford, third; H. H. Hile, Penn State, fourth; H. N. Stone, Cornell, fifth. Tlme-23 9-10s. 120 -Yard High Hurdles-Won by C. R. Hauers, Harvard; W. E. Massey Princeton, second; S. H' Thompson, Prineeton, third; R. V. Merrick, Boston College, fourth; (C.'H. Kauffman, Penn State, disqualified). Time- $153-10 \mathrm{~s}$.

FIELD EVENTS-Broad Jump-Won by R, L. Legendre, Georgetown, $23 \mathrm{ft} .71 / 2 \mathrm{in}$.; A. E. Rose, Pennsylvanla, $23 \mathrm{ft}^{2} 21 / 2$ in., second; D. B. Lourie, Prineeton, 22 ft . $113 / 4$ in., thlrd; J. W. Merchant, California, $22 \mathrm{ft} .71 / 4 \mathrm{in}$., fourth; P. Oourtois, New York University, 22 ft . $1 / 4 \mathrm{in}$., fifth. High JumpWon by L. T. Brown, Dartmouth, $6 \mathrm{ft} .45-8 \mathrm{in}$. (a new intercolleglate record) ; tie between R. H. Clark, Amherst, and H, P. Muller, Californla, 6 ft. 2 5-8 in., for gecond; $P$. B. Nicols, Cornell, 6 ft. $13 / 4 \mathrm{in}$., fourth; T. J. Treyer, Callfornia, $6 \mathrm{ft} . \mathrm{m}^{3 / 4}$ in., fifth. Javelin Throw-Won by G. E. Bronder, Pennsylvania, $185 \mathrm{ft} .85-8 \mathrm{in}$.; S. 8. Sorcnti, California, 185 $\mathrm{ft} .73 / \mathrm{in}$., seeond; J. F. Hanner, Stanford, 180 ft . $83 / 4$ ln., thilrd; J. W. Merchant, California, 177 ft .10 in., Sourth; S. H. Downs, Cornell, 169 ft .11 in ., fifth. pole Vaulf-Won by A. G. Norris, California, 12 ft . 9 in,: tie among E. V. Gouinlock, Cornell, K .1 . Libbey, Dartmouth, W. Black, Stanford, and T. Gardner, Yale, 12 ft .6 in., for sccond. Discus Throu-Won by G. Hartranft, Stanford, 140 ft . 1-8 in.; H. P Muiler, California $134 \mathrm{ft}, 31 / 4 \mathrm{in}$, second: W. V. Miller, IIarvard, 130 tt. $3.5-8 \mathrm{in}$. third; R. A. Berkey, California, 129 feet 9 7-8 in, fourth; R. L. Legendre, Georgotown, 127 it. $71 /{ }^{1}$ in. fifth. Shot Put-Won by $G$. Hartranft, Stanford, $48 \mathrm{ft} 61 / 2 \mathrm{ha}$; J. W. Merchant, Callornia, 44 ft . $101 / 2 \mathrm{in}$., sceond; J. I. Witter, California, 44 tt. 8 3-8 in., third: G. E: Bronder, Pennsylvania, $44 \mathrm{ft} .71 / \mathrm{in}$. Pourth; S. H. Thompson, Prinecton, 43 ft .9 1-8 ln., fifth. Hammer

Throw-Won by J. W. Merchant, University of California, 171 itt. 2 in.; J. F. Brown, Harvard, 159 ft. 6 in., seeond; H. F. Baler, Prlnceton, 155 ft. $111 / 4$ in., thlrd; F. D. Tootel, Bowdoin, 155 ft. 3 in., fourth; H. Emery, Prinecton, 150 ft., fifth.

BEST I. C. A. A. A. A. RECORDS.
100-Yard Dash-9 7-10s., J. A. Le Coney, Lafayette, Cambridge, Mass., May 27, 1922. 2'20-Yard Dash-21 1-5s., B. J. Wefers, Georgetown University, New York, May 30, 1896, and R. C. * Dead heat, stakes divided.

NOTE. The Derby of 1915-6-7-8 was run at Newmarket as the "New" Derby. The 1920 Derby was won in record time of 2 minutes $344-5$ seconds; previous best time being Lemberg's, 1910, 2 minutes $351-5$ seconds.

The 1921 Derby was run on June 1. Humorist at 12 to 1 in the betting, won in a hard drive by a neek from Viscount Astor's Craig an Eran, while three lengthis baek Joseph Watson's Lemonora finished third, and Allen Breck, the favorite, fourth. A. K. Macomber's The Bohemian, an Ameriean bred horse was never prominent and finished among the also rans. The time was 2 minutes, 45 seconds. The King and Queen were present.

THE 1922 DERBY.
The 1922 Derby was won in a canter in the record
time of 2 minutes, $343-5$ seeonds. Tamar, owned by Lord Astor, was seeond; Craigangower, third; and the bettlng favorite, St. Louis, fourth.

The Derby was instituted by the tweifth Eari of Derby in 1780. A year earlier the same racing peer had started tile Oaks, named after his piace at Banstead Downs-the Valley of Lambert's Oaks Lord Derby won his own race in 1787 with Sir Peter Teazie, named thus in honor of his wife. who was Miss Farren, and had been acting as Lady Teazle in "The Schooi for Scandai," when Lord Derby saw her for the first time. On May 18, 1847. Lord George Bentinek moved the adjournment of the House of Commons over Derby Day. This motion was moved each year until 1879

The Derby course on Epsom Downs is left-handed, and eonsists of two straights and a turn-the historic Tottenham Corner.

The winner of the Caicutta sweepstakes, a Liver-
pooi woman, Miss Gwendoline Thomas, thirty-four, pooi woman, Miss Gwendoline Thomas, thir

Miss Thomas would have won $£ 122,000$ but sle
soid half iner tieket for $£ 3,000$ to a Calentta man Her winnings, therefore, anount to $£ 64,000$ and are free from income tax, as. the autiorities do not reoognize income from such a source.

Intercoilegiate football developed marvellous popuiarity in 1922, record throngs attending many big games in ail parts of the country and the largest stadiums were unabie to accommodate-ail who desired to witness the piay: The scores of $a^{\prime}$ few of the leading coilege teams follow:

RECORDS OF CHIEF FOOTBALL GAMES IN PAST YEARS.
(During America's participation in the World War most of the big college teams did not play.)

## LACROSSE.

Lacrosise gaincd further popularity as a college sport during the scason of 1922, due in part to the tour of the oxford-Cambridge Unlversity combination from England. The northern sectlon championship of the Intercollegiate League was won by the Syracuse University team without a defeat. The southern section play resulted in a tie, the University of Pennsylvanla team winning in the playoft. The record of the leading college twelves, including non-league games, follows:

## WOMEN'S ATHLETICS

Athletics for women received a great impetus throughout the country during the season of 1922 when a team of echoolgirl athletes representing the United States competed in the first international meet held in Paris, August 20, and won second place. Development of track and field sports for women is progressing in all parts of the country and it is expected that the Amateur Athletic Union will assume jurisdiction of Women's athletics in the United States before 1923 and that the country will be represented by a women's team in the Olympic Games of 1928 at Amsterdam when events for women are planned for the program at those games

## INTERNATIONAL MEET

First international games for women held at Paris, Aug. 20. Point scores: England 50; United States 31; France. 29, Czechoslovakia 12; Switzerland 6. Results of events:

## ARCHERY.

The 42 d Annual Championship Tournament of the National Archery Associatlon of the Unlted States, was held in Cooperstown, New York, August 22 to 25 and was known as "The Robin Hood Tournament." Chlef among the new trophies was the Douglas Falrbanks' Robin Hood Trophy. Other new trophies were the Mald Marlon Cup presented by Wallace Bryant of Washington, D. C.. the Leatherstocking Cup presented by James Fenlmore Cooper of Cooperstown, New York, and a cup also presented by Wallace Bryant for the best score at 80 yards.

Competition for the men's championship narrowed down to the 1921 champion, James S. Jiles of Pittsburgh, Pa. and Dr. Robert P. Elmer of Wayne, Pa., Who had held the championshlp for a number of years previous to 1921, Dr. Elmer finally winning. Among the ladles Miss Dorothy D. Smith of Newton Center, Mass., was successful in defcnding her championship tltle.

In connectlon with Dr. Elmer's shooting he won the Double York Round with a score of 1,039. In two previous championship tournaments Dr. Elmer had made over 1,000 in the Double York Round, the present tournament being the third at which he had accompllshed this feat. H. A. Ford, of England, is the only other archer who ever made over 1,000 in the Double York Round at three championship meets.

The only records which were broken were in the team shoots. The Robin Hood Team from the Wayne Archers, and composed of Dr. R. P. Elmer, W. H. Palmer Jr., J. M. Mauser and W. H. Palmer 3d, not only won the championship for the men's team shoot, but broke the previous record of 1,680 by making a total of 1,691. The ladles' team from the Newton Archers, of Newton, Mass., composed of Miss Dorothy D. Smith, Mrs. L. C. Smlth, Mlss Norma Pierce and Mrs. E. W. Frentz, also broke the women's team record of 1,517 by making a new score of 1,525 .

A special contest for the Douglas Fairbanks' Robin Hood Trophy was staged, conslsting of a long-range wand shoot. A band two inches wide was placed vertically across each target and the contestants
each shot 48 arrows at a distance of 100 yards. Only the arrows which lodged $\ln$ the narrow band counted This event was won by Dr. R. P. Elmer with three hits in the band.

A special event was also staged for the Leatherstocking Cup. This event was participated in by both men and women, the men shootlng 48 arrows at 60 yards and the women 48 arrows at 40 yards. The cup was won by W. H. Palmer Jr., of Wayne Pa., with a total of 273 points. Miss Dorothy D Smith was a close second with 266 points

The winners in the varlous events are as follows:
Men's Championship-Dr: R. P Elmer, Wayne Pa., 2,488 points.

Women's Championship-Miss Dorothy D. Smith, Newton Center, Mass., 1,616 points.

Double Fork Round-Dr. R. P. Elmer, 219 hits, score, 1,039.

Double American Round-Dr. R. P. Elmer, 178 hits, score, 1,052.

Double National Round-Miss Dorothy D. Smith, 120 hits, score, 552.

Double Columbia Round-Miss Dorothy D. Smith 140 hits, score, 804

WINNING MEN'S TEAM.
Robin Hood Team From Wayne Archers-R. $\mathbf{P}$ Elmer, 93 hits, score, 523; W. H. Palmer Jr., 92 hits, score, 476 ; J. M: Mauser, 89 hits, score, 463 ; .W. H Palmer $3 \mathrm{~d}, 53$ hits, score, 229.

WINNING WOMEN'S TEAM
Neuton Archers-Miss Dorothy D. Smith, 90 hits score, 400; Miss Norma Plerce, 82 hlts, score, 416 Mrs. E. W. Frentz, 81 hits, score, 403; Mrs. L. C. Smlth, 72 hits, score, 306.

Miller and H. Westcoatt), sccond. Time Not awarded.

## WORLD AND AMERICAN SWIMMING RECORDS.

World swimming records must be officially recognized by the International Amateur Swimming Federation. The Federation meets annually and records are frequently recognized a year or more after being made. Many American records made in 1922 are also world records as yet unsanctioned. American records are based upon short courses, from 60 feet to 220 yards, and long courses, from 220 feet to 220 yards.

WORLD'S RECORDS TO JANUARY 1, 1921.

## AMERICAN AMATEUR TRACK AND FIELD RECORDS.

## RELAY RACING.

440 yards relay (outdoor-4 men, each ran 110 varcls)-422-5s., New York A. C. team (B. J. Wefers, Jr., F. K. Lovejoy, H. Ray Edward Farrell), Pasadena, Cal., Juiy 5,1921 .

880 yards relay (outdoor- 4 men, each ran 220 yards) - $1 \mathrm{~m} .272-5 \mathrm{~s}$., New York A. C. team (B. J. Wefers, Jr., F. K. Lovejoy, H. Ray, Edward Farreil), Pasadena, Cai., July 5, 1921.

880 yards relay (indoor, with baton -4 mcn , each man ran 220 yards) 1 m . 35 2-5s., Xavicr A. A. team (C. B. Clark, H. Heiland, E. Iohse, W. J. Keating), New York City, Feb. 21, 1912; (outdoor) Im. 29 2-5s., University of Chicago team (F. T. Ward, B. Dismond, M. Baranak, D. Knight), Chicago, Iil., June 12, 1915.

1 mile (outdoor, with baton- 4 men, each man ran 440 yards -3 m . $16 \quad 2-5 \mathrm{~s}$., Amcrican Legion, State of Pennsylvania, team (C. D. Rogers, Eari Eby, Larry Brown, R. S. Maxam), Philadelphia, June 11, 1921; (indoor) 3 m . 21s., Ail-Buffaio team (J. W. Habberfield, W. F. Koppish, M. J. Sutton C. H. Brandt), Buffaio, N.'Y., April 17, 1920.

2 miles ( 4 men, each man ran 880 yards) -7 m . 49-5-5s., University of Pennsyivania team (Meredith, Holden, MeMulien, Browri), Philadelphia, April 29, 1922; (indoor) '7m. 54 4-5s., Penn State College team, New York, February 1, 1922.

4 miles (ontdoor- 4 men, each man ran 1 milc) -17 m . 51 1-5s., Boston A. A. tcam (Maboney, Marceau, Powers, Hediund), Easton, Pa., June 17, 1913; (with baton), 17 m . 51 1-5s., Corncil University team (G. Tayior, J. Hoffmire, L. Windnagel, D. Potter), Philadeiphia, Pa., April 29, 1916.

4 miles (indoor-4 men, cach man ran 1 mile) 17 m . 43 2-5s., Corneli University team (H. N. Putnam, L. Finch, T. S. Berna, J. P. Jones), Buifaio, N. Y., March 1, 1912 .

Mediey reiay-(outdoor) $7 \mathrm{~m} .44 \quad 2-5 \mathrm{~s} .$, IrishAmerican A. C. team (J. J. Archer, 220 yards; J. M. Rosenberger, 440 yards; A. R. Kiviat, 880 yards; J. Bromilow, 1 mile), Boston, Mass., July 24. 1909; (indoor) $7 \mathrm{~m} .382-5 \mathrm{~s}$., All-New York team (F. P. McNally, 220 yards; J. M. Rosenberger, 440 yards; J. P. Sullivan, 880 yards; A. R. Kiviat, 1 milic), Buffaio, N. Y., April 7, 191i.

## HURDLE RACING.

70 yards (indoor)-6 hurdles, 3 ft. 6 in. high, 10 yards apart, 10 yards to first hurdie, 10 yards
to finish-9 1-5s., E. F. Smalley, Univ. of Pennsyl vania, at Buffalo, N. Y., Feb. 21, 1920; Waiker Smith, Corneli Univ., at New York City, March 13, 1920; (indoor) 5 hurdles, 3 it. 6 in. high, 10 yards apart first hurdle 15 yards from starting point and last hurdle 15 yards before finishing line-84-5s:, Waido Ames, Chicago A. A., Chicago, Mareh 26, 1921.

120 yards high hurdles (outdoor)- 10 hurdles, 3 ft .6 in . high, 10 yards apart, first hurdle 15 yards from starting point and last hurdle 15 yards before finishing ine-14 2-5s., Eari J. Thomson, Dart mouth College, Philadelphia, Pa., May 29, 1920.

220 yards- 10 hurdles, 2 ft .6 in. high (straight away), 23 3-5s. (outdoor), A. C. Kraenzlein, New York City, May 28, 1898; J. I. Wendell, Cambridge, Mass., May 31, 1913.10 hurdles, 2 ft. 6 in. high, 20 yards apart, first hurdie 20 yards from startin! mark and the last hurdle 20 yards before the finishing line, Robert Simpson, University of Missouri, Coiumbia, Mo., May 27 , 1916 . 10 hurdles, 2 ft , 6 in high, 244 4-5s, (outdoor, around a turn), John J. Eiler, Irish-American A. C., Travers Island, Sept. 19, 1908; John J. Eller, Pittsburgh, Pa.. July 1, 1911; John J. Eller, Celtie Park, L. 1., Ser. 16. 1911; F. W. Kelly, University of Southern California, Los Angeles, Cal., May 21, 1915.

440 yards (outdoor) - 10 hurdies, 3 ft . high, first hurdle 40 yards from start. 40 yards between each hurdle and 40 yards to finish- 54 1-5s., J. K. Norton, Olympic Club, San Francisco, at Pasadelu, Cai., June 26, 1920.

## JUMPING.

Standing high jump, without weights (outdoor) $-5 \mathrm{ft} .3-54 \mathrm{in}$., Leo Goeh. ing, Travers Isiand, N. Y., June 14, 1913 ; (indoor), 5 ft. 4 1-8 in., Platt Adams, New York City, Jan. 25, 1913.

Running high jump, without weights 6 ft 7 $5-16$ in., (outdoor)-E. Beeson, Olympic Ciub, Berkeiey, Cai., May 2, 1914.
Running high jump (indoor), without weights6 ft. 4 3-4 in., J. L. Murphy, New York, Feb. 1, 1922. One standing broad jump, without weights11 ft. 4 7-8 in., Ray C. Ewry, St. Louis, Aug. 29, 1904. Running broad jump, without weights- 25 ft . 3 in., Edward O. Gourdin, Cambridge, Mass., July 23,1921 .

Running hop, step and jump, wlthout weights$50 \mathrm{ft} .11 \mathrm{in} ., \mathrm{D} . \mathrm{F}$. Ahearn, Celtic Park, L. I., May $30, .1911$.

## THROWING THE DISCUS.

Throwing the discus, Olympic style, weight 4 lbs. $61-2 \mathrm{oz}$. ( $8 \mathrm{ft} .21-2 \mathrm{in}$. circle) $-156 \mathrm{ft} .13-8 \mathrm{in} .$, James Duncan Celtic Park, L. I. May 27, 1912.

Throwing the discus from 7 -ft. circle- 145 ft. 9 1-2 in;, James Duncan, Celtic Park, L. I., June 2, 1912 .
Throwing the discus $88 \mathrm{ft} .2 \mathrm{1-2} \mathrm{in}$. circle, right and left hand), 252 it. 8 7-8 in., James Duncan, Celtic Park, L. I., May 27, 1912. Right hand, $156 \mathrm{ft} .13-8$ in. 1 left hand, 96 ft .7 1-2 in.

## THROWING WEIGHTS.

56-1b. Weight, thrown with both hands from a $7 . \mathrm{ft}$ circle, without follow- $-40 \mathrm{ft} 6 \mathrm{3}-$.8 in., M. J. McGrath, Montreal, Canada, Sept. 23, 1911.
$56-\mathrm{lb}$. Weight for height- $16 \mathrm{it} .111-4 \mathrm{in} ., \mathrm{P}$. Donovan, Pastime A. C., San Francisco, Cal., Feb. 20. 1914.

## THROWING THE JAVELIN

197 ft .5 1-4 in., James C. Lincoln, Jr., New York A. C., at New York City, Sept. 25, 1920.

## AMERICAN AMATEUR TRACK AND FIELD RECORDS.

In many cases these records are also world's records which have or have not been passed upon by the International Amateur Athletic Federation. For list of officlally sanctioned world's records see International Amateur Athletic Federation list.

## CENTRE OF NEGRO POPULATION, 1920.

The United States Department of Commerce announces that the centre of Negro population as
determined by the Bureau of the Census on the basis of the fourteenth census enumeration, taken Jan. 1, 1920, is iocated in latitude $34^{\circ} 46^{\prime} 52^{\prime \prime}$ and longitude $85^{\circ} 30^{\prime} 48^{\prime \prime}$, being in the extreme northwestern corner of Georgia, in Dade County, about $13 / 4$ miles north-northeast of Rising Fawn town, and that for the first time in the history of the country this centre has moved northeast, being approximately 9.4 miles further east and 19.4 miles further north in 1920 than it was in 1910.

Its former movements have ali been in a southwesteriy directlon. In 1790 it was located 25 miles west-southwest of Petersburg, Dinwlddie County, Virginia, and one hundred years later, in 1890, it had moved southwest 463 miles to a point 15.7 miles
southwest of Lafayette. Walker County, Georgia. the same county in which it was located in 1880

Between 1890 and 1900 it crossed the State line into Alabama, its location in 1900 and again in 1910 being in DeKalb County, Alabama. Its northeastward movement after 1910 has brought it back to the State of Georgia.

The northeasterly movement of the centre or Negro population between 1910 and 1920 is due principaily to the great increase in the Negro population of Massachusetts, Connecticut, New York, New Jersey, Pennsylvania, West Virginia, Ohio, Indiana, and Michigan
The total increase in the Negro population of the United States was 635,368 and it will be noted tiat the increase in the northern states mentioned was 56 per cent. of the total increase.

## 

The 1922 Congressional Election Returns are to be found following Wyoming table.

State Engineer and Surveyor-La Du, Dem., 1,077,314; Cadle, Rep., 1,009,582; Stcinmetz, Soc., Farm-Lab., 291,763; Passage, Proll., 19,852; Bickweat, Soc. Lab., $5,131$.

VOTE ON CONSTITUTIONAL AMENDMENTS, 1922.

New York State voters (1922) rejected the proposed Constitutional amendment, designed to increase the salaries of the Judges of the Court of Appeals, by 891,980 and 572,502 .

By a vote of 819,628 to 554,654 approval was given to the amendinent relating to the return of city bills to the Legisiature. Under the amendment Mayors of cities are required to return special city bills to the elerk of the House from which they
were sent. If the Legislature is not in session, the clerk, and not the Mayor, shall immediately transmit the bilis to the Governor.

Approximately $1,000,000$ registered voters falled to express themscives on the proposed amendments. The proposed amendinent increasing the salarics of Court of Appeals Judges was carried in only two counties, New York and Nassau. The amendment refating to the return of city bils was defeated in twenty-five counties, thirteen of which have citles.

RECISTRATION IN NEW YORK STATE, 1922-1920.
The registration by counties in three years was as follows:

Governor (1922)—Pierce, :Dem., 133,392; Olcott, Rep., 99,155.

Oregon voters, in 1922, adopted the inltiative measure known as the Compulsory School Blll. The blll, sponsored orlginally by the Scottlsh Rite Masons, was taken up by the Ku Klux Klan as its main issue. It is sald the blil will close parochial schools. The purpose of the blll was stated on the offlclal ballot as follows:
"Requilring any parent or guardian or other person having control, charge or custody of a child
over elght and under sixteen years of age, from and after Sept. 1, 1926, to send such child to a publle school during the entire school year, excepting (a) children physically unable: (b) children who have completed the elghth grade; (c) chlldren between the ages of eight and ten llving more than three miles from a public school, except where transportation is furnished; (d) children taught by parent or private teacher.;

## SUMMARY OF ELECTORAL VOTE SINCE 1789.

1789. Previous to 1804, each electo voted for two candidates for President. The one who received the largest number of votes was declared President, and the one who received the next largest number of votes was declared Vice-President. The electoral votes for the first President of the United States were: George. Washington, 69 ; John Adams, of Massachusetts. 34: John Jay, of New York, 9; R. H. Harrison, of Maryland, 6; John Rutledge, of South Carollna, 6; John Hancock, of Massachusetts, 4; George Clinton, of New York, 3 ; Samuei Huntingdon, of Connecticut, 2; John Milton, of Georgia, 2 ; James Armstrong, of Georgia; Benjamin Lincoln, of Massachusetts, and Edward Telfair, of Georgia, 1 vote each. Vacancies (votes not cast), 4. George Washington was chosen Presldent and John Adams Vice-President.
1790. George Washington, Federalist, received 132. votes; John Adams, Federalist, 77; George Clinton, of New York, Republican, 5; Thomas Jefferson, of Virginia, Republican, 4; Aaron Burr, of New York, Republican, 1 vote. Vacancles, 3. George Washington was chosen President and John Adams Vice-President.
1791. John Adams, Federalist, 71; Thomas Jefferson, Republican, 68; Thomas Pinckney of South Carolina, Federalist, 59; Aaron Burr. of New York, Republican, 30; Samuel Adams, of Massachusetts Republican, 15; Oliver Ellsworth, of Connecticut, Independent, 11 ; George Clinton, of New York, Republican, 7; John Jay, of New York, Federalist, 5 ; James Iredell, of North Carolina, Federallst, 3; George Washington, of Virginia: John Henry, of Maryland, and S. Johnson, of North Carollna, ali Federaiists, 2 votes each; Charles Cotesworth Pinckney, of South Carolina, Federaiist, 1 vote. John Adams was chosen President and Thomas Jefferson Vice-President.
1792. Thomas Jefferson, Republican, 73: Aaron Burr. Republlcan, 73; John Adams, Federalist, 65; Charles C. Pinckney, Federalist, 64: John Jay, Federalist, 1 vote. There being a tle vote for Jefferson and Burr, the choice devolved upon the House of Representatives. Jefferson received the votes of ten States, which, being the larges, vote cast for a candidate, elected him Presldent. Burr recelved the votes of four States, which, being the next largest vote, elected him Vlce-President. There were 2 blank votes.
1793. The Constitution of the United States having been amended, the electors at this election voted for a Presid_nt and a Vlce-President, instead of for two candldates for President. The result was as follows: For President, Thomas Jefferson, Republican, 162; Charles C. Pinckney, Federalist, 14. For Vlce-President, George Cilnton, Republlcan, 162 ; Rufus King, of New York, Federalist, 14. Jefferson was chosen Presldent and Cllnton VlcePresident.
1794. For President, James Madison, of Virginia, Republican, 22; Charles C. Pinckney, of South Carolina, Federalist, 47; George Clinton, of New York, Republican, 6. For Vice-Presldent, George Clinton, Republican, 113; Rufus King, of New York, Federalist, 47; John Langdon, of New Hampshlre, 9; James Madison, 3; James Monroe, 3. Vacancy, 1. Madison was chosen President and Ciinton Vice-President.
1795. For President, James Madison, Repubiican, 128; De Witt Clinton, of New. York, Federalist, 89. For Vlce-President, Elbridge Gerry, Repubiican, of Massachusetts, 131; Jared Ingersoli, of Yennsyivanla, Federalist, 86. Vacancy, 1. Madison was chosen President and Gerry Vice-President.
1796. For Presldent, James Monroe, of Virginia, Republican, 183; Rufus King, of New York, Federalist, 34. For Vice-President, Daniel D. Tompkins,
of New York, Republican, 183; John Eager Howard, of Maryland, Federalist, 22 James Ross, of Pennsyivania, 5; John Marshall, of Virginia, 4; Robert G. Harper, of Maryland, 3. Vacancies, 4. Monroe was chosen President and Tompkins Vice-President
1797. For President, James Monroe, of Virginia, Republican, 231; John Q. Adams, of Massachusetts, Republlcan, 1. For Vice-President, Daniel D. Tompklns, Republlcan, 218: Richard Stocktoll, of New Jersey, 8; Daniel Rodney, of Delaware, 4: Robert G. Harper, of Maryland, and Richard Rush, of Pennsylvania, 1 vote each. Vacancies, 3. James Monroe was cliosen President and Daniei D. Tompkins Vice-President.
1798. For Presldent, Andrew Jackson, of Tennessee, Republican, 99; John Quincy Adams, of Masisachusetts, Repubilcan, 84; Henry Clay, of Kentucky, Repubilcan, 37; William H. Crawford, of Georgia, Repubilican, 41. For Vice-President, John C Calhoun, of South Caroiina, Republican, 182; Nathan Sanford, of New York, Republican, 30; Nathaniei Macoll, of North Carolina, Republican, 24; Andrew Jackson, of Tennessee, Republican, 13 ; Martin Van Buren, of New York, Republlcan, 9; Henry Clay, of Kentucky, Repubilcan, 2; Caihoun was chosea Vice-Presldent.
There was no choice in the Electoral College in 182\% for President, and the election was thrown into the House of Representatives, which chose John Quincy Adams for President, he receiving 87 votes, as against 71 for Jackson and 54 for Cravoford.
1799. For Presldent, Andrew Jackson, of Tennessee, Democrat, 178 ; John Quincy Adams, of Massachusetts, National Republican, 83 . For VicePresident, John C. Calhoun, of South Carollna, Demorrat 171; Richard Rush, of Pennsylvanla, National Republican, 83; Wiiliam Smith, of South Carolina, Democrat, 7.
1800. For President, Andrew Jackson, of Tennessee, Democrat, 219; Henry Clay, of Kentucky, National Repubilcan, 49; John Floyd, of Georgla, Independent, 11; William Wirt, of Maryland, AntiMason, 7. PARTY STRENGTH IN EARLY CONGRESSES.
The figures as to party strength in the First to the Twentieth, and also in the Twenty-first to the Thirty-first Congresses are slightly at variance as between different political authorities. The data in the table above are as nearly correct as possible.

## APPORTIONMENT OF CONGRESSIONAL REPRESENTATION.

NOTES ON THE ABOVE TABLE.

Since the taking of the Census of 1920 there have been several efforts in the House of Representatives to legisiate toward an increase in membership, based on the growth of popuiation. Up to the end of 1922 none of these efforts had succeeded. The chief objection to enlarging the House is that it would make that body too large and cumbersome. Membership of House under census of 1850 was increased from 233 to 234 by act of July 30, 1852; membership under census of 1860 was increased from 233 to 241 by act of March 4, 1862; membership under census of 1870 was originaliy fixed at 283, but increased to 292 by act of May 30, 1872.

Representation such as shown in table was assigned after apportionment under censuses, as foilows: (1790) Tenn.; (1800) Ohio; (1810) Ala., Dei., Ind., La., Miss.; (1830) Ark., Mich.; (1840) Cal., Fia., Iowa, Texas, Wis.; (1850) Minn., Orc.; (1860) Neb., Nev.; (1870) Coi.; (1880) Idaho, Mont., S. D, N. D., Wash., Wyo.; (1890) Utah; (1900) Okla.

Ariz. and N. Mex. were included in apportion-
ment under 1910 census, in anticipation of becoming States.

Maine's apportionment of seven members under 1810 census was included in the 20 members originaiiy assigned to Mass. but credited to Maine after it became a State, March 15, 1820.

The ratio under the Constitution was one Representative in Congress for each 30,000 of population. Thereatter, the ratios, as determincd by the decennial censuses, were as follows: 1790 and 1800, onc to each 33,$000 ; 1810$, one in each 35,$000 ; 1820$, one in each 40,000; 1830, one in cach 47,700; 1840, one in cach 70,$680 ; 1850$, onc in each 93,$423 ; 1860$, onc in each 127,$381 ; 1870$, onc in each 131,$425 ; 1880$, one in each 151,911; 1890, one in each 173,901: 1900, one in each 194,182; 1910, one in each 211,877.

Of the thirteen Original States the present quotas are the same as under the Constitution in Connecticut, Delaware, Maryland, and Virginia. The original quotas in the other Original States were as foilows: Gcorgia, 3; Massachusetts, 8: New Hampshire, 3; New Jersey, 4; New York, 6; North Carolina, 5; Pennsyivania, 8; Rhode Island, 1; and South Carollna, 5.

# Well Drilling With a Fordson Tractor Driven Cyclone Drill An Economical, Quick-Moving Outfit 

THE Cyclone well drill using the versatile Fordson tractor as the power unit makes a self-propelled or traction well drill outfit of very low original cost and even lower proportionate upkeep.
Some of the advantages of such an outfit are: (1) Cost is $1-4$ to 1-3 that of a self-contained traction well drill; (2) can be moved at eight to ten miles per hour (about four times the moving speed of a self-contained traction drill); (3) Fordson dealer service throughout the world available for the tractor or power unit; (4) kerosene used for fuel- $\$ 1.00$ to $\$ 1.25$ is the fuel cost; (5) ample power always available for drilling and moving; (6) when the well drill is not busy the tractor can be used for other purposes, such as hauling, plowing, threshing, etc.

Send coupon and I will mail you my wonderful book, "How To Speak in Public'-the most fascinating and helpful book you ever read. Lays bare the secrets of oratory-gives methods of famous orators-tells how to prepare speeches on any subject-how to address lodges, club gatherings, directors' meetings, etc. Introduction by Elbert Hubbard. Appendix by Dr. Orison Swett Marden. Covers entire field of public speaking. "How to Overcome Bashfuluess;" "Nethods of Great Orators:" ""Securing Confidence of Audiences;"' "How to Make Speeches That Win;" "Humor;" "Pathos;" "Climaxes." Contains a wealth of Original Ready-Made Speeches, Toasts, Anecdotes, etc., suitable for any occasion.

## 

Sena coupun. The book will come to you at once, postpaid. Keep it 5 days. Let the book itself convince you that it will give you a wonderful command of English -teach you how to "think on your feet." $\mathrm{N}^{0}$0 matter how old you are: no matter what caused your affliction; no matter how many years you have suffered or how hopeless you believe your case to be, there is hope for you in the Philo Burt Method.

Eminent specialists who have studied and treated spinal diseases and deformities for years \{are first astonished, then convinced and quickly \{become enthusiastic upon finding one success follow another when the Philo Burt Method is \{used. Ask us for the names of happy patrons \{right in your vicinity.

A young woman who was bed-ridden at 26 with spinal tuberculosis after suffering for 20 years, is married, happy and perfectly strong and vigorous at 29.
A boy of 8 was unable to walk or hold his head erect. After a few months every symptom disappeared and he walks daily three miles to school.

A man of 45 , in cruel agony for six years, spent over $\$ 3,000$ in a vain search for relief. Now works every day without the aid of any artificial support.

## FREE-30 Days' Trial

The Philo Burt Method is new and different, not like anything you have tried. It has benefited or cured over 30,000 sufferers from spinal trouble caused by tuberculosis, Pott's disease, infantile paralysis, spinal meningitis, pleurisy, \{rheumatism, injuries. wrong sitting and stand\{ing postures, etc. Treat yourself at home. A 30 -days' trial costs you nothing; no obligations \{ of any lind if it fails.

The Philo Burt Appliance will positively cure any case that is curable and straighten any crooked spine that can be straightened. It gives firmer and more natural support to the spine than any torturing, unsanitary, old style brace \{ made of steel, iron. leather, plaster of paris, \{tc. It is as yielding, soft and comfortable as a corset. Goes on and off like a coat and cannot be detected under the clothing. It re\} lieves and strengthens and has accomplished many amazing cures. Let us send you sworn \{ proof. Send no money. Simplo describe your case fully. Get our liberal offer and helpful $\{$ book on sninal tronitos absolutely free.

## Is Your English a Handicap? This Test Will Tell You

THOUSANDS of people make little mistakes in their everyday English and don't know it. As $A$ result of countless tests, Sherwin Cody found that the average person is only $61 \%$ efficient in the vital points of English. In a five-minute conversation, or in an average one-page letter, five to fifty errors will appear. Try the test shown below, now. See where you stand on these 30 simple questions.

2. How Do You Say-

| ening | EV-en-ing | or | EVE-ning |
| :---: | :---: | :---: | :---: |
| ascertain | AS-cer-tain | or | as-CER-tain |
| hospitable | HOS-pi-ta-ble | or | hos-PIT'-able |
| abdomen | AB-do-men | or | ab-Do-men |
| mayoralty | MAY-or-al-ty | or | may-OR-al-ty |
| am¢nable | a-ME-na-ble | or | a-MEN-able |
| acclimate | AC-cli-mate | or | ac-cli-mate |
| profound | PRO-found | or | pro-FOUND |
| beneficiary | ben-e-fi-shEE-ary | or | ben-e-FISH-ary |
| culinary | CUL-dina-ry | O1' | CU-li-na-ry |

3. Do You Spell It-

| supercede | or | supersede | repEtition | or | repititit |
| :---: | :---: | :---: | :---: | :---: | :---: |
| recEIve | or | reoreve | sepArate | $0 \cdot$ | sep |
| reprETve | or | repriteve | a Comodate | or | aCComMod |
| donkEYS | or | donkIES | trafficing | Or | traffi |
| factorIES | or | factor'Ys | aCSeSible | or | aCCeSSible |

## New Invention Improves Your English in 15 Minutes a Day

Mr. Cody has specialized in English for the past twenty years. His wonderful self-correcting device is simple, fascinating, time-saving, and incomparably efficient. You can write the answers to 50 questions in 15 minutes and correct your work in 5 minutes more. You waste no time in going over the things you already know. Your effoits are automatically concentrated on the mistakes you are in the habit of making, and through constantly being shown the right way you soon acquire the correct habit in place of the incorrect habit. There is no tedious copying. There is no heart-breaking drudgery.
